## CONTENTS

OPERATING STEAM RAILROAD CORPORATIONS		PAGES
Historical Statement, Steam Railroad Corporations.....	Giving dates of incorporation, reorganization, consolidation, merger, lease, and change of name, with location of line, officers, and office.	1-26
Table 101: Balance Sheet June 30, 1914.....		28-35
Table 102: Income and Profit and Loss Statement Year Ended June 30, 1914.....		28-35
Table 103: Miscellaneous Permanent Investments and Marketable Securities.....		36-51
<i>Classified into —</i>		
Securities of system corporations, pledged;	Rate of interest or contractual dividend;	
Securities of system corporations, unpledged;	Date of maturity;	
Advances to system corporations for construction, equipment, and betterments;	Par value of amount held;	
Permanent investments in physical property;	Date of acquisition;	
Other permanent investments in securities, pledged;	Actual money cost;	
Other permanent investments in securities, unpledged;	Book value;	
Marketable securities;	Income accrued during year.	
Each class further classified as stocks, bonds, and miscellaneous securities.		
Table 104: Gross Investment in Road and Equipment.....		52-60
Number miles of railroad owned;	Details of cost of road;	
Number miles of railroad operated;	Details of cost of equipment;	
Total cost to June 30, 1914;	Average cost per mile.	
Table 105 a: Permanent Debt.....		61-68
GENERAL AND MISCELLANEOUS		
<i>Classified into —</i>		
Mortgage bonds;	Dates of nominal issue and maturity;	
Collateral trust bonds;	Amount authorized;	
Debentures, plain bonds, and promissory notes;	Actually outstanding June 30, 1914;	
Income bonds;	Interest:	
Other funded debt.	Rate per centum, dates payable,	
	Accrued during year, paid during year,	
	Matured and unpaid at close of year.	
EQUIPMENT OBLIGATIONS		
Date of issue and term in years;	Interest:	
Number of payments;	Accrued during year,	
Rate per centum of interest;	Paid during year,	
Amount outstanding June 30, 1914;	Matured and unpaid.	
Table 105 b: Permanent Debt Issued or Assumed.....		69
Class of securities issued;	Par value issued during year;	
Rate of interest and date of maturity;	Cash or other consideration;	
Date, by whom, and par value authorized;	Average price realized.	
Table 106 a: Capital Stocks.....		70, 71
Par value of authorized issue;	Amount actually outstanding June 30, 1914;	
Par value of amount actually issued;	Dividends declared and rate.	
Cash realized on amount issued;		
Table 106 b: Capital Stocks Issued.....		71
Securities issued;	Par value issued during year;	
Date, by whom, and par value authorized;	Cash or other consideration, and par value realized.	
Table 107 a: Location and Length of Road within State of New York.....		72-77
<i>Classified into —</i>		
Railroads owned by operating corporation, with branches and spurs;	Termini of railroads;	
Railroads with all capital stock held by operating corporation;	Termini of branches and spurs;	
Railroads operated under lease for definite annual rent;	Length of railroad within State of New York;	
Railroads operated under contract or agreement;	Per cent of railroad within State of New York.	
Railroads operated under trackage rights.		
Table 107 b: Classification of Mileage within State of New York.....		78, 79
Showing the length of railroad, with the portion within the State classified into first, second, and other main tracks, sidings, etc.		
Table 108 a: Equipment in Service.....		80, 81
Showing number and capacities of all classes of cars in service June 30, 1914.		
Table 108 b: Steam Locomotive Equipment in Service.....		82-85
Showing the number, tractive power, weight, and type of locomotives in service June 30, 1914, classified according to age.		
Table 108 c: Electric Locomotive Equipment in Service.....		85
Showing the number, class, type, horsepower, voltage, and tractive capacity of locomotives in service June 30, 1914.

	PAGES
Table 108 d: Summary of Steam and Electric Locomotive Equipment in Service.....	86, 87
Showing the number of various types of locomotives in service, with number assigned to the various classes of service June 30, 1914.	
Table 109: Operating Revenues.....	88, 89
Details of revenues from transportation and other railroad operations, with average number miles operated and average revenues per mile operated.	
Table 110: Operating Expenses.....	90-99
Maintenance of way and structures;	General expenses;
Maintenance of equipment;	Average number miles road operated;
Traffic expenses;	Average expenses per mile operated;
Transportation expenses;	Operating ratio, per cent.
Table 111 a: Operating Statistics.....	100, 101
Analyses of freight and passenger revenues per mile of road, per train-mile, per ton carried, per ton-mile, per passenger-mile; with operating revenues and operating expenses per mile of road, and transportation expenses and direct movement expenses per revenue train-mile.	
Operating expenses: showing revenue train-miles, revenue locomotive-miles, and revenue car-miles per mile of road; with expenses per revenue train-mile for maintenance of equipment all classes of locomotives and cars, maintenance of way and structures, and track labor and materials.	
Freight and passenger service: showing per mile of road, the train-miles, ton-miles, car-miles, and average haul per ton; and train-miles, passenger-miles, car-miles, and average travel per passenger.	
Table 111 b: Commodities.....	102-113
Showing the entire revenue freight operations of each corporation; giving the number of tons of two thousand pounds each originating in the State of New York and on the railroad as a whole, the number of tons received from connecting carriers, and the relation of each commodity to the total number of tons, in per cent; and classified as —	
Products of agriculture;	Manufactures;
Products of animals;	Merchandise;
Products of mines;	Miscellaneous.
Products of forests;	
Table 112: Employees and Their Salaries and Wages.....	114, 115
All classes, nature of employment, number on payroll, and average pay per day.	
Table 113: Grade Crossings and Crossing Protection within State of New York.....	116
With steam railroads, street and electric railroads, streets, avenues, and highways.	
Table 114: Accidents to Persons.....	117
LESSOR STEAM RAILROAD CORPORATIONS	
Table 101 L: Balance Sheet June 30, 1914.....	120-127
Table 102 L: Income and Profit and Loss Statement Year Ended June 30, 1914.....	120-127
Table 103 L: Miscellaneous Permanent Investments and Marketable Securities.....	128
Classified into —	Details shown:
Advances to system corporations;	Rate of interest or contractual dividend;
Permanent investments in physical property;	Date of maturity;
Securities of system corporations, pledged;	Par value of amount held;
Securities of system corporations, unpledged;	Date of acquisition;
Other permanent investments in securities, pledged;	Actual money cost;
Other permanent investments in securities, unpledged;	Book value;
Marketable securities;	Income accrued during year.
Each class further classified as stocks, bonds, and miscellaneous securities.	
Table 104 L a: Gross Investment in Road and Equipment.....	129-131
Details of expenditures for road;	Total cost of road and equipment June 30, 1914.
Details of expenditures for equipment;	
Table 104 L b: Cost of Road and Equipment per Mile Owned.....	132
Number miles of railroad owned, and average cost per mile of both road and equipment.	
Table 105 L a: Permanent Debt.....	133, 134
Showing for the securities outstanding the dates of nominal issue and maturity, the amount authorized and amount actually outstanding June 30, 1914; and for interest: rate per centum and dates payable, amount accrued and amount paid during year, and amount matured and unpaid June 30, 1914.	
Table 105 L b: Permanent Debt Issued or Assumed.....	134
Class of securities issued;	Par value issued during year;
Rate of interest and date of maturity;	Cash or other consideration;
Date, by whom, and par value authorized;	Average price realized.
Table 106 L a: Capital Stocks.....	135, 136
Par value of authorized issue;	Amount actually outstanding June 30, 1914;
Par value of amount actually issued;	Dividends declared and rate.
Cash realized on amount issued;	
Table 106 L b: Capital Stocks Issued.....	136
Table 107 L: Termini, Mileage, and Leasehold Conditions.....	137-141
Name of owning corporation;	Date of expiration of lease;
Termini and length of railroad;	Rent accrued to lessor for year;
Name of present possessor;	Basis on which rent is determined.

## GRAPHIC CHARTS, STEAM RAILROAD CORPORATIONS

Graphic Charts.....	PAGES 144-190
<p><i>Showing for —</i></p> <p>The Pennsylvania Railroad Company, The New York Central and Hudson River Railroad Company, The New York, New Haven and Hartford Railroad Company, The Lake Shore and Michigan Southern Railway Company, Eric Railroad Company, Boston and Maine Railroad, The Delaware, Lackawanna and Western Railroad Company, Lehigh Valley Railroad Company, The Delaware and Hudson Company, The Northern Central Railway Company, The Long Island Railroad Company, The New York, Chicago and Saint Louis Railroad Company, Buffalo, Rochester and Pittsburgh Railway Company, New York, Ontario and Western Railway Company.</p>	<p><i>Illustrating —</i></p> <p>Series A: The total annual income 1900 to 1914 inclusive and its disposition, and miles of road operated; Series B: The sources and disposition of the income for year ended June 30, 1914, in percentage relations; Series C: By months, from July, 1907, to December, 1914, the total operating revenues, total operating expenses, and net operating revenue; With graphs showing relative size of income for each of the fourteen railroads, and the sources and disposition of total income.</p>

## OPERATING ELECTRIC RAILROAD CORPORATIONS

Historical Statement, Electric Railroad Corporations.....	192-207
Giving dates of incorporation, reorganization, consolidation, merger, lease, and change of name, with location of line, officers, and office.	
Table 201: Balance Sheet June 30, 1914.....	210-217
Table 202: Income and Profit and Loss Statement Year Ended June 30, 1914.....	210-217
Table 203: Investments.....	218, 219
<p><i>Classified into —</i></p> <p>1. Bonds of independent corporations; 2. Other funded debt of independent corporations; 3. Stocks of independent corporations; 4. Bonds of system corporations; 5. Other funded debt of system corporations; 6. Stocks of system corporations; 7. Advances to system corporations; 8. Land; 9. Improvements on land; 10. All other investments.</p>	<p><i>Details shown:</i></p> <p>Rate of interest or contractual dividend; Date of maturity; Par value of amount held; Date of acquisition; Actual money cost; Book value; Income accrued during year.</p>
Table 204: Cost of Road and Equipment.....	220-229
<p>Details of fixed capital installed during year; Fixed capital installed since December 31, 1908; Fixed capital December 31, 1908;</p>	<p>Total cost of road and equipment; Miles of railroad owned; Average cost per mile owned.</p>
Table 205 a: Funded Debt.....	230-233
<p><i>Classified into —</i></p> <p>Mortgage bonds; Income bonds; Debentures, plain bonds, and promissory notes; Other funded debt; Equipment obligations.</p>	<p><i>Details shown:</i></p> <p>Dates of nominal issue and maturity; Amount authorized; Actually outstanding June 30, 1914; Interest: Rate per centum, dates payable, Accrued during year, paid during year, Matured and unpaid at close of year.</p>
Table 205 b: Funded Debt Issued or Assumed.....	234
<p>Class of securities issued; Rate of interest and date of maturity; Date, by whom, and par value authorized;</p>	<p>Par value issued during year; Cash or other consideration; Average price realized.</p>
Table 206 a: Capital Stocks.....	235, 236
<p>Par value of authorized issue; Par value of amount actually issued; Cash realized on amount issued;</p>	<p>Amount actually outstanding June 30, 1914; Dividends declared and rate.</p>
Table 206 b: Capital Stocks Issued.....	236
<p>Securities issued; Date, by whom, and par value authorized;</p>	<p>Par value issued during year; Cash or other consideration, and par value realized.</p>
Table 207 a: Location and Length of Road Operated.....	237-243
Classified as to road owned, etc., and termini, and miles located within the State.	
Table 207 b: Classification of Mileage within State of New York.....	244, 245
Showing track mileage owned, portion within the State, and mileage of other tracks to which the corporations named had right of possession for purposes of operation.	
Table 208: Car Equipment.....	246-252
Number, type, and seating capacities of all classes of passenger cars; number and type of all classes of cars; and number and type of car motors and car trucks in service June 30, 1914.	
Table 209: Operating Revenues.....	253-255
Details of revenues from transportation and other railroad operations, average number miles of road operated, with average revenues per mile operated.	
Table 210: Operating Expenses.....	256-265
<p>Maintenance of way and structures; Maintenance of equipment; Traffic expenses;</p>	<p>Transportation expenses; General and miscellaneous expenses; Average expenses per mile operated.</p>

	PAGES
Table 211: Operating Statistics.....	266, 267
Analyses of operating revenues and operating expenses per mile: showing revenue car-miles and revenue car-hours, and car earnings per revenue car-mile; average expense of maintenance of way and structures per-mile of track and per revenue car-mile; and average expense of maintenance of equipment per revenue car-mile.	
Revenues passenger service: showing number of passengers, and revenue car-miles per mile of road and per car-hour; cash and tickets received; average fare; earnings per passenger, per passenger car-mile, and per passenger car-hour.	
Revenues freight and express service: showing number of tons carried, number of ton-miles, and average earnings per ton and per ton-mile for each class of service.	
Table 212: Employees and Their Salaries and Wages.....	268-277
All classes, number employed, and average rate of pay.	
Table 213: Grade Crossings and Crossing Protection within the State of New York.....	278
With steam railroads, and highways outside of cities or villages; and protection.	
Table 214: Accidents to Persons.....	279

## LESSOR ELECTRIC RAILROAD CORPORATIONS

Table 201 L: Balance Sheet June 30, 1914.....	282, 283
Table 202 L: Income and Profit and Loss Statement Year Ended June 30, 1914.....	282, 283
Table 203 L: Investments.....	284
Rate of interest or contractual dividend;	Actual money cost;
Date of maturity;	Book value;
Par value of amount held;	Income accrued during year.
Date of acquisition;	
Table 204 L: Cost of Road and Equipment.....	284
Number miles of road;	Average cost per mile.
Total cost road and equipment;	
Table 205 L a: Funded Debt.....	284
Securities outstanding and amount of mortgage;	Interest:
Dates of authorization and maturity;	Rate per centum, dates payable,
Amount authorized for issue;	Accrued during year, paid during year,
Actually outstanding June 30, 1914;	Matured and unpaid.
Table 205 L b: Funded Debt Issued or Assumed.....	285
Table 206 L a: Capital Stocks.....	285
Par value of authorized issue;	Amount actually outstanding June 30, 1914;
Par value of amount actually issued;	Dividends declared and rate.
Cash realized on amount issued;	
Table 206 L b: Capital Stocks Issued.....	285
Table 207 L: Termini, Mileage, and Leasehold Conditions.....	286
Name of owning corporation;	Date of expiration of lease;
Termini and length of railroad;	Rent accrued to lessor for year;
Name of present possessor;	Basis on which rent is determined.

## EXPRESS COMPANIES

Table 601: Balance Sheet June 30, 1914.....	288
Table 602: Income and Profit and Loss Statement Year Ended June 30, 1914.....	288
Table 603: Investments.....	289-295
Classified into —	Details shown:
Securities of system corporations;	Par value, unpledged and pledged;
Miscellaneous investments in securities;	Book value;
Miscellaneous investments in physical property;	Rate of dividend or interest;
Miscellaneous securities.	Income accrued during year.
Table 604: Cost of Real Property and Equipment.....	295
Table 605: Funded Debt.....	296
Table 606: Capital Stocks.....	296
Shareholders' interests shown under this head.	
Table 607 a: Mileage Operated.....	296
Showing mileage in the State, and also in the United States, ocean lines, and foreign countries.	
Table 607 b: Lines Wholly or Partly in State of New York Over Which Companies Operated June 30, 1914.....	297
Table 608: Inventory Value of Equipment.....	298
Table 609: Operating Revenues.....	298
Showing revenues from transportation and other operations, and cost of express privileges.	
Table 610: Operating Expenses.....	299
Showing details of expenses for maintenance, traffic, transportation, and all general expenses, with the percentage of each to total operating expenses.	

Supplemental Statement, Express Companies .....	PAGES 300, 301
Showing the organization, officers, and principal office; controlled companies; and the number of offices in the United States.	
SLEEPING AND DRAWING ROOM CAR COMPANY	
The Pullman Company .....	304-307
Abstracts from annual report to this Commission, showing the —	
Organization, controlled corporations, officers;	Balance sheet June 30, 1914;
Capital stock and number of stockholders;	Income account year ended June 30, 1914;
Mileage operated, with operating contracts;	Profit and loss account;
Corporations with which the company has contracts for operation in	Stocks and funded debt owned;
this State;	Property and equipment cost;
Operating contracts;	Operating revenues and operating expenses;
Auxiliary operations and other properties;	Operating statistics;
And all classes of employees, with number of each class and average daily compensation.	
STAGE COACH CORPORATIONS	
Financial and Operating Statements .....	310, 311
Also names of corporations which failed to file reports.	
BAGGAGE AND TRANSFER COMPANIES	
Operating and Financial Statements .....	314
Also names of companies which failed to file reports.	
STOCK YARD COMPANY	
Financial Statement .....	316
INSPECTIONS OF STEAM RAILROADS	
Inspections of Steam Railroads .....	318-381
Reports in detail on the condition of the properties of all railroads in this State operated by steam:	
General description of road and tracks;	Rails and fastenings;
Right of way and its condition;	Bridges, culverts, and other openings;
Grades and curvatures;	Crossings and protection;
Ditches and drainage;	Signals and other devices;
Roadbed: cuts and embankments;	Track maintenance;
Surface and alignment;	Stations and other buildings;
Ties and ballast;	Yards and terminals.
Index .....	383-396

STEAM RAILROAD CORPORATIONS

---

STATEMENT GIVING THE ORGANIZATION OF STEAM RAILROAD CORPORATIONS WITHIN THE STATE OF NEW YORK  
JUNE 30, 1914.

---

## STEAM RAILROAD CORPORATIONS

UNDER THE JURISDICTION OF THE PUBLIC SERVICE COMMISSION, SECOND DISTRICT, GIVING DATES OF INCORPORATION, REORGANIZATION, CONSOLIDATION, MERGER, AND CHANGE OF NAME, WITH LOCATION OF LINE, OFFICERS, AND OFFICE.

### OPERATING AND LESSOR CORPORATIONS

In alphabetic order, disregarding the word "The" when part of title. The lessor corporations are printed in small type, immediately following the lessee operating corporation.]

#### **Adirondack and Saint Lawrence Railroad Company**

*Organization:* Incorporated under the railroad law April 19, 1906.

*Location of line:* St. Lawrence county; connects with the Rome, Watertown and Ogdensburg division of the New York Central and Hudson River railroad at DeKalb Junction.

*Officers:* President, Sidney H. March; First Vice-president, Edward E. Thalmann; Secretary and Treasurer, Willoughby J. Kingsbury.

*Main business office:* 41 Broad street, New York city.

#### **Bath and Hammondsport Railroad Company**

*Organization:* Incorporated January 17, 1872, under the railroad law.

*Location of line:* Steuben county; Bath to Hammondsport.

*Officers:* President, F. D. Underwood; Vice-president, G. A. Richardson; Secretary, David Bosman; Treasurer, D. W. Bigoney.

*Main business office:* 50 Church street, New York city.

#### **Boston and Maine Railroad**

*Organization:* Incorporated under authority of a special act of Massachusetts passed March 6, 1841 (ch. 56), constituting the stockholders of the Boston and Portland Railroad Corporation (incorporated as the Andover and Wilmington Railroad by special act passed March 15, 1833 [ch. 109], and name changed by special act passed April 5, 1837 [ch. 113], to Andover and Haverhill Railroad Corporation, and name again changed by special act passed April 3, 1839 [ch. 82], to Boston and Portland Railroad Corporation) stockholders of the Boston and Maine Railroad Company of New Hampshire, incorporated by special act of New Hampshire passed June 27, 1835 (ch. 14), and authorizing the union of said companies under the name of Boston and Maine Railroad Company. By special act of Massachusetts passed March 24, 1843 (ch. 90), the united corporation was authorized to unite with the Maine, New Hampshire and Massachusetts Railroad Corporation, incorporated by special act of Maine passed March 30, 1836 (ch. 179), under the name of Boston and Maine Railroad. (See also L. New Hamp. 1841, ch. 6; L. Maine 1843, ch. 108.)

At various times the following companies have been united with the Boston and Maine Railroad: Boston and Maine Railroad Extension Company (see L. Mass. 1845, ch. 159; L. New Hamp. 1841, ch. 290; L. Maine 1846, ch. 340); Stoneham Branch (see L. Mass. 1851, ch. 139); Danvers Railroad (see L. Mass. 1855, ch. 42; L. Mass. 1876, ch. 126); Newburyport City Railroad (see L. Mass. 1869, ch. 398); West Amesbury Branch Railroad (see L. Mass. 1876, ch. 7); Newburyport Railroad (see L. Mass. 1876, ch. 124); Eastern Railroad, Eastern Railroad in New Hampshire, and the Portsmouth, Great Falls

and Conway Railroad (see L. Mass. 1888, ch. 250; amended L. Mass. 1890, ch. 185; also L. New Hamp. 1887, ch. 304; L. Maine 1887, ch. 268); Dover and Winnepisiogee Railroad (see L. New Hamp. 1841, ch. 6); Portland, Saco and Portsmouth Railroad, Portland and Rochester Railroad, Kennebunk and Kennebunkport Railroad (see L. Maine 1887, ch. 268); Central Massachusetts Railroad (see L. Mass. 1900, ch. 424); Orchard Beach Railroad (see L. Maine 1881, ch. 64; L. Maine 1887, ch. 268). See general act as to leased corporations organized under laws of Maine, New Hampshire, Massachusetts, or Vermont, L. Mass. 1891, ch. 308; and purchase of shares in leased lines generally, L. Mass. 1898, ch. 194. By special act of Massachusetts (L. 1909, ch. 519), permission is granted to the Boston Railroad Holding Company to acquire stock in the Boston and Maine Railroad, and to dispose of same (L. 1914 ch. 766). The line within the State of New York is held under lease from the Fitchburg Railroad Company and Troy and Bennington Railroad Company. The lease of the Fitchburg railroad is confirmed by special act of Massachusetts passed June 30, 1900 (ch. 426).

*Location of line within State:* The main line extends from Boston, Mass., and Portland, Maine, to Troy and Rotterdam Junction, with branches to Holyoke and Springfield, Mass., and various points in Maine, New Hampshire, Vermont, and Massachusetts. That portion of the main line to Boston within the State (Fitchburg Railroad Company, lessor) extends from Rotterdam Junction to Vermont-State line east of Petersburg Junction. Between Mechanicville and Crescent a single track of The Delaware and Hudson Company's road and a single track of the Boston and Maine Railroad are operated as a double-track railroad.

*Officers:* President, Morris McDonald; Vice-president, William J. Hobbs; Corporation Clerk, Arthur B. Nichols; Treasurer, Herbert E. Fisher.

*Main business office:* North Station, Boston, Mass.

#### *Lessor Companies:*

**Fitchburg Railroad Company:** Incorporated by special act of Massachusetts approved March 3, 1842 (ch. 84). In 1846 the road was extended into Boston. Leased to Boston and Maine Railroad June 30, 1900. At the dates stated it purchased: March 24, 1860, the Peterborough and Shirley Railroad Company, incorporated by special act of Massachusetts passed March 22, 1845 (ch. 181), and also incorporated in New Hampshire; April 22, 1885, Ashburnham Railroad Company, incorporated by special act of Massachusetts passed May 5, 1871 (ch. 251), reorganized May 3, 1878, as The Ashburnham Railroad Company, under act approved April 13, 1878 (ch. 139); April 15, 1887, The Hoosac Tunnel Dock and Elevator Company, chartered under special act of Massachusetts approved April 29, 1879 (ch. 277); June 1, 1887, Boston, Hoosac Tunnel and Western Railway Company (November 1, 1892, consolidated under the laws of New York and Massachusetts with Fitchburg Railroad Company), incorporated February 16, 1877, under the railroad law, and consolidated June 12, 1880, with a company of the same name incorporated in Vermont under authority of an act approved November 26, 1878 (ch. 188); (see consolidation with Mohawk and Lake Erie Rail-

way Company, Hoosac Tunnel and Saratoga Railway Company, and Utica and Syracuse Air Line Railway Company, filed April 11, 1881; June 1, 1887, Troy, Saratoga and Northern Railroad Company (consolidated with the Fitchburg Railroad Company November 1, 1892), incorporated September 2, 1886, as a consolidation of Hoosac Tunnel and Saratoga Railway Company, incorporated February 23, 1881, and Saratoga Lake Railway Company, incorporated August 13, 1880, under the railroad law (see as to latter company L. 1881, ch. 67).

In addition to the above consolidations, at the dates stated the following companies were consolidated with the Fitchburg Railroad Company: February 1, 1887, Troy and Greenfield Railroad and Hoosac Tunnel (under authority of an act of Massachusetts passed June 5, 1885 [ch. 297]), chartered by special act of Massachusetts under the name Troy and Greenfield Railroad Company, approved May 10, 1848 (ch. 307); June 25, 1887 (under the laws of New York and Massachusetts), Troy and Boston Rail Road Company, incorporated November 22, 1849, under the railroad law. (See Troy and Bennington Railroad Company; also L. New York 1851, ch. 533, authorizing lease of part of Western Vermont Railroad; and L. 1859, ch. 109, the erection of freight depot and construction of track in Troy; also L. 1867, ch. 793, repealed; L. 1869, ch. 607, of which section 2 as to four cent fare "until the completion of the Hoosick Tunnel" was amended, L. 1876, ch. 351); October 1, 1890, Cheshire Railroad Company (see L. Mass. 1887, ch. 389, and L. New Hamp. 1887, ch. 257), incorporated under special act of New Hampshire approved December 27, 1844 (ch. 192), and consolidated in August, 1845, with the Winchendon Railroad Corporation, incorporated by special act of Massachusetts approved March 13, 1845 (ch. 115); October 1, 1892, The Monadnock Railroad Company, incorporated by special act of New Hampshire passed December 13, 1848 (ch. 773), was leased to the Cheshire Railroad Company (consolidated as above), and its capital stock was purchased by the Fitchburg Railroad Company under authority of Mass. 1891 (ch. 48).

August 25, 1894, the following railroads were consolidated with the Fitchburg Railroad Company under the laws of New Hampshire and Massachusetts: Brookline and Pepperell Railroad Company, incorporated June 30, 1891, under the laws of Massachusetts, Brookline Railroad Company incorporated by special act of New Hampshire approved March 31, 1891 (ch. 233), and the Brookline and Milford Railroad Company, incorporated by special act of New Hampshire approved February 22, 1893 (ch. 165); July 1, 1885, Boston, Barre and Gardner Railroad Corporation, incorporated April 24, 1877, under the name of Barre and Worcester Railroad Company, under ch. 276, laws of 1847 of Massachusetts, name changed as above under ch. 55, laws of 1849 of Massachusetts, was merged into Fitchburg Railroad Company; January 1, 1874, the Vermont and Massachusetts Railroad Company was leased to Fitchburg Railroad Company for a term of 999 years.

*Officers:* President, Moses Williams; Secretary and Treasurer, George O. Foster.

*Corporate office:* 152 Causeway street, Boston, Mass.

**Troy and Bennington Rail Road Company:** Incorporated May 27, 1851, under the railroad law. Leased in 1872 to Troy and Boston Railroad Company, and lease assumed by Boston and Maine Railroad.

*Officers:* President, William F. Gurley; Vice-president, H. C. Shields; Secretary and Treasurer, Paul Cook.

*Corporate office:* 514 Fulton street, Troy, N. Y.

### **Buffalo and Susquehanna Railroad Company Buffalo and Susquehanna Railroad Corporation**

*Organization:* Buffalo and Susquehanna Railroad Company was incorporated October 7, 1891, under the laws of Pennsylvania. September 25, 1893, the following companies, incorporated under the same act at the dates stated, were consolidated and merged with Buffalo and Susquehanna Railroad Company under the name of that company: Sinnemahoning Valley Railroad Company, May 8, 1889; Susquehanna Railroad Company, August 3, 1891; Cherry Springs Railroad Company, July 14, 1893; Cross Fork Railroad Company, April 12, 1893. September 29, 1894, Coudersport and Wellsboro Railroad Company, incorporated January 2, 1892, under the laws of Pennsylvania, was merged; November 26 1895, State Line Railroad Company, incorporated November 10, 1890, under the laws of Pennsylvania, was merged. April 1, 1901, Northern Susquehanna Railroad Company, incorporated January 31, 1900, Susquehanna and New York Railroad Company, a reorganization of Addison and Pennsylvania Railroad Company

(property and franchises in Pennsylvania), incorporated June 14, 1898, and Galeton and Eastern Railroad Company, a reorganization of New York and North Pennsylvania Railway Company, incorporated June 14, 1898, were merged into Buffalo and Susquehanna Railroad Company. June 27, 1905, Susquehanna and Southern Railroad Company, incorporated August 12, 1902; February 11, 1907, Southwestern Du Bois Railroad Company, incorporated June 5, 1905; and April 3, 1907, Plumville Railroad Company, incorporated April 27, 1905, were merged into Buffalo and Susquehanna Railroad Company.

July 1, 1907, Buffalo and Susquehanna Railroad Company leased its properties and assigned its interest in the properties of its two leased lines to Buffalo and Susquehanna Railway Company, which thereafter operated these properties in conjunction with its own line as one system. H. I. Miller having been appointed receiver of Buffalo and Susquehanna Railway Company May 2, 1910, was appointed receiver of Buffalo and Susquehanna Railroad Company by the Court of Common Pleas of Potter County, Penna., July 23, 1910. Thereafter the property of the two corporations was independently operated by the receiver, separate accounts being kept for each.

Effective January 1, 1914, the property of Buffalo and Susquehanna Railroad Company was sold under foreclosure to Buffalo and Susquehanna Railroad Corporation, incorporated under the laws of Pennsylvania December 31, 1913, as a reorganization of Buffalo and Susquehanna Railroad Company. Certificate of authority to transact business in New York state was filed in the office of the Secretary of State June 27, 1914.

*Location of line within State:* The company's only line in New York is that of its lessor corporations, Wellsville, Coudersport and Pine Creek Railroad Company (New York-Pennsylvania state line near Genesee, Penna., to Wellsville, N. Y.); and Addison and Susquehanna Railroad Company (New York-Pennsylvania state line near Nichols, N. Y., to Addison, N. Y.).

*Officers:* Chairman of Board, H. I. Miller; President, E. R. Darlow; Vice-president, Edward B. Smith; Secretary and Treasurer, F. E. Hall.

*Main business office:* 980 Ellicott Square, Buffalo, N. Y.

#### *Lessor Companies:*

**Addison and Susquehanna Railroad Company:** Incorporated June 22, 1898, as a reorganization, having acquired by purchase at judicial sale incident to foreclosure the properties and franchises in New York state of Addison and Pennsylvania Railway Company. Addison and Pennsylvania Railway Company (New York and Pennsylvania) was formed by consolidation July 23, 1887, of Addison and Pennsylvania Railway Company of New York, incorporated July 15, 1887, as a reorganization of The Addison and Northern Pennsylvania Railway Company, incorporated as The Addison and Northern Pennsylvania Railway June 19, 1882, and consolidated under above name January 27, 1883, with Addison and Northern Pennsylvania Railway (Pennsylvania corporation). August 16, 1892, Addison and Pennsylvania Railway Company of New York was reorganized as Addison and Pennsylvania Railway Company, and September 28, 1892, was consolidated with Addison and Pennsylvania Railway Company (Pennsylvania corporation) and Addison and Pennsylvania Railway Company of Pennsylvania, incorporated under the laws of that State.

*Officers and office same as operating company.*

**Wellsville, Coudersport and Pine Creek Rail Road Company:** Incorporated November 14, 1881, under the railroad law.

*Officers and office same as operating company.*

### **Buffalo and Susquehanna Railway Company**

*Organization:* Buffalo and Susquehanna Railway Company was incorporated September 20, 1902, under the railroad law. July 1, 1907, it leased the properties of Buffalo and Susquehanna Railroad Company, and these lines were operated as part of its system until July 23, 1910. H. I. Miller was appointed receiver of Buffalo and Susquehanna Railway Company May 2, 1910, by the Supreme Court

of the State of New York; and July 23, 1910, was also appointed receiver of Buffalo and Susquehanna Railroad Company. Thereafter, and to June 30, 1911, the line of Buffalo and Susquehanna Railway Company has been independently operated.

*Location of line:* Main line from junction with Lake Shore and Michigan Southern railroad near Blasdell, N. Y., to Wellsville. Branch from Springville, N. Y., to Springville Junction (Buffalo, Rochester and Pittsburgh).

*Corporate officers:* President, E. R. Darlow; Vice-president, A. C. Goodyear; Secretary and Treasurer, F. A. Lehr.

*Officers of Receiver's organization:* Receiver, H. I. Miller; Treasurer, F. E. Hall.

*Main business office:* 980 Ellicott Square, Buffalo, N. Y.

#### **Buffalo, Attica and Arcade Railroad Company**

*Organization:* Incorporated October 15, 1894, for the purpose of maintaining and operating the railroad of The Attica and Freedom Railroad Company, incorporated November 9, 1891, under the railroad law.

*Location of line:* Wyoming county; Attica to Arcade (connection with Buffalo and Susquehanna railway).

*Officers:* President, W. L. Kann; Vice-president, W. R. Brown; Secretary and Treasurer, R. G. Kann.

*Main business office:* Main street, Arcade, N. Y.

#### **Buffalo Creek Railroad**

The switching road of The Buffalo Creek Railroad Company is operated by Erie Railroad Company (successor to New York, Lake Erie and Western Railroad Company) and Lehigh Valley Railroad Company as lessees under above name.

*Organization:* Incorporated January 25, 1869, under the railroad law. Lease dated December 31, 1889.

*Location of line:* Buffalo. Main line: N. Y. C. & H. R. Junction (East Buffalo) to Peck Slip; Prenatt Street branch, Elk street to Delaware, Lackawanna and Western right of way; Beach branch, Beach and Island Junction to Outer Lot 48; Trackage, Outer Lot 48 to United States Government lands (Pennsylvania railroad).

*Corporate officers:* President, E. T. Statesbury; Vice-president, F. H. Silvernail; Secretary and Treasurer, E. A. Albright.

*Operating officers:* Executive Committee, F. D. Underwood, E. B. Thomas; Treasurer, D. W. Bigoney.

*Main business office:* 50 Church street, New York city.

#### **The Buffalo Creek Transfer Railroad Company**

[Operated by Frank Williams & Co.]

*Organization:* Incorporated June 23, 1881, under the railroad law.

*Location of line:* County of Erie. A series of switching tracks located on what is known as the "Island," in the city of Buffalo, extending from the tracks operated by Buffalo Creek Railroad and The Pennsylvania Railroad Company to Frank Williams & Co.'s coal yard. The total amount of tracks is 1.10 miles.

*Officers:* President, John R. Williams; Secretary, Arthur H. Williams; Treasurer, Agnes P. McKibbin.

*Main business office:* 812 Prudential Building, Church and Pearl streets, Buffalo, N. Y.

#### **Buffalo, Rochester and Pittsburgh Railway Company**

*Organization:* Buffalo, Rochester and Pittsburgh Railway Company was incorporated under the railroad law August 18, 1881; was consolidated November 28, 1881, with Rochester and Pittsburgh Railroad Company, a reorganization January 29, 1881, of The Rochester and State Line Railway Company, incorporated under the railroad law October 6, 1869; Rochester and Charlotte Railroad Company, incorporated April 21, 1881, under

the railroad law; Great Valley and Bradford Railroad Company, incorporated July 25, 1881, under the railroad law; Bradford and State Line Railroad Company, a Pennsylvania corporation, and The Pittsburgh and New York Railroad Company, a Pennsylvania corporation, together forming Rochester and Pittsburgh Railroad Company, which last named company was reorganized October 28, 1885, as Buffalo, Rochester and Pittsburgh Railroad Company. This company was consolidated March 11, 1887, with The Pittsburgh and State Line Railroad Company, incorporated October 28, 1885, under the laws of Pennsylvania, forming the Buffalo, Rochester and Pittsburgh Railway Company. December 5, 1899, The Perry Railroad Company, incorporated May 9, 1882, under the railroad law, and The Lincoln Park and Charlotte Railroad Company, incorporated December 1, 1888, under the railroad law, surrendered capital stock and were merged with Buffalo, Rochester and Pittsburgh Railway Company. The Johnsonburg and Bradford Railroad Company, organized November 15, 1887, under the laws of Pennsylvania, was purchased and the corporation dissolved August 5, 1907. Silver Lake Railway Company, incorporated July 11, 1870, under the railroad law, as Rochester and Pine Creek Railroad Company, name changed by special act passed March 22, 1877 (ch. 57), to Silver Lake Railway Company, and reorganized under same name pursuant to sale June 1, 1886, under foreclosure, was merged September 29, 1910, with the Buffalo, Rochester and Pittsburgh Railway Company.

*Location of line within State:* Main line extends from Rochester and Buffalo to a junction at Ashford, thence to Salamanca, Bradford, Pittsburgh, and New Castle, Penna., with branches to Charlotte and Perry.

*Officers:* President, William T. Noonan; Vice-president, Adrian Iselin, jr.; Secretary, Ernest Iselin; Treasurer, John F. Dinkey.

*Main business office:* 155 Main street west, Rochester, N. Y.

#### **Carthage and Copenhagen Railroad Company**

*Organization:* Incorporated April 10, 1906, under the railroad law.

*Location of line:* Jefferson and Lewis counties.

*Officers:* President, Seth J. Gifford; Vice-president, W. J. Twining; Secretary, W. B. Van Allen; Treasurer, Henry L. Grant.

*Main business office:* Carthage, N. Y.

#### **Catskill and Tannersville Railway Company**

*Organization:* Incorporated September 14, 1892, under the railroad law.

*Location of line:* Otis Summit, where it connects with Otis Elevating railway, to Tannersville.

*Officers:* President, A. V. S. Olcott; Secretary, W. Y. Hawley; Treasurer, T. E. Jones.

*Main business office:* 70 Water street, Catskill, N. Y.

#### **Catskill Mountain Railway Company**

*Organization:* Incorporated under the railroad law July 2, 1885, as a reorganization of Catskill Mountain Railroad Company, incorporated September 16, 1880.

*Location of line:* Extends from Catskill Landing to Palenville, with branch to Cairo.

*Officers:* President, George H. Beach; Vice-president, W. I. Jennings; Secretary, T. E. Jones; Treasurer, Orrin Day.

*Main business office:* 70 Water street, Catskill, N. Y.

#### **Lessor Company:**

**The Cairo Railroad Company:** Incorporated April 10, 1884, under the railroad law.

*Officers:* President, A. V. S. Olcott; Vice-president, J. D. Hasbrouck; Secretary and Treasurer, W. J. Hughes.

*Corporate office:* 77 Water street, Catskill, N. Y.

**Central New England Railway Company**

**Organization:** Incorporated January 12, 1899, under the railroad law, as a reorganization of Philadelphia, Reading and New England Railroad Company, incorporated July 28, 1892, as a consolidation of Poughkeepsie Bridge and Railroad Company, incorporated as the Poughkeepsie Bridge Company by special act passed May 31, 1871 (ch. 897), and reorganized July 14, 1892, under the above name; and Central New England and Western Railroad Company, incorporated July 23, 1889, as a consolidation of Hudson Connecting Railroad Company, incorporated under the railroad law January 28, 1887, and The Poughkeepsie and Connecticut Railroad Company, incorporated September 14, 1888. The following companies organized under the railroad law were consolidated June 25, 1907, with Central New England Railway Company: The Poughkeepsie Bridge Railroad Company, incorporated June 5, 1888; The Dutchess County Railroad Company, incorporated April 21, 1890; Newburgh, Dutchess and Connecticut Railroad Company, incorporated January 15, 1877, as a reorganization of the Dutchess and Columbia Railroad Company, incorporated September 4, 1866; and The Poughkeepsie and Eastern Railway Company, incorporated April 11, 1893, as a reorganization of The Poughkeepsie, Hartford and Boston Railroad Company, incorporated May 15, 1875.

This reorganization was pursuant to sale under foreclosure of a mortgage executed by The Poughkeepsie, Hartford and Boston Railroad Company to John P. Adrianee as trustee. The Poughkeepsie, Hartford and Boston Railroad Company was reorganized January 22, 1887, as The New York and Massachusetts Railway Company, and the latter company was consolidated April 26, 1887, with The Hudson River and Boston Railway Company, incorporated July 14, 1885, under the name of The New York and Massachusetts Railway Company. The above reorganization of The Poughkeepsie, Hartford and Boston Railroad Company was pursuant to sale under foreclosure of mortgage executed by The Poughkeepsie, Hartford and Boston Railroad Company to Edward Ellsworth as trustee, dated September 1, 1875. The Poughkeepsie, Hartford and Boston Railroad Company was incorporated May 15, 1875, as a reorganization of The Poughkeepsie and Eastern Railroad Company. This latter company was incorporated by special act passed April 13, 1866 (ch. 456). By special act passed June 2, 1883 (ch. 514), The Poughkeepsie, Hartford and Boston Railroad Company was authorized to merge and consolidate its capital stock, etc., with the capital stock, etc., "of such other railroad company or companies in either of the States of Massachusetts or Connecticut or in both of those States as shall by the construction of a line of railroad from Boston . . . to the New York state line or by completion . . . hereafter form a continuous line of railroad with the said railroad of the said The Poughkeepsie, Hartford and Boston Railroad Company, as at present constructed".

**Location of line within State:** The main line extends from Campbell Hall via Poughkeepsie bridge and Poughkeepsie to Hartford, Conn., via New York, New Haven and Hartford railroad, with main line branches Poughkeepsie to Hopewell Junction, Fishkill Landing via Hopewell Junction to State Line, Rhinecliff to Boston Corners.

**Officers:** President, Howard Elliott; Vice-President, J. H. Hustis; Secretary, A. E. Clark; Treasurer, A. S. May.

**Main business office:** Corner Water and Meadow streets, New Haven, Conn.

**Lessor Company:**

**Hartford and Connecticut Western Railroad Company:** Incorporated June 30, 1881, in accordance with a resolution (123) of the General Assembly of Connecticut passed March 31, 1881, "Incorporating the first mortgage bondholders of the Connecti-

cut Western Railroad Company as the Hartford and Connecticut Western Railroad Company". By a further resolution passed March 10, 1882 (No. 84, section 3, as amended by resolution No. 197, approved April 19, 1882), permission was given to Hartford and Connecticut Western Railroad Company to purchase the Rhinebeck and Connecticut railroad (Rhinebeck and Connecticut Railroad Company, amended certificate), incorporated June 29, 1870 (amended certificate filed January 15, 1872), under the railroad law; a similar enabling act, conferring the powers of a New York corporation, was passed by the legislature of New York, L. 1882, ch. 339. The road of this company was leased to the Central New England and Western Railroad Company August 30, 1889, and February 4, 1890.

**Officers:** President, Howard Elliott; Vice-president, J. H. Hustis; Secretary, A. E. Clark; Treasurer, A. S. May.

**Corporate office:** Corner Meadow and Water streets, New Haven, Conn.

**Central New York Southern Railroad Corporation**

**Organization:** Incorporated March 28, 1914, as a reorganization of The New York, Auburn and Lansing Railroad Company, incorporated March 16, 1900, under the railroad law. January 6, 1912, John W. Dwight and Roger B. Williams, jr., were appointed receivers of the last named company.

**Location of line:** Cayuga and Tompkins counties; extends from Auburn to Ithaca (Renwick Junction).

**Officers:** President, R. B. Williams, jr.; First Vice-president, H. W. Fitz; Secretary, H. A. Clark; Treasurer, T. P. Clancy.

**Main business office:** 109 North Tioga street, Ithaca.

**The Champlain and Saint Lawrence Railroad Company**

[Operated by Grand Trunk Railway Company of Canada.]

**Organization:** Incorporated March 6, 1851, under the railroad law.

**Location of line:** The line extends from Rouses Point, where it connects with The Delaware and Hudson Company's railroad, to Lacolle Junction (International boundary line), 1.21 miles single track, where it joins the Grand Trunk railway, of which it forms a part.

**Officers:** President, E. J. Chamberlin; Vice-president, W. W. Wainwright; Secretary and Treasurer, Frank Scott.

**Main business office:** McGill street, Montreal, Canada.

**The Connecting Terminal Rail Road Company**

**Organization:** Incorporated June 7, 1881, under the railroad law.

**Location of line:** It consists of a series of switching tracks located on what is known as the "Island," in Buffalo, and extends from a connection with the track of The Pennsylvania Railroad Company to the grain elevator and freight houses owned by The Connecting Terminal Rail Road Company.

**Officers:** President, George D. Dixon; Vice-president, James C. Evans; Secretary, Frank Staley; Treasurer, P. R. Perkins.

**Main business office:** 1000 Commercial Trust Building, Philadelphia, Penna.

**Cooperstown and Charlotte Valley Rail-road Company**

**Organization:** Incorporated April 30, 1888, under the name of The Cooperstown and Charlotte Valley Railroad Company, under the railroad law, and consolidated April 13, 1891, under the above name, with The West Davenport Rail-Road Company, incorporated February 25, 1891, under the railroad law. The line, including that of its lessor, is operated by The Delaware and Hudson Company, which owns the entire capital stock of Cooperstown and Charlotte Valley Rail-road Company, and 2094 out of 3074 shares of Cooperstown and Susquehanna Valley Rail Road Company. Revenues and expenses, traffic statistics, etc., are separately recorded, and are not included in the figures reported by The Delaware and Hudson Company.

*Location of line:* Extends from Cooperstown to Davenport Center via Charlotte Crossing.

*Officers:* President, L. F. Loree; First Vice-president, C. S. Sims; Secretary, F. M. Olyphant; Treasurer, C. A. Walker.

*Main business office:* 32 Nassau street, New York city.

*Lessor Company:*

**Cooperstown and Susquehanna Valley Rail Road Company:** Incorporated February 25, 1865, under the railroad law. See L. 1865, ch. 758 (section 13 amended L. 1875, ch. 204; and 1882, ch. 57; also sections 6, 9, 10, and 13 amended L. 1888, ch. 483); 1866, ch. 787; 1867, ch. 422; 1869, ch. 519; 1878, ch. 78; and 1885, ch. 452.

*Officers:* Vice-president, W. H. Williams; Assistant Secretary and Assistant Treasurer, F. M. Olyphant.

*Corporate office:* Cooperstown, N. Y.

**Cranberry Lake Railroad Company**

*Organization:* Incorporated under the railroad law February 24, 1902.

*Location of line:* St. Lawrence county.

*Officers:* President, Herbert C. Rich; Vice-president, H. Clarence Rich; Secretary, C. A. Rich; Treasurer, L. G. Willson.

*Main business office:* Wanakena, N. Y.

**Dansville and Mount Morris Railroad Company**

*Organization:* Incorporated October 21, 1891, as a reorganization of Erie and Genesee Valley Railroad Company, incorporated January 24, 1868, under the railroad law. A. S. Murray, jr., appointed receiver June 6 and 8, 1894.

*Location of line:* Livingston county; main line extends from Dansville to Mount Morris town line; trackage to the Erie depot at Mount Morris (leased by Avon, Genesee and Mount Morris Railroad Company to Erie Railroad Company, and sub-leased to this company).

*Officers:* President, Charles C. Hoge; Vice-president, George E. Kent; Secretary, Treasurer, and Receiver, A. S. Murray, jr.

*Main business office:* Dansville, N. Y.

**The Delaware and Hudson Company**

*Organization:* Incorporated as The President, Managers and Company of the Delaware and Hudson Canal Company by special act passed April 23, 1823 (ch. 238). The powers of a railroad corporation were conferred upon the company by special act passed May 9, 1867 (ch. 841). See also special act of Pennsylvania passed April 5, 1826 (ch. 67, L. 1825-26). Name changed to The Delaware and Hudson Company by special act passed April 28, 1899 (ch. 469). See also various special acts of Pennsylvania: namely, act approved March 13, 1823, ch. 61; April 1, 1825, ch. 78, L. 1824-25; March 12, 1859, ch. 123; April 11, 1861, ch. 275; March 24, 1870, ch. 533; May 12, 1871, ch. 701; and May 18, 1871, ch. 830.

The following companies were merged with The Delaware and Hudson Company at the dates named: The Adirondack Railway Company November 5, 1902: incorporated as The Adirondack Company October 24, 1863, in pursuance of special act passed April 27, 1863 (ch. 236), authorizing the incorporation of a railroad from some point in the county of Saratoga, up and along the valley of the upper Hudson into the wilderness in the northern part of the State; this company was reorganized July 7, 1882, as the Adirondack Railway Company; The Adirondack Company (original company) was authorized to purchase, take, and hold lands to the amount of 1,000,000 acres in the said wilderness in addition to the lands it was authorized to take under the railroad law; to convert and prepare for market the natural products of the forest; to mine and prepare for market the iron and other

ores and minerals upon its lands, and to transport, sell, and dispose of the same. The Schenectady and Duaneburgh Railroad Company August 4, 1903: organized under the railroad law July 15, 1873. The New York and Canada Railroad Company May 23, 1908: incorporated under the railroad law March 16, 1872, and consolidated April 8, 1873, with The Whitehall and Plattsburgh Railroad Company, incorporated under the railroad law April 11, 1853. The Montreal and Plattsburgh Railroad Company: a reorganization August 22, 1868, of The Plattsburgh and Montreal Railroad Company, incorporated under the railroad law March 28, 1850. The Cherry Valley, Sharon and Albany Railroad Company July 17, 1908: incorporated under special act passed April 10, 1860 (ch. 255), under the name of Cherry Valley and Sprakers Railroad Company, which name was changed by special act passed April 15, 1864 (ch. 199), to Cherry Valley and Mohawk River Railroad Company, and name again changed by special act passed April 10, 1869 (ch. 147), to the Cherry Valley, Sharon and Albany Railroad Company.

*Location of lines within State:* The main line extends from Binghamton via Albany, Troy, Schenectady, and Saratoga Springs to Rouses Point, with connection to Montreal; and main line branches to Scranton and Wilkes-Barre, Penna., Rutland, Lake George, and Lake Placid.

*Officers:* President, L. F. Loree; Vice-president, Charles A. Peabody; Secretary, F. M. Olyphant; Treasurer, C. A. Walker.

*Main business office:* 32 Nassau street, New York city.

*Lessor Companies:*

**The Albany and Susquehanna Rail Road Company:** Incorporated April 19, 1851, under the railroad law: see L. 1852, ch. 113 (section 9 amended ch. 373) and ch. 195 (section 5 amended L. 1888, ch. 481); 1856, ch. 64 (sections 1, 2, 3, 4, and 6 amended and act partially repealed L. 1857, ch. 401, section 1 of amending act repealed L. 1867, ch. 747, section 2); 1857, ch. 398; 1859, ch. 384; 1863, ch. 18 (section 1 amended L. 1864, ch. 402) and ch. 70; 1865, ch. 145; 1867, chs. 164, 747, and 932; 1871, ch. 298, section 1; 1877, ch. 18; 1879, chs. 423 and 431; 1882, ch. 55; and 1889, ch. 478. Leased February 24, 1870, and March 7, 1876, to Delaware and Hudson Canal Company.

*Officers:* President, Arthur W. Butler; Vice-president, George Wilwood Murray; Secretary and Treasurer, William L. M. Phelps.

*Corporate office:* 58 North Pearl street, Albany, N. Y.

**The Albany and Vermont Rail Road Company:** Incorporated October 6, 1859 (see L. 1863, ch. 11), as a reorganization of The Albany, Vermont and Canada Rail Road Company, incorporated November 7, 1856, as a reorganization of Albany Northern Rail Road, incorporated February 20, 1851, under the railroad law (see L. 1854, ch. 63). Leased to The Delaware and Hudson Company May 1, 1871.

*Officers:* President, Edward C. Gale; Vice-president, LeGrand C. Cramer; Secretary and Treasurer, S. S. Bullions.

*Corporate office:* 17 First street, Troy, N. Y.

**The Chateaugay and Lake Placid Railway Company:** Incorporated July 24, 1903, as a consolidation of Chateaugay Railroad Company, incorporated May 15, 1879 (see L. 1887, ch. 448). The Chateaugay Railway Company, incorporated July 13, 1887, and Saranac and Lake Placid Rail Road Company, incorporated June 13, 1890, all under the railroad law. Leased to The Delaware and Hudson Company July 1, 1905.

*Officers:* President, Smith M. Weed; First Vice-president, L. F. Loree; Secretary, F. M. Olyphant; Treasurer, C. A. Walker.

*Corporate office:* 32 Nassau street, New York city.

**The Rensselaer and Saratoga Railroad Company:** Incorporated under special act passed April 14, 1832 (ch. 131; sections 9 and 10 construed L. 1836, ch. 118, section 14; section 12 repealed L. 1886, ch. 493, section 1 paragraph 7). See also L. 1836, ch. 118; 1838, ch. 280 (amended L. 1842 ch. 232); 1853, ch. 462 (repealed L. 1909 ch. 201); 1864, ch. 107; 1872, ch. 269, section 9 (amended L. 1895, ch. 502; and 1906, ch. 290). Leased to The Delaware and Hudson Company May 1, 1871. Succeeded to the property and franchises of The Glens Falls Rail Road Company, incorporated July 26, 1867, under the railroad law (see L. 1866, ch. 626; 1867, chs. 919 and 953 [amended L. 1868, chs. 32 and 317]; 1868, ch. 334; and 1873, ch. 87). The Saratoga and Whitehall Rail Road Company (certificate of surrender of capital stock to The Rensselaer and Saratoga Railroad Company filed

October 22, 1868), incorporated June 7, 1855, as a reorganization of The Saratoga and Washington Rail-Road Company, incorporated by special act passed May 2, 1834 (ch. 249, sections 1-19, 21-26; section 12 repealed L. 1886, ch. 593, section 1 paragraph 9). See L. 1840, ch. 109; 1844, ch. 267; 1847, ch. 58; 1848, ch. 74; and 1850, ch. 149; Rutland and Washington Railroad Company, incorporated by special act of Vermont approved November 13, 1847 (No. 17). See No. 60 of 1849, and No. 252 of 1892.

*Officers:* President, LeGrand C. Cramer; Vice-president, Edward C. Gale; Secretary and Treasurer, S. S. Bullions.

*Corporate office:* 17 First street, Troy, N. Y.

**Saratoga and Schenectady Railroad Company:** Incorporated under special act passed February 16, 1831 (ch. 43, amended ch. 144. See L. 1838, ch. 282; section 12 repealed L. 1886, ch. 593, section 1 paragraph 6). Leased to The Delaware and Hudson Company May 1, 1871.

*Officers:* President, LeGrand C. Cramer; Vice-president, Edward C. Gale; Secretary and Treasurer, S. S. Bullions.

*Corporate office:* 17 First street, Troy, N. Y.

**The Ticonderoga Railroad Company:** Incorporated December 13, 1889, under the railroad law. See L. 1890, ch. 4. Leased to Delaware and Hudson Canal Company August 13, 1890.

*Officers:* President, P. W. Clement; Secretary, H. G. Smith; Treasurer, C. H. Harrison.

*Corporate office:* Clement National Bank Building, Rutland, Vt.

**West Troy and Green Island Railroad Company:** Incorporated October 15, 1870, under the railroad law. The secretary of this corporation, which is stated to be a proprietary company of The Rensselaer and Saratoga Railroad Company, reports that the road was built by "and is now owned" by The Rensselaer and Saratoga Railroad Company, and is included in the lease of that corporation's property to Delaware and Hudson Canal Company, May 1, 1871.

*Officers:* President, LeGrand C. Cramer; Vice-president, Edward C. Gale; Secretary and Treasurer, S. S. Bullions.

*Corporate office:* 17 First street, Troy, N. Y.

#### Delaware and Northern Railroad Company

**Organization:** Incorporated under the railroad law October 14, 1911, as a reorganization of Delaware and Eastern Railroad Company, incorporated November 14, 1904, under the railroad law. The line of Delaware and Eastern Railroad Company was leased to Schenectady and Margaretville Railroad Company by lease dated May 13, 1907, and was operated after consolidation by Delaware and Eastern Railway Company, incorporated May 17, 1907, by consolidation of Schenectady and Margaretville Railroad Company, incorporated under the railroad law July 28, 1906, and Hancock and East Branch Railroad Company, incorporated under the railroad law July 12, 1906.

**Location of line:** Delaware county; main line extends from Arkville, where it connects with the Ulster and Delaware railroad, to East Branch, where it connects with the New York, Ontario and Western railway.

*Officers:* President, A. M. Moreland; First Vice-president, William H. Seif; Secretary and Treasurer, C. C. Taylor.

*Main business office:* Margaretville, N. Y.

#### The Delaware, Lackawanna and Western Railroad Company

**Organization:** Originally The Liggett's Gap Railroad Company, incorporated by special act of Pennsylvania approved April 7, 1832 (ch. 134, sec. 12); name changed to The Lackawanna and Western Railroad Company by special act of Pennsylvania approved April 14, 1851 (ch. 338); and consolidated March 11, 1853, under special act of Pennsylvania approved March 11, 1853 (ch. 123), with Delaware and Cobb's Gap Railroad Company, incorporated by special act of Pennsylvania approved April 7, 1849 (ch. 470, see L. 1851), under the name of The Delaware, Lackawanna and Western Railroad Company. The following have since been consolidated with and merged into the company: Keyser Valley Railroad Company, incorporated under special act of Pennsylvania

approved March 13, 1865 (ch. 322), December 27, 1865; Nanticoke Coal and Iron Company, incorporated under special act of Pennsylvania approved April 13, 1864 (ch. 345), August 12, 1870; The Lackawanna and Bloomsburg Railroad Company, incorporated under special act of Pennsylvania approved April 5, 1852 (ch. 391), June 17, 1873; The Hanover and Newport Railroad Company, incorporated under railroad laws of Pennsylvania (act of May 16, 1861, and supplements), July 1, 1909; Bangor and Portland Railway Company, incorporated under same act and supplements, July 1, 1909.

**Location of lines within State:** The main line extends from Hoboken, N. J., to Buffalo via Scranton and Binghamton, with main line branches to Syracuse and Oswego, Utica, Ithaca, and Black Rock (the latter a switching track around Buffalo). That portion of the main line from the Pennsylvania-State line near Conklin to Buffalo is within the State, except 6.38 miles west of Waverly which are in Pennsylvania. The line from Binghamton to Buffalo is leased from The New York, Lackawanna and Western Railway Company.

*Officers:* President, W. H. Truesdale; Vice-president, E. E. Loomis; Secretary and Treasurer, A. D. Chambers.

*Main business office:* 90 West street, New York city.

#### Lessor Companies:

**The Cayuga and Susquehanna Railroad Company:** Incorporated under special act passed April 18, 1843 (ch. 221; amended L. 1846, ch. 180; 1847, ch. 150; and 1851, ch. 103; section 13 repealed L. 1886, ch. 593, section 1, paragraph 18. See L. 1850, ch. 231; and 1859, ch. 94), being a reorganization of Ithaca and Owego Rail Road Company, incorporated by special act passed January 28, 1828 (ch. 21; amended L. 1832, ch. 75, 1834, ch. 261. See L. 1838, ch. 295; amended L. 1840, ch. 344). Leased to The Delaware, Lackawanna and Western Railroad Company April 21, 1855.

*Officers:* President, M. Taylor Pyne; Vice-president, Samuel Sloan; Secretary and Treasurer, Henry R. Taylor.

*Corporate office:* 30 Pine street, New York city.

**Erie and Central New York Railroad Company:** Incorporated under the name of The Utica, Chenango and Cortland Rail Road Company April 9, 1870, under the railroad law (see L. 1872, ch. 351; 1874, ch. 438, authorizing purchase of Central Valley Rail Road Company, incorporated March 30, 1870, amended certificate June 7, 1871, in towns of Southville and Greene: 1881, ch. 83; and 1883, ch. 183). By special act passed May 10, 1883 (ch. 366), the name was changed to Erie and Central New York Railway Company (see L. 1888, ch. 205; and 1893, ch. 512), and the company was reorganized May 24, 1902, as Erie and Central New York Railroad Company. Leased to The Delaware, Lackawanna and Western Railroad Company January 1, 1913.

*Officers:* President, W. H. Truesdale; Vice-president, E. E. Loomis; Secretary and Treasurer, A. D. Chambers.

*Corporate office:* 90 West street, New York city.

**The Greene Railroad Company:** Incorporated October 18, 1869, under the railroad law.

*Officers:* President, W. H. Truesdale; Vice-President, E. E. Loomis; Secretary and Treasurer, A. D. Chambers.

*Corporate office:* 90 West street, New York city.

**The New York, Lackawanna and Western Railway Company:** Incorporated August 26, 1880, under the railroad law (amended certificates filed February 17, 1881, and April 13, 1881). See L. 1882, ch. 86; 1884, ch. 478; 1885, ch. 254; and 1905, ch. 547. The New York, Lackawanna and Western Railway of Pennsylvania was merged August 9, 1883, with The New York, Lackawanna and Western Railway Company [New York]. Leased to The Delaware, Lackawanna and Western Railroad Company October 2, 1882.

*Officers:* President, W. H. Truesdale; Vice-president, P. J. Flynn; Secretary and Treasurer, A. D. Chambers.

*Corporate office:* 90 West street, New York city.

**The Oswego and Syracuse Rail Road Company:** Incorporated under special act passed April 29, 1839 (ch. 270). See L. 1841, ch. 17; 1845, ch. 320; 1847, ch. 65 and ch. 270; section 5 repealed by railroad law; 1853, ch. 205; 1860, ch. 452; and 1864, ch. 188. Leased to The Delaware, Lackawanna and Western Railroad Company February 13, 1869.

*Officers:* President, W. H. Truesdale; Vice-president, W. S. Jenney; Secretary and Treasurer, A. D. Chambers.

*Corporate office:* 90 West street, New York city.

**Syracuse, Binghamton and New York Railroad Company:** Incorporated August 13, 1851, under the railroad law, as Syracuse and Binghamton Railroad Company; reorganized October 18, 1856, as Syracuse and Southern Railroad Company; name changed as above April 30, 1857, by special act passed March 31, 1857 (ch. 214); section 5 amended L. 1858, ch. 274, section 2, to Syracuse, Binghamton and New York Railroad Company. The Union Rail Road Company, incorporated December 4, 1856, under the railroad law, was merged pursuant to special act passed April 16, 1858 (ch. 274), authorizing the purchase of the road of the company. See L. 1836, ch. 423; 1848, ch. 203; 1852, ch. 114; and 1853, ch. 205. Leased to The Delaware, Lackawanna and Western Railroad Company September 26, 1912.

*Officers:* President, W. H. Truesdale; Vice-president, E. E. Loomis; Secretary and Treasurer, A. D. Chambers.

*Corporate office:* 90 West street, New York city.

**Utica, Chenango and Susquehanna Valley Rail Way Company:** Incorporated January 11, 1866, under the railroad law. Leased to The Delaware, Lackawanna and Western Railroad Company April 9, 1870.

*Officers:* President, W. H. Truesdale; Vice-president, E. E. Loomis; Secretary and Treasurer, A. D. Chambers.

*Corporate office:* 90 West street, New York city.

**The Valley Railroad Company:** Incorporated March 4, 1869, under the railroad law. Leased to The Delaware, Lackawanna and Western Railroad Company April 15, 1869.

*Officers:* President, W. H. Truesdale; Vice-president, E. E. Loomis; Secretary and Treasurer, A. D. Chambers.

*Corporate office:* 90 West street, New York city.

#### **Dexter and Northern Railroad Company**

*Organization:* Incorporated July 23, 1908, under the railroad law (amended certificate filed October 19, 1908).

*Location of line:* Jefferson county; extends from Dexter to Dexter Junction.

*Officers:* President, C. W. Campbell; Vice-president, J. A. Outtersen; Secretary and Treasurer, J. E. Campbell.

*Main business office:* Dexter, N. Y.

#### **The Dunkirk, Allegheny Valley and Pittsburgh Railroad Company**

[Operated by The Lake Shore and Michigan Southern Railway Company for The New York Central and Hudson River Railroad Company, lessee.]

*Organization:* Incorporated December 31, 1872, as a consolidation of the Warren and Venango Railroad Company, organized under the laws of Pennsylvania, and Dunkirk, Warren and Pittsburgh Railway Company, incorporated May 14, 1870, by consolidation of the Dunkirk, Warren and Pittsburgh Railroad Company, incorporated March 14, 1867, under the railroad law of New York, and Conewango Valley Railroad Company, organized under the laws of Pennsylvania. By order dated October 29, 1914 (amended December 12, 1914), the Commission approved a consolidation agreement dated April 29, 1914, between The New York Central and Hudson River Railroad Company, The Lake Shore and Michigan Southern Railway Company; Geneva, Corning and Southern Railroad Company; The Terminal Railway of Buffalo; The Dunkirk, Allegheny Valley and Pittsburgh Railroad Company, and other companies whose property is entirely outside of New York state, under the name of The New York Central Railroad Company.

*Location of line:* Extends from Dunkirk to Titusville, Penna., with connection for Oil City and Pittsburgh. That portion of the line within the State extends from Dunkirk to the Pennsylvania-State line near Fentonville.

*Officers:* President, Alfred H. Smith; Vice-president, William K. Vanderbilt, jr.; Secretary, Dwight W. Pardee; Treasurer, Edward L. Rossiter.

*Main business office:* Corner West Third street and St. Clair avenue, Cleveland, Ohio.

#### **Erie Railroad Company**

*Organization:* Original corporation, New York and Erie Railroad Company, organized under special act passed April 24, 1832 (L. 1832, ch. 224); reorganized May 1,

1861, and June 25, 1861, as Erie Railway Company, under special acts passed April 4, 1860 (L. 1860, ch. 160), and April 2, 1861 (L. 1861, ch. 119); reorganized as New York, Lake Erie and Western Railroad Company, upon foreclosure of Erie Railway Company second consolidated mortgage and sale thereunder, April 27, 1878 (see act passed May 11, 1874: L. 1874, ch. 430, as amended by act passed June 2, 1876: L. 1876, ch. 446); and again reorganized November 14, 1895, as Erie Railroad Company, upon foreclosure of New York, Lake Erie and Western Railroad Company second consolidated mortgage and sale thereunder November 2, 1895. The Buffalo Branch of Erie Railway Company was incorporated June 13, 1861, as a reorganization of The Buffalo and New York City Rail Road Company, incorporated by special act of New York passed May 14, 1845 (ch. 336: section 2 amended L. 1849, ch. 353; 1850, ch. 5; 1851, ch. 77: section 5 amended L. 1852, ch. 162; section 13 repealed L. 1886, ch. 593, section 1, paragraph 20; see also L. 1851, ch. 76 and ch. 117), under the name of The Attica and Hornellsville Railroad Company, new name as above assumed April 18, 1851 (L. 1851, ch. 77), and consolidated December 12, 1862, with Erie Railway Company under authority of special act of New York passed March 28, 1862 (ch. 66, sections 4 and 5).

At the dates named the following companies were merged with Erie Railroad Company: April 11, 1896, Buffalo, New York and Erie Railroad Company, incorporated October 20, 1857, under the railroad law (see L. 1858, ch. 29); November 19, 1895, The Buffalo and South Western Railroad Company, incorporated December 11, 1877, as a reorganization of Buffalo and Jamestown Railroad Company, incorporated March 23, 1872, under the railroad law; November 2, 1895, Newburgh and New York Rail Road, incorporated April 8, 1864, under the railroad law; April 11, 1896, The Suspension Bridge and Erie Junction Railroad Company, incorporated October 16, 1868, under the railroad law.

*Location of lines within State:* Main line extends from Jersey City, N. J., to Marion, O., thence by Chicago and Erie railroad to Chicago, with main line branches Hornell to Buffalo, Salamanca to Dunkirk, Youngstown to Cleveland, and Marion, O., to Cincinnati. The original main line of the Erie railroad extended from Piermont to Dunkirk.

*Officers:* President, F. D. Underwood; Vice-president, G. F. Brownell; Secretary, David Bosman; Treasurer, D. W. Bigoney.

*Main business office:* 50 Church street, New York city.

#### *Lessor Companies:*

**Avon, Geneseo and Mount Morris Railroad Company:** Incorporated February 21, 1860, as a reorganization of The Genesee Valley Rail Road Company, incorporated July 22, 1857, under the railroad law. See L. 1863, ch. 249; and L. 1871, ch. 394. Leased to Erie Railway Company in 1872. Erie Railroad Company sub-leases 2.35 miles of this company's line in Mount Morris, to Dansville and Mount Morris Railroad Company.

*Officers:* President, Josiah Antstie; Vice-president, H. P. Mills; Secretary and Treasurer, H. E. Brown.

*Corporate office:* Mount Morris, N. Y.

**Buffalo, Bradford and Pittsburgh Railroad Company:** Incorporated March 22, 1859, as a consolidation, pursuant to act passed April 6, 1858 (ch. 102; see also L. 1860, ch. 40), and an act of Pennsylvania entitled "Supplement to an act incorporating the Buffalo and Bradford Railroad Company approved by the General Assembly of Pennsylvania May 20, 1857" (No. 663), of Buffalo and Pittsburgh Rail Road Company, incorporated October 13, 1852, under the railroad law (see L. 1853, ch. 256; amended L. 1853, ch. 351; and 1850 ch. 348), and the Buffalo and Bradford Rail Road Company, incorporated under the laws of Pennsylvania. Controlled by Erie Railroad Company through stock ownership.

*Officers:* President, C. P. Eckels; Vice-president, F. D. Underwood; Secretary, David Bosman; Treasurer, D. W. Bigoney.

*Corporate office:* Bradford, Penna.

**Conesus Lake Railway Company:** Incorporated May 10, 1882, under the railroad law (see L. 1883, ch. 362). Controlled by Erie Railroad Company through stock ownership.

*Officers:* President, F. D. Underwood; Vice-president, G. A. Richardson; Secretary, David Bosman; Treasurer, D. W. Bigoney.  
*Corporate office:* Avon, N. Y.

**Elmira State Line Railroad Company:** Incorporated April 24, 1872 (amended certificate filed September 25, 1876) under the railroad law. Leased to Hugh J. Jewett as Receiver November 1, 1876.

*Officers:* President, F. D. Underwood; Vice-president, George F. Brownell; Secretary, David Bosman; Treasurer, D. W. Bigoney.

*Corporate office:* Elmira, N. Y.

**Erie and Black Rock Railroad Company:** Incorporated March 28, 1882, under the railroad law. Controlled by Erie Railroad Company through stock ownership.

*Officers:* President, F. D. Underwood; Vice-president, G. F. Brownell; Secretary, David Bosman; Treasurer, D. W. Bigoney.

*Corporate office:* Erie Depot, Exchange and Michigan streets, Buffalo, N. Y.

**Erie and Jersey Railroad Company:** Incorporated June 5, 1905, under the railroad law. June 26, 1907, Suffern Railroad Company, incorporated February 8, 1907, under the railroad law, was merged with Erie and Jersey Railroad Company. The capital stock of Erie and Jersey Railroad Company is all owned by Erie Terminals Railroad Company, whose entire capital stock is in turn owned by Erie Railroad Company. The road of Erie and Jersey Railroad Company from Graham to Highland Mills is leased to Erie Terminals Railroad Company and operated under agreement by Erie Railroad Company.

*Officers:* President, F. D. Underwood; Vice-president, G. F. Brownell; Secretary, David Bosman; Treasurer, D. W. Bigoney.

*Corporate office:* 50 Church street, New York city.

**Erie Terminals Railroad Company:** Incorporated February 8, 1907, under the laws of New Jersey. Its entire capital stock is owned by Erie Railroad Company. Its road, 1.27 miles in Edgemere, N. J., is leased to and operated by New York, Susquehanna and Western Railroad Company. It also leases from Erie and Jersey Railroad Company the road owned by that corporation, and by agreement grants Erie Railroad Company the right to operate.

*Officers:* President, F. D. Underwood; Vice-president, G. F. Brownell; Secretary, David Bosman; Treasurer, D. W. Bigoney.

*Corporate office:* Foot Pavonia avenue, Jersey City, N. J.

**Genesee River Railroad Company:** Incorporated August 23, 1905, under the railroad law. Erie Railroad Company owns entire capital stock.

*Officers:* President, F. D. Underwood; Vice-president, G. F. Brownell; Secretary, David Bosman; Treasurer, D. W. Bigoney.

*Corporate office:* 50 Church street, New York city.

**Goshen and Deckertown Railway Company:** Incorporated March 18, 1868, under the railroad law (see L. 1868, ch. 384). Leased to Erie Railway Company January 18, 1872.

*Officers:* President, G. W. Murray; Vice-president, Secretary, and Treasurer, C. S. Young.

*Corporate office:* Main street, Goshen, N. Y.

**Middletown and Crawford Railroad Company:** Incorporated August 3, 1868, under the railroad law. Supplemental certificates filed September 28, 1889, and September 26, 1890. See L. 1868, ch. 783: section 11 repealed L. 1886, ch. 593; section 1 paragraph 43, L. 1871, ch. 298, section 4; and ch. 453. Leased to New York, Lake Erie and Western Railroad Company January 30, 1882.

*Officers:* President, F. D. Underwood; Vice-president, G. F. Brownell; Secretary, David Bosman; Treasurer, D. W. Bigoney.

*Corporate office:* 50 Church street, New York city.

**Montgomery and Erie Railway Company:** Incorporated January 2, 1866, under the railroad law. See L. 1867, ch. 387, section 10 part, and 14 repealed L. 1886, ch. 593, section 1 paragraph 42. Leased to Erie Railway Company December 16, 1871: to New York, Lake Erie and Western Railroad Company April 12, 1881, and April 22, 1886.

*Officers:* President, G. W. Murray; Vice-president, J. Booth; Secretary and Treasurer, C. S. Young.

*Corporate office:* Main street, Goshen, N. Y.

**Northern Railroad Company of New Jersey:** Incorporated by special act of New Jersey passed February 9, 1854, ch. 33 (see L. 1855, ch. 27; 1856, ch. 18; 1858, ch. 89; 1860, chs. 4 and 91; 1862, ch. 1; 1865, chapter 225; and 1866, ch. 41). See special act of New York passed April 15, 1858 (ch. 253), authorizing extension to Piermont. Leased to Erie Railroad Company June 1, 1899.

*Officers:* President, F. D. Underwood; Vice-president, G. A. Richardson; Secretary, David Bosman; Treasurer, D. W. Bigoney.

*Corporate office:* Englewood, N. J.

**Nyack and Northern Railroad Company:** Incorporated November 25, 1868, under the railroad law. Its property was sold under foreclosure in 1894 to Nyack and Southern Railroad Company, which leases its railroad and other property to Northern Railroad Company of New Jersey, the latter sub-leasing to Erie Railroad Company. Nyack and Northern Railroad Company stock of \$74,800 has never been canceled, and the company now stands with no property but with obligations in the form of \$750,000 matured bonds and \$31,326 deferred credit items. The bonds are owned by Northern Railroad Company of New Jersey and are pledged under its general mortgage. Nyack and Northern Railroad Company does not have income from any source.

*Officers:* President, F. D. Underwood; Vice-president, G. F. Brownell; Secretary, David Bosman; Treasurer, D. W. Bigoney.

*Corporate office:* Nyack, N. Y.

**Nyack and Southern Railroad Company:** Incorporated June 12, 1879, under the railroad law. Acquired by purchase at foreclosure sale the road of Nyack and Northern Railroad Company, which it leases to its proprietary corporation, Northern Railroad Company of New Jersey. The latter in turn leases it to Erie Railroad Company.

*Officers:* President, F. D. Underwood; Vice-president, G. F. Brownell; Secretary, David Bosman; Treasurer, D. W. Bigoney.

*Corporate office:* 50 Church street, New York city.

**The Nypano Railroad Company:** Incorporated March 23, 1896 (in New York), as a reorganization under the laws of New York, Pennsylvania, and Ohio of The New York, Pennsylvania & Ohio Rail Road Company, a corporation of the States of New York, Ohio, and Pennsylvania, incorporated April 15, 1880 (in New York), as a reorganization of The Atlantic and Great Western Railroad Company, a corporation of the States of New York, Pennsylvania, and Ohio, incorporated (in New York) November 20, 1871, as a consolidation of The Atlantic and Great Western Railway Company of Ohio, and The Atlantic and Great Western Railway Company of New York and Pennsylvania, incorporated (in New York) November 7, 1871, as a consolidation of The Atlantic and Great Western Railway Company of Pennsylvania, a Pennsylvania corporation, and The Atlantic and Great Western Railway Company of New York, incorporated October 3, 1871, as a reorganization of The Atlantic and Great Western Railway Company, incorporated October 3, 1865, as a consolidation pursuant to L. 1865, ch. 614, of The Atlantic and Great Western Rail Road Company in New York, incorporated May 18, 1859 (see L. 1860, ch. 234), The Buffalo Extension of The Atlantic and Great Western Railway Company, incorporated May 19, 1864, The Atlantic and Great Western Railroad Company of Pennsylvania (a Pennsylvania corporation), and The Atlantic and Great Western Railroad Company, a corporation of the State of Ohio.

*Officers:* President, F. D. Underwood; Vice-president, G. F. Brownell; Secretary, David Bosman; Treasurer, D. W. Bigoney.

*Corporate office:* 121 Euclid avenue, Cleveland, Ohio.

**Rochester and Genesee Valley Rail Road:** Incorporated July 2, 1851, under the railroad law. Leased to Buffalo, New York and Erie Railroad Company July 1, 1871.

*Officers:* President, C. H. Bahecock; Vice-president, D. D. Sully; Secretary and Treasurer, Josiah Austin.

*Corporate office:* 220 North Water street, Rochester, N. Y.

**The Union Rail Road Company:** Incorporated January 20, 1851, under the railroad law. Leased September 10, 1852, to New York and Erie Railroad Company.

*Officers:* President, William Barbour; Secretary and Treasurer, Robert I. Hopper.

*Corporate office:* 66 Broadway, New York city; 150 Market street, Paterson, N. J.

#### Fonda, Johnstown and Gloversville Railroad Company

*Organization:* Incorporated under the name of The Fonda, Johnstown and Gloversville Rail Road Company January 17, 1867, under the railroad law (articles legalized and confirmed by special act passed April 24, 1867, ch. 716); and was consolidated December 23, 1902, with Amsterdam Street Rail Road Company, incorporated February 5, 1873, and with Cayadutta Electric Railroad Company, incorporated February 27, 1892, under the name of Fonda, Johnstown and Gloversville Railroad Company. Cayadutta Electric Railroad Company was consolidated December 13, 1893, with The Gloversville Street Electric Railroad Company, incorporated under the railroad law January 19, 1891.

*Location of line operated by steam:* Montgomery and Fulton counties; main line extends from Fonda to Northville.

For location of line operated by electricity see Electric Railroad Corporations.

*Officers:* President, J. Ledlie Hees; First Vice-president, Gustav Levor; Secretary, Frank Burton; Treasurer, Lyman K. Brown.

*Main business office:* 102 West Fulton street, Gloversville, N. Y.

*Lessor Company:*

**The Gloversville and Broadalbin Railroad Company:** Incorporated April 25, 1895, under the railroad law. Leased to Fonda, Johnstown and Gloversville Railroad Company August 1, 1895.

*Officers:* President, W. H. Collins; Vice-president, W. H. Dailey; Secretary and Treasurer, L. K. Brown.

*Corporate office:* 102 West Fulton street, Gloversville, N. Y.

**Fulton Chain Railway Company**

*Organization:* Incorporated February 25, 1902, as a reorganization of Fulton Chain Railroad Company, incorporated January 20, 1896, under the railroad law.

*Location of line:* Herkimer county; extends from Fulton Chain to Old Forge.

*Officers:* President, William Seward Webb; Vice-president, William Pierson Hamilton; Secretary, Charles E. Snyder; Treasurer, Thomas J. Regan.

*Main business office:* Grand Central Terminal, New York city.

**Genesee and Wyoming Railroad Company**

*Organization:* Incorporated March 24, 1899, as a reorganization of Genesee and Wyoming Valley Railroad Company, incorporated April 27, 1891, under the railroad law. July 30, 1912, the Commission approved a lease of Halite and Northern railroad to Genesee and Wyoming Railroad Company.

*Location of line:* Livingston county; extends from Pittsburgh and Lehigh Junction, where it connects with the Lehigh Valley railroad and Buffalo, Rochester and Pittsburgh railway, to Retsof; and from Retsof Junction, where it connects with the Pennsylvania railroad, via Retsof to Greigsville, where it connects with the Delaware, Lackawanna and Western railroad. The Halite and Northern railroad is operated as the "South Branch," from Halite to Coverdale.

*Officers:* President, Mortimer B. Fuller; Vice-president, M. M. Belding, jr.; Secretary and Treasurer, W. H. Barnard.

*Main business office:* Scranton, Penna.

*Lessor Company:*

**Halite and Northern Railroad Company:** Incorporated November 29, 1910, under the railroad law (operated under agreement dated July 29, 1912).

*Officers:* President, William A. Hazard; Vice-president and Treasurer, Edward W. Brown; Secretary, Duncan A. Holmes.

*Corporate office:* 29 Broadway, New York city.

**Glenfield and Western Railroad Company**

*Organization:* Incorporated August 6, 1901, under the railroad law.

*Location of line:* Lewis county; extends from Glenfield, where it connects with the Rome, Watertown and Ogdensburg division of the New York Central and Hudson River railroad, to Monteola.

*Officers:* President, G. H. P. Gould; Secretary and Treasurer, James E. Campbell.

*Main business office:* Dexter, N. Y.

**Grand Trunk Railway Company of Canada**

See The Champlain and Saint Lawrence Railroad Company and The United States and Canada Railroad Company.

**Greenwich and Johnsonville Railway Company**

*Organization:* Incorporated October 13, 1866, as The Union Village and Johnsonville Railroad Company, under

the railroad law; name changed March 26, 1874, to Greenwich and Johnsonville Railroad Company; reorganized September 10, 1879, as Greenwich and Johnsonville Railway Company, and consolidated August 12, 1903, with Battenkill Railroad, incorporated December 15, 1902, under the railroad law. The Salem branch, Greenwich to Greenwich Junction, was sold to The Delaware and Hudson Company May 17, 1911, and is operated by that company.

*Location of line:* Rensselaer and Washington counties; main line extends from Johnsonville, where it connects with Boston and Maine Railroad, to Schuylerville.

*Officers:* President, I. C. Blandy; Vice-president, C. S. Sims; Secretary, F. M. Olyphant; Treasurer, C. A. Walker.

*Main business office:* Greenwich, N. Y.

**The Island Railroad Company**

*Organization:* Incorporated September 1, 1883, under the railroad law.

Returns not tabulated. The capital stock of this corporation is owned by Mutual Terminal Company of Buffalo, and the entire stock of Mutual Terminal Company of Buffalo is owned or controlled by The New York Central and Hudson River Railroad Company; The Delaware, Lackawanna and Western Railroad Company, Lehigh Valley Railroad Company, and Erie Railroad Company, each of which owns \$15,000 par value; the bonds of this corporation are also owned by the above four stockholders in varying amounts. The respondent states that it has right of possession to several tracks ranging from 900 to 1200 feet in length, used exclusively as warehouse tracks, on which cars are placed for loading and unloading; the property being held under grant for 990 years. The balance sheet as of June 30, 1913, shows the cost of road to have been \$199,000, with capital stock outstanding of \$200,000, leaving a corporate deficit of \$1000. No dividends have ever been declared on capital stock. No income or profit and loss account is shown, and the report filed contains no further information of importance.

*Location of line:* Erie county; consists of a series of switching tracks extending from a connection with the Buffalo Creek railroad near Ganson street, Buffalo, to the Mutual Transit Company's warehouse and the Mutual Terminal Company's elevator.

*Officers:* President, Charles M. Heald; Secretary and Treasurer, F. H. Silvernail.

*Main business office:* 1300 Chamber of Commerce, Buffalo, N. Y.

**Jamestown, Westfield and Northwestern Railroad Company**

*Organization:* Incorporated December 4, 1913, as a reorganization of Jamestown, Chautauqua and Lake Erie Railroad Company, incorporated September 25, 1900, under the railroad law, and of Jamestown and Chautauqua Railway Company, incorporated December 30, 1898, as a reorganization of The Jamestown and Lake Erie Railway Company, incorporated October 11, 1894, as a reorganization of Chautauqua Lake Railway Company, incorporated July 29, 1885, and consolidated under the same name December 29, 1886, with The Jamestown Short Line Railway Company, incorporated May 25, 1886, under the railroad law, and Westfield and Chautauqua Railroad Company, incorporated July 8, 1886, under the railroad law and an act to facilitate the construction of narrow gauge railroads. George Bullock was appointed receiver of Jamestown, Chautauqua and Lake Erie Railroad Company November 14, 1911, and the road was operated by him until November 7, 1913. It was operated by the purchasers at the foreclosure sale until December 8, 1913, at which date the reorganized corporation took possession.

Returns not tabulated. For year ended June 30, 1914, company reported as a steam railroad corporation. Its report was received too late for figures from it to be included in the tabulated abstracts. June 30, 1914, it was changing its motive power from steam to electricity, and has since completed the electrification of its road, so that its report for 1914-15 will be made as an electric railroad corporation. The important features of its report may be summarized as follows: Capitalization,

\$200,000 par value common stock; no bonded debt. An inventory and appraisal of the physical property acquired by the reorganized company is in process, meanwhile it is put at the nominal figure of \$200,000. The balance sheet June 30, 1914, shows —

<i>Assets Side:</i>	
Road and equipment.....	\$200,374
Working assets and accrued income.....	32,395

*Location of line:* Chautauqua county; extends from Jamestown to Westfield.

*Officers:* President, A. N. Broadhead; First Vice-president and Treasurer, S. B. Broadhead; Secretary, W. R. Reynolds.

*Main business office:* Fairmount avenue and West 8th street, Jamestown, N. Y.

#### **Kanona and Prattsburgh Railroad Company**

*Organization:* Incorporated under the railroad law April 13, 1897, as a reorganization of Kanona and Prattsburgh Railroad Company, incorporated April 2, 1886.

*Location of line:* Steuben county; extends from Kanona, where it connects with the Rochester division of Erie railroad, to Prattsburgh.

*Officers:* President, Jacob C. Klinek; Vice-president, Bertram Cruger; Secretary and Treasurer, J. Walter Benson.

*Main business office:* 49 Wall street, New York city.

#### **The Keeseville, Ausable Chasm and Lake Champlain Railroad Company**

*Organization:* Incorporated April 4, 1889, under the railroad law.

*Location of line:* Extends from Keeseville to Port Kent.

*Officers:* President, M. J. Callanan; Vice-president, C. H. Prescott; Secretary, J. J. Long; Treasurer, E. K. Romeyn.

*Main business office:* Keeseville, N. Y.

#### **Lake Champlain and Moriah Railroad Company**

*Organization:* Incorporated December 4, 1867, under an act entitled "An act to facilitate the construction of railroads and tram roads within the counties of Essex and Clinton and authorize the formation of companies therefor," passed April 14, 1865 (ch. 448, section 1 amended L. 1877, ch. 356; and 1888, ch. 324; see also L. 1868, ch. 364; L. 1872, ch. 501).

*Location of line:* Essex county; extends from Port Henry on Lake Champlain, where it connects with The Delaware and Hudson Company's railroad, to Mineville.

*Officers:* President, Frank S. Witherbee; First Vice-president, Moses Taylor; Secretary and Treasurer, Henry W. Brinsmade.

*Main business office:* Room 1801, 2 Rector street, New York city.

#### **The Lake Shore and Michigan Southern Railway Company**

*Organization:* Incorporated August 14, 1869, pursuant to the laws of the States of New York, Pennsylvania, Ohio, Michigan, Indiana, and Illinois, as a consolidation of The Buffalo and Erie Railroad Company and Lake Shore and Michigan Southern Railway Company, under the name of The Lake Shore and Michigan Southern Railway Company. The Buffalo and State Line Railroad Company, incorporated October 13, 1849, under special act passed April 12, 1848 (ch. 301), authorizing the incorporation of a railroad from Buffalo to the Pennsylvania-State line (by special act passed April 13, 1857 [ch. 362], the Buffalo and State Line Railroad Company was authorized to lease the Erie and North East Railroad Company, and by special act passed March 9, 1867 [ch. 66], to consolidate with that company), and The Erie and North East Railroad Company, incorporated by special act of Pennsylvania passed April 12, 1842 (ch. 92), were consolidated under the name of The Buffalo and Erie Railroad Company June 27, 1867, pursuant to the laws of the States of New York and Pennsylvania. The Cleveland, Painesville and Ashtabula Railroad Company, incorporated by special act of Ohio passed February 18, 1848 (L. 1847-8, p. 184), and the Cleveland and Toledo Railroad Company, formed July 15, 1853, by consolidation under the laws of Ohio, of Junction Railroad Company, incorporated by special charter of Ohio passed March 2, 1846 (L. 1845-6, p. 284), The Toledo, Norwalk and Cleveland Railroad Company, created by special charter of Ohio passed March 7, 1850 (L. 1849-50, p. 316), and Port Clinton Railroad Company, incorporated October 6, 1852, under the railroad law of Ohio of May 1, 1852 (L. 1852, p. 274), were consolidated under the name of The Lake Shore Railway Company in March, 1869, pursuant to the laws of the States of Ohio and Pennsylvania; and the Lake Shore Railway Company and The Michigan Southern and Northern Indiana Railroad Company were consolidated under the name of The Lake Shore and Michigan Southern Railway Company in May, 1869, pursuant to the laws of the States of Pennsylvania, Ohio, Michigan, Indiana, and Illinois. The Michigan Southern and Northern Indiana Railroad Company was organized April 15, 1855, by a consolidation under the laws of the States of Illinois, Indiana, and Michigan, of the following companies: Michigan Southern Railroad Company, created by special charter of Michigan passed May 9, 1846 (ch. 113); The Erie and Kalamazoo Railroad Company, organized by special charter of Michigan passed April 22, 1833 (Private Laws 1833, p. 78), and leased in perpetuity to the Michigan Southern Railroad Company May 25, 1849; Northern Indiana Railroad Company, organized July 8, 1853, under the laws of the States of Ohio and Indiana by the consolidation of the Northern Indiana Railroad Company of Indiana, chartered by the State of Indiana February 6, 1835, under the name of Buffalo and Mississippi Railroad Company, and the Northern Indiana Railroad Company (Ohio), created by special charter of Ohio passed March 3, 1851 (L. 1850-51, p. 439).

By order of the Commission dated October 29, 1914 (amended December 12, 1914), the Commission approved a consolidation agreement dated April 29, 1914, between The New York Central and Hudson River Railroad Company, The Lake Shore and Michigan Southern Railway Company, Geneva, Corning and Southern Railroad Company, The Terminal Railway of Buffalo, The Dunkirk, Allegheny

Valley and Pittsburgh Railroad Company; Chicago, Indiana and Southern Railroad Company; Detroit and Chicago Railroad Company; Detroit, Monroe and Toledo Railroad Company; Kalamazoo and White Pigeon Railroad Company, The Northern Central Michigan Railroad Company, and The Swan Creek Railway Company of Toledo, under the name of The New York Central Railroad Company.

*Location of line within State:* The main line extends from Buffalo to Chicago, Ill., via Cleveland and Toledo, Ohio; with main line branches to Oil City and Clearfield, Penna.; Fort Wayne, Ind.; Detroit, Jackson, Grand Rapids, and Lansing, Mich.

*Officers:* President, Alfred H. Smith; Vice-president, William K. Vanderbilt, jr.; Secretary, Dwight W. Pardee; Treasurer, Milton S. Barger.

*Main business office:* West Third street and St. Clair avenue, Cleveland, Ohio.

#### **The Lehigh and Hudson River Railway Company**

*Organization:* Formed by consolidation April 1, 1882, of Lehigh and Hudson River Railroad Company (a corporation incorporated under the railroad laws of New Jersey, into which the Pequest and Wallkill Railroad Company, incorporated by special act of New Jersey passed February 23, 1866 [ch. 53], had been merged May 16, 1881) and The Warwick Valley Railroad Company, incorporated under the railroad law March 8, 1860, with which the Wawayanda Railroad Company, incorporated under the railroad laws of New Jersey, had been consolidated May 27, 1880. By special act passed April 16, 1866 (ch. 620). The Warwick Valley Railroad Company was authorized to extend its road in the town of Warwick to the New Jersey-State line. The Orange County Railroad Company, incorporated December 3, 1888, was consolidated with The Lehigh and Hudson River Railway Company under the name of the latter May 22, 1907. The South Easton and Phillipsburg Railroad Company of New Jersey and the South Easton and Phillipsburg Railroad Company of Pennsylvania were consolidated with The Lehigh and Hudson River Railway Company April 2, 1912.

*Location of line within State:* The main line extends from Maybrook, N. Y., to Belvidere, N. J., and from Phillipsburg, N. J., to Easton, Penna.

*Officers:* President, Lewis A. Riley; Vice-president, Morris Rutherford; Secretary and Treasurer, John Sayer.

*Main business office:* Warwick, N. Y.

#### **Lehigh and New England Railroad Company**

*Organization:* Organized July 1, 1895, under the laws of New Jersey and Pennsylvania, as a reorganization of Pennsylvania, Poughkeepsie and Boston Railroad Company, incorporated under the railroad laws of New Jersey and Pennsylvania September 7, 1887, in turn also a reorganization of Pennsylvania, Slatington and New England Railroad Company, organized under the laws of New Jersey and Pennsylvania. Pennsylvania, Slatington and New England Railroad Company was a merger and consolidation by agreement dated June 20, 1881, under laws of New Jersey (ch. 178) of 1881, and of Pennsylvania (No. 35) of 1865, of the Pennsylvania and New England Railroad Company (New Jersey Division) organized under special act of New Jersey approved March 13, 1873 (ch. 246), under the name of The South Mountain and Boston Railroad Company (name afterward changed as above), and Delaware and Slatington Railroad Company, organized in 1882 under the railroad law of Pennsylvania. December 1, 1913, Lehigh and New England Railroad Company commenced operation of the line of Panther Creek Railroad Company (Pennsylvania corporation) merged into Lehigh and New England

Railroad Company November 28, 1913. A company of the same name, Pennsylvania, Poughkeepsie and Boston Railroad Company, was incorporated December 31, 1887, under the railroad law, as a consolidation of Poughkeepsie, Hartford and New England Railroad Company, incorporated September 10, 1887, under the railroad law, and Poughkeepsie and Southwestern Railroad Company, incorporated March 9, 1883, under the railroad law.

*Location of line within State:* Extends from Campbell Hall and Goshen, via trackage right (Eric railroad), to Pine Island Junction, thence over the line of Campbell Hall Connecting railway, which it operates by contract, to the state line, thence over its own line to Swartswood Junction, N. J.

*Officers:* President, S. D. Warriner; Vice-president, Rollin H. Wilbur; Secretary, H. F. Baker; Treasurer, Henry H. Pease.

*Main business office:* 437 Chestnut street, Philadelphia, Penna.

#### *Lessor Companies:*

**Campbell Hall Connecting Railroad Company:** Incorporated April 3, 1889, under the railroad law. Capital stock owned by Lehigh and New England Railroad Company.

*Officers:* President, Samuel D. Warriner; Vice-president, Rollin H. Wilbur; Secretary and Treasurer, H. F. Baker.

*Corporate office:* 143 Liberty street, New York city.

**Pochuck Railroad Company:** Incorporated April 23, 1897, under the railroad law. Capital stock owned by Lehigh and New England Railroad Company.

*Officers:* President, S. D. Warriner; Vice-president, R. H. Wilbur; Secretary and Treasurer, H. F. Baker.

*Corporate office:* 143 Liberty street, New York city.

#### **Lehigh Valley Railroad Company**

*Organization:* Incorporated by special act of Pennsylvania passed April 21, 1846 (ch. 422, see L. 1848), letters patent dated September 20, 1847, under the name of Delaware, Lehigh, Schuylkill and Susquehanna Railroad Company. By act passed January 7, 1853 (ch. 1), the name was changed to Lehigh Valley Railroad Company. It was consolidated July 8, 1864, with Beaver Meadow Railroad Company, incorporated by special act passed April 7, 1830 (ch. 194, L. 1829-30), as Beaver Meadow Railroad and Coal Company. Also consolidated August 5, 1864, with Penn Haven and White Haven Railroad Company, incorporated by special act passed May 4, 1857 (ch. 737, see L. 1859); with Lehigh and Mahanoy Railroad Company June 20, 1866; with Hazelton Railroad Company May 25, 1868, incorporated as The Hazelton Coal Company by special act passed March 18, 1836 (ch. 47), name changed by special act passed March 9, 1865 (ch. 302), to the Hazelton Railroad Company; and with Lehigh-Luzerne Railroad Company June 16, 1868, incorporated by special act passed March 23, 1854 (ch. 599, see L. 1856), as Jeddo and Carbon County Railroad Company. change of name authorized to The Lehigh and Luzerne Railroad Company by special act passed February 12, 1856 (ch. 57), and to Lehigh-Luzerne Railroad Company by act passed April 8, 1857 (ch. 218).

*Location of lines within State:* The Lehigh Valley railroad (Pennsylvania corporation) extends from Jersey City, N. J., to Buffalo, with main line branches within the State as follows: The Lehigh and New York branch, Sayre, Penna., near Pennsylvania-State line, to North Fair Haven; Ithaca branch, Van Etten Junction to Geneva Junction; Auburn and Ithaca branch, Ithaca to Auburn; also branches from the main line to Rochester, and from Buffalo to Niagara Falls; Elmira and Cortland branch extends from Elmira to Camden via Van Etten. Main line within the State extends from the Pennsylvania-State line to Buffalo, and is leased from The Lehigh Valley Railroad Company (New York corporation).

*Officers:* President, E. B. Thomas; Vice-president, J. A. Middleton; Secretary, D. G. Baird; Treasurer, J. M. Baxter.

*Main business office:* 228 South 3rd street, Philadelphia, Penna.

*Lessor Companies:*

**Lehigh and New York Railroad Company:** Incorporated August 24, 1895, as a reorganization of The Southern Central Rail Road, incorporated November 17, 1865, under the railroad law. See L. 1866, ch. 433 (section 9 and part section 19 repealed L. 1886, ch. 593, section 1 paragraph 4); 1867, chs. 377 and 918; 1868, ch. 173; 1869, ch. 273, section 220; 1870, ch. 245; 1873, chs. 145 and 498; 1875, ch. 71 and ch. 511 (section 2 amended L. 1879, ch. 97); 1876, chs. 104, 140, 228, and 238; and 1880, ch. 281. Leased to Lehigh Valley Railroad Company August 24, 1895.

*Officers:* President, E. B. Thomas; Vice-president, J. A. Middleton; Secretary, D. G. Baird; Treasurer, J. M. Baxter.

*Corporate office:* 1330 Marine Bank Building, Buffalo, N. Y.

**The Lehigh Valley Rail Way Company:** Incorporated March 23, 1882, under the name of Lehigh Valley Railway Company, under the railroad law. June 23, 1890, it was consolidated with Geneva and Van Etenville Railway Company, incorporated March 7, 1889, and Buffalo and Geneva Railway Company, incorporated February 28, 1889, and its name changed as above. May 13, 1890, The Geneva and Sayre Railroad Company, and Auburn and Ithaca Railway Company, incorporated October 8, 1889, under the railroad law, surrendered their capital stock and were merged into Geneva and Van Etenville Railway Company. The Geneva and Sayre Railroad Company was incorporated August 28, 1889, as a reorganization of The Geneva, Ithaca and Sayre Railroad Company, incorporated October 2, 1876, as a reorganization (both companies also consolidated May 25, 1874, under the name Geneva, Ithaca and Athens Railroad Company) of Ithaca and Athens Railroad, incorporated December 22, 1865, under the name of The Ithaca and Towanda Rail Road Company (see L. 1866, ch. 645; section 15 amended L. 1867, ch. 872), and name changed as above by special act passed February 18, 1870 (ch. 23; see also L. 1873, ch. 510; and 1877, ch. 382), and of The Geneva and Ithaca Rail Road Company (a reorganization of two companies above), incorporated June 7, 1870, under the railroad law (see L. 1873, ch. 800); The Geneva, Ithaca and Sayre Railroad Company merged April 16, 1879, pursuant to L. 1879, ch. 73; The Cayuga Southern Railroad Company, incorporated December 3, 1877, as a reorganization of The Cayuga Lake Railroad Company, incorporated July 1, 1867 (amended certificate filed November 3, 1871, and also previously reorganized October 1, 1874, on foreclosure of a second mortgage as The Cayuga Railway Company). Leased to Lehigh Valley Railroad Company January 1, 1891.

On the following dates the following companies were merged into The Lehigh Valley Rail Way Company: August 3, 1903, The Depew and Tonawanda Railroad Company, incorporated June 15, 1895. Rochester Southern Railroad Company, incorporated August 14, 1895, by consolidation of The Rochester and Southern Railroad Company, incorporated May 7, 1895, and The Rochester and Honeoye Valley Railroad Company, incorporated January 14, 1888, under the railroad law. Middlesex Valley Railroad Company, incorporated May 11, 1892. The Seneca County Railway, incorporated February 24, 1891. The Waverly and State Line Railway Company, incorporated June 11, 1867. February 17, 1905, The Elmira, Cortland and Northern Railroad Company, incorporated March 7, 1884. April 30, 1890, The Canal Railroad Company surrendered its capital stock to The Elmira, Cortland and Northern Railroad Company; and February 7, 1905, The Canastota Northern Railroad Company, incorporated March 24, 1886, also surrendered its capital stock and was merged. The Elmira, Cortland and Northern Railroad Company purchased from Austin Corbin and another the line of the Utica, Ithaca and Elmira Railroad Company, incorporated October 25, 1871, as a consolidation of Ithaca and Cortland Rail Road Company, incorporated July 21, 1869, and Utica, Horsehead and Elmira Rail Road Company, incorporated April 2, 1870. Utica, Ithaca and Elmira Railroad Company was reorganized May 10, 1878, as The Utica, Ithaca and Elmira Railway Company of the State of New York. (See L. 1872, ch. 594; and 1873, ch. 834.) This company also purchased from the same parties the lease of The Canal Railroad Company, and lease of line extending from Cortland to De Ruyter owned by New York, Ontario and Western Railway Company; also the line of road extending from De Ruyter to Canastota formerly owned by The Cazenovia, Canastota and De Ruyter Rail Road Company, incorporated June 17, 1873, as a consolidation of The Cazenovia and Canastota Railway Company, incorporated March 4, 1873, as a reorganization of Cazenovia and Canastota Rail Road Company, incorporated January 22, 1868, and Cazenovia and De Ruyter Rail Road Company, incorporated January 26, 1872. The Canal Railroad Company,

incorporated April 26, 1878. June 26, 1907, The Lehigh and Lake Erie Railroad Company, incorporated May 7, 1896.

*Officers:* President, E. B. Thomas; Vice-President, J. A. Middleton; Secretary, D. G. Baird; Treasurer, J. M. Baxter.

*Corporate office:* 1330 Marine Bank Building, Buffalo, N. Y.

**The Long Island Railroad Company**

*Organization:* Incorporated by special act passed April 24, 1834 (ch. 178). By special act passed April 2, 1836 (ch. 94), the demise or lease of The Brooklyn and Jamaica Railroad, incorporated by special act passed April 25, 1832 (ch. 256), to The Long Island Railroad Company was authorized, and the construction of a branch to lead from Brooklyn and Jamaica railroad to a suitable point on the East river in "the village of" Williamsburgh authorized to be deemed performance of obligation to make its road from Greenport to Brooklyn and Williamsburgh. By special act passed May 16, 1836 (ch. 358), a branch to Hempstead was authorized. By special act passed June 28, 1851 (ch. 306), The Long Island Railroad Company was authorized to furnish rails for branch from Hicksville toward Cold Spring Harbor and to use branch when constructed. Special act passed April 18, 1859 (ch. 484), relates to construction and operation in Atlantic street, Brooklyn. (See L. 1860, ch. 100.) By special act passed March 12, 1860 (ch. 65), the extension of its line from Jamaica to the East river at or near Hunters Point, and purchase of New York and Jamaica railroad, incorporated September 3, 1859, under the railroad law, were authorized. December 6, 1912, The Jamaica and South Shore Rail Road Company, incorporated December 18, 1903, as a reorganization of New York and Rockaway Rail Road Company, incorporated December 30, 1870, under the railroad law, was merged into The Long Island Railroad Company.

*Location of lines:* Main line extends from Long Island City to Greenport, and the Montauk division from Long Island City to Montauk, with terminals at Atlantic avenue, Brooklyn (Nassau Electric railroad, leased line), and Bay Ridge; and with branches to Manhattan Beach, Rockaway Beach, Long Beach, Oyster Bay, Wading River, etc.

*Officers:* President, Ralph Peters; Vice-president, Henry Tatnall; Secretary, Frank E. Haff; Treasurer, J. F. Fahnestock.

*Main business office:* Broad Street Station, Philadelphia, Penna.

*Lessor Companies:*

**The Long Island Railroad Company, North Shore Branch:** Incorporated July 14, 1892, under the railroad law; consolidated September 23, 1892, with The Smithtown and Port Jefferson Rail Road Company, incorporated June 9, 1870, under the railroad law, under the name of the former company. Leased to The Long Island Railroad Company July 1, 1904.

*Officers:* President, Ralph Peters; Vice-president, C. L. Addison; Secretary, Frank E. Haff; Comptroller, C. M. Bunting.

*Corporate office:* Jamaica, N. Y.

In addition to the foregoing, The Long Island Railroad Company leases within the First Public Service District from the following companies: The Nassau Electric Railroad Company; The New York, Brooklyn and Manhattan Beach Railway Company; The Glendale and East River Railroad Company; Canarsie Railroad Company; and The New York and Rockaway Beach Railway Company.

**The Lowville and Beaver River Railroad Company**

*Organization:* Incorporated September 17, 1903, under the railroad law.

*Location of line:* Lewis county; extends from Lowville, where it connects with the Rome, Watertown and Ogdensburg division of the New York Central and Hudson River railroad, to Croghan.

*Officers:* President, J. S. Bowen; Secretary, G. A. Blackmon; Treasurer, Frederiek S. Easton.

*Main business office:* Shady avenue, Lowville, N. Y.

**Marcellus and Otisco Lake Railway Company**

*Organization:* Incorporated under the railroad law May 25, 1905.

*Location of line:* Onondaga county; Martisco to Otisco Lake.

*Officers:* President, Frederick McOwen; Vice-president, Sylvester S. Marvin; Secretary and Treasurer, F. B. Snyder.

*Main business office:* Marcellus, N. Y.

**The Massena Terminal Railroad Company**

*Organization:* Incorporated May 1, 1900, under the railroad law.

*Location of line:* Connects with the main line of Rome, Watertown and Ogdensburg division of the New York Central and Hudson River railroad at Massena Springs, and extends to the power plant of the Aluminum Company of America on LaGrasse river, with branch to power house of St. Lawrence River Power Company.

Information on file with the Commission shows that the road is operated by The New York Central and Hudson River Railroad Company as agent of The Massena Terminal Railroad Company: The New York Central and Hudson River Railroad Company handles all freight from its own lines and that coming from the Grand Trunk Railway Company at Massena Springs, and delivers same to factories on line of the Massena Terminal at a price of \$2 per car in addition to the regular freight charges, of which switching charge The Massena Terminal Railroad Company receives \$1 per car. For the year ended June 30, 1914, the report shows a net loss under this arrangement of \$10,061, chiefly due to large expenditures incurred during the year for maintenance of track and roadway. The balance sheet June 30, 1914, is reported as follows:

<i>Assets Side:</i>	
Total road and equipment.....	\$412,988
Total working assets and accrued income.....	303
Profit and loss balance.....	43,861
	<hr/> \$457,152
<i>Liabilities side:</i>	
Capital stocks.....	\$250,000
Total working liabilities and accrued liabilities.....	207,152
	<hr/> \$457,152

*Officers:* President, Arthur V. Davis; First Vice-president, Charles M. Hall; Secretary, G. R. Gibbons; Treasurer, R. E. Withers.

*Main business office:* Massena, N. Y.

**Middleburgh & Schoharie Rail Road**

*Organization:* Incorporated March 29, 1867, under the railroad law. See special act passed May 8, 1867, ch. 808, as amended by laws of 1868, ch. 57, and laws of 1907, ch. 497.

The original law enabling the Town of Middleburgh to bond and take stock in the railroad company, provided for the taking by the Town of 500 shares; and that the railroad commissioner of the Town should have 10 votes thereon in all elections of directors and inspectors; but by chapter 497 laws of 1907 the original enabling act was amended, and by its terms gave 500 votes to the commissioner, thus giving the Town the majority of votes. The constitutionality of this amendment is questioned by the individual stockholders, but no situation has yet arisen which has led to any litigation in the premises.

*Location of line:* Schoharie county; extends from Middleburgh to Schoharie, where it connects with the Schoharie Valley railway, the two forming a through line between Middleburgh and Schoharie Junction on The Delaware and Hudson Company's railroad.

*Officers:* President, Duryea Beekman; Vice-president, Daniel D. Frisbie; Secretary, George D. Frisbie; Treasurer, G. L. Danforth.

*Main business office:* Corner River street and Danforth avenue, Middleburgh, N. Y.

**Middletown and Unionville Railroad Company**

*Organization:* Incorporated November 14, 1913, as a reorganization of Middletown, Unionville and Water Gap Railroad Company, incorporated May 25, 1866, under the railroad law (see L. 1868, ch. 365).

Effective date of beginning operations by the reorganized company has been taken for accounting purposes as of December 1, 1913, and report covers operations from that date to June 30, 1914. Road was formerly operated under contract by New York, Susquehanna and Western Railroad Company.

*Location of line:* Orange county; extends from Middletown to the New Jersey-State line.

*Officers:* President, Charles I. Henry; Vice-president, J. A. Smith; Secretary, Frank H. Finn; Treasurer, G. T. Townsend.

*Main business office:* 90 North street, Middletown, N. Y.

**Newark and Marion Railway Company  
(Receiver)**

*Organization:* Incorporated May 4, 1900, under the railroad law. Harold C. Beatty was appointed temporary receiver March 28, 1914 (took possession April 22, 1914), at a special term of the Supreme Court for Wayne County, in an action for the voluntary dissolution of the company. Road was operated in name of the railway company, Syracuse Railroad Construction Company to bear as to the company any deficit from operation.

*Location of line:* Newark terminal to Marion.

*Officers:* President, W. H. Stansfield; Vice-president, H. J. Clark; Secretary, H. C. Beatty; Treasurer, W. W. Foster.

*Main business office:* 500 Onondaga County Savings Bank Building, Syracuse, N. Y.

**New Jersey and New York Railroad Company**

*Organization:* Incorporated April 3, 1880, under the laws of New Jersey, as a reorganization of the New Jersey and New York Railroad Company, formed by consolidation November 4, 1874, of Hackensack Railroad Company, a reorganization of Hackensack and New York Railroad Company, incorporated by special act of New Jersey approved March 14, 1856 (ch. 162); see also act (N. J.) passed March 12, 1861 (ch. 105), extension to New York and Erie railroad at or near Nanuet; see also section 4 of act passed March 22, 1867 (ch. 188); also act (N. J.) passed March 29, 1864 (ch. 313), extension to Hudson river or to any other railroad extending or running to the Hudson river; see also act of New York passed April 17, 1875 (ch. 118), extension of New Jersey and New York railroad from a point in the township of Haverstraw or Stony Point to a point on the Wallkill Valley railroad; and New Jersey and New York Railroad Company, a reorganization of The Hackensack and New York Extension Railroad Company, formed by special act of New Jersey passed February 23, 1869 (ch. 55); see also act approved March 10, 1868 (ch. 132). By special act passed April 20, 1870 (ch. 304), extension was authorized from the state line "to a point on the Hudson river between Caldwell's Landing and the southerly line of the village of Warren, in the county of Rockland".

*Location of lines within State:* Rockland county; extends from Jersey City, trackage over Erie railroad to New Jersey and New York Junction, thence via Nanuet, trackage over Piermont branch of Erie railroad to Spring Valley, to Haverstraw and Stony Point, with branch to New City. That portion of the main line within the State extends from the New Jersey-State line near Pearl river to Nanuet Junction, and from Spring Valley to Stony Point Junction, from Stony Point Junction to Stony

Point, and from Stony Point Junction to Haverstraw (New Jersey and New York Extension Railroad Company, lessor).

*Officers:* President, F. D. Underwood; Vice-president, G. F. Brownell; Secretary, David Bosman; Treasurer, D. W. Bigoney.

*Main business office:* Jersey City, N. J.

*Lessor Company:*

**New Jersey and New York Extension Railroad Company:** Incorporated June 2, 1886, under the railroad law. Leased to New Jersey and New York Railroad Company September 1, 1887.

*Officers:* President, F. D. Underwood; Vice-president, G. A. Richardson; Secretary, David Bosman; Treasurer, D. W. Bigoney.

*Corporate office:* Jersey City, N. J.

### **Newton Falls and Northern Railroad**

*Organization:* Incorporated June 24, 1908, under the railroad law.

*Location of line:* St. Lawrence county; extends from Newton Falls, where it connects with the Carthage and Adirondack branch of the Rome, Watertown and Ogdensburg railroad (The New York Central and Hudson River Railroad Company, lessee), to New Bridge. The road is used entirely for conveying logs and timber belonging to the company owning the road.

The Commission does not require a report.

### **New York and Pennsylvania Railway Company**

*Organization:* Incorporated May 24, 1904, as a consolidation of New York and Pennsylvania Railroad Company, incorporated under the railroad law July 22, 1895, amendment September 23, 1895, and which latter company was consolidated June 22, 1896, with Olean, Oswayo and Eastern Railroad Company, incorporated under the laws of Pennsylvania October 20, 1892, under the name of New York and Pennsylvania Railroad Company; the Sharon and Ceres Railroad Company, incorporated under the laws of Pennsylvania July 18, 1901, and Sharon and Ceres Terminal Railroad Company, incorporated under the railroad law February 9, 1903.

*Location of lines:* Steuben and Allegany counties; extends from Canisteo, where it connects with the Susquehanna division of the Erie railroad, to the New York-Pennsylvania line near Genesee; it then passes for some distance through the State of Pennsylvania and reenters the State of New York for 0.18 mile at Ceres, where it connects with the Pittsburg, Shawmut and Northern railroad.

*Officers:* President, Theodore Cobb; Vice-president, William Cobb; Secretary, Fordyce A. Cobb; Treasurer, Howard Cobb.

*Main business office:* East Main street, Canisteo, N. Y.

### **The New York, Auburn and Lansing Railroad Company**

See Central New York Southern Railroad Corporation, successor.

### **The New York Central and Hudson River Railroad Company**

*Organization:* Formed by consolidation November 1, 1869, of The New York Central Railroad Company and The Hudson River Railroad Company. The Hudson River Railroad Company was incorporated under a special act passed May 12, 1846 (ch. 216). The New York Central Railroad Company was formed by consolidation July 7, 1853, under authority of special act passed April 2, 1853 (ch. 76), of the following companies: The Albany and Schenectady Railway Company, organized as the Mohawk and Hudson River Railroad Company by special act passed April 17, 1826 (ch. 253), and name changed to The Albany and Schenectady Railroad Company by special act passed April 19, 1847 (ch. 91); The Buffalo and Lockport Railroad Company, incorpo-

rated under the railroad law April 29, 1852; Buffalo and Rochester Railroad Company, formed by consolidation December 7, 1850, of The Attica and Buffalo Railroad Company, incorporated under special act passed May 3, 1836 (ch. 242), and The Tonawanda Railroad Company, incorporated by special act passed April 24, 1832 (ch. 241); The Mohawk Valley Railroad Company, incorporated under the railroad law December 29, 1852 (not constructed, consolidated July 7, 1853, with The New York Central Railroad Company under act of 1853); The Rochester, Lockport and Niagara Falls Railroad Company, incorporated December 14, 1850, as a reorganization of the Lockport and Niagara Falls Railroad Company, incorporated by special act passed April 24, 1834 (ch. 177); The Rochester and Syracuse Railroad Company, a consolidation August 1, 1850, of The Auburn and Rochester Railroad Company, incorporated by special act passed May 13, 1836 (ch. 349), and The Auburn and Syracuse Railroad Company, incorporated by special act passed May 1, 1834 (ch. 228); The Direct Railway between Syracuse and Rochester, incorporated under the railroad law June 18, 1848, was consolidated with The Rochester and Syracuse Railroad Company August 6, 1850; The Schenectady and Troy Railroad Company, incorporated by special act passed May 21, 1836 (ch. 427); The Syracuse and Utica Railroad Company, incorporated by special act passed May 11, 1836 (ch. 292); Syracuse and Utica Direct Railroad Company, incorporated under the railroad law January 26, 1853 (not constructed, consolidated July 7, 1853, with The New York Central Railroad Company under act of 1853); The Utica and Schenectady Railroad Company, incorporated by special act passed April 29, 1833 (ch. 294).

In addition to the foregoing, the roads of the four companies following were leased and the companies subsequently merged into the consolidation: The Buffalo and Niagara Falls Railroad Company, incorporated by special act passed May 3, 1834 (ch. 269); leased December 22, 1853, capital surrendered and company merged April 23, 1869; The Lewiston Railroad Company, incorporated by special act passed May 6, 1836 (ch. 260); merged September 30, 1855; Rochester and Lake Ontario Railroad Company, incorporated under the railroad law May 17, 1852; leased August 25, 1852, merged September 30, 1855; The Saratoga and Hudson River Railroad Company, incorporated under the railroad law April 16, 1864, leased March 7, 1867, to The New York Central Railroad Company; at that time the track extended from a point on the Hudson river in the town of Athens to a point in the town of Rotterdam; capital surrendered and company merged with The New York Central Railroad Company, September 9, 1867. Under date of November 2, 1881, the road formerly constituting the Saratoga and Hudson River railroad, extending from Athens to Schenectady, was leased to the New York, West Shore and Buffalo Railway Company.

An interest in the following lines has been acquired by The New York Central and Hudson River Railroad Company by merger or consolidation: The Geneva and Lyons Railroad Company, incorporated under the railroad law October 5, 1877; leased and capital surrendered and company merged January 20, 1890; The Junction Railroad Company, incorporated under the railroad law April 20, 1870; leased April 10, 1875, capital surrendered and company merged October 1, 1879; Niagara Bridge and Canandaigua Railroad Company, incorporated August 25, 1858, as a reorganization of The Canandaigua and Niagara Falls Railroad Company, incorporated under the railroad law March 18, 1851; leased to The New York Central Railroad Company September 1, 1858, capital surrendered and company merged January 10, 1890; The Syracuse Junction Railroad Company, incorporated under the railroad

law June 9, 1873: leased April 10, 1875, to The New York Central and Hudson River Railroad Company, capital surrendered and company merged October 1, 1879.

March 7, 1913, the following corporations were merged into The New York Central and Hudson River Railroad Company: Buffalo Erie Basin Rail Road Company, incorporated July 8, 1876, under the railroad law. Carthage and Adirondack Railway Company, incorporated March 28, 1883, under the railroad law. The Gouverneur and Oswegatchie Railroad Company, incorporated April 12, 1892, under the railroad law. The Mohawk and Malone Railway Company, incorporated June 23, 1892, as a consolidation of The Herkimer, Newport and Poland Railway Company, incorporated July 8, 1880 (prior certificate filed December 18, 1879), under the name of Herkimer, Newport and Poland Narrow Gauge Railway Company, under the railroad law, and which company reincorporated December 8, 1891, under the above name, under authority of special act passed March 16, 1891 (chap. 78); The Mohawk Valley and Northern Railway Company, incorporated October 31, 1890, under the railroad law, was consolidated with Herkimer, Newport and Poland Narrow Gauge Railway Company April 30, 1891; Herkimer, Newport and Poland Extension Railway Company, incorporated September 10, 1891, under the railroad law; and St. Lawrence and Adirondack Railroad Company, incorporated September 10, 1891, under the railroad law. New York and Ottawa Railway Company, incorporated January 19, 1905, as a reorganization of New York and Ottawa Railroad Company, incorporated July 22, 1897, under the railroad law, and consolidated October 28, 1897, with Northern New York Railroad Company, incorporated May 27, 1895, as a reorganization of Northern Adirondack Railroad Company, incorporated February 9, 1883, under the railroad law, and consolidated April 5, 1890, with Northern Adirondack Extension Railroad Company, incorporated February 17, 1886, under the railroad law. The New York and Putnam Railroad Company, incorporated January 13, 1894, as a reorganization of The New York and Northern Railway Company, incorporated October 11, 1887, as a reorganization of The New York City and Northern Railroad Company, incorporated March 1, 1878, under the railroad law; March 7, 1913, The Mahopac Falls Railroad Company, incorporated March 8, 1884, under the railroad law, was merged into The New York and Putnam Railroad Company, and therefore became merged with The New York Central and Hudson River Railroad Company. The New York Central Niagara River Rail Road Company, incorporated March 26, 1877, under the railroad law. The Spuyten Duyvil and Port Morris Railroad Company, incorporated March 4, 1869, under the railroad law. Tivoli Hollow Railroad Company, incorporated May 15, 1893, under the railroad law. March 14, 1913, Tonawanda Island Bridge Company, incorporated by special act passed April 21, 1883 (ch. 279).

April 16, 1913, the following companies were consolidated with The New York Central and Hudson River Railroad Company: Rome, Watertown and Ogdensburg Railroad Company, incorporated as The Watertown and Rome Rail-Road Company by special act passed April 17, 1832, ch. 173 (see also L. 1836, ch. 283; L. 1837, ch. 346; L. 1845, ch. 337; L. 1847, chs. 147 and 393; L. 1854, ch. 154; and L. 1859, ch. 473), the name of which was changed August 23, 1861, by certificate filed with the State Engineer and Surveyor July 10, 1861, to Rome, Watertown and Ogdensburg Rail Road Company, under authority of special act passed April 11, 1860 (ch. 273), it having complied with the condition specified in the act by the purchase of the roadbed and property of The Potsdam and Watertown Rail Road Company, incorporated February 25, 1852, under the railroad law. January 14, 1875, Lake Ontario Rail Road Com-

pany, incorporated September 29, 1874, as a reorganization of Lake Ontario Shore Rail Road Company, incorporated March 27, 1868, under the railroad law (legalized and authorized to build branch to Rochester by special act passed April 19, 1869, ch. 241), was consolidated with Rome Watertown and Ogdensburg Rail Road Company, and December 23, 1875, it was consolidated with Syracuse and Northern Rail Road Company, incorporated September 22, 1875, as a reorganization of Syracuse Northern Rail Road Company, incorporated February 25, 1868, under the railroad law; and also April 20, 1885, with Oswego Railroad Bridge Company, incorporated by special act passed April 27, 1872 (ch. 399). By the latter consolidation the name of the corporation was changed to Rome, Watertown and Ogdensburg Railroad Company. August 7, 1889, the capital stock of Norwood and Montreal Railroad Company, incorporated March 1, 1884, under the railroad law, and of The Syracuse Phoenix and Oswego Railway Company, incorporated February 16, 1885, as a reorganization of The Syracuse, Phoenix and Oswego Railroad Company, incorporated November 29, 1871, under the name of Syracuse, Phoenix and Oswego Railroad Company (see special act passed May 22, 1878, ch. 309), which latter company was consolidated under the above name June 10, 1875, with The Syracuse Northwestern Rail Road Company, incorporated September 19, 1874, under the railroad law, was surrendered and the companies merged into Rome, Watertown and Ogdensburg Railroad Company. The Syracuse Phoenix and Oswego Railway Company was consolidated April 22, 1886, with Fulton and Oswego Railroad Company, incorporated December 18, 1885, under the railroad law. April 28, 1890, the capital stock of Rome Watertown and Ogdensburg Terminal Railroad Company, incorporated June 22, 1886, under the railroad law, was surrendered and the company merged. February 21, 1888, the capital stock of Windsor Beach and Ontario Railroad Company, incorporated November 30, 1887, under the railroad law, and of Rochester and Lake Beach Railroad Company, incorporated February 1, 1888, as a reorganization of Rochester and Ontario Belt Railway Company, incorporated January 31, 1882, under the railroad law, was surrendered and the companies merged into Rome Watertown and Ogdensburg Terminal Railroad Company. The Utica and Black River Railroad Company, incorporated May 22, 1861, under the railroad law, and by authority of special act entitled "An act for the relief of the holders of the mortgage bonds of the Black River and Utica Railroad Company and to authorize them to organize a new railroad company," passed March 31, 1860 (ch. 134). The Black River and Utica Rail Road Company was incorporated January 31, 1853, under the railroad law. November 16, 1883, Black River and Morristown Rail Road Company, incorporated March 22, 1870, under the railroad law, was consolidated with The Utica and Black River Railroad Company. March 31, 1886, Clayton and Theresa Rail Road Company, incorporated February 7, 1871, under the railroad law, and The Ogdensburg and Morristown Railroad Company, incorporated September 11, 1877 (certificate of The Ogdensburg and Morristown Railroad Company filed July 17, 1871), under the railroad law, were consolidated with The Utica and Black River Railroad Company. Oswego and Rome Rail Road Company, incorporated April 11, 1862, under the railroad law. Carthage, Watertown and Sackets Harbor Rail Road Company, incorporated February 5, 1869. The Niagara Falls Branch Rail Road Company, incorporated December 24, 1875, under the railroad law. Little Falls and Dolgeville Railroad Company, incorporated February 20, 1891, under the railroad law, and reorganized December 27, 1902.

The New York Central and Hudson River Railroad Company has acquired an interest in the following lines by

ownership of capital stock: Chest Creek Railroad Company, organized May 31, 1890, under the laws of Pennsylvania (not constructed). The Hudson River Bridge Company at Albany, incorporated by special act passed April 9, 1856 (ch. 146), as amended and supplemented by L. 1857, ch. 451; L. 1864, ch. 243; L. 1868, ch. 412; L. 1869, ch. 779; L. 1905, ch. 381; and L. 1907, ch. 730; see also L. 1886, ch. 593, sec. 1, par. 21. New York and Fort Lee Railroad Company, incorporated under the laws of New Jersey, under the name of The New York and Bull's Ferry Railroad Company, March 14, 1861; name changed March 3, 1862, as above, by supplemental act of New Jersey: a portion of its right of way and tracks leased June 30, 1886, to New Jersey Junction Railroad Company, and the rest is occupied by West Shore terminals at Weehawken. Pennsylvania and Western Railroad Company, incorporated April 9, 1856, under the name of Bedford Iron Company; name changed to Coalmont Iron and Coal Company May 1, 1861; and again to Somerset and Clearfield Coal Company April 13, 1867; and again to East Broad Top Coal and Iron Company May 18, 1871; and assuming the name of Pennsylvania and Western Railroad Company August 13, 1872. August 2, 1873, Steuben Iron Company of Center County, incorporated May 27, 1871, as the successor of Caledonia Iron Land and Railroad Company, incorporated March 22, 1867, and name changed April 30, 1869, to Southern Pennsylvania Iron and Railroad Company, was merged into Pennsylvania and Western Railroad Company.

By order of the Commission dated October 29, 1914 (amended December 12, 1914), the Commission approved a consolidation agreement dated April 29, 1914, between The New York Central and Hudson River Railroad Company, The Lake Shore and Michigan Southern Railway Company; Geneva, Corning and Southern Railroad Company; The Terminal Railway of Buffalo; The Dunkirk, Allegheny Valley and Pittsburgh Railroad Company; Chicago, Indiana and Southern Railroad Company; Detroit and Chicago Railroad Company; Detroit, Monroe and Toledo Railroad Company; Kalamazoo and White Pigeon Railroad Company, The Northern Central Michigan Railroad Company, The Swan Creek Railway Company of Toledo, under the name of The New York Central Railroad Company.

*Location of lines within State:* Main line extends from New York city (and Boston via Boston and Albany railroad to Albany) to Buffalo, and in connection with the Lake Shore and Michigan Southern railway, the Michigan Central railroad, the Cleveland, Cincinnati, Chicago and St. Louis railway and allied lines, reaches Cleveland, Pittsburgh, Chicago, Cincinnati, Detroit, and St. Louis, with main line branches to Troy, Montreal, Northern New York, Oswego, from Syracuse to Rochester the Auburn road, Williamsport, Penna., Niagara Falls, and other points. The West Shore railroad (leased line) extends from Weehawken, N. J., to Buffalo, with branches to Montgomery (Wallkill Valley), Albany, and Earlville.

*Officers:* Chairman of the Board, Chauncey M. Depew; President, Alfred H. Smith; Vice-president, William K. Vanderbilt, jr.; Secretary, Dwight W. Pardee; Treasurer, Edward L. Rossiter.

*Main business office:* Grand Central Terminal, New York city.

#### *Lessor Companies:*

**Amsterdam, Chuctanunda and Northern Railroad Company:** Incorporated September 23, 1879, under the railroad law. Operated by The New York Central and Hudson River Railroad Company under agreement dated January 7, 1911, effective November 1, 1907.

*Officers:* President, A. R. Conover; Secretary, J. Arthur Brannock; Treasurer, Lauren Kellogg.

*Corporate office:* Upper Church street, Amsterdam, N. Y.

**Boston and Albany Railroad Company:** Incorporated by act of Massachusetts passed May 24, 1867 (ch. 270), as a consolidation of Boston and Worcester Rail Road Corporation, incorporated by act of Massachusetts passed June 23, 1831 (ch. 72), and Western Rail Road Corporation, incorporated by act of Massachusetts passed March 15, 1833 (ch. 116). Castleton and West Stockbridge Rail-Road Company was incorporated by act of New York passed May 5, 1834 (ch. 292); name changed to The Albany and West-Stockbridge Rail-Road Company by act passed May 5, 1836 (ch. 262). November 11, 1841, a permanent contract of transportation was made by the Western Railroad Corporation for the operation of The Albany and West-Stockbridge Rail-Road Company by the former company, and under the laws of the States of New York and Massachusetts The Albany and West-Stockbridge Rail-Road Company and The Hudson and Boston Railroad Corporation, incorporated February 23, 1855, under the railroad law, were consolidated with the Boston and Albany Railroad Company. This agreement was filed in the office of the Secretary of State January 10, 1871. (See L. 1866, ch. 912; p. 12 of session laws of 1867 as to The Albany and West-Stockbridge Rail-Road Company.) Leased to The New York Central and Hudson River Railroad Company November 15, 1899, in effect July 1, 1900, under authority of act of July 17, 1900, ch. 468, Massachusetts.

*Officers:* President, Charles S. Sargent; Secretary, George P. Furber; Treasurer, Frank H. Ratcliffe.

*Corporate office:* 325 South Station, Boston, Mass.

**Dolgeville and Salisbury Railway Company:** Incorporated June 12, 1907, under the railroad law. Operated by Little Falls and Dolgeville Railroad Company, which was consolidated with The New York Central and Hudson River Railroad Company April 16, 1913.

*Officers:* President, W. H. Switzer; Vice-president, E. L. Wells; Secretary and Treasurer, F. R. Switzer.

*Corporate office:* 115 Genesee street, Utica, N. Y.

**Geneva, Corning and Southern Railroad Company:** Incorporated April 12, 1909 (agreement of consolidation and merger effective April 1, 1909), under the laws of New York and Pennsylvania (filed in office of Secretary of State of Pennsylvania April 10, 1909), as a consolidation of Syracuse, Geneva and Corning Railway Company, incorporated August 27, 1875, under the railroad law, itself consolidated November 2, 1885, with Penn Yan and New York Railway Company, incorporated August 24, 1877, under the railroad law; Fall Brook Railway Company, incorporated January 2, 1873, under the name of Corning, Cowanesque and Antrim Railway Company (name changed to Fall Brook Railway Company July 1, 1892, as a consolidation of The Blossburgh and Corning Rail Road Company, incorporated May 19, 1854, and the Wellsboro and Lawrenceville Rail Road Company, incorporated April 4, 1867, under the laws of Pennsylvania. The Blossburgh and Corning Rail Road Company was incorporated as a reorganization of the The Tioga Coal, Iron, Mining and Manufacturing Company, reciting act of New York passed April 5, 1851 (ch. 90), entitled "An act to authorize The Tioga Coal, Iron, Mining and Manufacturing Company to borrow money to relay its road with a heavy T rail, and to consolidate with the Tioga Rail Road Company, and to change the name of said company to The Corning and Blossburgh Rail Road Company". The Tioga Coal, Iron, Mining and Manufacturing Company was incorporated by special act passed April 9, 1828 (ch. 191). See also L. 1833 (ch. 81); and 1840 (ch. 296). May 27, 1874, Corning, Cowanesque and Antrim Railway Company purchased the Cowanesque Valley Railroad Company, incorporated April 9, 1869, under the laws of Pennsylvania. Pine Creek Railway Company, incorporated by act of Pennsylvania approved February 17, 1870 (ch. 136), under the name of Jersey Shore, Pine Creek and Buffalo Railway Company, name changed as above by a decree of the Court of Common Pleas of Tioga County, Pennsylvania, February 6, 1884. Leased to The New York Central and Hudson River Railroad Company by lease dated April 11, 1899, by Syracuse, Geneva and Corning Railway Company and Pine Creek Railway Company.

*Officers:* President, Alfred H. Smith; Vice-president, William K. Vanderbilt, jr.; Secretary, Dwight W. Pardee; Treasurer, Edward L. Rossiter.

*Corporate office:* Union Station, Albany, N. Y.

**New York and Harlem Railroad Company:** Incorporated by special act passed April 25, 1831 (ch. 263). See L. 1832, ch. 93; 1835, ch. 101; 1836, ch. 305; 1839, ch. 166; 1840, ch. 242; 1845, ch. 333; 1846, ch. 195, section 1, and ch. 200; 1848, ch. 143; 1849, chs. 75 and 317; 1852, ch. 152; 1853, ch. 28; 1855, ch. 297; 1859, ch. 387; 1867, ch. 880 (repealed 1881, ch. 537, section 1); 1868, ch. 278 (section 3 amended 1869, ch. 916; sections 3 and 4 repealed 1875, ch. 586, section 3); 1869, ch. 919 (section 3 amended 1886, ch. 661); 1872, ch. 702 (see 1875, ch. 485), and ch. 825; 1874, ch. 503, section 3 (amended 1881, ch. 454); 1884,

ch. 261; 1886, ch. 593, section 1, paragraph 6. See 1892, ch. 339 (sections 4 and 14 amended 1894, ch. 548; section 7 amended 1896, ch. 594; section 18 amended 1904, ch. 691). See L. 1894, ch. 548, section 3; and 1898, ch. 613; 1896, ch. 616; 1903, chs. 424 and 425 (section 8 amended 1904, ch. 639; section 3a added 1908, ch. 403; sections 5 and 8 amended 1910, ch. 555); 1905, ch. 731 (sections 3 and 6 amended 1907, ch. 736); 1911, ch. 777; 1912, ch. 356. June 8, 1880, The New York and Mahopac Rail Road Company, incorporated March 7, 1871, under the railroad law, surrendered its capital stock and was merged into New York and Harlem Railroad Company. Steam portion leased to The New York Central and Hudson River Railroad Company from April 1, 1873.

*Officers:* President, William K. Vanderbilt; Vice-president, William K. Vanderbilt, jr.; Secretary, Dwight W. Pardee; Treasurer, Milton S. Barger.

*Corporate office:* Grand Central Terminal, New York city.

**St. Lawrence and Adirondack Railway Company:** Incorporated May 4, 1888, under the laws of Canada; consolidated July 2, 1896, with the Southwestern Railway Company, incorporated May 22, 1888, by authority of an act of Parliament of Canada. November 18, 1895, St. Lawrence and Adirondack Railway Company was consolidated under the laws of New York and the Dominion of Canada with Malone and St. Lawrence Railway Company, incorporated September 10, 1891, under the railroad law. Operated under agreement by The New York Central and Hudson River Railroad Company.

As agent for St. Lawrence and Adirondack Railway Company, The New York Central and Hudson River Railroad Company also operates about 13 miles of line from Valley Field to Beauharnois, leased by St. Lawrence and Adirondack Railway Company from Grand Trunk Railway Company of Canada; and about 9 miles of trackage rights secured by St. Lawrence and Adirondack Railway Company from the Canadian Pacific Railway Company.

*Officers:* President, William C. Brown; Vice-president, Alfred H. Smith; Secretary, Dwight W. Pardee; Treasurer, Edward L. Rossiter.

*Corporate office:* 130 St. James street, Montreal, Canada.

**Troy and Greenbush Railroad Association:** Incorporated by special act passed May 14, 1845 (ch. 323). Leased in fee February 3, 1851, to The Hudson River Railroad Company (The New York Central and Hudson River Railroad Company, successor).

*Officers:* President, James A. Eddy; Vice-president, Le Grand C. Cramer; Secretary and Treasurer, E. C. Gale.

*Corporate office:* 59 First street, Troy, N. Y.

**The Wallkill Valley Railroad Company:** Incorporated July 2, 1877, as a reorganization of The Wallkill Valley Railway Company, incorporated April 26, 1866, under the railroad law. Leased to The New York Central and Hudson River Railroad Company April 11, 1899.

*Officers:* President, William H. Newman; Vice-president, William C. Brown; Secretary, Dwight W. Pardee; Treasurer, Edward L. Rossiter.

*Corporate office:* Kingston, N. Y.

**West Shore Railroad Company:** Incorporated December 5, 1885, as a reorganization of New York, West Shore and Buffalo Railway Company, incorporated February 18, 1880, under the railroad law (amended certificate filed May 9, 1881). The New York, West Shore and Buffalo Railway Company was consolidated June 14, 1881, with the North River Railroad Company, a corporation organized under the laws of the States of New York and New Jersey, formed May 5, 1881 (amended certificate filed May 9, 1881), by consolidation of the North River Railway Company, a corporation organized April 3, 1880, under the railroad law (amended certificate filed June 14, 1880), and Jersey City and Albany Railway Company of the States of New York and New Jersey. Jersey City and Albany Railway Company of the States of New York and New Jersey was formed January 28, 1879, by consolidation under the laws of New York and New Jersey, and especially an act of New Jersey entitled "An Act to enable the Ridgefield Park Railroad Company, a corporation of the State of New Jersey, and the Rockland Central Railroad Company, a corporation of the State of New York, to consolidate their stock and connect with other companies," approved March 7, 1873 (ch. 155), of The Jersey City and Albany Railway Company, incorporated in New York October 12, 1878, as a reorganization of The Jersey City and Albany Railroad Company, and The Jersey City and Albany Railway Company of New Jersey, also a reorganization of The Jersey City and Albany Railroad Company under a statute of New Jersey entitled "An act in relation to the number of directors of railroad, canal or turnpike companies which have been or may hereafter be sold under foreclosure and reorganized, and the consolidation of such companies when partly within and partly without the State," approved March 14, 1878 (ch. 67). A certificate of incorporation of The Jersey City and Albany Railroad Company was filed in the office of the Secretary of State of New York June 24, 1873, as a consolidation of The Rockland Central Rail Road Company,

incorporated under the railroad law May 23, 1870, and The Ridgefield Park Railroad Company, incorporated by special act of New Jersey approved April 4, 1867 (ch. 320). The Rockland Central Rail Road Company was consolidated July 29, 1872, with the Rockland Central Extension Rail Road Company, organized May 29, 1872, under the railroad law. June 30, 1891, West Shore Railroad Company took a surrender of the capital stock of The Syracuse, Ontario and New York Railway Company, incorporated June 20, 1883, under the railroad law. The last named company acquired by agreement of purchase the railroad formerly belonging to The Syracuse, Chenango and New York Rail Road Company, incorporated April 7, 1877, as a reorganization of Syracuse and Chenango Rail Road Company, incorporated May 14, 1873. By L. 1873, ch. 782, this company was authorized to purchase the property and franchises of Syracuse and Chenango Valley Rail Road Company, incorporated April 16, 1868, under the railroad law. See L. 1868, ch. 541, and ch. 570 (section 2 amended L. 1871, ch. 789); and 1871, ch. 334. April 11, 1881, an agreement of consolidation of The Syracuse, Chenango and New York Rail Road Company with Boston, Hoosac Tunnel and Western Railway Company and other companies was filed in the office of the Secretary of State. Leased to The New York Central and Hudson River Railroad Company December 5, 1885.

*Officers:* President, Alfred H. Smith; Vice-president, William K. Vanderbilt, jr.; Secretary, Dwight W. Pardee; Treasurer, Edward L. Rossiter.

*Corporate office:* Union Station, Albany, N. Y.

### **The New York, Chicago and St. Louis Railroad Company**

*Organization:* Incorporated August 15, 1887, as a consolidation of The New York, Chicago and St. Louis Railroad Company, incorporated under the railroad law June 22, 1887, and The Erie and State Line Railroad Company of Pennsylvania, incorporated June 27, 1887, under the laws of Pennsylvania. These two companies bought from the purchasers the portions of the line of New York, Chicago and St. Louis Railway Company in the respective States of New York and Pennsylvania, which line was sold under foreclosure in May, 1887. The portions of the line in the States of Ohio, Indiana, and Illinois, respectively, were bought from the purchasers by the following corporations: The Cleveland and State Line Railroad Company, incorporated under the laws of Ohio August 15, 1887; The Fort Wayne and Illinois Railroad Company, incorporated under the laws of Indiana June 28, 1887; and The Chicago and State Line Railroad Company, incorporated under the laws of Illinois June 30, 1887. The first two companies named, those organized under the laws of Ohio and Indiana, consolidated September 27, 1887, with The New York, Chicago and St. Louis Railroad Company under the name of The New York, Chicago and St. Louis Railroad Company. New York, Chicago and St. Louis Railway Company (original company whose line was sold under foreclosure) was incorporated under the laws of the five States of New York, Pennsylvania, Ohio, Indiana, and Illinois as a consolidated company, by agreement dated April 8, 1881, filed with the Secretary of State of New York April 12, 1881, of the following named companies: Buffalo, Cleveland and Chicago Railway Company of New York, incorporated October 7, 1880, under the railroad law; Buffalo, Cleveland and Chicago Railway Company of Pennsylvania, incorporated January 15, 1881, under the laws of Pennsylvania; The New York and Chicago Railway Company, incorporated about March 15, 1881, under the laws of Ohio; The New York and Chicago Railway Company of Indiana, incorporated March 4, 1881, under the laws of Indiana; and The New York and Chicago Railway Company of Illinois, incorporated March 23, 1881, under the laws of Illinois.

*Location of line within State:* Main line extends from Buffalo to Chicago via Cleveland, Ohio, and Fort Wayne, Ind.; that portion within the State of New York extends from Buffalo to Pennsylvania-State line west of Ripley.

*Officers:* President, W. H. Canniff; Secretary, D. W. Pardee; Treasurer, M. S. Barger.

*Main business office:* 805 Euclid avenue, Cleveland, Ohio.

**The New York, New Haven and Hartford Railroad Company**

**Organization:** May 31, 1907, The Consolidated Railway Company, organized August 31, 1901, and The New York, New Haven and Hartford Railroad Company, organized August 6, 1872, merged under the name of The New York, New Haven and Hartford Railroad Company. The Consolidated Railway Company was chartered as The Thompson Tramway Company by the State of Connecticut by special act approved April 30, 1901 (Special Laws, vol. 13, p. 747), and the corporate name was changed by the Superior Court for New Haven County January 24, 1902, to The Worcester and Connecticut Eastern Railroad Company, and was again changed by the Superior Court for New Haven County on May 18, 1904, to The Consolidated Railway Company. The New York, New Haven and Hartford Railroad Company was incorporated under authority of act of Connecticut approved July 26, 1871 (ch. 129), by consolidation of The New York and New Haven Railroad Company (incorporated by special act of Connecticut passed 1844 [Private Laws 1836-1856, vol. 4, p. 1020]) and the Hartford and New Haven Railroad Company. The New York, New Haven and Hartford Railroad Company was given the right to extend its railroad from the Connecticut-State line to the New York and Harlem railroad by special act passed May 11, 1846 (ch. 195), assented to by an act of Connecticut passed 1846 (Private Laws, vol. 4, p. 1025). By special act passed March 29, 1848 (ch. 143), The New York and New Haven Railroad Company was authorized to run its cars over the road of the New York and Harlem Railroad Company from the point of junction of said roads at or near Williams Bridge (Woodlawn Junction) to the city of New York, and as far into the city as the Harlem railroad may extend.

**Location of lines within State:** Main line extends from New York city to New Haven and Hartford, Conn., Springfield, Mass. (thence over the Boston and Albany railroad to Boston), and also to Boston direct via New Haven and Providence, with main line branches to Pittsfield, Mass., and Worcester, Mass. That portion of the main line within the State extends from Woodlawn Junction to the Connecticut-State line.

**Officers:** Chairman of the Board, Howard Elliott; President, J. H. Hustis; Vice-president, Benjamin Campbell; Secretary, A. E. Clark; Treasurer, A. S. May.

**Main business office:** Corner Meadow and Water streets, New Haven, Conn.

**Lessor Company:**

**The Harlem River and Port Chester Railroad Company:** Incorporated by special act passed April 23, 1866 (ch. 763, section 1 amended L. 1869, ch. 722; section 8 repealed L. 1869, ch. 722). See also L. 1871, ch. 605; 1873, ch. 48; and 1905, ch. 670. Leased to The New York, New Haven and Hartford Railroad Company September 29, 1873, effective October 1, 1873.

**Officers:** President, Howard Elliott; Vice-president, James H. Hustis; Secretary, A. E. Clark; Treasurer, A. S. May.

**Corporate office:** Grand Central Terminal, New York city.

**New York, Ontario and Western Railway Company**

**Organization:** Organized January 11, 1880, as a reorganization (see L. 1874, ch. 430, as amended by L. 1876, ch. 446) of New York and Oswego Midland Railroad Company, incorporated January 11, 1866, under the railroad law.

**Location of lines within State:** Main line extends from Weehawken, N. J., via Cornwall (trackage over West Shore railroad to Cornwall) to Oswego, with main line branches to Ellenville and Kingston, Delhi, New Berlin and Edmeston, Port Jervis and Monticello, Cadosia to Scranton, Penna., and Randallville to Utica and Rome. At Earlville it connects with the Chenango branch of the West Shore railroad (The New York Central and Hudson River Railroad Company, lessee) for the West.

**Officers:** Chairman, Howard Elliott; President, John B. Kerr; Secretary and Treasurer, Richard D. Rickard.

**Main business office:** Grand Central Terminal, New York city.

**Lessor Companies:**

**Ellenville and Kingston Railroad Company:** Incorporated March 29, 1901, under the railroad law. Operated by New York, Ontario and Western Railway Company under lease or agreement dated July 1, 1905.

**Officers:** Vice-president, John B. Kerr; Secretary and Treasurer, R. D. Rickard.

**Corporate office:** Ellenville, N. Y.

**Ontario, Carbondale and Scranton Railway Company:** Incorporated October 3, 1889, as a consolidation of The Scranton and Forest City Railroad Company, incorporated November 21, 1888, under the laws of Pennsylvania; The Forest City and State Line Railroad Company, incorporated March 16, 1889, under the laws of Pennsylvania; and The Hancock and Pennsylvania Railroad Company, incorporated April 2, 1889, under the railroad law. Leased to New York, Ontario and Western Railway Company May 10, 1890.

**Officers:** Vice-president, John B. Kerr; Secretary and Treasurer, R. D. Rickard.

**Corporate office:** Peoples' National Bank Building, Scranton, Penna.

**Pecksport Connecting Railway Company:** Incorporated April 29, 1896, under the railroad law. Operated by New York, Ontario and Western Railway Company, which owns all its capital stock.

**Officers:** President, James E. Childs; Secretary, Arthur L. Parmelee; Treasurer, R. D. Rickard.

**Corporate office:** Grand Central Terminal, New York city.

**Port Jervis, Monticello and Summitville Railroad Company:** Incorporated December 5, 1902, as a reorganization of Port Jervis, Monticello and New York Railroad Company, incorporated November 17, 1886, under the railroad law. Operated by New York, Ontario and Western Railway Company under lease or agreement dated July 1, 1905.

**Officers:** Vice-president, John B. Kerr; Secretary and Treasurer, R. D. Rickard.

**Corporate office:** Port Jervis, N. Y.

**Rome and Clinton Rail Road Company:** Incorporated June 3, 1869, under the railroad law. See L. 1869, ch. 592; 1870, ch. 505; 1880, ch. 249; and 1882, ch. 22. Leased to Delaware and Hudson Canal Company January 1, 1891.

**Officers:** President, Clinton Scollard; Vice-president, John S. Wardwell; Secretary and Treasurer, R. U. Hayes.

**Corporate office:** West Park Row, Clinton, N. Y.

**Utica, Clinton and Binghamton Railroad Company:** Incorporated August 13, 1862, under the name of Utica City Rail Road Company; name changed March 20, 1866, by authority of special act passed April 13, 1864 (ch. 177; see also L. 1866, ch. 827), to The Utica and Waterville Railroad Company (see amended certificate filed September 26, 1867), and again by special act passed March 25, 1868 (ch. 51), to The Utica, Clinton and Binghamton Railroad Company (see L. 1869, ch. 77; 1870, ch. 794; 1871, ch. 350; 1873, ch. 289; and 1884, ch. 98). Steam line, Utica to Randallville, sub-leased from the Delaware and Hudson Canal Company, lessee, May 26, 1886, and The Delaware and Hudson Company, successor, April 30, 1908.

**Officers:** President, E. B. Woolworth; Vice-president, Clinton Scollard; Secretary and Treasurer, C. S. Symonds.

**Corporate office:** 108 Genesee street, Utica, N. Y.

**Wharton Valley Railway Company:** Incorporated June 12, 1888, under the railroad law. Operated by New York, Ontario and Western Railway Company under lease or agreement dated August 4, 1888, effective October 1, 1888.

**Officers:** President, Thomas P. Fowler; Secretary and Treasurer, Richard D. Rickard.

**Corporate office:** Grand Central Terminal, New York city.

**New York, Susquehanna and Western Railroad Company**

**Organization:** New York, Susquehanna and Western Railroad Company was incorporated May 26, 1881, as a consolidation under the general laws of New Jersey and Pennsylvania of The Paterson Extension Railroad Company, incorporated April 14, 1881; Midland Railroad Company of New Jersey, incorporated March 25, 1880; the Midland Connecting Railway Company, incorporated May 3, 1881; The North Jersey Railroad Company, incorporated May 2, 1881; all incorporated under the laws of New Jersey; The Water Gap Railroad Company, incorporated May 21, 1880, and The Pennsylvania Midland Rail-

way Company, incorporated May 24, 1881, the last two named companies incorporated under the laws of Pennsylvania. The New York, Susquehanna and Western Railroad Company was consolidated April 25, 1893, under the laws of New Jersey and Pennsylvania, with the Hudson River Railroad and Terminal Company, incorporated under the laws of New Jersey.

Report covers entire year's operations, although the corporation was within the jurisdiction of the Commission only to December 1, 1913, the effective date of the transfer to Middletown and Unionville Railroad Company of the road of the Middletown, Unionville and Water Gap Railroad Company. To December 1, 1913, this line was operated under contract by New York, Susquehanna and Western Railroad Company, being the only line in New York state operated by that corporation.

*Officers:* President, F. D. Underwood; Vice-president, G. F. Brownell; Secretary, David Bosman; Treasurer, D. W. Bigoney.

*Main business office:* 59 Church street, New York city.

#### Niagara Junction Railway Company

*Organization:* Incorporated May 27, 1892, under the railroad law.

*Location of line:* Niagara county; a connecting road at Niagara Falls, operating for freight traffic Portage Road, Niagara Falls to Fletcher's Corners, town of Niagara, where it connects with the Rochester, Lockport and Niagara Falls line of the New York Central and Hudson River railroad; there is also a connection with the Erie railroad at Echota, about 2.2 miles east of Niagara Falls.

*Officers:* President, Edward A. Wickes; Vice-president, Philip P. Barton; Secretary, Frederick L. Lovelace; Treasurer, W. Paxton Little.

*Main business office:* Power House, Buffalo avenue, Niagara Falls, N. Y.

#### The Northern Central Railway Company

*Organization:* The Northern Central Railway Company was formed by consolidation December 9, 1854, pursuant to special statute of Pennsylvania approved May 3, 1854 (ch. 531), and special statute of Maryland passed March 10, 1854 (ch. 250), of Baltimore and Susquehanna Railroad Company, incorporated under special act of Maryland passed February 13, 1828 (ch. 72, see L. 1827-8), York and Maryland Line Railroad Company, incorporated under special act of Pennsylvania approved March 14, 1832 (ch. 78, see L. 1831-2), York and Cumberland Railroad Company, incorporated under special act of Pennsylvania approved April 21, 1846 (ch. 421, see L. 1848), and Susquehanna Railroad Company, incorporated by special act of Pennsylvania approved April 14, 1851 (ch. 337).

*Location of lines within State:* The main line of the Elmira and Lake Ontario railroad extends from Chemung Junction to Canandaigua. The Lake branch, for freight only, extends from Canandaigua yard to Canandaigua Lake. Sodus Bay branch extends from Stanley to Sodus Point. The main line of Elmira and Williamsport Railroad Company extends from Williamsport, Penna., to Elmira.

*Officers:* President, Samuel Rea; Vice-president, W. W. Atterbury; Secretary, Lewis Neilson; Treasurer, James F. Fahnestock.

*Main business office:* Broad Street Station, Philadelphia, Penna.

#### Lessor Companies:

*The Elmira and Lake Ontario Railroad Company:* Formed by consolidation December 31, 1886, of The Chemung Railroad Company, incorporated by special act passed May 14, 1845 (ch. 350), The Elmira, Jefferson and Canandaigua Railroad Company, incorporated February 18, 1859, as a reorganization of the Canandaigua and Elmira Railroad Company, new name assumed September 14, 1852, by The Canandaigua and Corning Railroad Company, incorporated by special act passed May 14, 1845 (ch. 328). December 31, 1888, The Canandaigua Lake Railroad Com-

pany, incorporated July 21, 1887, under the railroad law, surrendered its capital stock and was merged into The Elmira and Lake Ontario Railroad Company. Operated by The Northern Central Railway Company, as agent, since February 15, 1887.

*Officers:* President, A. J. County; Vice-president, Henry Tattall; Secretary, Lewis Neilson; Treasurer, James F. Fahnestock. *Corporate office:* 85 Cedar street, New York city.

*Elmira and Williamsport Railroad Company:* Incorporated by special act passed April 21, 1832 (ch. 216). Leased to The Northern Central Railway Company April 15, 1863.

*Officers:* President, W. D. Neilson; Secretary, Lewis Neilson; Treasurer, Lewis P. Geiger, jr.

*Corporate office:* Broad Street Station, Philadelphia, Penna.

#### Norwood and St. Lawrence Railroad Company

*Organization:* Incorporated March 30, 1901, under the railroad law, and consolidated January 21, 1909, with Raymondville and Waddington Railroad Company, incorporated February 8, 1907, under the railroad law.

*Location of line:* St. Lawrence county; extends from Norwood, where it connects with the Rome, Watertown and Ogdensburg division of the New York Central and Hudson River railroad and Rutland railroad, to Waddington, on the St. Lawrence river.

*Officers:* President, John Weekes. Vice-president, J. A. Remington; Secretary, R. J. Buck; Treasurer, F. M. Hugo.

*Main business office:* Norfolk, N. Y.

#### Otis Railway Company

*Organization:* Incorporated June 26, 1899, as a reorganization of Otis Elevating Railway Company, incorporated November 25, 1885, under the railroad law.

*Location of line:* Greene county; extends from Otis Junction to Otis Summit.

*Officers:* President, A. V. S. Olcott; Secretary, W. T. Hawley; Treasurer, T. E. Jones.

*Main business office:* 70 Water street, Catskill, N. Y.

#### The Owasco River Rail Way

*Organization:* Incorporated June 2, 1881, under the railroad law.

*Location of line:* Cayuga county; connects with the yard of the Auburn branch of the New York Central and Hudson River railroad at Auburn and extends to the International Harvester Company's works.

*Officers:* President, F. B. Montgomery; Vice-president, S. D. Snow; Secretary, F. M. Morton; Treasurer, C. W. Embody.

*Main business office:* 606 Michigan avenue, Chicago, Ill.

#### The Pennsylvania Railroad Company

*Organization:* The Pennsylvania Railroad Company was incorporated by authority of special act of Pennsylvania approved April 13, 1846 (ch. 363), letters patent issued February 25, 1847.

*Location of lines within State:* The main lines extend from Buffalo to Emporium Junction, Penna., and from Buffalo to Oil City, Penna., respectively, with branches Olean to Rochester, and Olean to Warren, Penna. At Emporium Junction connection is made with the Erie division of the Pennsylvania railroad for Williamsport, Harrisburg, Philadelphia, and New York. At Oil City connection is made for Pittsburgh and western points, the main line of the Pennsylvania railroad being reached at both Harrisburg and Pittsburgh. Within the First Public Service District The Pennsylvania Railroad Company has an operating agreement with Pennsylvania Tunnel and Terminal Railroad Company.

*Officers:* President, Samuel Rea; Vice-president, W. W. Atterbury; Secretary, Lewis Neilson; Treasurer, J. F. Fahnestock.

*Main business office:* Broad Street Station, Philadelphia, Penna.

*Lessor Companies:*

**The Union Terminal Railroad Company of the City of Buffalo:** Incorporated June 12, 1884, under the railroad law. Proprietary corporation of Western New York and Pennsylvania Railroad Company, and operation by The Pennsylvania Railroad Company is through its lease of the latter. Leased to the Buffalo, New York and Philadelphia Railroad Company June 12, 1884.

*Officers:* President, John P. Green; Vice-president, A. J. County; Secretary, R. H. Groff; Treasurer, J. F. Fahnestock.

*Corporate office:* 85 Cedar street, New York city.

**Western New York and Pennsylvania Railway Company:** The Western New York and Pennsylvania Railroad Company was formed by consolidation March 18, 1895, of North Western Pennsylvania Railway Company, the certificate of incorporation dated February 25, 1895, and filed in the office of the Secretary of the Commonwealth of Pennsylvania March 18, 1895, and Western New York Railway Company, incorporated under the railroad law of New York February 28, 1895, as a reorganization of the Western New York and Pennsylvania Railroad Company, which last named company was a consolidation November 23, 1887, of the Western New York and Pennsylvania Railway Company of New York, incorporated October 12, 1887, as a reorganization of the Buffalo, New York and Philadelphia Railroad Company, and Western New York and Pennsylvania Railway Company of Pennsylvania, a Pennsylvania corporation. The Buffalo, New York and Philadelphia Railroad Company was a consolidation February 14, 1883, of The Buffalo, New York and Philadelphia Railway Company, The Olean and Salamanca Railroad Company, incorporated under the railroad law of New York October 21, 1882, The Oil City and Chicago Railroad Company, a Pennsylvania corporation; and The Buffalo, Pittsburg and Western Railroad Company, incorporated January 22, 1881, by consolidation of The Pittsburg, Titusville and Buffalo Railway Company, The Salamanca, Bradford and Allegheny River Railroad Company of New York, incorporated December 11, 1880, The Salamanca, Bradford and Allegheny River Railroad Company of Pennsylvania, a Pennsylvania corporation, The Buffalo, Pittsburg and Western Railway Company, incorporated September 29, 1880, and The Titusville and Oil City Railway Company, a Pennsylvania corporation. The Buffalo and Washington Railroad Company was incorporated February 7, 1865, and consolidated December 11, 1865, under authority of special act passed April 14, 1865 (ch. 439), with Buffalo and Allegheny Valley Railroad Company, incorporated under the railroad law May 30, 1853, to form the Buffalo and Washington Railway Company, the name of which was afterward changed by special act passed April 12, 1871 (ch. 429), to The Buffalo, New York and Philadelphia Railway Company, one of the constituent companies consolidated to form the Buffalo, New York and Philadelphia Railroad Company. The Pittsburg, Titusville and Buffalo Railway Company was formed by consolidation February 17, 1880, of The Buffalo, Chautauqua Lake and Pittsburg Railway Company, and the Pittsburg, Titusville and Buffalo Railway Company, a Pennsylvania corporation. The Buffalo, Chautauqua Lake and Pittsburg Railway Company was a consolidation May 3, 1879, of the Dunkirk, Chautauqua Lake and Pittsburg Railroad Company and The Corry and State Line Railroad Company, a Pennsylvania corporation. The Dunkirk, Chautauqua Lake and Pittsburg Railroad Company was a reorganization of the Buffalo, Corry and Pittsburg Railroad Company, formed by consolidation October 15, 1867, of The Buffalo and Oil Creek Cross Cut Railroad Company, incorporated July 19, 1865, under the railroad law, and the Cross Cut Railroad Company in the State of Pennsylvania, a Pennsylvania corporation, under authority of special act passed April 24, 1867 (ch. 753). Leased to The Pennsylvania Railroad Company October 22, 1902.

The following proprietary corporations of Western New York and Pennsylvania Railway Company are nominally sublessors under its lease to The Pennsylvania Railroad Company, but are considered for all practical purposes as merged: Olean, Bradford and Warren Railroad Company, incorporated October 17, 1877, under the railroad law and an act to facilitate the construction of narrow gauge railroads. Pennsylvania and Rochester Railroad Company, formed November 15, 1912, by consolidation of The Genesee Valley Canal Railroad Company, incorporated July 16, 1880, under the railroad law; and The Genesee Valley Terminal Railroad Company incorporated August 14, 1882, under the railroad law. The property of the two constituent corporations had been leased since December 8, 1881, and November 1, 1882, respectively, to The Buffalo, New York and Philadelphia Railway Company, a constituent of the Western New York and Pennsylvania Railway Company. The Rochester, New York and Pennsylvania Railroad Company (leased to the Buffalo, New York and Philadelphia Railway Company December 8, 1881), incorporated February 14, 1881, as a reorganization of Rochester, Nunda and Pittsburg Railroad Company, incorporated June 27, 1877 (also consolidated July 11, 1881, with same company under the name of The Rochester, New York, and Pennsylv-

ania Rail Road Company), as a reorganization of Rochester, Nunda and Pennsylvania Rail Road Company, originally incorporated April 9, 1870, and March 18, 1872, consolidated with The Rochester, Nunda and Pennsylvania Extension Rail Road Company incorporated January 10, 1872, and The Northern Extension of the Rochester, Nunda and Pennsylvania Railroad Company, incorporated January 12, 1872 (L. 1872, ch. 764). February 14, 1873, the consolidated company was consolidated with The Northern Rail Road and Navigation Company, incorporated by act of Pennsylvania approved March 23, 1867 (No. 1275; see also No. 1278, Session Laws 1869). See L. 1873, ch. 24, ratifying the consolidation; L. 1873, chs. 291 and 532; and L. 1872, ch. 183; 1874, ch. 248; and 1876, ch. 377; the latter all repealed by L. 1907, ch. 755, section 638 (L. 1876, ch. 377, repealed by construction, by L. 1880, ch. 14, section 2).

*Officers:* President, John P. Green; Vice-president, A. J. County; Secretary, Lewis Neilson; Treasurer, J. F. Fahnestock.

*Corporate office:* Broad Street Station, Philadelphia, Penna.

**The Philadelphia and Reading Coal and Iron Company**

*Organization:* Incorporated under the laws of Pennsylvania.

Returns not tabulated. Operates under lease road of The Central Dock and Terminal Railway Company "for the purpose of handling and shipping its own coal, from which it receives no revenue".

*Location of line:* Extends from Georgia Street dock, where it connects with the Buffalo and Niagara Falls branch of the New York Central and Hudson River railroad, about one mile west of Terrace station, to a point near Walden avenue, in Buffalo.

*Officers:* President, W. J. Richards; Secretary, W. G. Brown; Treasurer, H. E. Paisley.

*Main business office:* Reading Terminal, Philadelphia, Penna.

*Lessor Company:*

**The Central Dock and Terminal Railway Company:** Incorporated May 31, 1889, under the railroad law. Leased January 1, 1891, to Philadelphia and Reading Railroad Company for a term of years expiring March 1, 1910. Lease assumed by Philadelphia and Reading Railway Company December 1, 1896, on reorganization of original lessee. Lease assigned to The Philadelphia and Reading Coal and Iron Company November 14, 1905. Extended to January 1, 1916, and terms modified by subsequent agreements.

*Officers:* President, Ira A. Place; Secretary, George Ziegler; Treasurer, H. E. Paisley.

*Corporate office:* Grand Central Terminal, New York city.

**The Pittsburg, Shawmut and Northern Railroad Company**

*Organization:* Incorporated August 2, 1899, as a consolidation, under the railroad laws of New York and Pennsylvania, of The Central New York and Western Railroad Company and The Pittsburg, Shawmut and Northern Railroad Company, a Pennsylvania corporation. The Central New York and Western Railroad Company was incorporated in the State of New York November 18, 1892, as a reorganization of The Lackawanna and Southwestern Railroad Company, incorporated May 7, 1889, as a reorganization of The Lackawanna and Pittsburgh Railroad Company, incorporated under the railroad law November 1, 1882, and consolidated June 1, 1883, with the Allegany Central Railroad Company; which in turn was a consolidation November 21, 1881, of the Olean Railroad Company, incorporated under the railroad law May 2, 1881; The Friendship Railroad Company, incorporated under the railroad law May 10, 1881; and The Allegany Central Railroad Company, incorporated September 29, 1881, under the railroad law. The Lackawanna and Southwestern Railroad Company was consolidated October 2, 1889, with The Rochester, Hornellsville and Lackawanna Railroad Company, incorporated June 9, 1886, under the railroad law, under the name of the former company. The Central New York and Western Railroad Company and The Central New York and Northern Railroad Company, incorporated under the railroad law April 20, 1899, were consolidated August 1, 1899, under the name of the

former. The Pittsburg, Shawmut and Northern Railroad Company (Pennsylvania corporation) was formed by consolidation July 13, 1899, under the laws of Pennsylvania, of the Smethport and Olean Railroad Company, organized 1895, under the laws of Pennsylvania; The Mt. Jewett, Clermont and Northern Railroad Company, incorporated May 24, 1897, as a consolidation of The Mt. Jewett and Smethport Railroad Company, organized May 27, 1892, under the laws of Pennsylvania, and The Emporium and Mt. Jewett Railroad Company, organized under the laws of Pennsylvania October 28, 1895; The Buffalo, St. Mary's and Southwestern Railroad Company, a consolidation January 28, 1897, of The St. Mary's and Southwestern Railroad Company, organized June 19, 1893, under the laws of Pennsylvania, and The Buffalo and St. Mary's Railroad Company, organized June 5, 1895, under the laws of Pennsylvania; and The Mill Creek Valley Railroad Company, incorporated 1899, under the laws of Pennsylvania. The Shawmut Connecting Railroad Company, incorporated under the railroad law of New York August 1, 1900, was merged January 21, 1905, with The Pittsburg, Shawmut and Northern Railroad Company. August 1, 1905, by orders of the Supreme Court of the State of New York and of the Circuit Court of the United States for the Western District of Pennsylvania, Frank Sullivan Smith was appointed receiver of The Pittsburg, Shawmut and Northern Railroad Company at the suit of the Central Trust Company, trustee under the general railroad mortgage of The Pittsburg, Shawmut and Northern Railroad Company. Operates by contract Pittsburg and Shawmut railroad in Pennsylvania. The Pittsburg, Shawmut and Northern Railroad Company also operates under lease a piece of road formerly the property of The Rochester, Hornellsville and Lackawanna Railroad Company, now owned by Frank Sullivan Smith and John Byrne, personally. The Rochester, Hornellsville and Lackawanna Railroad Company was incorporated June 9, 1886, under the railroad law. The property of the company, after litigation, was sold at foreclosure and purchased in 1892 by its present owners, by whom it is leased to The Pittsburg, Shawmut and Northern Railroad Company. The road extends from Moraine to Hornell, in Steuben county, a distance of about ten miles.

*Location of line within State:* Main line extends from Wayland Junction (Wayland by trackage over the Delaware, Lackawanna and Western railroad) to Smethport, St. Mary's, Hyde, and Ramsaytown, Penna., with main line branches to Hornell, Olean, Hallton, Penna., and other points. That portion within the State extends from Wayland to Pennsylvania-State line.

*Officers:* Acting President and Receiver, Frank Sullivan Smith; Secretary, Lewis F. Wilson; Comptroller, H. S. Hastings.

*Main business office:* St. Mary's, Penna.

#### **Port Chester Terminal Railroad Company**

*Organization:* Incorporated July 12, 1901, under the railroad law.

Returns not tabulated. This corporation, controlled through ownership of entire capital stock by Russell, Birdsall and Ward Bolt and Nut Company, operates a railroad in connection with the properties of the above named company, the road extending from that company's yards to the tracks of The New York, New Haven and Hartford Railroad Company at Port Chester, N. Y., a distance of 0.542 mile. The balance sheet as of June 30, 1914, against a total investment in road and equipment of \$11,513, shows capital stock of \$10,000 and loans and bills payable of \$1513. No income account for the year is reported.

*Officers:* President, Samuel Comly; Secretary, Elwood Burdsall; Treasurer, Richard H. Burdsall.

*Main business office:* Midland avenue, Port Chester, N. Y.

#### **Raquette Lake Railway Company**

*Organization:* Incorporated February 7, 1899, as a street surface railroad. Motive power: steam, generated with oil as fuel, pursuant to authority granted by amendment to section 100 (now 180) of the railroad law by L. 1900, ch. 679.

*Location of line:* Herkimer and Hamilton counties; extends from Carter (formerly Clearwater) to Raquette Lake.

*Officers:* President, W. S. Webb; Vice-president, W. P. Hamilton; Secretary, C. E. Snyder; Treasurer, T. J. Regan.

*Main business office:* Grand Central Terminal, New York city.

#### **Rutland Railroad Company**

*Organization:* Incorporated July, 1867, under charter of Vermont approved March 28, 1867 (special session, ch. 3), as a reorganization of a company originally incorporated as Champlain and Connecticut River Railroad Company by special act of Vermont passed November 1, 1843 (ch. 54), and charter modified and name changed to Rutland and Burlington Railroad Company November 1, 1847, and reorganized as above, forming Rutland Railroad Company. Rutland Railroad Company was consolidated January 18, 1901, under act of Vermont approved October 29, 1900 (ch. 153), and under the railroad law of New York (certificate filed in New York state October 28, 1901), with Ogdensburg and Lake Champlain Railway Company, Bennington and Rutland Railway Company, and Rutland-Canadian Railroad Company. Ogdensburg and Lake Champlain Railway Company was incorporated by special act passed May 14, 1845 (ch. 324), as The Northern Railroad Company, and name changed by special act passed April 13, 1855 (ch. 401), to Ogdensburg and Lake Champlain Railroad Company; reorganized January 6, 1858, under name of Ogdensburg Railroad Company, and transferred to Ogdensburg and Lake Champlain Railroad Company, incorporated June 18, 1864, pursuant to special act passed March 31, 1857 (ch. 199), as revised and amended by special act passed April 8, 1864 (ch. 142). This transfer was made under date of August 1, 1865, and in the name of The Northern Railroad Company, the original mortgagor.

Interchange of freight and passengers between Central Vermont railroad and Ogdensburg and Lake Champlain railroad at Rouses Point is regulated by special act passed June 29, 1882 (ch. 364), and power to lease or own and operate steamboats on St. Lawrence river and upper lakes is conferred by special act passed May 12, 1884 (ch. 271).

By special act passed March 9, 1847 (ch. 25), The Northern Railroad Company was authorized to construct branches to connect with lines to be constructed in Canada East. Bennington and Rutland Railroad Company was incorporated under special act of Vermont approved November 5, 1845 (ch. 28), as Western Vermont Railroad Company, and reorganized August 1, 1865, under name of Bennington and Rutland Railroad Company; name changed to Bennington and Rutland Railway Company under articles of association dated August 8, 1877. Rutland-Canadian Railroad Company was incorporated under charter approved by the legislature of Vermont November 4, 1898 (ch. 160).

Rutland Railroad Company was also consolidated under the railroad law of New York (certificate filed in New York state December 24, 1901), and under above act of Vermont approved October 29, 1900 (ch. 153), with Chatham and Lebanon Valley Railroad Company. The Chatham and Lebanon Valley Railroad Company was originally incorporated as Lebanon Springs Railroad Company, organized March 25, 1852, under the railroad law.

By special acts passed March 8, 1853 (ch. 25), and June 24, 1853 (ch. 461), an extension of the Lebanon Springs railroad into Massachusetts and Vermont was authorized. By special act of Massachusetts passed April 21, 1853 (ch. 168), the Williamstown and Hancock Railroad Company was consolidated with the Lebanon Springs Railroad Company. By special act passed April 9, 1864 (ch. 145), the Lebanon Springs Railroad Company was authorized to change its terminus from Massachusetts-State line, as stated in the articles of association, to any point within the town of Hoosick, Rensselaer county, or the town of White Creek. The Lebanon Springs Railroad Company was consolidated August 20, 1867, under the laws of New York and Vermont, with Vermont and New York Railroad Company, organized under act of Vermont approved November 2, 1865 (ch. 134). April 25, 1870, the Lebanon Springs Railroad Company was consolidated with the Bennington and Rutland Railroad Company (see above, and special act of Vermont approved November 21, 1867 [ch. 155]), under the name of Harlem Extension Railroad Company; the property was operated as the Harlem Extension division of New York, Boston and Montreal Railway Company, incorporated under the railroad law January 21, 1873, for a short time. December 1, 1873, it was leased to Central Vermont Railroad Company and operated by that company until 1877. September 16, 1877, Harlem Extension Railroad South Cove Transportation Company assumed operation for the bondholders. Receiver appointed October 1, 1880, and road sold under foreclosure June 12, 1885, to a syndicate of bondholders who transferred it April 1, 1886, to the New York, Rutland and Montreal Railway Company, incorporated December 21, 1883, under the railroad law, for the purpose of consolidating the Lebanon Springs Railroad Company with Bennington and Rutland Railroad Company. February 27, 1888, Lebanon Springs railroad passed into the hands of a receiver, and was reorganized September 23, 1899, under the name of Chatham and Lebanon Valley Railroad Company.

*Location of lines within State:* The main line extends from White Creek (connection for Troy and Albany) and Bellows Falls, Vt. (connection for Boston), to Alburgh, Vt., and Noyan Junction, Que. (connection for Montreal), with branch to Addison Junction (Ticonderoga); and from Alburgh, Vt., to Ogdensburg. The Chatham division extends from Chatham to North Bennington, Vt., on the main line. No portion of the main line, White Creek to Canada line, is in the State. Of the Chatham division, that portion from Chatham to Vermont-State line, North Bennington, is within the State. The main line, Alburgh, Vt., to Ogdensburg, is within the State.

*Officers:* President, Alfred H. Smith; Vice-president, Howard Elliott; Secretary, Dwight W. Pardee; Treasurer, Edward L. Rossiter.

*Main business office:* Merchants Row, Rutland, Vt.

*Lessor Company:*

**Addison Railroad Company:** Incorporated under special act of Vermont dated November 2, 1867 (No. 154). Leased to the Rutland Railroad Company December 7, 1870. It holds under a 999 years' lease dating from January 14, 1873, 0.85 mile from the Vermont-State line to Addison Junction, formerly owned by The Whitehall and Plattsburgh Railroad Company, now a constituent corporation of The Delaware and Hudson Company. This road, from Vermont-State line to Addison Junction, is included with the road leased to Rutland Railroad Company.

*Officers:* President, William C. Brown; Secretary and Treasurer, Austin G. Adams.

*Corporate office:* Rutland, Vt.

**Schoharie Valley Railway Company**

*Organization:* Incorporated March 10, 1880, under the railroad law, as a reorganization of Schoharie Valley Railroad Company, incorporated April 13, 1874, under the railroad law.

*Location of line:* Schoharie county; extends from Schoharie Junction, where it connects with The Delaware and Hudson Company's railroad, to Schoharie.

*Officers:* President, Charles Vroman; Secretary and Treasurer, A. H. Wood.

*Main business office:* Schoharie, N. Y.

**Skaneateles Railroad Company**

*Organization:* Incorporated by special act passed April 17, 1866 (ch. 635). By special act passed May 15, 1876 (ch. 315), the company was authorized to own and operate steamboats on Skaneateles lake.

*Location of line:* Onondaga county; connects with the Auburn branch of New York Central and Hudson River railroad at Skaneateles Junction and extends to Skaneateles.

*Officers:* President, Henry B. Reed; Vice-president, S. A. Kane; Secretary and Treasurer, D. V. Reynolds.

*Main business office:* Jordan and Railroad streets, Skaneateles, N. Y.

**The South Buffalo Railway Company**

*Organization:* Incorporated April 25, 1899, under the railroad law.

*Location of line:* Erie county; connects with Buffalo Creek railroad at Buffalo Creek Junction and extends to Lackawanna; spurs, branches, connecting tracks, and extensions in and about the Lackawanna Steel Works are operated under lease.

*Officers:* President, E. A. S. Clarke; Vice-president, Moses Taylor; Secretary, Fred F. Graham; Treasurer, J. P. Higginson.

*Main business office:* Lackawanna Building, Lackawanna, N. Y.

**Sterling Mountain Railway Company**

*Organization:* Incorporated May 18, 1864, under the railroad law.

*Location of line:* Orange and Rockland counties; extends from Sterlington, where it connects with the main line of Erie railroad, to Lakeville.

*Officers:* President, H. A. Van Alstyne; Vice-president, W. P. Hamilton; Secretary, W. S. Johnson; Treasurer, B. Moffatt, jr.

*Main business office:* Sterlington, N. Y.

**The Terminal Railway of Buffalo**

*Organized:* Incorporated June 17, 1895, under the railroad law. Consolidated with The New York Central and Hudson River Railroad Company.

*Location of line:* Depew to West Seneca, Erie county.

*Officers:* President, Alfred H. Smith; First Vice-president, William K. Vanderbilt, jr.; Secretary, Dwight W. Pardee; Treasurer, Edward L. Rossiter.

*Main business office:* Grand Central Terminal, New York city.

**The Troy Union Rail Road Company**

*Organization:* Incorporated July 21, 1851, under the railroad law.

Returns not tabulated. This company owns 5.45 miles of railroad tracks situated in Troy, N. Y., within the territory between Madison street on the south, Hoosick street on the north, and the Hudson river bridge on the west. These tracks are used in common by the three companies controlling The Troy Union Rail Road Company through the ownership of its entire capital stock of \$30,000, of which The New York Central and Hudson River Railroad Company owns one-half, The Delaware and Hudson Company one-fourth, and the Boston and Maine Railroad one-fourth. The operating expenses, less revenues accruing from station privileges and the operation of a restaurant, are apportioned among and paid by the three controlling com-

panies in proportion to their several interests. The balance sheet as of June 30, 1914, shows gross investment in road and equipment \$1,159,800; common stock outstanding \$30,000; corporate surplus \$1,158,202. During the year ended June 30, 1914, revenues from station privileges, parcel room receipts, baggage storage, and rents were \$4059, and the net revenue from the operation of restaurant \$265; railroad operating expenses were \$114,880 and taxes \$33,368.

*Officers:* President, A. H. Smith; Vice-president, C. S. Sims; Secretary and Treasurer, F. A. Harrington.

*Main business office:* Room 1, Union Station, Troy, N. Y.

#### **The Ulster and Delaware Railroad Company**

*Organization:* Incorporated under the railroad law April 3, 1866, as The Rondout and Oswego Railway Company; name changed by authority of special act passed May 9, 1872 (ch. 604), to The New York, Kingston and Syracuse Railroad Company; and reorganized June 12, 1875, as Ulster and Delaware Railroad Company. The Ulster and Delaware Railroad Company was consolidated as The Ulster and Delaware Railroad Company December 31, 1901, with the following companies, incorporated under the railroad law at the dates stated: Hobart Branch Railroad Company, March 25, 1884; Delaware and Otsego Railroad Company, May 5, 1887; The Stony Clove and Catskill Mountain Railroad Company, January 18, 1881; and The Kaaterskill Railroad Company, November 23, 1882.

*Location of line:* The main line extends from Kingston Point to Oneonta, with branches to Kaaterskill and Hunter.

*Officers:* President, Edward Coykendall; Vice-president, T. C. Coykendall; Secretary, H. H. Flemming; Treasurer, H. B. Coykendall.

*Main business office:* 22 Ferry street, Kingston, N. Y.

#### **Unadilla Valley Railway Company**

*Organization:* Incorporated January 21, 1904, as a reorganization of The Unadilla Valley Railway Company, incorporated January 25, 1890, under the railroad law.

*Location of line:* Chenango, Madison, and Oneida counties; extends from Bridgewater, where it connects with the Richfield Springs branch of the Delaware, Lackawanna

and Western railroad, to New Berlin, where it connects with the New Berlin branch of New York, Ontario and Western railway.

*Officers:* President, Lewis R. Morris; Vice-president, William McNair; Secretary and Treasurer, Wirt Howe.

*Main business office:* New Berlin, N. Y.

#### **The United States and Canada Railroad Company**

[Operated by Grand Trunk Railway Company of Canada.]

*Organization:* Incorporated May 26, 1883, under the railroad law, and consolidated July 6, 1888, with Massena Springs and Fort Covington Railroad Company, incorporated September 12, 1884, under the railroad law.

*Location of line:* St. Lawrence and Franklin counties; extends from Massena Springs, where it connects with the Rome, Watertown and Ogdensburg division of the New York Central and Hudson River railroad, to the International boundary line near Fort Covington, at which point it connects with a branch of the Grand Trunk railway extending to Montreal.

*Officers:* President, E. J. Chamberlin; Vice-president, S. W. Foster; Secretary, J. W. Gaudion; Treasurer, Frank Scott.

*Main business office:* McGill street, Montreal, Canada.

#### **Frank Williams and Company**

Operates under lease the switching tracks of The Buffalo Creek Transfer Railroad Company. Owns the entire capital stock of the railroad company and operates its property chiefly as a terminal switching road in its own coal business. Organized as a copartnership.

*Main business office:* 812 Prudential Building, Buffalo, N. Y.

The following steam railroad corporations have limited trackage rights within the Second Public Service District, but do not report to the Commission:

Central Vermont Railway Company;  
Grand Trunk Railway Company of Canada (Buffalo and Niagara Falls termini);  
The Michigan Central Railroad Company;  
Toronto, Hamilton and Buffalo Railroad Company;  
The Wabash Railroad Company.

## INCHOEATE AND DORMANT CORPORATIONS

**Buffalo Frontier Terminal Railroad Company**

Incorporated January 4, 1904. Road projected to extend from Bay View, Erie county, N. Y., to Tonawanda, N. Y., a distance of 27.7 miles. Certificate of public convenience and a necessity was granted by the Public Service Commission, Second District, July 20, 1909. Appeal taken from this order of the Public Service Commission, and May 20, 1913, the order was affirmed by the Court of Appeals. April 23, 1914, the time within which the company might begin construction was extended for five years, and the time in which it might finish road and put into operation was extended for ten years. Construction not begun June 30, 1914. Proposed capitalization \$3,000,000 common stock; of this, \$31,300 par value is considered outstanding, that amount having been subscribed and paid at the time of incorporation. No stock certificates have been actually issued to shareholders.

*Officers:* Vice-president, Edw. Michael; Secretary, Robert F. Schelling; Treasurer, Arthur D. Bissell.

*Main business office:* 618 Ellicott Square, Buffalo, N. Y.

**Champlain and Sanford Railroad Company**

Incorporated April 18, 1908, for the primary purpose of securing railroad transportation facilities for iron ore from the mines of the MacIntyre Iron Company; time extended for three years from April 18, 1913. The road is projected to extend from Addison Junction (now Fort Ticonderoga) to Lake Sanford via Paradox lake, Schroon river, and Blue Ridge, a total distance of 62.21 miles. It is reported that deeds have been secured for 32 miles of right of way, and that 14 miles are under condemnation proceedings. The entire capital stock of the company is owned by the MacIntyre Iron Company. The balance sheet June 30, 1914, shows—

<i>Assets Side:</i>	
Road and equipment.....	\$86,750
Cash .....	119
	<hr/> \$86,869
<i>Liabilities Side:</i>	
Common stock .....	\$60,000
Advances by controlling corporation.....	25,000
Other liabilities .....	1,869
	<hr/> \$86,869

*Officers:* President, Andrew Thompson; Vice-president, Charles M. Hyatt; Secretary, Guy D. Hills; Treasurer, A. R. McKenzie, jr.

*Main business office:* 13 North Pearl street, Albany, N. Y.

**Corning, Keuka Lake and Ontario Railway Company**

Incorporated January 14, 1905, as a reorganization of the Sodus Bay, Corning and New York Railroad Company, organized 1872. The road is projected to extend from Corning to Sodus Bay via Bradford, Penn Yan, Geneva, and Lyons, N. Y., a total distance of 86 miles. It is reported that about 59 miles of the roadbed had been graded prior to reorganization, and some grading was done in the Summer of 1906, when work had to be discontinued because of suits brought by claimants of land along the roadbed, which suits are still pending.

*Officers:* President, John C. Zimmerman; Vice-president, Fred Crosby; Secretary, Frank Plaisted; Treasurer, David E. Hoover.

*Main business office:* Bradford, N. Y.

**Cortland and Auburn Railroad Company**

Incorporated August 31, 1906. Certificate of public convenience and a necessity granted by the Board of Railroad Commissioners April 3, 1907. The road is projected to extend from Cortland, N. Y., to Auburn, N. Y., via Skaneateles lake, a distance of 35.7 miles. Right to issue \$1,000,000 bonds secured by mortgage on property and franchises of company granted by the Board of Railroad Commissioners May 15, 1907. Location surveys are not completed, and construction has not been carried on during the year because sale of bonds was not completed as expected. Amount of stock actually outstanding is \$40,000; this with \$10,000 other unfunded debt constitutes the total liabilities of the company, all of which is charged to "Cost of road and equipment".

*Officers:* President, Benjamin L. Webb; Vice-president, Nathan A. Bundy; Secretary, Wyland D. Tisdale; Treasurer, Eliot L. Stone.

*Main business office:* 56 Main street, Cortland, N. Y.

**Delaware Valley and Kingston Railway Company**

Incorporated November 8, 1899, to build a road projected to extend from Jackawaxen, Penna., to Rondout, N. Y., a total distance of 79.9 miles. Its capital stock of \$250,000 is owned

by Erie Railroad Company, which has also advanced \$70,937.97. Total expenditure for road and equipment to June 30, 1914, is reported as \$251,300, of which the three largest items are real estate \$169,962, law expenses \$22,824, engineering \$19,624.

*Officers:* President, F. D. Underwood; Vice-president, G. F. Brownell; Secretary, David Bosman; Treasurer, D. W. Bigoney.

*Main business office:* 50 Church street, New York city.

**Elizabethtown Terminal Railroad Company**

Incorporated September 27, 1909, for the purpose of building a standard gauge railroad from Westport, N. Y., to a point near the village limits of Elizabethtown, Essex county, N. Y., a total distance of 8 miles. September 29, 1909, a contract for constructing and equipping the road was entered into with V. R. Coon, and under this contract the grading of roadbed was partly constructed. That contract was surrendered March 30, 1911, and a new one for the completion and equipping of road was entered into with Crosby and Parker of Brattleboro, Vt., the contractors to be reimbursed from the proceeds of a bond issue. Under this latter contract the grading is reported to have been completed by June 30, 1911. No work has been done since that date, according to the company's reports. Of a contemplated issue of \$80,000 capital stock, \$29,000 were issued and outstanding at the close of the year; and of a contemplated issue of \$150,000 bonds, \$85,500 were issued and outstanding.

*Officers:* President, George W. Jenkins; Vice-president, Livingston Woodruff; Secretary, Robert B. Dudley; Treasurer, Merritt C. Stanton.

*Main business office:* Elizabethtown, N. Y.

**Frontier and Western Railroad Company**

Incorporated August 5, 1909. November 6, 1909, a petition was filed with the Public Service Commission, Second District, for a certificate under section 59 of the railroad law and section 53 of the Public Service Commissions Law. This application was contested by other railroad companies interested, both before the Commission and in the courts. February 12, 1914, the Public Service Commission, Second District, granted a certificate of public convenience and a necessity. May 27, 1914, the Commission denied application for a rehearing. During June, 1914, the contesting railroads obtained a writ of certiorari to review the decision of the Commission, which proceeding is now pending. Chapter 491, laws of 1914, extended for five years the time to begin and finish construction and put road in operation, and extended for ten years the corporate existence and powers of the company, both extensions dating from August 5, 1914. Construction has not yet been commenced.

*Officers:* President, William B. Cutter; Vice-president, Edward Michael; Secretary, Robert F. Schelling; Treasurer, Arthur D. Bissell.

*Main business office:* 618 Ellicott Square, Buffalo, N. Y.

**The Hudson Highland Bridge and Railway Company**

"The company was organized in the '60's under the name of Hudson Suspension Bridge and New England Railroad Company. The location was completed from Turners, N. Y., on the Erie railroad, to Brewster, N. Y., on the Harlem railroad, and a large part of the right of way was purchased, about \$200,000 being expended for this purpose alone. The construction was thereupon begun and a bond issue was made to pay for this and for the real estate purchased. . . . Owing to the Baring Brothers' failure of 1890, the English syndicate which was to have taken up the larger part of the bonds was obliged to drop the matter, and before the affair could be reinstated the panic of 1893 forced the company into bankruptcy. Its charter and that part of the right of way where most of the work had been done were purchased at foreclosure by a committee of the American bondholders, who incorporated as The Hudson Highland Bridge and Railway Company, eliminating all the foreign interests. The charter has been extended so that it now has about four years more to run [to July 4, 1915]. Modern requirements have made necessary such material changes in the location of this road that most of the right of way became of no value for this purpose, and in consequence all the company's direct holdings have been sold; but it has options on all the important parts and retains the right to cross the tracks of the New York Central and West Shore railroad companies. The modern bridge planned would cross the river 250 feet higher than that planned twenty-five years ago, and would be the highest bridge in the world, and the longest span. Negotiations are under consideration for construction."

*Officers:* President, R. G. Hazard; Secretary and Treasurer, J. G. Hazard.

*Main business office:* 989 James street, Syracuse, N. Y.

**The Hudson River Connecting Railroad Corporation**

Incorporated March 19, 1913, for the purpose of constructing a high level railroad bridge across the Hudson river between Castleton and Shodack Landing. The road is projected to extend from a point connecting with the New York Central and Hudson River railroad at or near Stuyvesant, in a northerly direction to a point on the east bank of the Hudson river opposite Upper Schodack Island, thence westerly to connect with the West Shore railroad at or near Feura Bush. Stuyvesant and Feura Bush will be its termini. Work on the foundation for the Hudson river bridge has been begun. The total projected length is 18 miles, including two branches of about 6 miles. The company is controlled by The New York Central and Hudson River Railroad Company through ownership of the entire capital stock. The balance sheet June 30, 1914, shows —

<i>Assets Side:</i>	
Road and equipment.....	\$29,003
Cash and other current assets.....	1,280
	<hr/> \$30,283
<i>Liabilities Side:</i>	
Capital stock.....	\$25,000
Accounts payable.....	4,853
Surplus.....	430
	<hr/> \$30,283

Of the \$29,003, cost of road to June 30, 1914, \$25,099 is charged to "Engineering".

*Officers:* President, Alfred H. Smith; Vice-president, W. K. Vanderbilt, Jr.; Secretary D. W. Pardee; Treasurer, E. L. Rossiter.

*Main business office:* Grand Central Terminal, New York city.

**Newark, Williamson and Northern Railroad Company**

Incorporated March 3, 1914. Road is projected to extend from Newark to Williamson via Marion. The balance sheet June 30, 1914, shows —

<i>Assets Side:</i>	
Cash.....	\$14,829
Road and equipment.....	171
	<hr/> \$15,000
<i>Liabilities Side:</i>	
Capital stock.....	\$15,000

*Officers:* President, Ernest L. Edgcomb; Vice-president, Willis P. Rogers; Secretary, Leslie Kincaid; Acting Treasurer, Judson L. Transue.

*Main business office:* Newark, N. Y.

**Rome and Osceola Railroad Company**

Incorporated March 6, 1908, to build a railroad projected to extend from Rome, N. Y., to Osceola, N. Y., via Lee Center and Point Rock, a distance of 25 miles. Location surveys were completed May 26, 1908. Certificate of public convenience and a necessity was granted by the Public Service Commission, Second District, July 30, 1908; 19.41 miles of right of way have been acquired, and 10.83 miles of road graded. The balance sheet June 30, 1914, shows —

<i>Assets Side:</i>	
Road and equipment.....	\$83,663
Cash and accounts receivable.....	154
	<hr/> \$83,817
<i>Liabilities Side:</i>	
Subscriptions to capital stock.....	\$33,616
Bills payable.....	44,400
Other liabilities.....	5,801
	<hr/> \$83,817

The three large items of cost of road and equipment are grading \$49,933, right of way and station grounds \$15,160, miscellaneous general expenditures \$7,000.

*Officers:* President, W. Pierrepont White; Vice-president, John D. McMahon; Secretary and Treasurer, Hugh White.

*Main business office:* 102 West Dominick street, Rome, N. Y.

**The Syracuse and Baldwinsville Railway Company**

Incorporated January 27, 1889. Right of way runs from Amboy station, in town of Camillus, Onondaga county, thence northwest through the towns of Van Buren and Lysander to the village of Baldwinsville, a distance of 6 miles single track, with 2 miles of sidings. In July, 1892, the running of trains was discontinued, and in November, 1893, all tracks were taken up with the exception of 0.95 mile and 1 mile of siding in the village of Baldwinsville. These remaining tracks are operated in connection with siding of the Oswego and Syracuse Railroad Company running from its tracks into the village of Baldwinsville. Controlled by The Delaware, Lackawanna and Western Railroad Company through stock ownership. The balance sheet June 30, 1914, shows —

<i>Assets Side:</i>	
Road and equipment.....	\$190,932
Current assets.....	3,011
Corporate deficit.....	83,205
	<hr/> \$277,149
<i>Liabilities Side:</i>	
Preferred stock.....	\$85,640
Common stock.....	8,620
Interest matured and unpaid.....	75,889
Other accounts payable.....	107,000
	<hr/> \$277,149

*Officers:* President, W. H. Truesdale; Vice-president, E. E. Loomis; Secretary and Treasurer, A. D. Chambers.

*Main business office:* 90 West street, New York city.

**Westchester Northern Railroad Company**

Incorporated February 8, 1910, to construct and operate a steam or electric railroad from White Plains, N. Y., to Danbury, Conn., via Bedford, N. Y., with branch line from a point near Cross Pond in the town of Poundridge, Westchester county, to Brewster, Putnam county, N. Y., a distance of 43.45 miles. May 24, 1910, the Public Service Commission, Second District, granted a certificate of public convenience and a necessity, and permitted the respondent to exercise its franchise and begin construction. June 21, 1910, the Commission authorized the issue of \$60,000 par value of capital stock for the acquisition of right of way. During 1911 orders were obtained from the Supreme Court authorizing construction and maintenance of operation of railroad across certain streets, avenues, and highways in the towns of Harrison, Poundridge, Lewisboro, North Salem, North Castle, Westchester county; and in the town of South East, Putnam county. Respondent has acquired some real estate for right of way, but construction has not been begun. The balance sheet June 30, 1914, shows —

<i>Assets Side:</i>	
Road and equipment, right of way, and station grounds.....	\$64,238
Cash.....	1,241
	<hr/> \$65,480
<i>Liabilities Side:</i>	
Capital stock.....	\$60,000
Bills payable.....	5,000
Interest accrued.....	401
Corporate surplus.....	79
	<hr/> \$65,480

*Officers:* President, Leyerett S. Miller; Secretary and Treasurer, George M. Spidell, jr.

*Main business office:* 481 Morris Park avenue, New York city.

## OPERATING STEAM RAILROAD CORPORATIONS

The figures following the name give the order in which the corporation appears in the tables:

Adirondack and Saint Lawrence Railroad Company.....	54	Lehigh and New England Railroad Company.....	18
Bath and Hammondsport Railroad Company.....	48	Lehigh Valley Railroad Company.....	8
Boston and Maine Railroad.....	6	Long Island Railroad Company, The.....	11
Buffalo and Susquehanna Railroad Company (Receiver's operations).....	21a	Lowville and Beaver River Railroad Company, The.....	45
Buffalo and Susquehanna Railroad Corporation.....	21b	Marcellus and Otisco Lake Railway Company.....	53

<sup>1</sup> Fonda, Johnstown and Gloversville Railroad Company operates a steam railroad and an electric railroad. Its report of corporate and fiscal affairs and statistics of operation (with the exception of description of railroad operated electrically, detailed statement of electric railroad direct operating revenues and expenses, statistics of electric railroad operations, and grade crossings and crossing protection, which are included among tables of electric railroad corporations) is rendered as of a steam railroad corporation, and tabulations thereof are included with those of steam railroad corporations.

Returns not tabulated; see statement Organization, etc.

Island Railroad Company, The  
Jamestown, Westfield and Northwestern Railroad Company  
Massena Terminal Railroad Company, The  
Philadelphia and Reading Coal and Iron Company, The

Port Chester Terminal Railroad Company  
Troy Union Rail Road Company, The  
Williams, Frank, and Company

TABLE 101: BALANCE SHEET, OPERATING STEAM

The figures given are for the corporation as a whole; they are not segregated according to state lines. Figures in *italics* denote credit balances on the assets. The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic

TABLE 103: MISCELLANEOUS PERMANENT INVESTMENTS AND MARKETABLE SECURITIES, OPERATING STEAM RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914

The figures given are for the corporation as a whole; they are not segregated according to state lines. The items shown are those included in the Balance Sheet, Table 101, under the heads "Other Permanent Investments" and "Marketable Securities". Only those corporations are included which report such items as held at any time during the year.

The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 27.

TABLE 103: MISCELLANEOUS PERMANENT INVESTMENTS AND MARKETABLE SECURITIES, OPERATING STEAM RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914 (continued)

The figures given are for the corporation as a whole; they are not segregated according to state lines. The items shown are those included in the Balance Sheet, Table 101, under the heads "Other Permanent Investments" and "Marketable Securities". Only those corporations are included which report such items as held at any time during the year.

The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 27.

<sup>2</sup> Held as lessee Connecticut Railway and Lighting Co."

TABLE 103: MISCELLANEOUS PERMANENT INVESTMENTS AND MARKETABLE SECURITIES, OPERATING STEAM RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914 (continued)

The figures given are for the corporation as a whole; they are not segregated according to state lines. The items shown are those included in the Balance Sheet, Table 101, under the heads "Other Permanent Investments" and "Marketable Securities". Only those corporations are included which report such items as held at any time during the year.

The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 27.

TABLE 103: MISCELLANEOUS PERMANENT INVESTMENTS AND MARKETABLE SECURITIES, OPERATING STEAM RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914 (continued)

The figures given are for the corporation as a whole; they are not segregated according to state lines. The items shown are those included in the Balance Sheet, Table 101, under the heads "Other Permanent Investments" and "Marketable Securities". Only those corporations are included which report such items as held at any time during the year.

The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 27.

The figures given are for the corporation as a whole; they are not segregated according to state lines. The items shown are those included in the Balance Sheet, Table 101, under the heads "Other Permanent Investments" and "Marketable Securities". Only those corporations are included which report such items as held at any time during the year.

The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 27.

[illegible]

TABLE 103: MISCELLANEOUS PERMANENT INVESTMENTS AND MARKETABLE SECURITIES, OPERATING STEAM RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914 (continued)

[illegible]

<sup>7</sup> Includes \$1,500,000 stated to be "pledged," but the cost and book value of which are not segregated.

**TABLE 103: MISCELLANEOUS PERMANENT INVESTMENTS AND MARKETABLE SECURITIES, OPERATING STEAM RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914 (concluded)**

The figures given are for the corporation as a whole; they are not segregated according to state lines. The items shown are those included in the Balance Sheet Table 101, under the heads "Other Permanent Investments" and "Marketable Securities". Only those corporations are included which report such items as held at any time during the year.

The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 27.

<sup>1</sup> If earned.

<sup>2</sup> Accrued interest on bonds at time of purchase, amounting in total to \$335, is charged against "income accrued," although interest from date of purchase to date of making report had not been taken upon the respondent's books.

TABLE 104: GROSS INVESTMENT IN ROAD AND EQUIPMENT, OPERATING

The expenditures for road and equipment since June 30, 1907, are shown according to the officially prescribed classification. Since the classification embodies June 30, 1907, but wherever practicable they also include the equipment prior to July 1, 1907.

The figures given are for the corporation as a whole; they are not segregated according to state lines. Figures in *italics* denote credits.

The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic

<sup>1</sup> Includes expenditures on leased lines, aggregating \$13,400,083 for period July 1, 1907, to June 30, 1913, and \$15,272,820 to June 30, 1914.

<sup>2</sup> Of this amount, details were given for expenditures since June 30, 1907, only.

<sup>3</sup> Includes \$7,132,835 formerly carried under "Passenger-train cars" but now transferred to "Freight-train cars".

<sup>4</sup> Cost of equipment purchased with road is not separated from cost of road purchased.

## STEAM RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914

the then commonly used classification of expenditures for equipment, the totals for the various classes of equipment are not restricted to the investment since

order and their ranking on the basis of railroad operating revenues see page 27.

<sup>8</sup> Includes \$60,123 electric street railway equipment.

<sup>9</sup> Includes 18.10 miles electric street railway.

<sup>7</sup> Includes 46.80 miles electric street railway.

<sup>8</sup> Includes expenditures on leased lines aggregating \$5,405,109 for period July 1, 1907, to June 30, 1913, and \$6,329,789 to June 30, 1914.

<sup>9</sup> Excludes \$8,619,721 "Coal lands and real estate" included on balance sheet under "Gross investment in road and equipment".

TABLE 104: GROSS INVESTMENT IN ROAD AND EQUIPMENT, OPERATING

The expenditures for road and equipment since June 30, 1907, are shown according to the officially prescribed classification. Since the classification embodies June 30, 1907, but wherever practicable they also include the equipment prior to July 1, 1907.

The figures given are for the corporation as a whole; they are not segregated according to state lines. Figures in *italics* denote credits.

The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic

<sup>2</sup> Of this amount, details were given for expenditures since June 30, 1907, only.

<sup>10</sup> Includes \$23,910 express equipment.

<sup>11</sup> Includes \$3,443,968 "Cost of equipment October 1, 1887, the date this company acquired the property," less credit of \$1323; also includes \$98,929 not distributed.

## STEAM RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914 (continued)

The then commonly used classification of expenditures for equipment, the totals for the various classes of equipment are not restricted to the investment since order and their ranking on the basis of railroad operating revenues see page 27.

<sup>12</sup> Expenditures for equipment prior to July 1, 1907, are included in expenditures for road.<sup>13</sup> Includes expenditures since August 1, 1905, date of receivership.

TABLE 104: GROSS INVESTMENT IN ROAD AND EQUIPMENT, OPERATING

The expenditures for road and equipment since June 30, 1907, are shown according to the officially prescribed classification. Since the classification embodies June 30, 1907, but wherever practicable they also include the equipment prior to July 1, 1907.

The figures given are for the corporation as a whole; they are not segregated according to state lines. Figures in *italics* denote *credits*.

The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic

<sup>17</sup> Adjustment of previous error.

<sup>18</sup> Includes expenditures only since June 30, 1910, receiver having taken possession of property May 3, 1910.

<sup>19</sup> Includes expenditures only since June 30, 1907; expenditures prior to that date are included in cost of road.

<sup>20</sup> Expenditures on road and equipment prior to June 30, 1907, have not been recorded on the books of the operating company, and the total to that is taken from the corporation report (see Table 104 L) merely for the sake of convenience.

<sup>21</sup> Figures given cover investment in electric as well as steam road and equipment.

<sup>22</sup> Cost of equipment acquired with road of consolidated companies is included with cost of road.

<sup>23</sup> Includes both steam and electric railroad mileage.

<sup>24</sup> Represents the value of grain elevator destroyed by fire.

TABLE 104: GROSS INVESTMENT IN ROAD AND EQUIPMENT, OPERATING

The expenditures for road and equipment since June 30, 1907, are shown according to the officially prescribed classification. Since the classification embodies June 30, 1907, but wherever practicable they also include the equipment prior to July 1, 1907.

The figures given are for the corporation as a whole; they are not segregated according to state lines. Figures in *italics* denote *credits*.

The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic

<sup>2</sup> Of this amount, details were given for expenditures since June 30, 1907, only.

<sup>12</sup> Expenditures for equipment prior to July 1, 1907, are included in expenditures for road.

<sup>28</sup> Includes both steam and electric railroad mileage.

<sup>29</sup> Includes adjustments due to the distribution among the fixed capital accounts of the credit of \$389,880, representing the sale of the Salem Branch in 1911.

<sup>30</sup> Includes expenditures only since January 6, 1912, date of receivership.

<sup>27</sup> Report covers period July 1, 1913, to March 31, 1914; see statement Organization, etc.

<sup>28</sup> Report covers period April 1, 1914, to June 30, 1914; see statement Organization, etc.

<sup>29</sup> Report covers period December 1, 1913, to June 30, 1914; see statement Organization, etc.

<sup>30</sup> "Expenditures for road prior to July 1, 1907," includes an item of \$380,581, "Cost of road purchased," which probably covers equipment as well.

## STEAM RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914 (continued)

the then commonly used classification of expenditures for equipment, the totals for the various classes of equipment are not restricted to the investment since order and their ranking on the basis of railroad operating revenues see page 27.

<sup>21</sup> Of this amount, details were given for expenditures since June 30, 1907, only.  
<sup>125</sup> Expenditures for equipment prior to July 1, 1907, are included in expenditures for road.

<sup>17</sup> Adjustment of previous error.

<sup>21</sup> For the most part represents equipment which has been retired from service; a letter of respondent dated April 21, 1910, stated "This amount is being carried until there is no possibility of certain matured bonds being presented for payment".

TABLE 104: GROSS INVESTMENT IN ROAD AND EQUIPMENT, OPERATING STEAM RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914 (*concluded*)

The expenditures for road and equipment since June 30, 1907, are shown according to the officially prescribed classification. Since the classification embodies the then commonly used classification of expenditures for equipment, the totals for the various classes of equipment are not restricted to the investment since June 30, 1907, but wherever practicable they also include the equipment prior to July 1, 1907.

The figures given are for the corporation as a whole; they are not segregated according to state lines. Figures in *italics* denote *credits*.

The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 27.

<sup>12</sup> Expenditures for equipment prior to July 1, 1907, are included in expenditures for road.

<sup>22</sup> Report covers period April 22, 1914, to June 30, 1914; see statement Organization, etc.

<sup>23</sup> Includes \$9348 of which no distribution is given.

<sup>24</sup> The principal cost of property and locomotives used by this company is not included, since the title to it is in the Dexter Sulphite Pulp and Paper Company."

TABLE 105 a: PERMANENT DEBT, OPERATING STEAM RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914

## Part I: Permanent Debt Other Than Equipment Obligations.

The figures given are for the actually outstanding debt (*i. e.* securities not held by or for the issuing corporation) of the corporation as a whole. They are not segregated according to state lines nor with regard to railroad operations and other operations. Only those corporations are included which report permanent debt outstanding at some time during the year.

The amount shown under "Par value authorized" is the amount already legally issued in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 27.

<sup>1</sup> This column shows matured interest unpaid as reported by the corporations. It is evident in some cases that interest due July 1st has been included under this head; in other cases that such interest has not been included; while in still other instances the report does not show whether interest due July 1st has or has not been included.

<sup>2</sup> Heretofore included with "Bills Payable".

TABLE 105 a: PERMANENT DEBT, OPERATING STEAM RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914 (continued)

## Part I: Permanent Debt Other Than Equipment Obligations (continued).

The figures given are for the actually outstanding debt (i. e. securities not held by or for the issuing corporation) of the corporation as a whole. They are not segregated according to state lines nor with regard to railroad operations and other operations. Only those corporations are included which report permanent debt outstanding at some time during the year.

The amount shown under "Par value authorized" is the amount already legally issued in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 27.

Corp'n No.	Name of corporation and securities outstanding	Dates		Interest provisions		Par value		Interest		
		Nominal issue	Maturity	Rate	Dates payable	Authorized	Actually outstanding June 30, 1914	Accrued during year	Paid during year	Matured and unpaid at close of year 1

<sup>1</sup> This column shows matured interest unpaid as reported by the corporations. It is evident in some cases that interest due July 1st has been included under this head; in other cases that such interest has not been included; while in still other instances the report does not show whether interest due July 1st has or has not been included.

\* Includes \$122,000 bonds held by respondent in sinking and redemption funds.

\* Includes \$6,863,000 bonds held by respondent in sinking fund.

TABLE 105 a: PERMANENT DEBT, OPERATING STEAM RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914 (continued)

## Part I: Permanent Debt Other Than Equipment Obligations (continued).

The figures given are for the actually outstanding debt (i. e. securities not held by or for the issuing corporation) of the corporation as a whole. They are not segregated according to state lines nor with regard to railroad operations and other operations. Only those corporations are included which report permanent debt outstanding at some time during the year.

The amount shown under "Par value authorized" is the amount already legally issued in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 27.

<sup>1</sup> This column shows matured interest unpaid as reported by the corporations. It is evident in some cases that interest due July 1st has been included under this head; in other cases that such interest has not been included; while in still other instances the report does not show whether interest due July 1st has or has not been included.

\* Includes \$6,863,000 bonds held by respondent in sinking fund.

\* There are held in sinking funds of respondent plain bonds as follows: \$25,000 issue of 1901; \$105,000 issue of 1903; \$33,000 issue of 1905; \$68,000 issue of 1906; \$100,000 issue of 1909; \$7000 issue of 1892; \$77,000 issue of 1894; \$22,000 issue of 1900; and \$127,000 improvement bonds of 1887; a total of \$564,000 par value.

\* Includes \$52,000 held by respondent in insurance fund.

TABLE 105 a: PERMANENT DEBT, OPERATING STEAM RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914 (continued)

## Part I: Permanent Debt Other Than Equipment Obligations (continued).

The figures given are for the actually outstanding debt (i. e. securities not held by or for the issuing corporation) of the corporation as a whole. They are not segregated according to state lines nor with regard to railroad operations and other operations. Only those corporations are included which report permanent debt outstanding at some time during the year.

The amount shown under "Par value authorized" is the amount already legally issued in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 27.

<sup>1</sup> This column shows matured interest unpaid as reported by the corporations. It is evident in some cases that interest due July 1st has been included under this head; in other cases that such interest has not been included; while in still

other instances the report does not show whether interest due July 1st has or has not been included.

<sup>2</sup> Of this amount, \$474 was charged to fixed capital.

TABLE 105 a: PERMANENT DEBT, OPERATING STEAM RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914 (continued)

## Part I: Permanent Debt Other Than Equipment Obligations (concluded).

The figures given are for the actually outstanding debt (i. e. securities not held by or for the issuing corporation) of the corporation as a whole. They are not segregated according to state lines nor with regard to railroad operations and other operations. Only those corporations are included which report permanent debt outstanding at some time during the year.

The amount shown under "Par value authorized" is the amount already legally issued in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 27.

<sup>1</sup> This column shows matured interest unpaid as reported by the corporations. It is evident in some cases that interest due July 1st has been included under this head; in other cases that such interest has not been included; while in still other instances the report does not show whether interest due July 1st has or has not been included.

<sup>8</sup> Date of maturity of these bonds extended to 1915.

<sup>9</sup> Includes \$2000 previously reported as matured funded debt unpaid, the time of maturity having been since extended to 1915.

<sup>10</sup> This road has been in the hands of a receiver since 1894, and no interest on bonds has ever been paid.

<sup>11</sup> In addition, \$11,167 was waived and credited to surplus.

For funded debt of the following named corporations see Table 105 L:

26. Buffalo Creek.

27. Dunkirk, Allegheny Valley and Pittsburgh.

TABLE 105 a: PERMANENT DEBT, OPERATING STEAM RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914 (continued)

## Part II: Equipment Obligations.

The obligations named are those issued in total or partial payment for equipment and secured by trust deed or other form of mortgage on the equipment acquired. In the column headed "Term in years" is shown the term of the latest maturing obligation in any series.

The figures given are for the actually outstanding debt (i. e. securities not held by or for the issuing corporation) of the corporation as a whole. They are not segregated according to state lines nor with regard to railroad operations and other operations. Only those corporations are included which report equipment obligations outstanding at some time during the year.

The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 27.

TABLE 105 a: PERMANENT DEBT, OPERATING STEAM RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914 (concluded)

## Part II: Equipment Obligations (concluded).

The obligations named are those issued in total or partial payment for equipment and secured by trust deed or other form of mortgage on the equipment acquired. In the column headed "Term in years" is shown the term of the latest maturing obligation in any series.

The figures given are for the actually outstanding debt (i. e. securities not held by or for the issuing corporation) of the corporation as a whole. They are not segregated according to state lines nor with regard to railroad operations and other operations. Only those corporations are included which report equipment obligations outstanding at some time during the year.

The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 27.

\* There are held in insurance and pension funds of respondent equipment obligations as follows: \$22,000 of series A; \$26,000 of series B; \$32,000 of series C; \$4000 of series D; \$26,000 of series E; \$27,000 of series F; \$296,000 of series G; a total of \$433,000 par value. Interest on obligations so held aggregating

\$17,342 is included in column "Accrued during year," but is not charged against income account "Interest deductions for funded debt".

\* Interest accrued from January 1 to June 30, 1914.

TABLE 105 b: PERMANENT DEBT ISSUED OR ASSUMED, OPERATING STEAM RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914

Only those corporations are included which report permanent debt actually issued or assumed during the year.

This table does not include advances for capital expenditures.

For equipment obligations the date of maturity indicates the due date of the latest maturing obligations in the series.

The amount shown under "Par value authorized" is the amount already legally issued in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 27.

<sup>1</sup> Assumed on merger of Holidaysburg, Bedford and Cumberland Railroad Company.

<sup>2</sup> The New York Central and Hudson River Railroad Company and The Lake Shore and Michigan Southern Railway Company jointly authorized to issue \$12,547,000 equipment bonds under this indenture.

<sup>3</sup> Issued on reorganization.

<sup>4</sup> Assumed on purchase from Buffalo and Susquehanna Railway Company of the equipment covered by these obligations.

<sup>5</sup> Of this amount, \$488,000 bonds were exchanged for a like amount of bonds of Ithaca Street Railway Company, and \$256,000 were given in part payment for the property owned by former The New York, Auburn and Lansing Railroad Company and its Receivers, including all the property sold on foreclosure of the first mortgage of The New York, Auburn and Lansing Railroad Company, but exclusive of the so called Remington power plant and its appurtenances.

<sup>6</sup> Bonds of Middletown and Unionville Railroad Company were issued for \$22,702 cash and in part payment of the purchase price of the property formerly owned by Middletown, Unionville and Water Gap Railroad Company.

TABLE 106 a: CAPITAL STOCKS, OPERATING STEAM RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914

The figures given are for the actually outstanding capital stocks (i. e. stocks not held by or for the issuing corporation) of the corporation as a whole; they are not segregated according to state lines nor with regard to railroad operations and other operations. Stock not otherwise specifically described is common. The amount shown under "Par value authorized" is the amount already legally issued in addition to the amount which the respondent claims may be issued without further approval by state or other public authority. The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 27.

<sup>1</sup> \$2,851,766 issued in exchange for stock of consolidated corporations.

<sup>2</sup> Of \$121,878,100 outstanding June 30, 1907, \$24,358,600 was reported as issued for cash (amount realized \$35,871,529); \$45,500,000 "created by merger" of Hartford and New Haven Railroad Company and of Consolidated Railway Company; \$35,807,600 "used to acquire capital stock and evidences of indebtedness of other companies"; and \$16,211,900 for convertible debenture certificates. Of the \$58,138,900 net increase in "Par value actually issued" since that date, \$13,489,700 appears to have been issued for convertible debenture certificates and \$44,649,200 for "Receipts outstanding for instalments paid".

<sup>3</sup> Since July 1, 1909.

<sup>4</sup> \$146,000,000 issued in connection with reorganization in 1895; \$25,271,300 for capital stock of New York, Susquehanna and Western Railroad Company and \$5,000,000 for stock of Pennsylvania Coal Company.

<sup>5</sup> 102,616 shares of common and entire issue of preferred stock issued for purchase of other roads.

<sup>6</sup> Remainder issued for construction and for purchase of railway and other properties, and for acquisition of securities.

<sup>7</sup> Amount realized on issue of \$13,681,700. Of remainder of issue, \$601,700 was issued for purchase of securities, \$2,260,000 for reorganization purposes, and \$2,799,150 for dividends.

<sup>8</sup> Issued for reorganization purposes; first preferred stock issued for cash contributions by former stockholders on basis of 10% of their stock holdings; common and second preferred issued in exchange for common and preferred stock of reorganized company in the proportion of two shares of the old for one of the new issue.

<sup>9</sup> Entire preferred stock and \$6,000,000 common stock issued upon consolidation for \$4,800,000 common and \$6,000,000 preferred stock of Buffalo, Rochester and Pittsburgh Railroad Company, and for \$1,200,000 common stock of Pittsburgh and State Line Railway Company. July 1, 1902, \$1,000,000 common stock was issued for debenture bonds exchanged at par.

<sup>10</sup> Includes \$500 in fractional scrip not entitled to dividends.

<sup>11</sup> 34,500 shares common and 31,500 shares preferred stock issued for stock of Philadelphia, Reading and New England Railroad Company, 13,500 shares common and 6000 shares preferred stock issued for stock of Poughkeepsie Bridge Company; Dutchess County Railroad Company; Newburgh, Dutchess and Connecticut Railroad Company; and Poughkeepsie and Eastern Railway Company.

<sup>12</sup> Includes \$200 in fractional scrip not entitled to dividends.

<sup>13</sup> Remainder issued in part payment for road.

<sup>14</sup> Issued for purchase of road, stocks of other companies, and as payment for road built under contract.

<sup>15</sup> Issued for reorganization.

<sup>16</sup> 17,946 shares issued as per agreement of consolidation January 1, 1902, to retire stock of The Ulster and Delaware Railroad Company; 1054 shares issued holders of second mortgage bonds to adjust difference in value between 5 per cent second mortgage bonds exchanged for 4 per cent first refunding mortgage bonds.

<sup>17</sup> Remainder issued in exchange for common stock of Buffalo and Susquehanna Railroad Company.

<sup>18</sup> Remainder issued for construction.

<sup>19</sup> Issued in part payment for purchase of constructed road and equipment.

<sup>20</sup> \$1,000,000 common and \$125,000 preferred stock issued for railroad property and franchises of Delaware and Eastern Railroad Company.

<sup>21</sup> Not "declared payable"; is described as an appropriation "for guidance in the finances of the company," representing cumulative dividends on preferred stock.

<sup>22</sup> 750 shares issued for consolidation and 295 shares issued for stock dividend.

<sup>23</sup> Issued to acquire the property of former The New York, Auburn and Lansing Railroad Company and the capital stock of Ithaca Street Railway Company.

<sup>24</sup> \$142,500 issued for construction; \$107,500 issued for stock of Raymondville and Waddington Railroad Company, January 6, 1909.

<sup>25</sup> Issued for right of way.

<sup>26</sup> Issued in part payment of the purchase price of the property of Middletown, Unionville and Water Gap Railroad Company.

TABLE 106 a: CAPITAL STOCKS, OPERATING STEAM RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914 (concluded)

The figures given are for the actually outstanding capital stocks (*i. e.* stocks not held by or for the issuing corporation) of the corporation as a whole; they are not segregated according to state lines nor with regard to railroad operations and other operations. Stock not otherwise specifically described is common.

The amount shown under "Par value authorized" is the amount already legally issued in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 27.

<sup>18</sup> Remainder issued for construction.

<sup>27</sup> Other consideration not known.

<sup>28</sup> Issued for organization.

<sup>29</sup> Remainder issued for property of Attica and Freedom Railroad Company.

<sup>30</sup> Issued for purchase of road.

<sup>31</sup> Remainder issued for property.

<sup>32</sup> Issued for construction.

<sup>33</sup> "2929 shares stock issued to contractors to electrify the road, declared void by Court's decision in Fall of 1910 but not actually returned." ~~2929 shares~~

<sup>34</sup> Six per cent annual dividend guaranteed by Catskill Mountain Railway Company.

<sup>35</sup> Remainder issued for railroad property purchased on reorganization.

TABLE 106 b: CAPITAL STOCKS ISSUED, OPERATING STEAM RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914

Only those corporations are included which report any capital stock issued during the year.

The amount shown under "Par value authorized" is the amount already legally issued in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 27.

<sup>1</sup> The stock was issued "for the retirement of securities and for general corporate purposes; the stock was sold for par except 31,005½ shares which were sold at various times and various prices which brought an aggregate of \$1,754,323". It is not clear from the foregoing quotation whether all stock was actually sold for cash or whether some was exchanged directly for other securities outstanding.

<sup>2</sup> Issued in exchange for ten shares of stock of Chatham and Lebanon Valley Railroad Company, canceled September, 1913.

<sup>3</sup> Issued for reorganization.

<sup>4</sup> Issued in part payment of purchase price of the property of Middletown, Unionville and Water Gap Railroad Company.

<sup>5</sup> Issued to acquire the property of former The New York, Auburn and Lansing Railroad Company and the capital stock of Ithaca Street Railway Company.

TABLE 107 a: LOCATION AND LENGTH OF ROAD OPERATED WITHIN THE STATE OF NEW YORK, OPERATING STEAM RAILROAD CORPORATIONS, JUNE 30, 1914 (concluded)

The roads are grouped under the name of the operating corporation into classes, as follows: (A) Line owned by the operating corporation; (B) branches and spurs; (C) Line owned by corporation all of whose capital stock is held by the operating corporation; (D) Line operated under lease for a definite annual rent; (E) Line operated under contract of agreement, or where the rent is contingent on earnings or other consideration; (F) Line operated under trackage rights. The length of road stated is confined to that portion lying within the State of New York; if any portion of the road lying between the termini named is outside the State of New York, only the length within the State, marked by an asterisk (\*), is given, and in the next column its percentage to the entire length of road between the termini named is indicated.

This table does not include steam railroad mileage under the exclusive jurisdiction of the Public Service Commission, First District.

The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 27.

TABLE 107 b: LENGTH OF ROAD AND CLASSIFICATION OF TRACK MILEAGE WITHIN THE STATE OF NEW YORK, OPERATING STEAM RAILROAD CORPORATIONS, JUNE 30, 1914

This table shows the miles of road (or first or single track), the portion of road in New York state, and the miles of other tracks in New York state to which the corporations named had on June 30, 1914, right of possession or occupancy for purposes of operation.  
 This table does not include steam railroad mileage under the exclusive jurisdiction of the Public Service Commission, First District.  
 The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 27.

Corp. No.	Name of corporation	Entire length of road operated	Portion in New York						Operated under trackage rights or joint agreement				Corp. No.		
			Road or 1st main track	Per cent of total length	2nd main track	3rd main track	Other main track	Sidings, etc.	Yard tracks	Total track mileage	Road or 1st main track	2nd main track		3rd and other tracks	Total all tracks

TABLE 108 a: EQUIPMENT IN SERVICE JUNE 30, 1914.

The figures given are for the corporation as a whole; the equipment is not segregated according to state lines. The capacity of freight cars is expressed in tons lavatory, and steel-tired wheels; all other passenger coaches are classed as second-class passenger cars. Only those corporations are included which report equipment. The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic

Corporation No.	Freight service cars															Corporation No.

<sup>1</sup> Includes steam and electric locomotives.

<sup>2</sup> Excludes 153 electric passenger cars.

<sup>3</sup> Includes 1 gasoline motor car having seating capacity of 80 to 91.

<sup>4</sup> Electric car having seating capacity of 78.

TABLE 108 b: STEAM LOCOMOTIVE EQUIPMENT IN SERVICE JUNE 30, 1914, OPERATING STEAM RAILROAD CORPORATIONS

In the symbol for each type of locomotive the first figure shows the number of front-truck wheels, the last figure the number of rear-truck wheels or trailers, and the middle figure (or figures in the case of articulated compounds) the number of drivers.

The tractive power is expressed in hundreds of pounds. One ton, or twenty hundred pounds, of tractive power is required to haul three hundred tons at a speed of ten miles per hour on a straight, level track, with moderate weather conditions.

Only those corporations are included which report equipment in service June 30, 1914.

The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 27.

Type of loco- motive	Number of steam locomotives		Tractive power at close of year		Average weight, in tons		Number of locomotives at close of year classified according to age					
	At be- ginning of year	At close of year	Aver- age	Total	Exclu- sive of tender	On drivers	Under 5 years	5 and 10 years	10 and 15 years	15 and 20 years	20 years and older

<sup>1</sup> The number of steam locomotives at beginning of year is taken from the reports for year ended June 30, 1914. In some instances they do not agree with the figures published last year because of corrections by corporations concerned in their previous year's report.

TABLE 108 c: ELECTRIC LOCOMOTIVE EQUIPMENT IN SERVICE JUNE 30, 1914, OPERATING STEAM RAILROAD CORPORATIONS

Only those corporations are shown which report electric locomotive equipment in service June 30, 1914.

Corp'n No.	Name of corporation	Number of locomotives in service	Class of service	Type	Hp. per motor	Hp. per loco-motive	Voltage of motor	Average diam-eter of drivers	Average weight on drivers	Average total weight per loco-motive	Average maximum tractive capacity	Corp'n No.

<sup>2</sup> Leased from Northern Central Railway Company, not otherwise described.

TABLE 109: OPERATING REVENUES, OPERATING STEAM RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914

The figures given are for the "rail operations" of the corporation as a whole; they are not segregated according to state lines. The revenues are classified in accordance with the officially prescribed uniform system of accounts. Figures in *italics* denote losses or deficits. The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 27.

<sup>1</sup> Report covers period July 1, 1913, to December 31, 1913; see statement Organization, etc.  
<sup>2</sup> Report covers period January 1, 1914, to June 30, 1914; see statement Organization, etc.  
<sup>3</sup> Not amount paid by The New York Central and Hudson River Railroad Company and The Lake Shore and Michigan Southern Railway Company to cover operating expenses and fixed charges of respondent.  
<sup>4</sup> Payments by the Erie and Western Transportation Company, controlling the respondent, for the handling and transferring of freight are limited by contract to an amount "sufficient for the maintenance and operation of the property of the Connecting Terminal Railroad Company".  
<sup>5</sup> Report covers period April 1, 1913, to March 31, 1914; see statement Organization, etc.  
<sup>6</sup> Report covers period April 1, 1914, to June 30, 1914; see statement Organization, etc.  
<sup>7</sup> Report covers period December 1, 1913, to June 30, 1914; see statement Organization, etc.  
<sup>8</sup> Operating revenues cover period July 1, 1913, to April 21, 1914; see statement Organization, etc.  
<sup>9</sup> Report covers period April 22, 1914, to June 30, 1914; see statement Organization, etc.

TABLE 110: OPERATING EXPENSES, OPERATING STEAM RAILROAD

Part A: Corporations Having Revenues from Railroad Operations of \$1,000,000

The figures given are for the "rail operations" of the corporation as a whole; they are not segregated according to state lines. The expenses are classified in the corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic

L.No.	Name of account	Pennsylvania 1	New York C. & H. R. 2	New York, N. H. & H. 3	Lake Shore & M. S. 4	Erie 5	Boston & Maine 6	Delaware, L. & W. 7	L.No.

TABLE 110: OPERATING EXPENSES, OPERATING STEAM RAILROAD

Part A: Corporations Having Revenues from Railroad Operations of \$1,000,000

The figures given are for the "rail operations" of the corporation as a whole; they are not segregated according to state lines. The expenses are classified in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic

L.No.	Name of account	Rutland 16	New York, S. & W. 17	Lehigh & N. E. 18	P., S. & N. (Rev'r's op) 19b	Lehigh & H. R. 20	Buffalo & S. R. R. 21a	B. & S. R. R. Corp'n. 21b	Ulster & Delaware 22	L.No.

TABLE III a: OPERATING STATISTICS, OPERATING STEAM RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914

The figures given are for the "rail operations" of the corporation as a whole; they are not segregated according to state lines. The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenue see page 27.

Corporation No.	Name of corporation	Average length of road operated, miles	Operating revenue per mile of road	Operating expenses per mile of road	Operating ratio	Transportation revenue			Freight revenue			Passenger service transportation revenue			Trans-shipment revenue per ton-mile	Direct movement revenue per train-mile	Maintenance of equipment expenses			Corporation No.	
						Per mile of road	Per revenue train-mile	Per ton-mile	Per train-mile	Per ton carried	Per ton-mile of haul	Dollars	Dollars	Dollars			Dollars	Dollars	Dollars		Dollars

TABLE III b: COMMODITIES, OPERATING STEAM RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914

The statements relate to the entire revenue freight operations of the corporation. Quantities are stated in tons of 2000 pounds. Only those corporations are shown which furnish information appropriate to this schedule. The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 27.

Commodity	Number of tons originating on road		Number of tons received from connecting carriers	Total freight carried		Number of tons originating on road		Number of tons received from connecting carriers	Total freight carried		
	In New York State	On entire line		Number of tons	Per cent of whole	In New York State	On entire line		Number of tons	Per cent of whole

TABLE 112: EMPLOYEES AND THEIR SALARIES AND WAGES, OPERATING STEAM RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914

The figures given are for the "rail operations" as a whole; they are not segregated according to state lines. The number of employees stated for any particular class is the number as shown by the payroll on June 30, 1914. The average pay per day is that reported by the corporation, and in some cases, as where the pay is on other than a time basis, a constructive day is used. Only those corporations are included which report statistics of wages and salaries. The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 27.

Corp'n No.	Name of corporation	Officers			General office clerks			Station men			Trainmen			Corp'n No.
		Number on payroll	Average pay per day	Other	Number on payroll	Average pay per day	Other	Number on payroll	Average pay per day	Other	Number on payroll	Average pay per day	Other

TABLE 113: GRADE CROSSINGS AND CROSSING PROTECTION WITHIN THE STATE OF NEW YORK, OPERATING STEAM RAILROAD CORPORATIONS, JUNE 30, 1914

Only those corporations are included which report grade crossings in New York state. Figures in *italics* denote decreases. The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 27.

Corporation No.	Name of corporation	With other steam railroads						With electric or street railroads						With streets, avenues, and highways					
		Unprotected			Protected June 30, 1914			Unprotected			Protected June 30, 1914			Unprotected			Protected June 30, 1914		
		Total	June 30, 1914	Increase over preceding year	By both gates and flagmen	By gates only	By flagmen only	By interlocking devices	By signals not interlocked	By derailing devices	Total	June 30, 1914	Increase over preceding year	By both gates and flagmen	By gates only	By flagmen only	By interlocking devices	By signals not interlocked	By derailing devices

<sup>1</sup> Includes 2 crossings protected by flagmen.

<sup>2</sup> The crossings of this company were reported in previous year by Buffalo and Susquehanna Railroad Company.

<sup>3</sup> Only crossings on steam division of this corporation are shown; for grade crossings on electric division see Table 213.

<sup>4</sup> The crossings of this company were reported in previous year by the New York, Auburn and Lansing Railroad Company.

<sup>5</sup> The crossings of this company were reported in previous year by New York, Susquehanna and Western Railroad Company.

<sup>6</sup> It should be borne in mind that each crossing of one steam road with another is normally reported twice, once by each road. It is also to be noted that a crossing with an electric road whose route lies along a highway is normally reported under both electric road crossings and highway crossings.

<sup>7</sup> Includes a decrease of 10 crossings in the case of The New York, New Haven and Hartford Railroad Company, which reports no grade crossings in New York state at close of year.

TABLE 114: ACCIDENTS TO PERSONS FROM STEAM RAILROAD OPERATIONS WITHIN THE STATE OF NEW YORK, YEAR ENDED JUNE 30, 1914

The heading "Killed" includes all cases resulting in death within 24 hours after the time of the accident. Accidents resulting in death later than 24 hours afterward are shown under the heading "Injured". Injuries to employees so slight as not to incapacitate the injured employee for more than three days during the ten days immediately following the accident are excluded. The statement of accidents resulting from movement of trains, locomotives, or cars is made up from reports of each individual accident as filed with the Commission by the railroads concerned. They have been classified, tabulated, and checked by the Commission's employees, and while the totals do not in all cases agree with the summaries made up by the railroads for their annual reports to the Commission, it is believed that the Commission's summary of individual accident reports is probably the more accurate statement. Accidents "Resulting from other causes" include a large number of injuries in railroad shops, mostly of a minor nature, for which no individual reports are required. These figures are given as shown in the annual reports of the railroads to the Commission.

Only those corporations are included which report accidents. The corporations are named in the order of their average revenues from railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 27.

Corp'n No.	Name of corporation	Resulting from movement of trains, locomotives, or cars										Resulting from other causes				Total all persons	
		Railroad employees		Passengers		Postal clerks, expressmen, etc.		Trespassing		Not trespassing		Railroad employees		Other persons		Killed	Injured

\* Amount due Lehigh Valley Railroad Company, lessee, for loss from operation for year ended June 30, 1914.

<sup>10</sup> Due to adjustment entries made to restore to railway land investment the cost of lands reduced by erroneously applying to the cost of the remaining property profits realized on real estate sold.

RAILROAD CORPORATIONS, JUNE 30, 1914 (*continued*)

they are not segregated according to state lines.

<b>Totals.....</b>						2,451,092	52,804

<sup>1</sup> Cost included in "Investment to June 30, 1907, road".

<sup>2</sup> Owned by Vermont and Massachusetts Railroad Company, whose road is leased to Fitchburg Railroad Company and by it sub-leased to Boston and Maine Railroad.

<sup>3</sup> All income accrues to Boston and Maine Railroad.

<sup>4</sup> Although demand notes in form, included in permanent investments pursuant to an understanding that payment will not be immediately required.

<sup>5</sup> All income accrues to The Delaware and Hudson Company, lessee.

<sup>6</sup> "No actual money cost; turned over to Western New York and Pennsylvania Railway Company at organization under reconstruction plan."

<sup>7</sup> "No actual money cost; securities for which these were received were turned over to Western New York and Pennsylvania Railway Company at organization under reconstruction plan."

<sup>8</sup> Taken over from former company, New York, West Shore and Buffalo Railway Company.

<sup>9</sup> "Received by The New York Central and Hudson River Railroad Company, lessee, which holds securities described for respondent; applied directly to reduction of construction account."

TABLE 104 L a: GROSS INVESTMENT IN ROAD AND EQUIPMENT, LESSOR STEAM RAILROAD CORPORATIONS,

<sup>2</sup> Respondent's report excludes \$3,347,060 from its detailed statement of investment in road and equipment although including that amount in the general balance sheet statement under "Total investment in road and equipment," for the reason that the sum in question represents expenditures made by the Harlem River and Port Chester Railroad Company for The New York, New Haven and Hartford Railroad Company, lessee, and is included in the total investment in road and equipment reported by the latter.

<sup>3</sup> Represents "equipment and personal property" leased to Central New England Railway Company and also included in assets reported by that company.

<sup>4</sup> Includes \$9500 floating equipment.

<sup>5</sup> Adjustment entry made to restore to railway land investment the cost of lands reduced by erroneously applying to the cost of the remaining property profits realized on real estate sold some years ago.

TABLE 104 L a: GROSS INVESTMENT IN ROAD AND EQUIPMENT, LESSOR STEAM RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914 (concluded)

Only those corporations are included which report expenditures for road or equipment since June 30, 1907. The figures given are for the corporation as a whole; they are not segregated according to state lines. Figures in *italics* denote *credits*.

Ontario, Carbondale and Seranton	73.15		52,039	None
Oswego and Syracuse	34.98	68,809	53,874	14,935
Peekskill Connecting	3.70		21,638	None
Poeluck	4.39		8,849	None
Port Jervis, Monticello and Summitville	38.20		14,660	None
Rensselaer and Saratoga	3 151.14	72,234	63,317	8,917
Rochester and Genesee Valley	18.40		30,174	None
Rome and Clinton	12.78		28,169	None
St. Lawrence and Adirondack	43.07	71,633	69,530	2,103
Saratoga and Schenectady	21.65	20,785		
Syracuse, Binghamton and New York	80.95	60,511	53,664	6,847
Ticonderoga	2.50		24,000	None
Troy and Bennington	5.04		47,015	None
Troy and Greenbush	5.56	49,460		
Union	.81		61,728	None
Union Terminal of the City of Buffalo	2.32		633,532	None
Utica, Chenango and Susquehanna	97.41	41,391	39,462	1,929
Utica, Clinton and Binghamton	4 40.83	41,405		None
Valley	11.10	106,887	103,103	3,784
Wallkill Valley	32.88	30,783	29,214	1,569
Wellsville, Coudersport and Pine Creek	10.11		10,630	None
Western New York and Pennsylvania	598.25	100,416	91,651	8,765
West Shore	479.11	152,719		
West Troy and Green Island	3 1.08			
Wharton Valley	6.85		21,168	None

<sup>1</sup> Cost of road and equipment not separately recorded.

<sup>2</sup> Includes 9.80 miles of electric railway.

<sup>3</sup> "The West Troy and Green Island railroad was built and is now owned by the Rensselaer and Saratoga Railroad Company," and as part of that property is leased to The Delaware and Hudson Company; it would therefore appear

that the mileage and cost of road of Rensselaer and Saratoga Railroad Company includes the mileage and cost of road of West Troy and Green Island Railroad Company.

<sup>4</sup> Includes 9.53 miles of electric railway.

TABLE 105 L a: PERMANENT DEBT, LESSOR STEAM RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914

The figures given are for the actually outstanding debt (*i. e.* securities not held by or for the issuing corporation) of the corporation as a whole. They are not segregated according to state lines nor with regard to railroad operations and other operations. Only those corporations are included which report permanent debt outstanding at some time during the year.

The amount shown under "Par value authorized" is the amount already legally issued in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

Name of corporation and of securities outstanding	Dates		Interest provisions		Par value		Interest		
	Nominal issue	Maturity	Rate	Dates payable	Authorized	Actually outstanding June 30, 1914	Accrued during year	Paid during year	Matured and unpaid at close of year <sup>1</sup>

<sup>1</sup> This column shows matured interest unpaid as reported by corporations. It is evident in some cases that interest due July 1st has been included under this head; in other cases that such interest has not been included; while in still other instances the report does not show whether interest due July 1st has or has not been included.

<sup>2</sup> Mortgage given to Frank Williams and Company (sole stockholder), together with \$5000 cash realized upon issue of stock, in consideration for conveyance of railroad properties; there is no date of maturity for this mortgage; no interest on these bonds is reported accrued or paid.

<sup>3</sup> Entire issue owned by controlling corporation, Lehigh and New England Railroad Company; no interest accrued or paid.

<sup>4</sup> Interest paid direct to bondholders by Erie Terminals Railroad Company, which reports deductions of \$293,213 from its gross income for year on account of guaranteed interest on bonds of respondent.

<sup>5</sup> Mortgage issued in exchange for like par value of Syracuse, Geneva and Corning bonds to The New York Central and Hudson River Railroad Company; latter company has issued a like amount of Geneva, Corning and Southern bonds secured by such mortgage for which it assumes the primary liability. No interest is accrued or paid by Geneva, Corning and Southern Railroad Company.

TABLE 105 L a: PERMANENT DEBT, LESSOR STEAM RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914 (concluded)

The figures given are for the actually outstanding debt (i. e. securities not held by or for the issuing corporation) of the corporation as a whole. They are not segregated according to state lines nor with regard to railroad operations and other operations. Only those corporations are included which report permanent debt outstanding at some time during the year.

The amount shown under "Par value authorized" is the amount already legally issued in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

<sup>1</sup> Issued for property, franchises, etc., in New York state, of Addison and Pennsylvania Railroad Company, sold under foreclosure.

<sup>2</sup> 9 per cent dividends stipulated in rental received from lessee; 3.25 per cent more paid out of additional rental of \$113,750 received from lessee and available for dividends.

<sup>3</sup> Issued for stocks of constituent companies.

<sup>4</sup> Issued to The Delaware and Hudson Company; \$2,856,000 for construction, additions, and betterments; and \$144,000 on account of assumption by that company of payment at maturity of equal amount of funded debt.

<sup>5</sup> Issued for stocks of constituent companies at par, as follows: \$500,000 for stock of Chemung Railroad Company; \$500,000 for stock of Elmira, Jefferson and Canandaigua Railroad Company; and \$500,000 for stock of Sodas Bay and Southern Railroad Company.

<sup>6</sup> Issued for reorganization.

<sup>7</sup> Issued for construction.

<sup>8</sup> All common stock and preferred stock not sold for cash issued for purposes of consolidation, purchase of roads, equipment, and dock and wharf properties.

<sup>9</sup> Under terms of lease, 1 per cent dividends are to be paid on common stock in hands of public; outstanding shares are now all owned by the lessee.

<sup>10</sup> Common stock exchanged for 13,250 shares at par of Syracuse, Geneva and Corning Railway Company; and 20,000 shares of \$50 par value of Pine Creek

Railway Company; preferred stock exchanged for 100,000 shares of \$50 par value of Fall Brook Railway Company.

<sup>11</sup> Remainder issued for construction.

<sup>12</sup> 19,170 shares issued for bonds of Connecticut Western Railroad Company; 8000 shares for purchase of Rhinebeck and Connecticut Railroad Company; and 2500 shares to decrease current liabilities.

<sup>13</sup> Issued for property and franchises of Southern Central Railroad Company.

<sup>14</sup> 14,220 shares issued for construction of new properties; 5000 shares for stock of The Lehigh Valley Rail Way Company; 14,000 shares for stock of Buffalo and Geneva Railway Company; 40,000 shares for stock of Geneva and Van Etten Railway Company; 3180 shares in payment of Canastota and Northern Railroad Company bonds; and 41,050 shares for companies merged in 1903, 1905, and 1907.

<sup>15</sup> Issued for stock of constituent companies; 101½ shares are still held in treasury for conversion of outstanding shares of Smithtown and Port Jefferson Railroad Company; of \$120,000 stock reported as outstanding, only 10 per cent has been paid in, \$113,750 remaining subject to call.

<sup>16</sup> Issued for property of Nyack and Northern Railroad Company.

<sup>17</sup> Issued for property and franchises of Port Jervis, Monticello and New York Railroad Company sold under foreclosure December 2, 1902.

<sup>18</sup> Paid direct to stockholders by Erie Railroad Company.

TABLE 106 L a: CAPITAL STOCKS, LESSOR STEAM RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914 (concluded)

The figures given are for the actually outstanding capital stocks (i. e. stocks not held by or for the issuing corporation) of the corporation as a whole; they are not segregated according to state lines nor with regard to railroad operations and other operations. Stock not otherwise specifically described is common. The amount shown under "Par value authorized" is the amount already legally issued in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

<sup>20</sup> \$1,200,000 issued for construction of new properties, \$470,000 for acquisition of securities, and \$334,000 for other purposes.

<sup>21</sup> 22,000 shares issued for construction; balance issued for other purposes not specified.

<sup>22</sup> Includes \$124 fractional shares on which no dividends are declared or paid.

<sup>23</sup> Issued for property of Wallkill Valley Railway Company sold under foreclosure.

<sup>24</sup> Issued in exchange for stock of Western New York and Pennsylvania Railroad Company.

<sup>25</sup> " Issued to The New York Central and Hudson River Railroad Company in consideration of its leasing the West Shore Railroad."

<sup>26</sup> Excludes \$350 dividends on stock held by company, reported as "declared" but not charged to income.

TABLE 106 L b: CAPITAL STOCKS ISSUED, LESSOR STEAM RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914

No corporation in this class issued capital stock during the year.

TABLE 107 L: TERMINI, MILEAGE, AND LEASEHOLD CONDITIONS, LESSOR STEAM RAILROAD CORPORATIONS, JUNE 30, 1914

This table comprises all railroads lying wholly or partly in the State of New York operated by other than the owning company under any form of contract which gives the operating company the right of exclusive possession, including such possession through ownership of capital stock.

Name of owning corporation	Termini	Length of road	Name of present possessor	Date of expiration of lease	Rent accrued to lessor during year ended June 30, 1914*		Remarks
					Amount	Basis on which determined	
Addison and Susquehanna.....	Addison—Pennsylvania—State line.	Miles 9.73	Buffalo and Susquehanna Railroad Corporation.	Mar 31, 1951	Dollars 1	Annual rental of \$1, interest on funded debt not exceeding \$1000 for maintaining corporate organization and paying all taxes, charges, liens, and assessments.	The original lease was made to Buffalo and Susquehanna Railroad Company. The lessee under the lease named company as transferee through a purchasing committee, effective January 1, 1914, to Buffalo and Susquehanna Railroad Corporation.
Addison.....	Leicester Jet., Vt.—Addison Jet.	14.61	Rutland Railroad Co.	Dec 7, 1969	15,000	Flat sum.	0.85 mile of road of Whitehall and Plattsburgh R.R. Co. is leased to Addison R.R. Co. for 999 years from January 30, 1878, and is included in the road of Addison R.R. leased to Rutland R.R. Co. for 99 years from December 7, 1870.
Albany and Susquehanna.....	Albany—Binghamton.....	142.59	Delaware and Hudson Co.	Apr 19, 2031	780,750	Interest on bonds, 9% dividends on capital stock, \$1000 maintaining organization, \$120,750 additional rental.	Additional rental results from refunding of \$10,000,000 first consolidated mortgage 7% and 6% bonds matured April 1, 1907, with like amount of mortgage gold 3½% bonds.
Albany and Vermont.....	Albany—Waterford Jet.....	12.18	Delaware and Hudson Co.	Perpetual....	20,000	Flat sum.	Lease acquired by present possessor through Rensselaer and Saratoga R.R. Co.
Amsterdam, Chuctanunda and Northern.	East Amsterdam—Linseed Oil Works.	21.50	New York Central and Hudson River R.R. Co.	Upon notice.	2,500	Flat sum.	Some taxes are paid by lessor; \$84 so paid during year.
Avon, Genesee and Mount Morris..	{ Avon—Mount Morris..... Mount Morris, Erie station— Mount Morris town line.	15.35 2.35	Erie Railroad Co..... Dausville and Mount Morris R.R. Co.	{ ..... 1	7,975	3½% on capital stock, \$100 administrative expenses.	Terms of rental given are for original lease to Erie R.R. Co.; 2.35 yard and turntable facilities at Mount Morris are subleased to Dausville and Mount Morris R.R. Co. by Erie R.R. Co. for \$800 per year.
Boston and Albany.....	Boston, Mass.—Albany.....	303.92	New York Central and Hudson River R.R. Co.	July 1, 1999	3,116,063	Interest on funded debt, 8% dividends on capital stock, \$10,000 administrative expenses.	Excludes 88.41 miles of road not in New York state leased to Boston and Albany R.R. Co. and subleased to New York Central and Hudson River R.R. Co. for 71.91 miles of which payment is made at an annual rental of \$78,000.
Buffalo, Bradford and Pittsburgh..	{ Carrollton—Gilesville, Penna.. Bradford, Penna.—Nusbaun, Penna.	{ 31.41	Erie Railroad Co.....	Jan 5, 2365	.....	{ Under the lease, interest on funded debt to be paid by lessee.	Lessee owns majority of stock and all of funded debt of lessor.
Buffalo Creek.....	In Buffalo.....	5.70	Lehigh Valley and Erie R.R. Cos.	Jan 25, 1939	118,000	Interest on funded debt, 7% dividends on capital stock, \$500 administrative expenses.	Lessees each own one-half of capital stock of lessor.
Buffalo Creek Transfer.....	Pennsylvania R.R. Co.—Williams & Co.'s dock on Blackwell Canal in city of Buffalo.	1.10	Frank Williams and Co.	.....	.....	.....	Frank Williams and Co. own all capital stock and operate road of Buffalo Creek Transfer R.R. Co. in handling coal at their docks.
Cairo.....	Cairo Jet.—Cairo.....	3.77	Catskill Mountain Ry. Co.....	Year to year.	2,944	6% on total cost of road and equipment.	Lehigh and New England R.R. Co. owns practically all capital stock and all funded debt of Campbell Hall Connecting R.R. Co.
Campbell Hall Connecting.....	Liberty Corners—Pine Island Jet.	4.11	Lehigh and New England R.R. Co.	Upon notice.	.....	.....	.....
Cayuga and Susquehanna.....	Susquehanna river—Ithaca.....	34.41	Delaware, Lackawanna and Western R.R. Co.	Jan 1, 1950	54,600	Flat sum.	.....
Central Dock and Terminal.....	In Buffalo.....	0.39	Philadelphia and Reading Coal and Iron Co.	Jan 1, 1916	23,000	Flat sum.	Taxes amounting to \$10,520 paid by lessor, for which it is reimbursed by lessee.
Chateaugay and Lake Placid.....	Bluff Point—Lake Placid.....	79.61	Delaware and Hudson Co.	Dec 31, 2403	41,404	Interest on funded debt and any balance remaining after deduction of all expenses incurred by lessee from operation.	Includes road of Plattsburgh and Danmore R.R. Co., 16.88 miles, owned by State of New York and leased to Chateaugay and Lake Placid Ry. Co.

\* Unless otherwise stated, taxes, operating expenses, and all other charges are paid by lessee.  
 † Lease is for period of corporate existence of lessor.

‡ This mileage is not included in that reported by The New York Central and Hudson River Railroad Co. as operated under lease, and its use is described as "right of way".

TABLE 107 L: TERMINI, MILEAGE, AND LEASEHOLD CONDITIONS, LESSOR STEAM RAILROAD CORPORATIONS, JUNE 30, 1914 (continued)

This table comprises all railroads lying wholly or partly in the State of New York operated by other than the owning company under any form of contract which gives the operating company the right of exclusive possession, including such possession through ownership of capital stock.

\* Unless otherwise stated, taxes, operating expenses, and all other charges are paid by lessee.

<sup>1</sup> Lease is for period of corporate existence of lessor.

<sup>2</sup> The compensation to lessor is net earnings for the year; for the period of this report there was a net loss from 123,975.

<sup>4</sup> Guyward P. O.

<sup>5</sup> For use of Erie and Jersey R.R. Co.'s tracks, which Erie Terminals R.R. Co. holds lease.

Delaware, Lackawanna and Western R.R. Co. owns all the outstanding bonds.

New York, New Haven and Hartford R.R. Co. owns entire capital stock of Harlem River and Port Chester R.R. Co.

Lessee owns majority capital stock of lessor.

Lessee owns entire capital stock of lessor.

Majority of capital stock held by the Long Island Railroad Co.

Lessee owns majority of capital stock.

Lessee paid \$292 taxes during year.

Lessee owns entire capital stock and all outstanding funded debt of lessor.

Also leased to New York Railways Co. 9.80 miles of city street line for \$402,500 annual rental.

Road of Nyack and Northern R.R. Co. sold under foreclosure and transferred to Nyack and Southern R.R. Co.; entire capital stock of latter company is owned by Northern Railroad of New Jersey, which leases the railroad owned and controlled by it to Erie R.R. Co., by which it is controlled through ownership of majority of capital stock.

See explanatory note against Northern Railroad of New Jersey.

Erie R.R. Co. owns entire capital stock of Nypano R.R. Co. and has assumed all leases and obligations of the latter.

Entire capital stock owned by lessee.

Road constructed by New York, Ontario and Western Ry. Co. and operated by it by virtue of ownership of entire capital stock.

Lessee owns majority of capital stock of lessor.

Lessee owns entire capital stock of lessor.

TABLE 107 L: TERMINI, MILEAGE, AND LEASEHOLD CONDITIONS, LESSOR STEAM RAILROAD CORPORATIONS, JUNE 30, 1914 (concluded)

This table comprises all railroads lying wholly or partly in the State of New York operated by other than the owning company under any form of contract which gives the operating company the right of exclusive possession, including such possession through ownership of capital stock.

Name of owning corporation	Road owned but in possession of another		Name of present possessor	Date of expiration of lease	Rent accrued to lessor during year ended June 30, 1914*		Remarks

STEAM RAILROAD CORPORATIONS: GRAPHIC CHARTS

---

ILLUSTRATING THE STATISTICS DERIVED FROM THE REPORTS OF FOURTEEN OF THE LARGER RAILROAD  
CORPORATIONS UNDER THE JURISDICTION OF THE COMMISSION.

---

## DESCRIPTION OF GRAPHIC CHARTS

In order to illustrate the statistics derived from reports of fourteen of the larger operating railroad corporations, the following series of graphic charts have been made:

Series A: The total annual incomes, disposition of such total incomes, accumulated surplus, and miles of road operated, for the years 1900 to 1914 inclusive.

Series B: The total income for the fiscal year ended June 30, 1914, the sources and disposition of such income, and the percentage ratios of subdivisions.

Series C: The monthly rail operating statistics per mile of road operated, showing total operating revenues, total operating expenses, and net operating revenue from July, 1907, to December, 1914, inclusive.

The fourteen operating railroads included in these charts are —

1. The Pennsylvania Railroad Company.
2. The New York Central and Hudson River Railroad Company.
3. The New York, New Haven and Hartford Railroad Company.
4. The Lake Shore and Michigan Southern Railway Company.
5. Erie Railroad Company.
6. Boston and Maine Railroad.
7. The Delaware, Lackawanna and Western Railroad Company.
8. Lehigh Valley Railroad Company.
9. The Delaware and Hudson Company.
10. The Northern Central Railway Company.
11. The Long Island Railroad Company.
12. The New York, Chicago and Saint Louis Railroad Company.
13. Buffalo, Rochester and Pittsburgh Railway Company.
14. New York, Ontario and Western Railway Company.

The grand total income, both operating and non-operating, of these fourteen corporations is \$764,844,008, and represents 96.5 per cent of the total income of the seventy-one operating railroad properties for which reports are made to this Commission. The total operated mileage of these fourteen corporations is 21,772 miles, and comprises 7340 miles operated in New York state, or 83.6 per cent of the total steam railroad mileage in New York state. The total capitalization of these same corporations is \$3,250,728,284, or 94.1 per cent of the capitalization of all the steam railroad corporations reporting to this Commission. From these figures it will be seen that the above fourteen corporations are representative of the steam railroad situation as a whole in this State.

## SERIES A.

The figures used in Series A are derived from reports received by the Board of Railroad Commissioners prior to July 1, 1907, the Public Service Commission, Second District, since July 1, 1907, and from the records of the Interstate Commerce Commission whenever the two sources first mentioned lacked sufficient data.

On account of the great variation in amounts the scale is not the same for all plates. Plates 1 and 2 are drawn on a scale one-half that of Plates 3 to 9 inclusive, and one-tenth that of Plates 10 to 14. With the above in mind, comparisons can be made between one railroad and another.

The total income is shown on the left as a whole: it combines the gross earnings and non-operating income. This is divided into freight revenue, passenger revenue, and a remainder composed of other transportation revenue, non-transportation revenue, net operating revenue from other than railroad property, and non-operating income. Prior to 1908 only the net income from auxiliary operations was included in total income; beginning with 1908 total income includes total auxiliary operations revenue

except that for 1908 the figures are not available in the cases of the Pennsylvania and the Northern Central. On the right of this chart are grouped various items, one above the other, showing the disposition of the total annual income for the various years given. The lowest columnar graph shows the total rail operation expenses divided, where figures are available, into "Wages and salaries" and "Other rail operation expenses". Prior to 1908 auxiliary operations expenses are included under total operating expenses; beginning with 1908 they are shown in a separate columnar graph.

*Auxiliary operations expenses* are those incurred in operations outside of rail operations but auxiliary thereto, such as ferries, boat lines, parks, etc. No figures for such operations are available for the years prior to 1908, and in the cases of the Pennsylvania and the Northern Central the figures for that year are not at hand.

*Wages and salaries* include compensation paid to officers and other employees engaged in operating the railroad property, excluding employees engaged solely in construction of new line or of new equipment.

*Taxes* mean taxes accrued on railroad property for the fiscal year given.

*Rents* include the following: rents accrued for lease of other roads and payable by the railroad company, rents payable for hire of equipment (balance) and for joint facilities, and miscellaneous rents.

*Interest* includes interest accrued during the year on funded debt and other interest deductions.

*Dividends* include dividends declared on stocks out of income for the year; but in order to show dividends declared out of surplus, this latter amount has been shown with an "S" inserted.

*Sinking funds and other appropriations* include sinking funds chargeable to income, losses from separately operated properties, other contractual or otherwise compulsory deductions from gross income not provided for in previous items of rent and interest; also additions and betterments charged to income, appropriations to reserves, and miscellaneous appropriations.

*Annual surplus*, as shown, is the balance of income account for the year transferred to profit and loss account; the debit balances are shown dotted below the base line, and indicate a loss or deficit for the year.

*Accumulated surplus*, as indicated, is the credit balance of the profit and loss account at the close of the year; debit balances are shown dotted below the base line.

## SERIES B.

This series covers the total income for one year only, the fiscal year ended June 30, 1914. Each chart represents the total income in two phases. All the circles are of the same size regardless of the total amount of income: this is necessary, as the variation of income is so large (see Plate 16). The upper left-hand circle represents by sectors the sources of the total income, and the lower right-hand circle represents by sectors the disposition of the same total income, the amount of which is given on a connecting link between the two circles. The sectors are proportional to the percentage of each division to the total income. The items in the circle showing disposition of total income are described in Series A.

As to the items in the circle showing the sources of total income, the following explanation is given:

*Freight revenue and passenger revenue* represent the amounts received directly from transportation of freight and passengers.

*Other transportation revenue* includes revenue derived from mail, express, switching service, etc.

*Other railroad revenue* includes station privileges, storage revenue, telegraph and telephone revenue, etc.

*Auxiliary operations revenue* includes revenue derived from operations outside of real operations but subsidiary thereto, such as ferries, boat lines, parks, etc.

*Net operating income* shown on one or two charts in this series includes net income from other than railroad property, such as coal mines, canals, etc. The remainder of the total income not heretofore mentioned is the non-operating income, which is divided as follows: rents, dividends, interest, and other non-operating income.

*Rents* include rents receivable from lease of road owned or controlled by the railroad company, rents receivable for hire of equipment (balance) and for joint facilities, and miscellaneous rents.

*Dividends* represent dividends declared by other companies on stocks owned or controlled by the railroad company.

*Interest* includes interest accrued and payable by other companies on funded debt owned or controlled by the railroad company, income from sinking and other special funds, and interest receivable on unfunded securities and accounts.

*Other non-operating income* includes miscellaneous income not included in other non-operating income items mentioned, and profit derived from separately operated properties.

Plate 15 shows the aggregate percentage relationship of the fourteen companies included in this series. In computing total "Wages and salaries, rail operations," and "Rail operation expenses other than wages and salaries," the total rail operation expenses of Erie Railroad Company are divided arbitrarily between "Wages and salaries, rail operations" and "Rail operation expenses other than wages and salaries" in the ratio of corresponding totals for the other thirteen companies.

#### SERIES C.

The figures for this series are derived from the monthly reports received by the Public Service Commission, Second District, from the several railroad corporations, showing their operating revenues and expenses and the miles of road operated, except that in the case of the Pennsylvania, Boston and Maine, and Northern Central the figures for

the period from July 1, 1907, to August 31, 1914, are derived from the monthly bulletins of Revenues and Expenses of Steam Roads published by the Interstate Commerce Commission. The period covered is from July 1, 1907, to December 31, 1914, and each horizontal space between the vertical lines represents a month [see top of chart]. As the scale is large, fairly accurate readings can be made of the graphic lines, all of which read from the same base or zero line. The upper light graphic line in a series of steps represents the monthly total rail operating revenues per mile of road operated; the next light full line in steps shows the monthly total rail operating expenses per mile of road operated; and the lower dotted series in steps is the difference between the two above and represents the monthly net operating revenue per mile of road operated.

A heavy line marked 12 months' average line runs through each step series. This line shows for 12 months the average per mile of road operated: of revenues, expenses, or net revenue, as the case may be, at the end of any particular month. Generally, such averages are made only at the close of the fiscal year, such as on June 30th. The yearly average for the fiscal years 1907, 1908, 1909, 1910, 1911, 1912, 1913, and 1914 can be found readily by noting where the heavy black 12 months' average lines cross the heavy green vertical lines on the right of the space for June. In this way, the 12 months' average to the end of any month can be compared with that of any other month, for each point in the line includes all the twelve months of the year immediately preceding, and ordinary seasonal variations do not affect this line. The yearly tendency of the revenues, expenses, or net revenue to increase or decrease is shown, together with the actual monthly increases or decreases. These separate monthly increases and decreases affect this 12 months' tendency line in various ways. Whenever a month shows an actual increase or decrease over the same month in the preceding year, the heavy line rises or falls. A steady ascent of the 12 months' average line denotes that each month has an increase over the same month in the preceding year; similarly, a descent of the 12 months' average line denotes an actual decrease of that month over the same month in the preceding year. If the 12 months' average line tends to remain parallel to the base or zero line, it indicates that there is no marked increase or decrease over the preceding year.

The scale used on Plates 1 and 2 is one-tenth, and that on Plates 3 to 9 is one-fifth, that used on Plates 10 to 14.

ELECTRIC RAILROAD CORPORATIONS

---

STATEMENT GIVING THE ORGANIZATION, ETC., OF ELECTRIC RAILROAD CORPORATIONS WITHIN THE STATE OF  
NEW YORK JUNE 30, 1914.

---

## ELECTRIC RAILROAD CORPORATIONS

UNDER THE JURISDICTION OF THE PUBLIC SERVICE COMMISSION, SECOND DISTRICT, GIVING DATES OF INCORPORATION, REORGANIZATION, CONSOLIDATION, MERGER, AND CHANGE OF NAME, WITH LOCATION OF LINE, OFFICERS, AND OFFICE.

### OPERATING AND LESSOR CORPORATIONS

[In alphabetic order, disregarding the word "The" when part of title. The lessor corporations are printed in small type, immediately following the lessee operating corporation.]

#### The Adirondack Lakes' Traction Company

*Organization:* Incorporated May 22, 1903, as a reorganization of Mountain Lake Electric Railroad Company, incorporated March 11, 1896, under the railroad law.

*Location of line:* Extends from Gloversville to Mountain Lake.

*Officers:* President, W. H. Collins; Vice-president, W. H. Dailey; Secretary and Treasurer, L. K. Brown.

*Main business office:* 102 West Fulton street, Gloversville, N. Y.

#### Albany Southern Railroad Company

*Organization:* Incorporated September 14, 1909, as a reorganization of Albany and Hudson Railroad Company, incorporated March 12, 1903, in turn a reorganization of Albany and Hudson Railway and Power Company, incorporated August 5, 1899, to operate a steam surface railroad. April 26, 1899, Citizens Electric Light and Power Company, incorporated March 29, 1894, and Kinderhook Power and Light Company, incorporated July 21, 1898, were merged into Hudson Light and Power Company. June 13, 1899, The Kinderhook and Hudson Railway Company, incorporated January 9, 1889, and reorganized April 11, 1896, as Kinderhook and Hudson Railway, was merged into Hudson Light and Power and Railroad Company. October 13, 1899, Hudson Light and Power and Railroad Company, incorporated November 26, 1888, as Hudson Light and Power Company (a consolidation of The Hudson Electric Light Company, incorporated March 1, 1888, and Hudson Gas Company, incorporated February 23, 1853), amended certificate filed June 10, 1899, under section 21 of the railroad law, changing name to Hudson Light and Power and Railroad Company; and Greenbush and Nassau Electric Railway, incorporated March 10, 1897, were merged with Albany and Hudson Railway and Power Company. The directors and stockholders of Hudson Street Railway Company, incorporated April 22, 1897, as a reorganization of Hudson Electric Railway Company, incorporated April 24, 1888, assented June 10, 1899, to a transfer of its property and franchises to Hudson Light and Power and Railroad Company. October 7, 1902, Rensselaer Lighting Company, incorporated November 27, 1899, under the transportation corporations law, was merged with Albany and Hudson Railway and Power Company. Albany and Greenbush Bridge Company, incorporated by special act passed April 18, 1872 (ch. 269), as amended by act passed May 2, 1895 (ch. 502), and act passed April 20, 1906 (ch. 290), was merged with Albany Southern Railroad Company September 18, 1909. October 7, 1909, the Commission consented to the transfer of the works, plant, and property of The East Albany Gas Light Company, incorporated March 18, 1871, under the general manufacturing law, to Albany Southern Railroad Company.

*Location of line:* Extends from Aiken avenue, Rensselaer (trackage to State street and Broadway, Albany),

to 7th and Diamond streets, Hudson; also Boston and Albany Railroad bridge and Cemetery to New York Central and Hudson River Railroad depot, Hudson.

*Officers:* President, William Loeb, jr.; First Vice-president, Richard Sutro; Secretary and Treasurer, Irvin W. Day.

*Main business office:* Corner Aiken avenue and Columbia street, Rensselaer, N. Y.

#### Auburn and Syracuse Electric Railroad Company

*Organization:* Incorporated September 30, 1902, as a consolidation of Auburn City Railway Company and Auburn Inter-Urban Electric Railroad Company, incorporated August 5, 1895, under the railroad law. Auburn City Railway Company was incorporated June 12, 1886, as a consolidation under authority of special act passed April 21, 1886 (ch. 163), of East Genesee Street and Seward Avenue Railway, incorporated under special act passed April 15, 1871 (ch. 527), amended by acts passed June 12, 1873 (ch. 743), and June 2, 1879 (ch. 444), and The Auburn and Owasco Lake Railway, incorporated under the name of The Auburn and Owasco Lake Railroad Company by special act passed April 15, 1871 (ch. 528), amended by act passed April 19, 1872 (ch. 292). A special act passed May 12, 1885 (ch. 265), authorized the filing of an amended certificate changing the name to The Auburn and Owasco Lake Railway, which amended certificate was filed June 2, 1885, a prior certificate on reorganization of The Auburn and Owasco Lake Railroad Company having been filed May 8, 1880, under the same name, The Auburn and Owasco Lake Railway.

*Location of line:* Extends in several directions in the city of Auburn, and through the counties of Cayuga and Onondaga via Skaneateles and Marcellus to Syracuse (trackage to common center).

*Officers:* President, C. D. Beebe; Vice-president, H. S. Holden; Secretary, H. C. Beatty; Treasurer, W. A. Holden.

*Main business office:* 500 Onondaga County Savings Bank Building, Syracuse, N. Y.

#### Babylon Railroad Company

*Organization:* Incorporated by special act passed April 15, 1871 (ch. 517), as amended by special act passed April 11, 1905 (ch. 174). January 30, 1911, Paul T. Brady and Willard V. King were appointed receivers by the United States District Court for the Eastern District of New York; and February 15, 1913, they were discharged as receivers and Ralph J. Hawkins appointed in their stead by the same court. December 13, 1913, the receiver turned the property over to the company.

*Location of line:* Extends from dock at foot of Fire Island avenue, Babylon, to Amityville.

*Officers:* President, Robert D. Ireland; Secretary, Frederick L. Kopff; Treasurer, Arthur Carter Hume.

*Main business office:* 1 Liberty street, New York city.

**Batavia Traction Company, Inc.**

*Organization:* Incorporated March 14, 1914, under the railroad law, and purchased the Batavia division of The Buffalo and Williamsville Electric Railway Company.

Returns not tabulated. Report covers period May 19 to June 30, 1914, only. The balance sheet June 30, 1914, shows—

*Assets Side:*

Current assets .....	\$947
Fixed capital .....	5,082
Special deposits .....	5,020

---

\$11,048

*Liabilities Side:*

Bills payable .....	\$1,000
Capital stock .....	10,000
Corporate surplus .....	48

---

\$11,048

The income account May 19 to June 30, 1914, shows—

Operating revenues .....	\$336
Operating expenses .....	288

---

Net operating revenue..... \$48

*Location of line:* Extends from the easterly limit of the village via Clinton and Main streets to Lewiston road.

*Officers:* President, S. W. Brown; Vice-president, J. Frank Thomas; Secretary, M. L. Dennis; Treasurer, Frank Garnier.

*Main business office:* 63 Main street, Batavia, N. Y.

**Berkshire Street Railway Company**

*Organization:* Commencing February 1, 1913, the line of The Hoosick Falls Railroad Company has been operated under an agreement with The Vermont Company, to which the Hoosick Falls railroad was leased February 1, 1913, by Berkshire Street Railway Company, incorporated June 11, 1901, under the laws of Massachusetts. It is a consolidation, having acquired pursuant to orders of the Massachusetts Railroad Commission the property and franchises of the following Massachusetts corporations: June 8, 1906, Hoosac Valley Street Railroad Company, incorporated April 7, 1886; and May 4, 1910, Pittsfield Electric Street Railway Company, incorporated October 1, 1890.

*Location of line within State:* In Hoosick Falls, through Main, Abbott, and High streets, and Parsons avenue; through main traveled highway to North Hoosick and Walloomsac; thence on highway and on private right of way to New York-Vermont line.

*Officers:* President, Howard Elliott; Vice-president, L. S. Storrs; Clerk of Corporation, C. Q. Richmond; Treasurer, A. S. May.

*Main business office:* Pittsfield, Mass.

*Lessor Company:*

*The Hoosick Falls Railroad Company:* Incorporated May 17, 1910, as a reorganization, in part, taking title to that portion of the property and franchises of Bennington and North Adams Street Railway Company sold to Charles L. Livingston in foreclosure. Bennington and North Adams Street Railway Company was originally a corporation duly organized and existing under act of Vermont approved December 8, 1902, as amended and supplemented by acts of Vermont approved December 6, 1904, No. 202; approved December 6, 1906, No. 311; approved October 25, 1906, No. 312; approved December 3, 1908, No. 299; approved January 6, 1911, No. 364; approved January 17, 1911, No. 365; and was consolidated under the laws of New York and Vermont January 23, 1907, with Bennington and Hoosick Valley Railway Company, a corporation formed November 9, 1897, by consolidation of Hoosick Railway Company, incorporated June 10, 1893, under the railroad law of New York, and Bennington Electric Railroad Company, a corporation under the laws of Vermont. The name Bennington and North Adams Street Railway Company was changed to The Vermont Company December 27, 1910, under authority of No. 229 of the acts of 1908, of Vermont.

*Officers:* President, Howard Elliott; Vice-president, L. S. Storrs; Secretary, A. E. Clark; Treasurer, A. S. May.

*Corporate office:* Main street, Hoosick Falls, N. Y.

**Binghamton Railway Company**

*Organization:* Incorporated December 6, 1901, under the railroad law, as a consolidation of Binghamton, Lestershire and Union Railroad Company, incorporated October 18, 1894, under the railroad law; and Binghamton Railroad Company, incorporated August 22, 1892, as a consolidation of Binghamton Street Railroad Company (incorporated March 24, 1890, as a consolidation in turn of Washington Street, Asylum and Park Railroad Company, itself a consolidation October 4, 1887, of The Washington Street and State Asylum Railroad Company, incorporated October 24, 1871, under the railroad law, and Park Avenue Railroad Company, incorporated under the same law May 6, 1882, together forming Washington Street, Asylum and Park Railroad Company; The Binghamton Central Railroad Company, incorporated under the same law March 1, 1883, and City Railway Company, incorporated December 22, 1883, under the same law), and Binghamton and Port Dickinson Railroad Company, incorporated by special act passed May 1, 1868 (ch. 501). May 1, 1894, the following companies were consolidated with the Binghamton Railroad Company: Court Street and East End Railroad Company, incorporated March 23, 1866, under the street surface railroad law of 1884; and The West Side Street Railway Company of the City of Binghamton, N. Y., incorporated September 24, 1887, under the same law. February 24, 1914, the Commission granted an order permitting The Scranton and Binghamton Railroad Company, a Pennsylvania corporation, to purchase the outstanding stock of Binghamton Railway Company.

*Location of line:* Extends in various directions in the city of Binghamton; and from the city line on Main street to Union, on Floral avenue to Catholic cemetery, and on Chenango street to Port Dickinson.

*Officers:* President, G. T. Rogers; Vice-presidents, George E. Green, G. W. Dunn; Treasurer, Elmer M. White.

*Main business office:* 375 State street, Binghamton, N. Y.

**The Black River Traction Company**

*Organization:* Incorporated December 23, 1897, under the name of Black River Traction Company, as a reorganization of Watertown and Brownville Street Railway Company, incorporated October 23, 1890, under the street surface railroad law. June 25, 1894, Watertown Street Railway Company, incorporated September 28, 1887, under the street surface railroad law, was consolidated with Watertown and Brownville Street Railway Company under the name of The Watertown and Brownville Street Railway Company. Dexter and Brownville Street Railway Company, incorporated February 27, 1895, under the railroad law, was consolidated with Black River Traction Company December 19, 1900, under the name of The Black River Traction Company.

The following explanation of the company's financial returns is quoted from a statement authorized by the company and inserted in its annual report: "The operations of this company have been carried on heretofore chiefly through Mr. J. A. Lebkuecher, who owned 700 of the 1050 shares of its capital stock, the other 350 shares being held by his partner, Mr. George Krementz. Mr. Lebkuecher has paid the expenses of the road's operations by his personal check, and has likewise paid for any improvements to the property, but has never wished the Traction company, as such, to open an account with him. Until December 31, 1910, Mr. Lebkuecher had title to the power house, barns, and equipment used by the Traction company, for which he nominally received a rental of \$36,000. . . . There is no debt outstanding against the corporation. On December 31, 1910, the property owned by Mr. Lebkuecher was turned over to the Traction company for a nominal consideration. . . . The property, although undoubtedly worth much more, is carried on the company's books at only \$105,000, the par value of

the capital stock." From the foregoing it appears that no account has been taken of expenditures for the permanent improvement of the plant and property, but that if any such have been made they are charged into the maintenance accounts.

*Location of line:* Extends from Watertown to Dexter.

*Officers:* President, George Krementz; Vice-president, F. A. Lebkuecher; Secretary, D. M. Cosgrove; Treasurer, Richard Krementz.

*Main business office:* 753 West Main street, Watertown, N. Y.

#### **Buffalo and Depew Railway Company**

*Organization:* Incorporated May 1, 1897, under the railroad law.

*Location of line:* Extends from Genesee street, Buffalo, at city line, to corner Burlington avenue and Ellicott road, Depew.

*Officers:* President, William B. Cutter; Secretary, Percy Eaton; Treasurer, R. A. Pilkington.

*Main business office:* 618 Ellicott Square, Buffalo, N. Y.

#### **Buffalo and Lake Erie Traction Company**

*Organization:* Incorporated October 29, 1906, as a consolidation of Lake Erie Electric Traction Company (incorporated October 25, 1906, under the laws of New York, as a reorganization of Lake Erie Traction Company, a corporation under the laws of New York and Pennsylvania formed by consolidation May 12, 1902, under the laws of both States, of South Shore Suburban Railway Company, incorporated under the laws of Pennsylvania, and Lake Erie Traction Company, incorporated February 11, 1902, under the railroad law of New York) and Buffalo, Dunkirk and Western Railroad Company, incorporated March 9, 1903, as a merger and consolidation of Dunkirk and Point Gratiot Traction Company, incorporated July 20, 1899, under the railroad law, and Lake Shore Traction Company, incorporated December 10, 1901, under the railroad law. Buffalo and Lake Erie Traction Company (New York corporation) was consolidated December 28, 1906, with Erie Rapid Transit Company, a Pennsylvania corporation; reorganization of Erie Rapid Transit Street Railway Company, a Pennsylvania corporation, under the provisions of the railroad law of New York and various acts of Pennsylvania entitled "An act supplementary to an act regulating railroad companies, approved February 19, 1849," approved March 24, 1865, and act entitled "An act supplementary to an act entitled 'An act to provide for the incorporation and regulation of certain corporations,' approved April 29, 1874, providing for the merger and consolidation of certain corporations," approved May 29, 1901; Buffalo and Lake Erie Traction Company thereby becoming a corporation under the laws of New York and Pennsylvania. The Dunkirk and Fredonia Railroad Company, incorporated December 14, 1865, under special act passed April 21, 1864 (ch. 265), was consolidated with Buffalo and Lake Erie Traction Company November 23, 1906. Hamburg Railway Company, incorporated March 13, 1895, under the railroad law, was consolidated with Buffalo and Lake Erie Traction Company December 24, 1906.

*Location of line:* Main line extends from Buffalo to Erie, Penna., via Silver Creek, Dunkirk, Westfield, etc.; also to Hamburg, on the Ridge road from Abbott road to Hamburg turnpike, in the town of West Seneca; and over various streets in the cities of Dunkirk, N. Y., and Erie, Penna.

*Officers:* Vice-president and Secretary, M. D. Evans; Treasurer, A. F. Tideswell.

*Main business office:* Exchange Building, Erie, Penna.

#### *Lessor Companies:*

**Buffalo and Lackawanna Traction Company:** Incorporated June 18, 1906, under the railroad law. Leased April 1, 1909, from June 18, 1906, to Buffalo and Lake Erie Traction Company.

*Officers:* President, R. E. Griseom; First Vice-president and Secretary, M. D. Evans; Treasurer, A. F. Tideswell.

*Corporate office:* Exchange Building, Erie, Penna.

**Dunkirk Street Railway Company:** Incorporated April 7, 1906, under the railroad law. Operated by Buffalo and Lake Erie Traction Company: no written agreement.

*Officers:* President, J. S. Pevear; Vice-president, M. W. Dodge; Secretary, M. D. Evans; Treasurer, A. F. Tideswell.

*Corporate office:* 225 Central avenue, Dunkirk, N. Y.

#### **The Buffalo and Williamsville Electric Railway Company**

*Organization:* Incorporated August 10, 1891, under the railroad law.

*Location of line:* Extends from Main street, Buffalo city line, to Transit Road, via Williamsville.

*Officers:* President, Loran L. Lewis, jr.; Vice-president, L. L. Grove; Secretary, Godfrey Morgan; Treasurer, Lauren K. Warwiek.

*Main business office:* Niagara Square, Buffalo, N. Y.

#### **Buffalo, Lockport and Rochester Railway Company**

*Organization:* Incorporated June 23, 1905, as a consolidation of Albion Electric Railway, incorporated December 24, 1901, Albion and Rochester Railway, incorporated September 2, 1904, and Albion and Lockport Railway Company, incorporated September 2, 1904, all under the railroad law. On application of the bondholders, and order of the United States Circuit Court of the Western District of New York dated August 5, 1909, John M. Campbell and Milford W. Childs were appointed receivers; and January 24, 1910, by order of the same court, Frank A. Dudley was appointed additional receiver. The receivership was discharged about January 1, 1911.

*Location of line:* Extends from Rochester city line to Lockport city line, with trackage rights in both cities.

*Officers:* President, C. D. Beebe; Vice-president, F. A. Dudley; Secretary, H. C. Beatty; Treasurer, W. A. Holden.

*Main business office:* 500 Onondaga County Savings Bank Building, Syracuse, N. Y.

#### **The Buffalo Southern Railway Company**

*Organization:* Incorporated August 26, 1904, as a reorganization of The Buffalo, Hamburg and Aurora Railway Company, incorporated March 15, 1897, under the railroad law. Buffalo, Gardenville and Ebenezzer Railway, incorporated June 19, 1895, under the railroad law, was consolidated with The Buffalo Southern Railway Company November 5, 1904. N. A. Bundy was appointed receiver September 26, 1913.

*Location of line:* Extends from Buffalo city line, Seneca street, southerly to Hamburg, with branch to Orchard Park; and easterly to East Seneca and Ebenezzer.

*Officers:* President, William M. Griffith; Vice-president, George F. Wells; Secretary, H. M. Gear; Treasurer, N. A. Bundy.

*Main business office:* 2433 Seneca street, Buffalo, N. Y.

#### **Catskill Traction Company**

*Organization:* Incorporated January 28, 1910, as a reorganization of Catskill Electric Railway Company, incorporated January 22, 1897, under the railroad law. George W. Holdridge was appointed receiver by order of Supreme Court dated April 11, 1914.

*Location of line:* Extends from Catskill Point and Catskill to Leeds.

*Officers:* President, Harry B. Morris; Secretary and Treasurer, William W. Bennett.

*Main business office:* Catskill, N. Y.

**The Chautauqua Traction Company**

*Organization:* Incorporated March 7, 1903, under the railroad law.

*Location of line:* Extends from Lakewood, near Jamestown, to Westfield and Barcelona; trackage Lakewood to Jamestown.

*Officers:* President, A. N. Broadhead; Secretary, W. R. Reynolds; Treasurer, S. B. Broadhead.

*Main business office:* West Third street, Jamestown, N. Y.

**Corning and Painted Post Street Railway**

*Organization:* Incorporated December 8, 1894, under the railroad law.

*Location of line:* Extends from Brown's Crossing, town of Corning, to Painted Post, town of Erwin; with branch in city of Corning to Delaware, Lackawanna and Western Railroad station.

*Officers:* President, J. L. Greatsinger; Vice-president, G. N. Orcutt; Secretary, K. V. Dougherty; Treasurer, D. W. Bigoney.

*Main business office:* 50 Church street, New York city.

**The Cortland County Traction Company**

*Organization:* Incorporated June 12, 1901, as a reorganization of Cortland and Homer Traction Company, incorporated May 14, 1894, under the railroad law.

*Location of line:* Extends from Cortland northerly to Preble and easterly to McGraw; with branch in Cortland to Delaware, Lackawanna and Western Railroad station.

*Officers:* President, D. W. VanHoesen; Vice-president, E. H. Brewer; Secretary, G. H. Garrison; Treasurer, Edwin Duffey.

*Main business office:* 10 Clinton avenue, Cortland, N. Y.

**Eastern New York Railroad Company**

*Organization:* Incorporated December 14, 1904, succeeding The Ballston Terminal Railroad Company, incorporated March 14, 1896, under the railroad law. F. H. Beach was appointed receiver June 23, 1908, and the receiver was discharged November 15, 1910. The capital stock was reduced from \$500,000 to \$275,000 by certificate filed February 4, 1912.

*Location of line:* Extends from Ballston Spa through Bath street, Johnstown road, Craneville road, Lafayette road, Rock City highway, Middle Grove highway, and private right of way to Middle Grove.

*Officers:* President, H. M. VanCourt; Vice-president, S. C. Medberg; Treasurer, F. H. Beach.

*Main business office:* 309 Milton avenue, Ballston Spa, N. Y.

**Elmira and Seneca Lake Traction Company**

*Organization:* Incorporated July 6, 1906, under the railroad law, as a reorganization of Elmira and Seneca Lake Railway Company, incorporated May 9, 1895 (amended certificate filed December 17, 1895), under the name of The Watkins and Havana Railroad Company; name changed by order of the Supreme Court dated April 21, 1896, to Elmira and Seneca Lake Railway Company.

*Location of line:* Extends from Horseheads to Watkins, with trackage Horseheads to Elmira.

*Officers:* President, Ray Tompkins; Vice-president, S. J. Dill; Secretary and Treasurer, C. A. Kolstad.

*Main business office:* Hulett Building, Elmira, N. Y.

**Elmira, Corning and Waverly Railway**

*Organization:* Incorporated August 30, 1905, under the railroad law.

*Location of line:* Extends from corner of Broad and Chemung streets, Waverly, to the easterly line of Elmira; easterly line of town of Big Flats, on River road at Clark's Glen, to Brown's Crossing, town of Corning; trackage from easterly line of city to corner Lake and Market streets, Elmira; from Lake and Water streets to Clark's Glen; and corner Broad and Fulton streets to corner Broad and Chemung streets, Waverly.

*Officers:* President, J. L. Greatsinger; Vice-president, G. N. Orcutt; Secretary, J. E. Packer; Treasurer, D. W. Bigoney.

*Main business office:* 50 Church street, New York city.

**Elmira Water, Light and Railroad Company**

*Organization:* Incorporated May 23, 1900, under the name of Elmira Water, Light Company; amended certificate under section 21 of the then railroad law filed May 26, 1900, changing name to Elmira Water, Light and Railroad Company; a further amended certificate (territory) was filed November 16, 1909. On the dates named the following companies were merged with Elmira Water, Light and Railroad Company: May 28, 1900: The Elmira and Horseheads Railway Company, incorporated December 30, 1870, under special acts passed April 18, 1866 (ch. 659), and April 15, 1870 (ch. 233), amending and revising the first named act, and The Maple Avenue Railroad Company, incorporated May 16, 1887, under the street surface railroad law; May 31, 1900: The Elmira Water Works Company; July 1, 1901: Elmira Heights Water Company; July 9, 1908: Chemung County Gas Company, incorporated October 2, 1902, under the transportation corporations law; May 25, 1910: The Montour Falls Electric Light Company, incorporated October 29, 1897, under the transportation corporations law. November 10, 1911, the Commission approved the merger of the West Side Railroad Company of Elmira, N. Y., into Elmira Water, Light and Railroad Company; and February 12, 1912, the Commission authorized Elmira Water, Light and Railroad Company to purchase the outstanding stock of West Water Street Railroad Company.

*Location of line:* Elmira, Horseheads, and Elmira Heights; and Elmira and Clark's Glen.

*Officers:* President, Ray Tompkins; Vice-president, S. J. Dill; Secretary and Treasurer, C. A. Kolstad.

*Main business office:* Hulett Building, Elmira, N. Y.

**Lessor Company:**

**West Water Street Railroad Company:** Incorporated August 26, 1890, under the street surface railroad law; leased April 26, 1899, to The Maple Avenue Railroad Company.

*Officers:* President, Ray Tompkins; Vice-president, George Bullock; Secretary and Treasurer, C. A. Kolstad.

*Corporate office:* Hulett Building, Elmira, N. Y.

**Empire United Railways, Inc.**

*Organization:* Incorporated February 17, 1913, as a consolidation of Rochester, Syracuse and Eastern Railroad Company; Auburn and Northern Electric Railroad Company; and Syracuse, Lake Shore and Northern Railroad Company. Rochester, Syracuse and Eastern Railroad Company was incorporated November 7, 1901, under the railroad law. Auburn and Northern Electric Railroad Company was incorporated September 14, 1904, under the railroad law. Syracuse, Lake Shore and Northern Railroad Company was incorporated September 9, 1905, under the railroad law. Syracuse, Lake Shore and Northern Railroad Company acquired by purchase September 9, 1905, the property of Syracuse, Lakeside and Baldwinsville Railway, incorporated July 16, 1896, under the railroad law, under the name of Onondaga Lake Railroad Company, and name changed as above May 3, 1898, by order of the Supreme Court. Fulton and Oswego Falls Street Railway Company was consolidated March 10, 1896, with Oswego Street Railway Company, incorporated May 7, 1885, under the name of Lake Ontario and Riverside Railway Company.

*Location of line:* Extends from Rochester Four Corners (trackage to Culver road) to Syracuse, and thence to Fulton and Oswego; also from Port Byron to Auburn.

*Officers:* President, C. D. Beebe; Vice-president, H. S. Holden; Secretary, C. A. Lux; Treasurer, W. A. Holden.

*Main business office:* 500 Onondaga County Savings Bank Building, Syracuse, N. Y.

*Lessor Company:*

**The Monroe County Electric Belt Line Company:** Incorporated July 18, 1901, under the railroad law.

*Officers:* President, H. C. Beatty; Vice-president, H. D. Brewster; Secretary, A. M. Michael; Treasurer, W. W. Foster.

*Corporate office:* 845 Powers Building, Rochester, N. Y.

**The Fishkill Electric Railway Company**

*Organization:* Incorporated March 12, 1895, under the railroad law.

*Location of line:* Extends from Fountain street, Beacon, to Fishkill; also from river to Mount Beacon (leased line).

*Officers:* President, John T. Smith; Vice-president, William J. Conklin; Secretary, William H. Southard; Treasurer, George F. Patterson.

*Main business office:* 93 Main street, Beacon, N. Y.

*Lessor Company:*

**The Citizens Railroad, Light and Power Company:** Incorporated as The Carroll Electric Company, November 4, 1893, under the transportation corporations law; name changed as above by order of Supreme Court December 26, 1901.

*Officers:* President, E. L. Tompkins; Vice-president, G. A. Schrader; Secretary, S. K. Phillips; Treasurer, B. L. Smith.

*Corporate office:* Beacon, N. Y.

**Fonda, Johnstown and Gloversville Railroad Company**

[Electric Division]

For history of organization, officers, etc., see Steam Railroad Corporations.

*Location of line:* Main line "B": Gloversville to Schenectady; Main line "C": Gloversville to Fonda; also belt lines in Gloversville and Amsterdam, and Hagaman line.

*Lessor Company:*

**The Johnstown, Gloversville and Kingsboro Horse Railroad Company:** Incorporated November 12, 1873, under the railroad law. See L. 1874, ch. 255; and 1882, ch. 337. Leased to Fonda, Johnstown and Gloversville Railroad Company January 1, 1894.

*Officers:* President, William Littauer; Vice-president, L. N. Littauer; Secretary and Treasurer, Lyman K. Brown.

*Corporate office:* 102 West Fulton street, Gloversville, N. Y.

**Freeport Railroad Company**

*Organization:* Incorporated April 6, 1912, under the railroad law.

*Location of line:* Extends from Railroad avenue and junction of Front street to Great South Bay Ferry Company, Freeport.

*Officers:* President, T. P. C. Forbes; Vice-president, Frank F. Wentworth; Secretary and Treasurer, Roland M. Lamb.

*Main business office:* 5 Railroad avenue, Freeport, N. Y.

**Geneva, Seneca Falls and Auburn Railroad Company, Inc.**

*Organization:* Incorporated May 28, 1913, as a reorganization of Geneva and Auburn Railway Company, incorporated March 27, 1895, under the name of Geneva, Waterloo, Seneca Falls and Cayuga Lake Traction Company, as a consolidation of Geneva and Waterloo Railway Company, incorporated March 18, 1893; Geneva Surface Railway Company, incorporated June 4, 1891; Waterloo, Seneca Falls and Cayuga Lake Railway, incorporated November 24, 1894: all under the railroad law; and The Seneca Electric Railway, incorporated December 7, 1889, as a reorganization of The Seneca Falls and Waterloo Railroad Company, incorporated by special act passed March 22, 1866 (ch. 197). The name Geneva, Waterloo, Seneca Falls and Cayuga Lake Traction Company was changed to Geneva and Auburn Railway Company by order of the Supreme Court dated July 26, 1909. February 5, 1912, R. R. Quay and W. B. Atwood were appointed receivers of Geneva and Auburn Railway Company.

*Location of line:* Main line, Geneva to Cayuga Lake Park via Waterloo and Seneca Falls; also Geneva line, Leligh Valley depot to end of Pulteney street.

*Officers:* President, R. R. Quay; Vice-president, W. B. Atwood; Secretary, L. G. Haskins; Treasurer, H. H. Harney.

*Main business office:* 143 Fall street, Seneca Falls, N. Y.

**The Glen Cove Rail Road Company**

*Organization:* Incorporated December 4, 1902, under the railroad law.

*Location of line:* Extends from Sea Cliff (railroad station) to Glen Cove, Hempstead harbor.

*Officers:* President, Ralph Peters; Vice-president, C. L. Addison; Secretary, Frank E. Haff; Treasurer, J. F. Fahnestock.

*Main business office:* Broad Street Station, Philadelphia, Penna.

**Great South Bay Ferry Company**

*Organization:* Incorporated July 31, 1903, under the transportation corporations law. Long Beach Transportation Company, incorporated February 8, 1901, under the transportation corporations law, was merged with Great South Bay Ferry Company September 27, 1907. All capital stock is owned by Seashore Municipal Railroad Company, incorporated January 18, 1907 (amended certificate filed May 25, 1907), under the railroad law.

*Location of line:* Extends from Atlantic avenue, Freeport, to Swift Creek dock.

*Officers:* President, T. P. C. Forbes; Vice-president, Frank F. Wentworth; Secretary and Treasurer, Roland M. Lamb.

*Main business office:* 5 Railroad avenue, Freeport, N. Y.

**Hornell Traction Company**

*Organization:* Incorporated October 6, 1909, as a consolidation of The Hornellsville Electric Railway Company, incorporated December 16, 1891; The Hornellsville and Canisteo Railway Company, incorporated May 2, 1892; and The Canisteo Valley Electric Railway Company, incorporated December 28, 1891: all under the railroad law.

*Location of line:* In city of Hornell, and extends to Canisteo; with line to North Hornell opened May 1, 1914.

*Officers:* President, Charles A. Adsit; Vice-president, J. B. Day; Secretary, H. A. Bull; Treasurer, W. H. Walbridge.

*Main business office:* 126 Main street, Hornell, N. Y.

**Hudson River and Eastern Traction Company**

*Organization:* Incorporated February 14, 1906, under the railroad law.

*Location of line:* Extends from New York Central and Hudson River Railroad depot to Camp Woods, Ossining; also Spring Street line to Ossining Hospital.

*Officers:* President, O. F. Bennett; Vice-president, Arthur A. McGivney; Secretary, H. D. Swain; Treasurer, W. L. Stratton.

*Main business office:* 167 Croton avenue, Ossining, N.Y.

**Hudson Valley Railway Company**

*Organization:* Incorporated August 14, 1901, as a consolidation of The Stillwater and Mechanicville Street Railway Company, incorporated November 13, 1882, under the railroad law; Greenwich and Schuylerville Electric Railroad, incorporated July 1, 1895, under the railroad law; Glens Falls, Sandy Hill and Fort Edward Street Rail Road Company, incorporated May 29, 1885, under the street surface railroad law; Warren County Railway, incorporated June 29, 1899, under the railroad law; Saratoga Northern Railway, incorporated June 28, 1897, under the railroad law; and Saratoga Traction Company, incorporated May 20, 1897, under the railroad law. Saratoga Lake Railroad Company, incorporated May 20, 1897, was merged with Saratoga Traction Company July 1, 1897.

*Location of line:* Extends from Waterford (trackage to center of city of Troy) northerly via Mechanicville to Fort Edward; thence to Hudson Falls, Glens Falls, Lake George, and Warrensburgh, with branch Thomson to Greenwich (trackage across Hudson river at Thomson); also Mechanicville to Saratoga Springs and Glens Falls, with spur to Ballston Spa, and branch Saratoga Springs to Saratoga Lake. Glens Falls and South Glens Falls have local lines.

*Officers:* President, L. F. Loree; First Vice-president, C. S. Sims; Secretary, W. H. Elder; Treasurer, H. F. Atherton.

*Main business office:* 598 Broadway, Albany, N. Y.

*Lessor Company:*

**The North River Railway:** Incorporated April 5, 1902, under the railroad law. Leased to Hudson Valley Railway Company July 3, 1903; all stock and bonds owned by that company.

*Officers:* President, L. F. Loree; First Vice-president, C. S. Sims; Secretary, W. H. Elder; Treasurer, H. F. Atherton.

*Corporate office:* 598 Broadway, Albany, N. Y.

**Huntington Railroad Company**

*Organization:* Incorporated May 13, 1890, under the street surface railroad law.

*Location of line:* Extends from Huntington harbor to Amityville.

*Officers:* President, Ralph Peters; Vice-president, C. L. Addison; Secretary, Frank E. Haff; Treasurer, J. F. Fahnestock.

*Main business office:* Broad Street Station, Philadelphia, Penna.

**International Railway Company**

*Organization:* Incorporated February 19, 1902, as a consolidation of Buffalo Railway Company, incorporated December 10, 1890, under the street surface railroad law; Buffalo and Niagara Falls Electric Railway, incorporated March 27, 1893, under the same law; Buffalo, Tonawanda and Niagara Falls Electric Railroad Company, incorporated August 26, 1898, as a reorganization of The Tonawanda Street Railroad Company, incorporated April 23, 1890, under the same law; The Niagara Falls and Suspension Bridge Railway Company, incorporated October

21, 1882, under the railroad law; Buffalo and Lockport Railway, incorporated May 3, 1898; Lockport and Olcott Railway, incorporated April 7, 1900; and Niagara Falls, Suspension Bridge Company. Buffalo and Lockport Railway had acquired in 1898 the franchises and properties of Lock City Electric Railroad Company, incorporated October 29, 1892 "for the purpose of constructing, operating, and maintaining an electric street surface railroad . . . in the city of Lockport . . . and an electric generating plant for purposes of light and power therefor and in connection therewith"; and of Buffalo, Kenmore and Tonawanda Electric Railway Company, incorporated September 26, 1891; see special act passed April 3, 1867 (ch. 239), authorizing the construction of a street railway. Prior to such consolidation, January 31, 1891, The Buffalo Street Rail Road Company, incorporated April 6, 1860, and The Buffalo East Side Street Railway Company, incorporated by special act passed May 10, 1870 (ch. 774), were merged with Buffalo Railway Company. April 5, 1892, The West Side Street Railway Company, incorporated August 13, 1887, was merged with Buffalo Railway Company. May 28, 1895, Buffalo and Tonawanda Electric Railway, incorporated January 12, 1893 (supplemental affidavit filed February 11, 1895), was consolidated with Buffalo and Niagara Falls Electric Railway under the name of the latter. February 3, 1902, The Buffalo Traction Company, incorporated October 28, 1895, and The Buffalo, Bellevue and Lancaster Railway Company, incorporated March 1, 1892, were merged with Buffalo Railway Company. Niagara Falls, Whirlpool and Northern Railway, incorporated February 26, 1894, was merged with Niagara Falls and Suspension Bridge Railway Company February 3, 1902. February 3, 1902, Elmwood Avenue and Tonawanda Electric Railway Company, incorporated June 20, 1893, under the railroad law, was merged into Buffalo and Lockport Railway Company. November 7, 1912, The Electric City Railway Company, incorporated February 1, 1904, under the railroad law, was merged into International Railway Company; and May 31, 1913, Crosstown Street Railway Company of Buffalo, incorporated February 5, 1890, under the street surface railroad law, was merged into International Railway Company. International Railway Company purchased the property of Lewiston Connecting Bridge Company within the State of New York; and the properties of Niagara Falls Park and River Railway Company, Clifton Suspension Bridge Company, The Queenston Heights Bridge Company, and Queenston Suspension Bridge Company, located in the Province of Ontario, Dominion of Canada.

*Location of line:* Extends in various directions in the city of Buffalo; easterly to Lancaster and Depew; and northerly to Tonawanda, North Tonawanda, Niagara Falls, Lockport, and Olcott Beach.

*Officers:* President, Edward G. Connette; Vice-president, E. J. Dickson; Secretary, John A. McKenna; Treasurer, G. W. Wilson.

*Main business office:* 816 Ellicott Square, Buffalo, N.Y.

**Ithaca Traction Corporation**

*Organization:* Ithaca Traction Corporation was incorporated March 30, 1914, as a reorganization of Ithaca Street Railway Company, incorporated November 18, 1884, under the street surface railroad law. Cayuga Lake Electric Railway Company, incorporated March 26, 1894, was merged with Ithaca Street Railway Company July 22, 1898; and December 5, 1912, Ithaca and Cayuga Heights Railway, incorporated October 6, 1904, was merged. Length of other track.....	9.83	9.63	0.20
Totals . . . . .	27.17	24.64	2.53
Trackage . . . . .	1.00	1.00	....

*Note:* Data from latest report of Public Service Commission, First District.

*Officers:* President, C. L. Addison; Vice-president, W. O. Wood; Secretary and Treasurer, Frank E. Haff.

*Main business office:* 7 and 9 Borden avenue, Long Island City, N. Y.

#### **Mount Beacon-on-Hudson Hotel Company**

*Organization:* Incorporated August 24, 1907, under laws of the State of Maine.

*Location of line:* Operates by cable incline from point at foot to point near summit of Mount Beacon, all on property of lessor, The Mount Beacon on Hudson Association.

*Officers:* President, Eugene S. Whitney; Vice-president, Albert Merrill; Secretary, W. J. Knowlton; Treasurer, E. F. Robinson.

*Main business office:* 31½ Exchange street, Portland, Me.

#### *Lessor Company:*

**The Mount Beacon on Hudson Association:** Incorporated July 6, 1900, under the business corporations law. The Mount Beacon on Hudson Association has acquired property at Mount Beacon, near Fishkill, N. Y., developing it as a summer resort, and has constructed an incline railroad 2200 feet in length from the base of the mountain to Mount Beacon House. It holds title to two hundred acres of land, comprising North Mount Beacon and land at the westerly base. All the property of the corporation is leased to Mount Beacon-on-Hudson Hotel Company for fifty years from February 1, 1908, the lessee to pay annually a sum equal to 5 per cent (a less amount for first three years) on \$150,000 outstanding capital stock of lessor, and 5 per cent interest on all bonds issued by the lessor and approved by the lessee; also interest on floating debt (a note of \$5000) until such note is funded; the sum of \$350 to meet expenses of maintenance of organization of lessor; and all taxes, insurance, and water rates. For the year ended June 30, 1914, the lessor company furnishes no complete financial statement, but reports title to land, permanent improvements, buildings, etc., valued at \$168,098, in addition to permanent improvements made by the lessee of which the lessor has no account, but to which under the terms of the lease it will have title upon the expiration of the lease. Its outstanding liabilities are reported as capital stock \$150,000, 5 per cent bonds \$25,000, note \$5000. Mount Beacon-on-Hudson Hotel Company furnishes for the year ended June 30, 1914, no complete income or balance sheet statements. It shows total receipts amounting to \$27,431: of which \$11,635 are credited to "Incline"; \$10,033 to "Casino"; and \$2108 to

"Hotel". Expenditures reported amount to \$27,267. Its assets and liabilities are listed as follows:

*Assets:*

Amount due from Mount Beacon on Hudson Association charges during the year.....	\$500.00
Prior amounts estimated.....	11,926.90
Bonds, par value \$4000, less 5%.....	3,800.00
Bills receivable.....	500.00
Bottling plant.....	1,500.00
Land.....	10,000.00
Tools.....	175.00
Cash on hand.....	500.00
	<hr/>
	\$28,901.90

*Liabilities:*

Rent due Mount Beacon on Hudson Association.....	\$3,000.00
Notes payable.....	3,600.00
Accounts payable.....	1,943.47
	<hr/>
	\$8,543.47

Equipment operated consists of two 33-ft. open cable cars.

*Officers:* President, Jesse B. Pattee; Vice-president, Welden F. Weston; Secretary, Samuel K. Phillip; Treasurer, Jesse B. Pattee.

*Corporate office:* Beacon, N. Y.

**Nassau County Railway Company**

*Organization:* Incorporated March 13, 1899, under the railroad law.

*Location of line:* Extends from railroad station to Prospect avenue, Sea Cliff.

*Officers:* President, Ralph Peters; Vice-president, C. L. Addison; Secretary, Frank E. Haff; Treasurer, J. F. Fahnestock.

*Main business office:* Broad Street Station, Philadelphia, Penna.

**New Paltz, Highland and Poughkeepsie Traction Company**

*Organization:* Incorporated July 20, 1903, under the railroad law. Acquired from the purchaser at receiver's sale the property and franchises of New Paltz and Poughkeepsie Traction Company, incorporated January 4, 1900, under the railroad law.

*Location of line:* Extends from Highland Landing to New Paltz via Lloyd.

*Officers:* President, Joseph A. Duffy; Vice-president, E. F. Millar; Secretary, George A. Wardell; Treasurer, Thomas G. Hinds.

*Main business office:* New Paltz, N. Y.

**The New York and Long Island Traction Company**

*Organization:* Incorporated February 27, 1899, as Mineola, Hempstead and Freeport Traction Company, under the railroad law; name changed by order of Supreme Court dated August 18, 1902, to The New York and Long Island Traction Company. Reports to Public Service Commission, First District. The larger portion of its line, however, is within the jurisdiction of the Second District Commission.

*Location of line:* Extends from Hempstead to Jamaica (Hempstead-Jamaica division); from Mineola through the villages of New Hyde Park and Floral Park to and beyond the New York city line (Jericho Turnpike division); and from Mineola via Hempstead, Freeport, Lynbrook, Rockville Center, and Valley Stream to Grant and Liberty avenues in the borough of Brooklyn (Mineola-Brooklyn division). Hempstead-Jamaica division: Hempstead via Belmont Park to Jamaica, 5.58 miles single track and 0.47 mile sidings and turnouts, and 0.27 mile in car-barn, all in Second District. Jericho Turnpike division: Mineola via Jericho turnpike to Washington and Fulton streets, Jamaica, 5.86 miles single track and 0.26 mile sidings and turnouts: 3.86 miles track and sidings are in Second District. Mineola-Brooklyn division: Mineola via Hempstead to Grant avenue, Brooklyn,

24.85 miles single track and 4.29 miles sidings and turnouts, 0.29 mile in car-barn: 20.64 miles track and sidings are in Second District. Of the foregoing divisions, 9.77 miles track are on private right of way and 0.38 mile on leased private right of way. Trackage: Hempstead-Jamaica division: Fulton and Grand streets, Jamaica, to Belmont Park (Long Island Electric Railway Company), 4.05 miles double track, not in Second District; Washington street to Grand street, Jamaica, on Fulton street (Brooklyn, Queens County and Suburban Railroad Company), 0.40 mile double track, not in Second District. Mineola-Brooklyn division: Grant and Liberty avenues, Brooklyn (Nassau Electric Railway Company), 0.10 mile double track, not in Second District.

*Summary of Mileage:*

	<i>Total</i>	<i>First District</i>	<i>Second District</i>

**New York and Stamford Railway Company**

*Organization:* Incorporated August 3, 1901, as a consolidation of The Larchmont Horse Railway Company, incorporated February 7, 1888, under the street surface railroad law, and Port Chester Street Railway Company, incorporated July 14, 1896, under the railroad law. January 1, 1907, The Consolidated Railway Company

leased to New York and Stamford Railway Company its line from Mianus river to New York-Connecticut state line.

*Location of line:* Liberty Square, Port Chester, to Dean Place, Larchmont, via Mamaroneck, Larchmont Manor, and Larchmont station, with branch Rye to Rye Beach; also Liberty Square, Port Chester, to New York-Connecticut line; local lines in Rye and Port Chester, and trackage right in Mamaroneck. In Connecticut, the line of the Connecticut company is used to Stamford.

*Officers:* President, Howard Elliott; Vice-president, L. S. Storrs; Secretary, A. E. Clark; Treasurer, A. S. May.

*Main business office:* Midland avenue, Port Chester, N. Y.

#### New York State Railways

*Organization:* Incorporated March 22, 1909, as a consolidation of Rochester Railway Company, incorporated February 25, 1890, under the street surface railroad law; The Rochester and Sodus Bay Railway Company, incorporated August 13, 1898, under the name of Rochester and Sodus Bay Railway, under the railroad law, and consolidated July 25, 1902, with The Irondequoit Park Railroad Company, incorporated October 19, 1895, together forming The Rochester and Sodus Bay Railway Company; and Rochester and Eastern Rapid Railway Company, incorporated January 21, 1891, amended certificate filed February 2, 1903. April 2, 1890, The Crosstown Railroad Company of Rochester, N. Y., incorporated April 2, 1889, under the street surface railroad law; Rochester City and Brighton Rail Road Company, incorporated May 31, 1862, under the railroad law, reorganized March 5, 1868, under the same name; and The South Park Railroad Company of Rochester, N. Y., incorporated April 2, 1889, under the street surface railroad law, were merged with Rochester Railway Company.

October 31, 1912, Utica and Mohawk Valley Railway Company, Syracuse Rapid Transit Railway Company, Oneida Railway Company, and Rochester and Suburban Railway Company were merged into New York State Railways. Utica and Mohawk Valley Railway Company was incorporated November 27, 1901, as a consolidation of The Utica Belt Line Street Railroad Company, incorporated February 15, 1886, under the railroad law, and The Utica and Mohawk Railroad, incorporated January 8, 1874, as a reorganization of The Utica and Mohawk Street Railroad Company, incorporated June 30, 1869, under authority of special act passed May 17, 1869 (ch. 894). November 27, 1901, the following companies were merged with Utica and Mohawk Valley Railway Company: The Utica Suburban Railway Company, incorporated under the railroad law April 11, 1896; Herkimer, Mohawk, Ilion and Frankfort Electric Railway, incorporated February 5, 1895, as a consolidation of The Mohawk and Ilion Horse Rail Road Company, incorporated April 12, 1870, The Herkimer and Mohawk Street Rail Road Company, incorporated March 3, 1871, and Frankfort and Ilion Rail Road Company, incorporated May 9, 1871, all under the railroad law; The Deerfield and Utica Railroad Company, incorporated May 8, 1888, as a reorganization of Utica and Deerfield Street Rail Road Company, incorporated February 6, 1871, under the railroad law; Little Falls and Herkimer Street Railway Company, incorporated February 6, 1895, under the railroad law; Frankfort and Utica Street Railway Company, incorporated February 2, 1895, under the railroad law. June 29, 1907, Rome City Street Railway Company, incorporated December 22, 1885, under the street surface railroad law, was also merged with Utica and Mohawk Valley Railway Company.

Syracuse Rapid Transit Railway Company was incorporated May 21, 1896, under the railroad law; purchased

July, 1896, The Syracuse Consolidated Street Railway Company, incorporated May 22, 1890, under the street surface railroad law; and September, 1869, Syracuse Street Railroad Company, incorporated April 19, 1893. The Syracuse Consolidated Street Railway Company held by perpetual lease dated July 1, 1890, the lines of the following companies: Third Ward Railway Company, incorporated February 26, 1886 under the street surface railroad law; Fourth Ward Railway Company of Syracuse, incorporated May 21, 1888, under the same law; Fifth Ward Railroad Company, incorporated October 3, 1867, under the railroad law; Seventh Ward Railway Company of Syracuse, incorporated March 12, 1886, under the street surface railroad law; The Eleventh Ward Street Railway Company, incorporated March 7, 1889, under the same law; Genesee and Water Street Railroad Company, incorporated October 13, 1865, under the railroad law; The Woodlawn and Butternut Street Railway Company, incorporated May 15, 1886, under the street surface railroad law; The Syracuse and Geddes Railway Company, incorporated July 10, 1863, under special act passed May 4, 1863 (ch. 406); and the New Brighton and Onondaga Valley Railroad Company, incorporated June 3, 1869, under the railroad law, as authorized by special act passed May 5, 1869 (ch. 580). Syracuse Street Railroad Company held under lease dated 1894 The People's Railroad Company of Syracuse, incorporated April 25, 1887, which in turn held under lease dated 1890 the line of The Central City Railway Company, incorporated May 1, 1860, under special act passed April 19, 1859 (ch. 483), and also under lease dated 1890 the line of The Syracuse and Onondaga Railway Company, incorporated September 5, 1863, under special act passed April 29, 1863 (ch. 340).

Oneida Railway Company was incorporated May 14, 1885, under the name The Oneida Railway Company of Oneida, N. Y., and name changed by order of Supreme Court dated August 4, 1903, to Oneida Railway Company. Rochester and Suburban Railway Company was incorporated January 30, 1890, as a reorganization of Rochester and Irondequoit Railroad Company, incorporated May 22, 1893, under the railroad law.

*Location of line:* Extends in various directions in the city of Rochester and immediate vicinity, and to Geneva; also in and connecting the cities of Syracuse, Oneida, Utica, Rome, and Little Falls, and immediate territory.

*Officers:* President, Horace E. Andrews; Vice-president, John Carstensen; Secretary, Joseph C. Collins; Treasurer, Edward L. Rossiter.

*Main business office:* 267 State street, Rochester, N. Y.

#### Lessor Companies:

**East Side Traction Company:** Incorporated January 14, 1899, under the street surface railroad law; is held under lease dated August 7, 1899, to Syracuse Rapid Transit Railway Company. East Side Traction Company purchased in 1899 Syracuse and East Side Railway Company, incorporated August 30, 1894, which in turn was the purchaser in 1894 of The Syracuse, Eastwood Heights and Dewitt Railway Company, incorporated September 6, 1889, under the street surface railroad law.

*Officers:* President, Horace E. Andrews; Vice-president, W. K. Vanderbilt, jr.; Secretary and Treasurer, T. H. Conderman.

*Corporate office:* Gridley Building, Syracuse, N. Y.

**Ontario Light and Traction Company:** Incorporated June 7, 1900, as a reorganization of Canandaigua Electric Light and Railroad Company, incorporated March 6, 1888, under the name of Canandaigua Electric Light Company, under the general manufacturing law; amended certificate filed July 21, 1893, changing name as above. The last named company purchased at foreclosure sale under authority of L. 1893, ch. 357 (section 2 added L. 1895, ch. 156), the property of Canandaigua Street Railroad Company, incorporated May 4, 1886, under the street surface railroad law. Leased to Rochester and Eastern Rapid Railway June 1, 1903.

*Officers:* President, Horace E. Andrews; Vice-president, William K. Vanderbilt, jr.; Secretary, Joseph C. Collins; Treasurer, Edward L. Rossiter.

*Corporate office:* 66 Main street, South, Canandaigua, N. Y.

**The Rochester Electric Railway Company:** Incorporated July 9, 1887, under the street surface railroad law. Leased to Rochester Railway Company September 8, 1894.

*Officers:* President, Horace E. Andrews; Vice-president, William K. Vanderbilt, jr.; Secretary, Joseph C. Collins; Treasurer, Edward L. Rossiter.

*Corporate office:* 267 State street, Rochester, N. Y.

**Utica, Clinton and Binghamton Railroad Company:** For organization see New York, Ontario and Western Railway Company, under steam railroad corporations. Columbia and Whitesboro line, New York Mills line, and Genesee Street line in the city of Utica, and suburban territory, leased to The Utica Belt Line Street Railroad Company December 1, 1886.

#### **New York, Westchester and Boston Railway Company**

*Organization:* Incorporated March 20, 1872, under the name New York, West Chester and Boston Railway Company, under the railroad law. Affidavits under authority of laws 1903, ch. 627, were filed January 6, 1904. See reorganization June 13, 1881, under name of The East River and Connecticut Railway Company. Under authority of special act passed May 29, 1909 (ch. 579), it was consolidated January 18, 1910, under above name, with New York and Port Chester Railroad Company, incorporated April 3, 1901 (amended certificates filed August 20, 1901, and March 30, 1907), under the railroad law. Operations were commenced as follows: Harlem River station to Adams Street station, Bronx, August 3, 1912; Columbus Avenue Junction to Mamaroneck avenue, White Plains, July 1, 1912; Mamaroneck avenue to Westchester avenue, White Plains, August 3, 1912.

*Location of line:* The main line extends from Harlem river to North avenue; White Plains branch: Columbus avenue, Mount Vernon, to Westchester avenue, White Plains.

*Officers:* President, Leverett S. Miller; Secretary, Arthur E. Clark; Treasurer, A. S. May.

*Main business office:* 481 Morris Park avenue, New York city.

#### **New York, Westchester and Connecticut Traction Company**

*Organization:* Incorporated February 12, 1895, under the railroad law. By deed dated May 1, 1912, recorded July 15, 1912, in the office of the registrar of Westchester County, the lines operated by John Johnston, formerly New York City Railway Company, were conveyed to New York, Westchester and Connecticut Traction Company. Operations were continued until July 13, 1912, in name of John Johnston.

*Location of line:* Extends in various directions in the cities of Mount Vernon and New Rochelle; villages of Bronxville, Tuckahoe, and North Pelham; and town of Eastchester.

*Officers:* President, Frederick W. Whitridge; Vice-president, Edward A. Maher; Secretary, Shelton E. Martin; Treasurer, Alfred D. Sage.

*Main business office:* 2396 Third avenue, New York city.

#### **The Niagara Gorge Railroad Company**

*Organization:* Incorporated June 3, 1899, as a reorganization of The Niagara Falls and Lewiston Railroad Company, incorporated October 8, 1890, under the railroad law. The Niagara Falls and Whirlpool Railway Company, incorporated January 7, 1886, under the railroad law, was merged with The Niagara Falls and Lewiston Railroad Company January 7, 1891.

*Location of line:* Niagara Falls (trackage rights in Niagara Falls) to Lewiston; and Lewiston to Youngstown, leased line.

*Officers:* President, Joseph T. Jones; Vice-president, B. L. Jones; Secretary and Treasurer, Robert E. Powers.

*Main business office:* 38 West Falls street, Niagara Falls, N. Y.

#### *Lessor Company:*

**Lewiston and Youngstown Frontier Railway Company:** Incorporated August 29, 1895, under the railroad law. Capital stock owned by The Niagara Gorge Railroad Company; lease to same company dated April 1, 1907.

*Officers:* President, Joseph T. Jones; Vice-president, B. L. Jones; Secretary and Treasurer, Robert E. Powers.

*Corporate office:* 38 West Falls street, Niagara Falls, N. Y.

#### **North Jersey Rapid Transit Company**

*Organization:* Incorporated under an act concerning railroads of the State of New Jersey for the purpose of constructing and operating a railroad from a point on the east bank of the Passaic river opposite Broadway in the city of Paterson, and near Riverside Drive in the county of Bergen, New Jersey, to the New York-New Jersey state line in the village of Suffern, 14.52 miles. April 10, 1912, Henry H. Parmelec was appointed receiver of the North Jersey Rapid Transit Company by the Court of Chancery of the State of New Jersey. Operating by trackage right over line of Suffern Railway Company. North Jersey Rapid Transit Company, because of the insignificant nature of its operations in New York through its lease of Suffern Railway, has not been required to report to the Commission.

*Location of line:* Extends from a point on the New York-New Jersey state line on Orange avenue in the village of Suffern, at the terminus of the railroad line of North Jersey Rapid Transit Company, along Orange avenue to Lafayette avenue.

#### *Lessor Company:*

**Suffern Railway Company:** Incorporated September 1, 1910, under the railroad law.

*Officers:* President, Henry H. Wehrhane; Vice-President, R. D. Benson; Secretary, M. D. Evans; Treasurer, Frank Gledhill.

*Corporate office:* 96 Franklin street, New York city.

#### **The Northport Traction Company**

*Organization:* Incorporated August 27, 1901, under the railroad law.

*Location of line:* Extends from Northport (East station) to Northport Harbor.

*Officers:* President, Ralph Peters; Vice-president, C. L. Addison; Secretary, Frank E. Haff; Treasurer, J. F. Fahnestock.

*Main business office:* Broad Street Station, Philadelphia, Penna.

#### **Ogdensburg Street Railway Company**

*Organization:* Incorporated December 22, 1885, under the street surface railroad law.

*Location of line:* Extends in various directions in the city of Ogdensburg and immediate vicinity, and to New York State Hospital.

*Officers:* President and Treasurer, E. E. Hawkins; Secretary, R. E. Waterman.

*Main business office:* 1 Ford street, Ogdensburg, N. Y.

#### **The Orange County Traction Company**

*Organization:* Incorporated October 16, 1901, as a reorganization of The Newburgh Electric Railway Company, incorporated February 27, 1894, as a reorganization of Newburgh Street Railway Company, incorporated January 16, 1886. With The Newburgh Electric Railway Company, Newburgh and Orange Lake Railroad Company, incorporated May 4, 1894, and Walden and Orange Lake Railroad Company, incorporated October 15, 1894, were consolidated July 9, 1897.

*Location of line:* Extends in various directions in the city of Newburgh, northerly to Balmville, and westerly to Walden via Orange lake.

*Officers:* President, B. B. Odell, jr.; Vice-president, A. L. J. Miller; Secretary, W. G. Taggart; Treasurer, H. B. Odell.

*Main business office:* 244 Broadway, Newburgh, N. Y.

#### **Otsego and Herkimer Railroad Company**

*Organization:* Incorporated December 31, 1908, as a reorganization on a re-sale of Oneonta, Cooperstown and Richfield Springs Railway Company, incorporated September 10, 1887, under the railroad law, under the name of Oneonta and Otsego Valley Railroad Company, the name of which was changed to Oneonta, Cooperstown and Richfield Springs Railway Company by order of the Supreme Court dated November 7, 1900. Oneonta and Mohawk Valley Railroad Company was incorporated May 8, 1906, as a reorganization of Oneonta, Cooperstown and Richfield Springs Railway Company.

*Location of line:* Extends in various directions in the city of Oneonta, Otsego county; and to Mohawk, Herkimer county, via Laurens; Hartwick, Richfield Springs, and Jordanville, with branch to Cooperstown and connection to tracks of The Delaware and Hudson Company.

*Officers:* First Vice-president and Secretary, Louis F. Reed; Treasurer, H. R. Skirving.

*Main business office:* Cooperstown, N. Y.

#### **The Paul Smith's Electric Light and Power and Railroad Company**

*Organization:* Incorporated July 10, 1905, under the transportation corporations law, as The Paul Smith's Electric Light and Power Company; amended certificate filed under section 21 of the railroad law May 2, 1906, changing title to above. November 22, 1906, the Commission of Gas and Electricity consented that The Saranac Lake Light, Heat and Power Company, incorporated December 28, 1907, under the transportation corporations law, transfer its plant, property, and franchises to The Paul Smith's Electric Light and Power and Railroad Company.

*Location of line:* Extends from Lake Clear Junction to Paul Smith's.

*Officers:* President and Secretary, Paul Smith; Treasurer, Phelps Smith.

*Main business office:* 29 Main street, Saranac Lake, N. Y.

#### **Peekskill Lighting and Railroad Company**

*Organization:* Incorporated July 12, 1900, under the transportation corporations law, under the name of Peekskill Lighting Company; name changed to Peekskill Lighting and Railroad Company by the filing of an amended certificate of incorporation under section 21 of the railroad law August 31, 1900. *Location of line:* Extends from New York Central and Hudson River Railroad depot, Peekskill, to Lake Mohegan, with branch to State Camp. Connecting with this branch is the Water Street branch (freight); also from South street, connecting with the main line to Verplanck.

*Officers:* President, F. A. Stratton; Vice-president, Stuart Wilder; Secretary, B. W. Stillwell; Treasurer, R. A. Carter.

*Main business office:* 127 Main street, Ossining, N. Y.

#### **Penn Yan & Lake Shore Railway**

*Organization:* Incorporated February 23, 1897, under the name of Penn Yan, Keuka Park and Branchport Railway, under the railroad law. August 30, 1913, name changed as above by order of Supreme Court, filed in office of Secretary of State July 30, 1913.

*Location of line:* Extends from Penn Yan to Branchport.

*Officers:* President, George E. Tylee; Vice-president, Clinton Hurlbutt; Secretary, William J. Tylee; Treasurer, W. H. Tylee.

*Main business office:* 115 Elm street, Penn Yan, N. Y.

#### **Plattsburgh Traction Company**

*Organization:* Incorporated May 27, 1896, under the railroad law.

*Location of line:* Bluff Point to south corporation line of Plattsburgh.

*Officers:* President, E. N. Sanderson; Vice-president, C. S. Sims; Secretary, W. H. Elder; Treasurer, H. F. Atherton.

*Main business office:* 3 Bridge street, Plattsburgh, N. Y.

#### **Port Jervis Traction Company**

*Organization:* Incorporated September 17, 1909, under the railroad law, taking title to the electric railroad and appurtenances of Port Jervis Electric Light, Power, Gas and Railroad Company, incorporated November 22, 1901, as The Port Jervis Electric Light, Power and Gas Company, under the transportation corporations law, as a consolidation of Port Jervis Light and Power Company, Deerpark Electric Light Company of Port Jervis, Limited, and The Port Jervis Gas Company, certificate under section 21 of the railroad law filed February 4, 1902, changing its name as above.

*Location of line:* Extends from Tri-States (Port Jervis) to Sparrowbush.

*Officers:* President, Edward E. Mandeville; Vice-president, George H. Stephenson; Secretary and Treasurer, Matthew F. Maury.

*Main business office:* 113 Pike street, Port Jervis, N. Y.

#### **Poughkeepsie City and Wappingers Falls Electric Railway Company**

*Organization:* Incorporated October 14, 1893, under the railroad law, filing of certificate legalized by special act passed March 22, 1894 (ch. 156). The Poughkeepsie City Railroad Company, incorporated by special act passed May 6, 1869 (ch. 654), and reorganized October 26, 1877, as City Rail Road Company of Poughkeepsie, was merged with Poughkeepsie City and Wappingers Falls Electric Railroad Company April 3, 1894. The Poughkeepsie and Wappingers Falls Street Surface Railroad Company, incorporated November 25, 1892, under the railroad law, was merged with Poughkeepsie City and Wappingers Falls Electric Railway Company October 28, 1893. South Avenue Surface Rail Road Company, incorporated November 3, 1890, under the street surface railroad law, was merged August 31, 1893, with The Poughkeepsie and Wappingers Falls Street Surface Railroad Company.

*Location of line:* Extends in various directions in the city of Poughkeepsie; and southerly to the town of Poughkeepsie, Vassar College (Main Street division), South Side division, and the village of Wappingers Falls. Leased line: Hospital branch: North street to Hudson River State Hospital (Central New England Railway Company).

*Officers:* President and Treasurer, Silas Hinkley; Vice-president and Secretary, Mary Hinkley.

*Main business office:* 489 Main street, Poughkeepsie, N. Y.

**Putnam and Westchester Traction Company**

*Organization:* Incorporated July 14, 1906, under the railroad law.

*Location of line:* Extends from Main and Division streets, Peekskill, northeasterly to or near the hamlet of Oregon.

*Officers:* President, O. G. Bennett; Vice-president, W. L. Stratton; Secretary and Treasurer, H. D. Swain.

*Main business office:* 167 Croton avenue, Ossining, N. Y.

**Rochester & Manitou Railroad Company**

*Organization:* Incorporated August 12, 1908, taking over the franchises and property of Rochester, Charlotte and Manitou Railroad Company, incorporated March 21, 1895, as a reorganization of The Grand View Beach Railroad Company, incorporated January 30, 1889, under the railroad law.

*Location of line:* On Beach avenue, Charlotte to Manitou Beach.

*Officers:* President, Henry W. Wedel; Vice-president, David Hyman; Secretary and Treasurer, Kendall B. Castle.

*Main business office:* 1230 Granite Building, Rochester, N. Y.

**Saint Lawrence International Electric Railroad & Land Company**

*Organization:* Incorporated February 19, 1900, as Saint Lawrence International Electric Company; amended certificate filed August 23, 1901, under section 21 of the railroad law, changing title as above.

*Location of line:* Extends from Alexandria Bay to Redwood.

*Officers:* President, Jacob Amos; Vice-president and Treasurer, B. B. Taggart; Secretary, Francis M. Hugo.

*Main business office:* Station Building, Market street, Alexandria Bay, N. Y.

**Schenectady Railway Company**

*Organization:* Incorporated February 12, 1895, as a reorganization of Schenectady Street Railway Company, incorporated February 25, 1886, under the street surface railroad law. Amended certificates (territory) filed April 30, 1902, and January 19, 1904; and (stock ownership) June 27, 1903.

*Location of line:* Extends in various directions in the city of Schenectady; and to Watervliet avenue, Albany, thence by trackage right to Broadway, Albany; to Third avenue, Watervliet, thence by trackage right to Union station, Troy; to Ballston Junction, thence by trackage right to Broadway, Saratoga Springs; to terminals Aqueduct and Rexford Flats; to connections with the Fonda, Johnstown and Gloversville railroad at Boston and Maine undercrossing; and the Scotia division (end of Mohawk and Ballston Avenue lines).

*Officers:* President, Horace E. Andrews; Vice-president, C. S. Sims; Secretary and Treasurer, James H. Aitkin.

*Main business office:* 204 Lafayette street, Schenectady, N. Y.

**Suffolk Traction Company**

*Organization:* Incorporated June 27, 1906, under the railroad law.

*Location of line:* Bluepoint line: Bay avenue, Patchogue, with branches to Patchogue, Holtsville, Echo (Port Jefferson line), and Bayport.

*Officers:* President, Thomas L. Hughes; Vice-president, John A. Potter; Secretary and Treasurer, J. H. Bennington.

*Main business office:* 230 West Main street, Patchogue, N. Y.

**Syracuse and South Bay Electric Railroad Company**

*Organization:* Incorporated March 11, 1907, under the railroad law.

*Location of line:* Syracuse, trackage to common center, to South Bay.

*Officers:* President, C. D. Beebe; First Vice-president, F. W. Roebbling; Secretary, H. C. Beatty; Treasurer, W. W. Foster.

*Main business office:* 500 Onondaga County Savings Bank Building, Syracuse, N. Y.

**Syracuse and Suburban Rail Road Company**

*Organization:* Incorporated June 29, 1895, under the railroad law.

*Location of line:* Main line: Syracuse to Edwards Falls; City line: City Line Junction to Seeley street; Jamesville branch: Orville Junction to Jamesville; Penitentiary branch: Dunlops Junction to Penitentiary; Trackage: Montgomery street to New York Central depot, Syracuse.

*Officers:* President, C. Loomis Allen; Vice-president, William P. Gannon; Secretary, Willis H. Michell; Treasurer, Alan C. Fobes.

*Main business office:* 502 Snow Building, Syracuse, N. Y.

**Syracuse, Watertown and Saint Lawrence River Railroad Company**

*Organization:* Incorporated April 28, 1911, under the railroad law. Commenced operations about November 2, 1912.

*Location of line:* Extends from Watertown Junction, on line of Syracuse and South Bay electric railroad, to Brewerton.

*Officers:* President, H. C. Beatty; Vice-president, W. C. Gray; Secretary, H. D. Brewster; Treasurer, W. W. Foster.

*Main business office:* 500 Onondaga County Savings Bank Building, Syracuse, N. Y.

**Troy and New England Railway Company**

*Organization:* Incorporated December 27, 1889, under the railroad law.

*Location of line:* Extends from city of Troy to Averill Park.

*Officers:* President, L. F. Loree; First Vice-president, C. S. Sims; Secretary, Wilson H. Elder; Treasurer, H. F. Atherton.

*Main business office:* 598 Broadway, Albany, N. Y.

**Union Railway Company of New York City**

*Organization:* Incorporated July 5, 1892, as a consolidation of Harlem Bridge, Morrisania and Fordham Railway Company, incorporated May 16, 1863 (further certificate filed July 1, 1863), under the railroad law, by authority of special act passed May 2, 1863 (ch. 361); The Melrose and West Morrisania Rail Road Company, incorporated August 19, 1886; and The North Third Avenue and Fleetwood Park Railroad Company, incorporated January 27, 1890. Reports to Public Service Commission, First District. A small portion of its line is within the jurisdiction of the Second District Commission.

*Location of line:* Track owned and leased 101.472 miles (including 1.727 miles track in car-houses) in the western half of the borough of the Bronx (except that the 5.121 miles leased are in the Second District), and three short branches extend over bridges into Manhattan; also operates under title equivalent to a lease the 22.938 miles of track owned by Bronx Traction Company, and 7.627 miles of track owned by the New York City Interborough

Railway Company. The first item includes 0.724 mile of track held under a joint or common title. The New York City Interborough Railway Company has franchise rights in streets in which this company is the sole owner of 2,059 miles of track, all of which is included in the foregoing. Trackage: Exercises trackage rights over 5,936 miles of track of other companies, of which 1,969 miles are in the Second District, located in the city of Mount Vernon. Operates over 5.121 miles of track of the Yonkers railroad under title equivalent to a lease.

*Summary of Mileage:*

	<i>Total</i>	<i>First District</i>	<i>Second District</i>
Length of line (first track).....	48.83	46.30	2.53
Length of other track.....	52.64	50.05	2.59
Totals . . . . .	101.47	96.35	5.12
Trackage . . . . .	5.94	3.97	1.97

*Note:* Data from latest report of Public Service Commission, First District.

*Officers:* President, Frederick W. Whitridge; Vice-president, Edward A. Maher; Secretary, Reune Martin; Treasurer, Alfred D. Sage.

*Main business office:* 2396 Third avenue, Manhattan, New York city.

**United Traction Company**

*Organization:* Incorporated December 30, 1899, as a consolidation of The Albany Railway, incorporated September 14, 1863, under the railroad law; Troy City Railway Company, incorporated January 31, 1866, under the name Troy and Albany Horse Rail Road Company, under the railroad law, the name changed by order of the Supreme Court dated June 20, 1891, to Troy City Railway Company; and The Watervliet Turnpike and Railroad Company, incorporated under the name The Watervliet Turnpike Company by special act passed March 31, 1828 (ch. 141), and name changed to The Watervliet Turnpike and Railroad Company by special act passed April 15, 1862 (ch. 233, sec. 13). The Troy and Lansingburgh Rail-Road Company, incorporated September 6, 1860, under the railroad law, surrendered its capital stock and was merged into Troy City Railway Company, December 28, 1893 (further certificate filed January 25, 1894). See L. 1851, ch. 295; and 1873, ch. 812.

*Location of line:* Extends in various directions in and connects the cities of Albany, Troy, Rensselaer, Watervliet, and Cohoes; and to the incorporated village of Waterford, Saratoga county.

*Officers:* President, L. F. Loree; Vice-president, C. S. Sims; Secretary, W. H. Elder; Treasurer, H. F. Atherton.

*Main business office:* 598 Broadway, Albany, N. Y.

*Lessor Companies:*

**The Capitol Railway:** Incorporated May 4, 1891, under the railroad law. Lease dated September 9, 1891, acquired from The Albany Railway on consolidation.

*Officers:* President, L. F. Loree; First Vice-president, C. S. Sims; Secretary, W. H. Elder; Treasurer, H. F. Atherton.

*Corporate office:* 598 Broadway, Albany, N. Y.

**Cohoes Railway Company:** Incorporated April 23, 1904, as a reorganization of The Cohoes City Railway Company, incorporated July 30, 1894, under the railroad law. Lease dated December 17, 1904.

*Officers:* President, L. F. Loree; First Vice-president, C. S. Sims; Secretary, W. H. Elder; Treasurer, H. F. Atherton.

*Corporate office:* 598 Broadway, Albany, N. Y.

**The Lansingburgh and Cohoes Railroad Company:** Incorporated March 8, 1880, under the railroad law. Leased May 14, 1880, to The Troy and Lansingburgh Rail-Road Company, Troy City Railway Company successor.

*Officers:* President, James O'Neil; Vice-president, Charles Clemenshaw; Secretary and Treasurer, Joseph J. Hagen.

*Corporate office:* Boardman Building, Fulton and River streets, Troy, N. Y.

**The Troy and Cohoes Rail Road Company:** Incorporated February 11, 1862, under the railroad law. Leased October 28, 1861, to The Troy and Lansingburgh Rail-Road Company, Troy City Railway Company successor.

*Officers:* President, Thomas Vail; Vice-president, Charles Clemenshaw; Secretary and Treasurer, Joseph J. Hagen.

*Corporate office:* Boardman Building, Fulton and River streets, Troy, N. Y.

**Waterford and Cohoes Railroad Company:** Incorporated February 10, 1883, under the railroad law. Leased May 29, 1889, to The Troy and Lansingburgh Rail-Road Company, Troy City Railway Company successor.

*Officers:* President, L. F. Loree; Vice-president, C. S. Sims; Secretary, J. J. Hagen; Treasurer, H. F. Atherton.

*Corporate office:* 598 Broadway, Albany, N. Y.

**Wallkill Transit Company**

*Organization:* Incorporated March 30, 1905, as a reorganization of Middletown-Goshen Electric Railway Company, incorporated October 20, 1899, as a reorganization of Middletown-Goshen Traction Company, incorporated June 22, 1895, as a consolidation of Middletown-Goshen Traction Company, incorporated June 10, 1893, under the railroad law, and Middletown-Bloomingsburgh Electric Railway Company, incorporated April 10, 1895, under the railroad law.

*Location of line:* In city of Middletown, and extends to Goshen.

*Officers:* President, D. C. McMonagle; Vice-president, C. A. Kunkel; Secretary, John Fox Weiss; Treasurer, W. M. Ogelsby.

*Main business office:* Franklin Square, Middletown, N. Y.

**Warren and Jamestown Street Railway Company**

*Organization:* Incorporated July 9, 1902, under the name Warren and Jamestown Electric Railroad Company, under the railroad law of New York, and consolidated and merged March 7, 1904, with The Warren and Jamestown Electric Street Railway Company, incorporated under the laws of Pennsylvania May 20, 1902, under the name of Warren and Jamestown Street Railway Company.

*Location of line:* Extends from Jamestown via Frewsburg to Warren, Penna., with trackage in Warren (Warren Street Railway Company).

*Officers:* President, D. H. Siggins; Vice-president, H. M. Preston; Secretary and Treasurer, Sam Q. Smith.

*Main business office:* Corner Liberty street and Pennsylvania avenue, Warren, Penna.

**The Waverly, Sayre and Athens Traction Company**

*Organization:* Incorporated December 19, 1894, as a consolidation under the railroad law of New York, and act of Pennsylvania of March 24, 1864, of The Susquehanna Valley Electric Traction Company, incorporated January 11, 1893, under the railroad law of New York, and The Waverly, Sayre and Athens Electric Traction Company, incorporated by letters patent of Pennsylvania issued January 23, 1893, under act of May 14, 1889 (P. L. 211).

*Location of line:* Extends in various directions in the village of Waverly, and to Sayre, Penna., and Athens, Penna.

*Officers:* President, G. T. Rogers; Vice-president, G. W. Dunn; Secretary and Treasurer, H. Tracy Rogers.

*Main business office:* 242 Broad street, Waverly, N. Y.

**The Westchester Electric Railroad Company**

*Organization:* Incorporated March 27, 1891, under the street surface railroad law. June 2, 1893, The Mount Vernon and Eastchester Railway Company, incorporated November 14, 1887, as a reorganization of Mount Vernon and East Chester Rail Road Company, incorporated

August 12, 1885, and The New Rochelle Railway and Transit Company, incorporated September 12, 1890, as a reorganization of New Rochelle and Pelham Railway Company, incorporated August 22, 1885, and New Rochelle Street Horse Railroad Company, incorporated September 25, 1885 (also merged June 29, 1888, with above named New Rochelle and Pelham Railway Company), were merged with The Westchester Electric Railroad Company. J. Addison Young was appointed receiver January 18, 1908, by order of the Supreme Court, Westchester County; receivership terminated by order dated July 6, 1912.

*Location of line:* Extends in various directions in the cities of Mount Vernon and New Rochelle; and to New York city, Bronx; towns of Eastchester, Pelham, and Mamaroneck; and villages of Bronxville, Tuckahoe, Pelham, Pelham Manor, and North Pelham.

*Officers:* President, F. W. Whitridge; Vice-president, E. H. Maher; Secretary, F. J. Fuller; Treasurer, A. D. Sage.

*Main business office:* 2396 Third avenue, New York city.

#### **The Westchester Street Railroad Company**

*Organization:* Incorporated December 1, 1909, as a reorganization of Tarrytown, White Plains and Mamaroneck Railway Company, incorporated May 4, 1892, under the name of The New York, Elmsford and White Plains Railway Company (amended certificate filed September 6, 1894); name changed by order of the Supreme Court dated January 29, 1898, as above.

*Location of line:* Extends from White Plains to Tarrytown, Mamaroneck, Mount Vernon, and Larchmont, with line Fair Grounds to Mount Calvary Cemetery (White Plains); also North Street line, Westchester avenue to village line White Plains; also Silver Lake line, from Mamaroneck and Railroad avenues to Silver Lake casino.

*Officers:* President, Howard Elliott; Vice-president, L. S. Storrs; Secretary, A. E. Clark; Treasurer, A. S. May.

*Main business office:* 70 Central avenue, White Plains, N. Y.

#### *Lessor Company:*

**Shore Line Electric Railroad Company:** Incorporated December 18, 1909, as a reorganization (in part) of Tarrytown, White Plains and Mamaroneck Railway Company (Parcel No. 3 at sale November 5, 1909). Leased to The Westchester Street Railroad Company July 1, 1913.

*Officers:* President, L. S. Storrs; Secretary, A. E. Clark; Treasurer, A. S. May.

*Corporate office:* 129 Church street, New Haven, Conn.

#### **Western New York and Pennsylvania Traction Company**

*Organization:* Incorporated November 16, 1906, as a consolidation under the laws of New York of The Olean

Street Railway Company, incorporated April 12, 1880, under the railroad law of New York, and Bradford Street Railroad Company, incorporated June 18, 1906, under the laws of Pennsylvania, as a reorganization of Bradford Electric Street Railway Company, incorporated under the laws of Pennsylvania. Rock City Railroad Company, incorporated July 14, 1906, as a reorganization of Olean, Rock City and Bradford Railroad Company, incorporated July 2, 1897, under the laws of New York, as a consolidation of Olean, Rock City and Bradford Railroad Company, organized under the laws of Pennsylvania, and a corporation of the same name incorporated February 26, 1897, under the laws of New York; was consolidated November 12, 1906, with The Olean Street Railway Company, under the name of the latter.

In Pennsylvania, the Rock City division extends to Bradford, and the Bradford-Carrollton division to Clarkdale; the Shingle House branch extends from state line to Shingle House, Penna.; there is also a line from Bradford to Lewis Run, and local lines in Bradford.

*Officers:* President, Wilson R. Page; Vice-president, Joseph B. Mayer; Secretary, James P. Quigley; Treasurer, Joseph B. Mayer.

*Main business office:* 142 North Union street, Olean, N. Y.

#### **The Yonkers Railroad Company**

*Organization:* Incorporated January 7, 1886, under the street surface railroad law. With the Yonkers Railroad Company, The North and South Electric Railway Company, incorporated July 9, 1894, and Yonkers and Tarrytown Electric Railroad Company, incorporated February 24, 1896, were consolidated April 1, 1896, under the name The Yonkers Railroad Company. Leslie Sutherland was appointed permanent receiver May 5, 1909, by order of the Supreme Court, Westchester County; receivership terminated by order dated July 6, 1912.

*Location of line:* Extends in various directions in the city of Yonkers; and to Hastings, Tuckahoe, Mount Vernon, and 242nd street, New York city (trackage).

*Officers:* President, F. W. Whitridge; Vice-president, Leslie Sutherland; Secretary, F. J. Fuller; Treasurer, A. D. Sage.

*Main business office:* 2396 Third avenue, New York city.

## INCHOATE AND DORMANT CORPORATIONS

## Forest Park Railway Company

Incorporated December 18, 1902. Road is projected to extend from Brunswick, Rensselaer county, to city of Rensselaer, and in cities of Troy and Rensselaer, a distance of 14 miles. No road has been constructed, but preliminary surveys have been made. Its capital stock of \$2000 is held by United Traction Company.

*Officers:* President, L. F. Loree; Vice-president, C. S. Sims; Secretary, Wilson H. Elder; Treasurer, H. F. Atherton.

*Main business office:* 83 Third street, Troy, N. Y.

## Frontier Electric Railway Company

Incorporated August 4, 1906. Road is projected to extend from Buffalo to Niagara Falls via Tonawanda and North Tonawanda, a distance of 24 miles. A certificate of public convenience and a necessity was granted to it by the Board of Railroad Commissioners. The stockholders, under date of November 16, 1906, consented to the increase of capital stock to 15,000 shares of \$100 par value each, but only 250 shares had been issued to June 30, 1914. They also consented to the execution and delivery of a mortgage upon all the corporation's property and franchises acquired at date of such mortgage or thereafter to be acquired, to secure the payment of bonds to the amount of \$2,000,000, to bear interest at 5 per cent per annum. No bonds had been issued under this mortgage up to June 30, 1914. An option on the right of way formerly owned by Buffalo, Thousand Islands and Portland Railroad Company between said cities has been acquired, and the work of completing said right of way and obtaining necessary municipal consents is reported to have been actively conducted. The balance sheet of June 30, 1914, shows—

<i>Assets Side:</i>	
Cash . . . . .	\$370
Road and equipment:	
Organization . . . . .	\$11,616
Right of way . . . . .	249,753
Engineering and superintendence . . . . .	6,305
	<u>267,674</u>
	\$268,044
<i>Liabilities Side:</i>	
Common stock . . . . .	\$25,000
Miscellaneous accounts payable . . . . .	238,706
Corporate surplus . . . . .	4,338
	<u>\$268,044</u>

*Officers:* President, H. T. Ramsdell; Vice-president, James S. Simmons; Secretary, Samuel Ellis; Treasurer, Walter Aspinwall.

*Main business office:* 272 Main street, Buffalo, N. Y.

## Geneva, Phelps and Newark Railroad Company

Incorporated November 25, 1905. Road is projected to extend from Geneva to Newark via Phelps, a distance of 15 miles. The Board of Railroad Commissioners granted a certificate of public convenience and a necessity March 21, 1906, and January 17, 1907, authorized a mortgage for not to exceed \$550,000. The report states that financial arrangements for construction were practically completed in the Fall of 1907, when the panic came on, and since that time nothing has been done. The balance sheet of June 30, 1914, shows—

<i>Assets Side:</i>	
Cash . . . . .	\$18,842
<i>Liabilities Side:</i>	
Miscellaneous unfunded debt . . . . .	\$3,842
Capital stock . . . . .	15,000
	<u>\$18,842</u>

*Officers:* President, Edward H. Palmer; Secretary, Lansing G. Hoskins; Treasurer, Thomas H. Chew.

*Main business office:* 541 Exchange street, Geneva, N. Y.

## Hornell and Dansville Railroad Company

Incorporated May 15, 1907. Road is projected to extend from Burns, Allegany county, to Dansville, Livingston county, N. Y., a distance of about 10 miles. May 15, 1907, a certificate of

public convenience and a necessity was granted by the Board of Railroad Commissioners. There has been considerable litigation over rights of way. The company reports that within five years after filing its certificate of incorporation it had begun construction and spent 10 per cent or more of its authorized capital for that purpose. The balance sheet June 30, 1914, shows—

<i>Assets Side:</i>	
Cash . . . . .	\$150
Materials and supplies . . . . .	2,300
Road and equipment:	
Organization . . . . .	\$1,404
Right of way . . . . .	7,350
Engineering and superintendence . . . . .	4,170
Miscellaneous construction expenditures . . . . .	225
	<u>13,149</u>
	\$15,599
<i>Liabilities Side:</i>	
Miscellaneous unfunded debt . . . . .	\$3,099
Capital stock . . . . .	12,500
	<u>\$15,599</u>

*Officers:* President, Horace Barnard; Vice-president, Frederick E. Haight; Secretary and Treasurer, T. F. Humphrey.

*Main business office:* 22 William street, New York city.

## Hornell-Bath Interurban Railroad Company

Incorporated July 22, 1909. Road is projected to extend from Hornell to Bath via Fremont, Howard, and Avoca, a distance of 23 miles, being the uncontested portion of the projected line of Hornell, Bath and Lake Keuka Railway Company abandoned by the latter after continued litigation. The Public Service Commission, Second District, December 23, 1909, granted a certificate of public convenience and a necessity, and approved the exercise by the company of its franchises and rights. December 28, 1909, the Commission authorized the issue of \$250,000 capital stock, and \$450,000 forty-year 5 per cent gold bonds secured by mortgage; an additional issue of \$195,000 bonds was authorized June 31, 1910. The report for year ended June 30, 1914, shows that of its authorized capital stock \$25,000 has been issued and is outstanding. Construction has not been commenced.

*Officers:* President, J. F. Turk; Vice-president, W. H. Greenhou; Secretary, Clyde E. Shults; Treasurer, J. N. Nicholson.

*Main business office:* 102 Main street, Hornell, N. Y.

## Ithaca-Cortland Traction Company

Incorporated June 27, 1903. Road is projected to extend from Ithaca to Cortland via Dryden and Freeville, a distance of 22 miles. The Board of Railroad Commissioners, December 2, 1903, granted a certificate of public convenience and a necessity which was sustained on appeal taken to the courts by Lehigh Valley Railroad Company. Municipal grants of franchises were issued in 1904 by the Townships of Ithaca, Dryden, Gorton, Cortlandville; and the Villages of Freeville and Dryden. Proposed crossings at various points have been contested by Lehigh Valley Railroad Company, and some of these are still in litigation. Effective May 21, 1913, the time in which to complete the road was extended by legislative enactment to June 30, 1915. October 14, 1913, Edward G. Wyckoff and George E. Monroe were appointed receivers of the property. The balance sheet June 30, 1914, shows—

<i>Assets Side:</i>	
Road and equipment . . . . .	\$83,596
Cash . . . . .	4
Deferred assets . . . . .	9,263
	<u>\$92,863</u>
<i>Liabilities Side:</i>	
Capital stock:	
Common . . . . .	\$67,800
Preferred . . . . .	9,000
Accounts payable . . . . .	1,876
Miscellaneous unfunded debt . . . . .	14,191
	<u>\$92,863</u>

\* So reported, though not the sum of the items given.

The expenditures for road and equipment to June 30, 1914, are as follows:

Organization . . . . .	\$18,507
Right of way . . . . .	7,554
Roadway and electric line . . . . .	6,990
Engineering and superintendence . . . . .	15,492
Law expenditures . . . . .	638
Miscellaneous construction expenditures . . . . .	26,009
Interest during construction . . . . .	7,117

\* \$82,307

\* So reported, though not the amount given on the balance sheet.

*Officers:* President, Paul K. Clymer; Vice-president, H. L. Chandler; Secretary and Treasurer, Seymour S. Preston.

*Main business office:* 120 East State street, Ithaca, N. Y.

#### Liberty and Callicoon Railroad Corporation

Incorporated in 1912. Road is projected to extend from Liberty to Callicoon, Sullivan county, via Jeffersonville. "This corporation was organized to take over the franchise and assets of the Liberty and Jeffersonville Railroad project. Certain steps were initiated but owing to legal entanglements and the condition of the times it was found necessary to abandon the steps taken before they were completed, and the company accordingly stands without having accomplished anything. It has no property, and it has no debts and no stock or securities of any nature outstanding. Certain moneys were received by the corporation for stock under an agreement which was found to be illegal, and the proceeding was therefore abrogated and the money refunded."

*Officers:* President, Lowell H. Brown; Treasurer, W. P. Craig.

*Main business office:* East Orange, N. J.

#### Little Falls and Johnstown Railroad Company

Incorporated April 8, 1911. Road is projected to extend from Little Falls to Johnstown via St. Johnsville, with branch to Canajoharie, a distance of 36 miles. Preliminary surveys have been made and line located. A certificate of public convenience and a necessity was granted by the Public Service Commission, Second District, July 8, 1912. June 30, 1914, an application for authority to issue securities was pending before the Commission.

*Officers:* President, J. Ledlie Hees; Vice-President, J. J. Gilbert; Secretary and Treasurer, A. J. Baker.

*Main business office:* 110 West Main street, Johnstown, N. Y.

#### Malone, Fort Covington and Hopkins Point Railway Company

From reports and correspondence on file it appears that this corporation is practically defunct, and until a different condition is found reports will not be required.

#### Rochester Corning Elmira Traction Company

Incorporated July 27, 1906. Road is projected to extend from Rochester to Elmira via Dansville, a distance of 120 miles. By order of Supreme Court dated March 5, 1907, the Board of Railroad Commissioners was directed to grant a certificate of public convenience and a necessity which had theretofore been refused; the certificate was accordingly granted and filed March 22, 1907. April 10, 1907, the company filed a certificate for a branch road from Dansville to Hornell. August 6, 1907, it applied to the Public Service Commission, Second District, for authority to execute a mortgage and issue bonds to the amount of \$8,000,000, and to issue \$4,000,000 stock. Consent and authorization were conditionally granted for a mortgage of not to exceed \$6,000,000 and the issue of \$4,210,000 bonds thereunder, and \$3,880,000 stock. Supplemental orders dated July 28, 1908, and September 22, 1908, authorized the issue under modified conditions of \$380,000 stock, of which \$271,400 is reported to have been issued; and \$1,000,000 bonds, none of which have yet been sold. In connection with a judgment in favor of William C. Gray for \$34,620, a temporary receiver was appointed July 18, 1912; and William C. Gray was appointed permanent receiver September 30, 1912. The company has no cash or tangible assets, nor are any expenditures for construction of road reported.

*Officers:* President, John Hofman; Secretary, L. H. Whitbeck; Treasurer, S. B. Williams.

*Main business office:* 77 Main street, West, Rochester, N. Y.

#### Troy, Rensselaer and Pittsfield Railroad Company

Incorporated April 27, 1901. Road is projected to extend from Troy to state line, in Columbia county, via Rensselaer, a distance of 35 miles. Certificate of public convenience and a necessity was granted by the Board of Railroad Commissioners July 15, 1901, later affirmed by the Appellate Division of the Supreme Court upon review at the instance of other interested railroads. By chapter 252, laws of 1906, time to commence construction was

extended two years. By chapter 81, laws of 1911, the time within which road would be required to be finished was extended to May 1, 1914. An action was commenced against the company before the Supreme Court, Rensselaer County, and judgment in sequestration and order of the court appointing Gilbert V. Schenck, receiver, are reported entered in the office of the Clerk of Rensselaer County April 26, 1911. The balance sheet June 30, 1914, shows—

#### Assets Side:

Road and equipment:	
Preliminary construction and survey . . . . .	\$33,999
Organization . . . . .	13,389
Right of way . . . . .	600
Roadway and electric line . . . . .	26,330
Engineering and superintendence . . . . .	4,350
Miscellaneous general expenditures . . . . .	2,244
Unassigned by accounts . . . . .	204

\$81,116

Cash . . . . . 102

\$81,218

#### Liabilities Side:

Capital stock . . . . .	\$35,000
Miscellaneous unfunded debt . . . . .	44,694
Surplus . . . . .	1,523

\$81,217

*Officers:* President, A. W. Paige; Vice-president, M. J. Warner; Secretary, J. A. Burne; Treasurer, J. F. Kelley.

*Main business office:* 30 Church street, New York city.

#### Utica Southern Railroad Company

Incorporated January 7, 1907. Road was originally projected to extend from Clinton, N. Y., to Hamilton, with a branch to Waterville, a distance of 26 miles, 20 miles of which would be on private right of way owned by the company. Later the charter was amended, and the Public Service Commission, Second District, granted permission to extend the line from Hamilton to Norwich, N. Y. The right of way is held by private individuals and has not yet been transferred. Approximately one mile of road has been graded. The corporation reports that it has entered into a contract for the construction and equipment of the road as originally projected. The Board of Railroad Commissioners had authorized the issue of \$600,000 common stock, and \$780,000 bonds secured by mortgage; later the Public Service Commission, Second District, authorized a mortgage upon the entire property for \$2,500,000 and the issue thereunder of \$628,000 additional bonds, a total authorized issue of \$1,408,000; it also authorized the issue of \$1,400,000 preferred stock. The report for year ended June 30, 1914, indicates that no part of the bonds and preferred stock has been issued, and of the common stock \$33,700 par value has been issued and is outstanding. No construction during the year is reported.

*Officers:* President, George W. Sanborn; Vice-president, A. M. Smith; Secretary, E. H. Risley; Treasurer, Fred G. Mott.

*Main business office:* 222 Arcade, Genesee street, Utica, N. Y.

#### Whitehall and Granville Railroad Company

Incorporated September 11, 1900. Road is projected to extend from Whitehall to West Pawlet via Granville, a distance of 22 miles. Certificate under section 69 granted April 4, 1901. Capital stock reduced to \$400,000 September 11, 1911. About 9 miles were graded in 1901, under contract with Dispatch Construction Company of Chicago, which company later failed, and no work appears to have been done since. The balance sheet June 30, 1914, shows—

#### Assets Side:

Road and equipment:	
Organization . . . . .	\$2,200
Right of way . . . . .	3,071
Other street railroad land . . . . .	23,094
Unassigned by accounts . . . . .	*14,000

\$42,365

#### Liabilities Side:

Capital stock . . . . .	\$25,200
Subscriptions for bonds . . . . .	3,165
Claim of assignees of Dispatch Construction Co. . . . .	14,000

\$42,365

\* Apparently represents grading, etc., done by Construction company under contract.

*Officers:* President, E. J. Gray; Vice-president, E. R. Norton; Secretary, Charles I. Baker; Treasurer, Daniel D. Woodard.

*Main business office:* 5 North street, Granville, N. Y.

## OPERATING ELECTRIC RAILROAD CORPORATIONS

The figures following the name give the order in which the corporation appears in the tables:

<sup>1</sup> Fonda, Johnstown and Gloversville Railroad Company operates a steam railroad and an electric railroad. Its report of corporate and fiscal affairs is rendered as of a steam railroad corporation, and tabulations thereof are included with those of steam railroad corporations. It also reports as an electric railroad corporation, and is included in the following tables in respect of electric railroad mileage (Tables 207a and 207b), electric railroad car equipment (Table 208), electric railroad operating revenues (Table 209), electric railroad operating expenses (Table 210), statistics of electric railroad operations (Table 211), and grade crossings and crossing protection (Table 213).

Returns not tabulated; see statement Organization, etc.

Batavia Traction Company, Incorporated  
Freeport Railroad Company  
Geneva and Auburn Railway Company

Great South Bay Ferry Company, The  
Mount Beacon-on-Hudson Hotel Company  
Penn Yan, Keuka Park and Branchport Railway

TABLE 201: BALANCE SHEET, OPERATING ELECTRIC

The figures given are for the corporation as a whole; they are not segregated according to state lines. The corporations operating both within and without and Pennsylvania Traction Company, New York and Stamford Railway Company, Warren and Jamestown Street Railway Company, and The Waverly, Sayre Figures in *italics* denote *credit balances* on the assets side or *debit balances* on the liabilities side. The corporations are named in the order of their average revenues from street and interurban railroad operations during the year ended June 30, 1914; for

<sup>1</sup> Includes expenditures on road and equipment of leased lines. <sup>2</sup> Company equalizes expense of accidents and damages over the calendar year, which is its fiscal year, by means of monthly charges on some estimated basis. This is finally adjusted during December to actual liabilities incurred for the year. The expense for accidents and damages to June 30, 1914, had exceeded the accruals by \$37,031, causing a debit balance of that amount in "Casualty and insurance reserve" and a net debit balance of \$35,220 in "Other reserves".  
<sup>3</sup> Includes \$1116 expenditures on road and equipment of leased lines. <sup>4</sup> Includes \$2644 expenditures on road and equipment of leased lines. <sup>5</sup> Includes \$3,553,858 "Construction work in progress, owned lines". <sup>6</sup> \$55,673

claimed by respondent to be a net adjustment for interest during prior periods of construction not previously taken into capital accounts has been credited to surplus on the company's books and charged to capital. This transaction has been questioned by the Commission's examiners as contrary to the provisions of the Commission's Uniform System of Accounts for Street Railroads, and in the absence of a satisfactory explanation it is disregarded in the preparation of these abstracts so that the fixed capital shown is less and the corporate deficit greater by \$55,673 than the corresponding figures on the company's books and in its reports. <sup>7</sup> Includes \$87,663 "Construction work in progress, owned lines". <sup>8</sup> Includes \$7600 "Stock of underlying companies".

<sup>1</sup> Includes \$70,184 representing 4% of gross earnings of Syracuse lines expended for betterments and credited to "Fixed capital December 31, 1908".  
<sup>2</sup> Includes \$19,827 "Adjustment of amount due from Electric Express Company for car-mile charges covering equipment, power, and trackage charges from 1902 to February 1, 1909".  
<sup>3</sup> Includes \$9491 adjustment of tax accrual account.  
<sup>4</sup> Respondent's portion of accruals for "Zylonite tunnel power station reserve".  
<sup>5</sup> Includes \$27,378 "Adjustment of charges, account operation of Zylonite power station"; and \$7491 "Expenditures on preliminary surveys of proposed extensions".  
<sup>6</sup> Amount accruing to respondent during year from tracks leased under an agreement whereby respondent was to be reimbursed if the expenses and taxes applicable to leased

tracks exceeded the revenues therefrom.  
<sup>7</sup> \$55,673 claimed by respondent to be a net adjustment for interest during prior periods of construction not previously taken into capital accounts has been credited to surplus on the company's books and charged to capital. This transaction has been questioned by the Commission's examiners as contrary to the provisions of the Commission's Uniform System of Accounts for Street Railroads, and in the absence of a satisfactory explanation it is disregarded in the preparation of these abstracts so that the fixed capital shown is less and the corporate deficit greater by \$55,673 than the corresponding figures on the company's books and in its reports.  
<sup>8</sup> Includes \$1361 adjustment of interest during construction, July 1, 1901, to August 31, 1912.

## RAILROAD CORPORATIONS, JUNE 30, 1914

the State of New York are International Railway Company, Buffalo and Lake Erie Traction Company, Berkshire Street Railway Company, Western New York and Athens Traction Company.

their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 209.

For income account of corporation No. 10, Fonda, Johnstown and Gloversville Railroad Company, see Table 102.

<sup>9</sup> Includes \$47,395 "Strike expenses". <sup>10</sup> Includes \$97,503 representing interest charged to income during year ended June 30, 1913, and placed in sus-

pense. It was decided during the current year that this amount should properly have been charged to "Interest during construction," and the Corporate Surplus or Deficit account was accordingly credited.

TABLE 201: BALANCE SHEET, OPERATING ELECTRIC

The figures given are for the corporation as a whole; they are not segregated according to state lines. The corporations operating both within and without Pennsylvania Traction Company, New York and Stamford Railway Company, Warren and Jamestown Street Railway Company, and The Waverly, Sayre Figures in *italics* denote *credit balances* on the assets side or *debit balances* on the liabilities side.

The corporations are named in the order of their average revenues from street and interurban railroad operations during the year ended June 30, 1914; for

<sup>11</sup> Includes \$5771 "Power used in building Riverside station early part 1913, not billed at that time".

<sup>12</sup> Represents \$10,670 "Original cost of power plant buildings," and \$8300 "Difference in engines exchanged".

<sup>13</sup> Taxes are not segregated as between railroad and other departments.

<sup>14</sup> Includes \$53,783 "Assets taken over from Hartwick Power Co." and \$4699 "Interest accrued taken care of in Hartwick Power Company's account taken over by company".

<sup>15</sup> Includes \$62,665 adjustments of interest accrued prior to July 1, 1913, and \$7258 shortage in Materials and Supplies.

<sup>16</sup> Includes \$14,516 appropriation to reserve for "Accrued amortization of capital".

<sup>17</sup> Appropriation to "Damage reserve," to close out account "for damages incurred in prior years".

## RAILROAD CORPORATIONS, JUNE 30, 1914 (continued)

the State of New York are International Railway Company, Buffalo and Lake Erie Traction Company, Berkshire Street Railway Company, Western New York and Athens Traction Company.

their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 209.

<sup>13</sup> Includes \$12,593, debit offsetting credit balance of operating expense account "Depreciation of way and structures"; deferred maintenance now charged to surplus instead of to current expense.

<sup>19</sup> Report covers period July 1, 1913, to March 31, 1914; see statement Organization, etc.

<sup>20</sup> See explanation of this amount in Table 205 a.

<sup>21</sup> Report covers period March 31, 1914, to June 30, 1914; see statement Organization, etc.

<sup>22</sup> Includes \$4357 adjustment of Materials and Supplies account.

<sup>23</sup> Includes expenditures, if any, for permanent improvements as well as operating expenses proper; see statement Organization, etc.

<sup>24</sup> Includes \$1425 loss on equipment sold, charged to Corporate Surplus or Deficit account during preceding year, which was transferred to reserve for "Accrued amortization of capital" during current year.

<sup>25</sup> Successor to Geneva and Auburn Railway Co.; see statement Organization, etc.

TABLE 201: BALANCE SHEET, OPERATING ELECTRIC

The figures given are for the corporation as a whole; they are not segregated according to state lines. The corporations operating both within and without Pennsylvania Traction Company, New York and Stamford Railway Company, Warren and Jamestown Street Railway Company, and The Waverly, Sayre and Fishkill Electric Company, are named in the order of their average revenues from street and interurban railroad operations during the year ended June 30, 1914; for figures in *italics* denote *credit balances* on the assets side or *debit balances* on the liabilities side.

<sup>28</sup> Electric railroad operations conducted during seven and one-half months only. <sup>29</sup> Includes an indefinite proportion of taxes applicable to prior

<sup>28</sup> Electric Railroad operations conducted by the United States Railroad Administration. <sup>29</sup> The proportion of taxes applicable to prior accounting periods, back taxes for a number of years having been levied and paid in 1913 and charged out through income of 1913 and 1914. <sup>30</sup> Includes \$11,375 "Cancellation of interest on bonds to December 31, 1913". <sup>31</sup> Under "Miscellaneous credits" to surplus are included \$1,100,000 of interest accrued and unpaid July 1, 1913, written off; \$8,100,000 of interest accrued with Metropolitan C. & O. Co. in 1913, written off; \$10,991 adjustment of tax account. "Unclassified Miscellaneous debits" to surplus is included \$10,932 account with P. H. Flynn, written off. In addition to the above, each of these items includes

\$2,850,000 as the result of a transaction whereby \$2,450,000 bonds and \$400,000 capital stock of the respondent were retired during the year and "Fixed capital December 31, 1908," correspondingly reduced. <sup>32</sup> Formerly the Penn Yan.

<sup>23</sup> "Cancellation of outstanding bills and accounts as part consideration of the transfer of a controlling interest in the company's capital stock." <sup>34</sup> In-

<sup>36</sup> Reported as a balancing adjustment due to unexplained discrepancies in the company's books when they were taken over by the Receiver.

## RAILROAD CORPORATIONS, JUNE 30, 1914 (concluded)

the State of New York are International Railway Company, Buffalo and Lake Erie Traction Company, Berkshire Street Railway Company, Western New York and Athens Traction Company.

their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 209.

<sup>37</sup> Electric railroad operations conducted from July 1, 1913, to September 30, 1913; and from May 23, 1914, to June 30, 1914.

<sup>38</sup> "Amount alleged to be due lessor" written off.

TABLE 203: INVESTMENTS, OPERATING ELECTRIC RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914

The items shown are those included under the head of "Miscellaneous investments" in the Balance Sheet, Table 201; these are divided into two groups: A, Free Investments; and B, Pledged or Otherwise Bound Investments. In each group the items are classified as follows: 1, bonds of companies independent of the respondent; 2, other funded debt of independent companies; 3, stocks of independent companies; 4, bonds of system corporations; 5, other funded debt of system corporations; 6, stocks of system corporations; 7, advances to system corporations; 8, land; 9, improvements on land; 10, all other investments.

Only those corporations are included which report such items as held at some time during the year.

The corporations are named in the order of their average revenues from street and interurban railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 209.

<sup>1</sup> \$7,500,000 capital stock of respondent issued in exchange for these and certain other securities of Hudson Valley Railway Company which have since matured.

<sup>2</sup> Four shares purchased for \$404; remainder turned over to respondent at time of consolidation.

<sup>3</sup> Exchanged for capital stock of respondent, par for par.

<sup>4</sup> Acquired along with other property in exchange for first and refunding bonds of respondent; it is reported that the amount of such bonds applicable to the acquisition of this stock alone is not now determinable.

<sup>5</sup> Dividends accruing to this company on stock of Niagara and Erie Power Company are paid to Erie and Suburban Railway Company, by agreement whereby the stock was deposited with the trustee of Erie and Suburban Railway Company as further security for that company's mortgage.

<sup>6</sup> Includes \$100,000 par value held by virtue of respondent's lease of Erie Electric Motor Company, the stockholder of record.

<sup>7</sup> "Acquired under consolidation June 30, 1901."

<sup>8</sup> "Secured at time of reorganization December 20, 1905, by means of debenture bonds issued in exchange."

TABLE 203: INVESTMENTS, OPERATING ELECTRIC RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914 (concluded)

The items shown are those included under the head of "Miscellaneous investments" in the Balance Sheet, Table 201; these are divided into two groups: A, Free Investments; and B, Pledged or Otherwise Bound Investments. In each group the items are classified as follows: 1, bonds of companies independent of the respondent; 2, other funded debt of independent companies; 3, stocks of independent companies; 4, bonds of system corporations; 5, other funded debt of system corporations; 6, stocks of system corporations; 7, advances to system corporations; 8, land; 9, improvements on land; 10, all other investments.

Only those corporations are included which report such items as held at some time during the year.

The corporations are named in the order of their average revenues from street and interurban railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of operating revenues see page 209.

TABLE 204: COST OF ROAD AND EQUIPMENT, OPERATING ELECTRIC RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914

The figures given are for the corporation as a whole; they are not segregated according to state lines. The corporations operating both within and without the State of New York are International Railway Company, Buffalo and Lake Erie Traction Company, Berkshire Street Railway Company, Western New York and Pennsylvania Traction Company, New York and Stamford Railway Company, Warren and Jamestown Street Railway Company, and The Waverly, Sayre and Athens Traction Company.

Expenditures since December 31, 1908, as well as those during the year are shown according to the officially prescribed classification, the totals of the balances in accounts representing the road and equipment reported as of December 31, 1908, and still in service being shown on line 55. Figures in *italics* denote credits.

The corporations are named in the order of their average revenues from street and interurban railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 209.

<sup>a</sup> Respondent acquired by lease effective February 1, 1913, the road of The Hoosick Falls Railroad Company which brought it within the jurisdiction of the Public Service Commission, Second District. Its expenditures for fixed capital have therefore been classified according to the Uniform System of Accounts adopted by the Commission since July 1, 1912, instead of since December 31, 1908. Such expenditures include an undistributed item \$852,855, "Cost of road purchased" during that period, and a credit of \$862 to that account, which are included in the totals of their respective columns but not otherwise shown. Expenditures reported cover both owned and leased lines.

<sup>b</sup> \$55,673 claimed by respondent to be a net adjustment for interest during prior periods of construction not previously taken into capital accounts has been credited to surplus on the company's books and charged to capital. This transaction has been questioned by the Commission's examiners as contrary to the provisions of the Commission's Uniform System of Accounts for Street Railroads, and in the absence of a satisfactory explanation it is disregarded in the preparation of these abstracts, so that the fixed capital shown is less and the corporate deficit greater by \$55,673 than the corresponding figures on the company's books and in its reports.

TABLE 204: COST OF ROAD AND EQUIPMENT, OPERATING ELECTRIC RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914 (continued)

The figures given are for the corporation as a whole; they are not segregated according to state lines. The corporations operating both within and without the State of New York are International Railway Company, Buffalo and Lake Erie Traction Company, Berkshire Street Railway Company, Western New York and Pennsylvania Traction Company, New York and Stamford Railroad Company, Warren and Jamestown Street Railway Company, and The Waverly, Sayre and Athens Traction Company.

Expenditures since December 31, 1908, as well as those during the year are shown according to the officially prescribed classification, the totals of the balances in accounts representing the road and equipment reported as of December 31, 1908, and still in service being shown on line 55. Figures in *italics* denote credits.

The corporations are named in the order of their average revenues from street and interurban railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 209.

\* Includes \$213,929 representing book value of West Side Railroad Company, which property was formerly leased by Elmira Water, Light and Railroad Company but was transferred to the latter corporation by merger in 1911. This amount has never been distributed in accordance with the prescribed classification, having been treated in this respect as though parent corporation had full title to property from the beginning.

TABLE 204: COST OF ROAD AND EQUIPMENT, OPERATING ELECTRIC RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914 (continued)

The figures given are for the corporation as a whole; they are not segregated according to state lines. The corporations operating both within and without the State of New York are International Railway Company, Buffalo and Lake Erie Traction Company, Berkshire Street Railway Company, New York and Stamford Traction Company, Warren and Jamestown Street Railway Company, and The Waverly, Sayre and Athens Traction Company.

The figures are segregated according to the following classification, the totals of the balances in accounts representing the road and equipment reported as of December 31, 1908, and still in service being shown on line 55. Figures in *italics* denote credits.

The corporations are named in the order of their average revenues from street and interurban railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 209.

\* Reported expenditures for road and equipment include only those since September 30, 1909, the date on which operations were begun by the present reorganized company; expenditures prior to that date are not reported separately for the Street Railroad department.

\* Includes \$23,737 expenditures on leased lines incurred during the year.

10 Includes expenditures on leased lines aggregating \$30,136 to June 30, 1913, and \$50,287 to June 30, 1914.

11 Includes \$11,281 expenditures on leased lines.

TABLE 204: COST OF ROAD AND EQUIPMENT, OPERATING ELECTRIC RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914 (continued)

The figures given are for the corporation as a whole; they are not segregated according to state lines. The corporations operating both within and without the State of New York are International Railway Company, Buffalo and Lake Erie Traction Company, Berkshire Street Railway Company, Western New York and Pennsylvania Traction Company, New York and Stamford Railway Company, Warren and Jamestown Street Railway Company, and The Waverly, Sayre and Adirondack Traction Company.

Expenditures during 1913, 1908, as well as those during the year are shown according to the officially prescribed classification, the totals of the balances in accounts representing the road and equipment reported as of December 31, 1908, and still in use as being shown on line 53. Figures in *italics* denote credits.

The corporations are named in the order of their average revenues from street and interurban railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 209.

TABLE 204: COST OF ROAD AND EQUIPMENT, OPERATING ELECTRIC RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914 (continued)

The figures given are for the corporation as a whole; they are not segregated according to state lines. The corporations operating both within and without the State of New York are International Railway Company, Buffalo and Lake Erie Traction Company, Berkshire Street Railway Company, Western New York and Pennsylvania Traction Company, New York and Stamford Railway Company, Warren and Jamestown Street Railway Company, and Waverly, Sayre and Athens Traction Company.

The expenditures since December 31, 1908, as well as those during the year are shown according to the officially prescribed classification, the totals of the balances in accounts representing the road and equipment reported as of December 31, 1908, and still in service being shown on line 53. Figures in *italics* denote *credits*.

The corporations are named in the order of their average revenues from street and interurban railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 209.

TABLE 204: COST OF ROAD AND EQUIPMENT, OPERATING ELECTRIC RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914 (continued)

The figures given are for the corporation as a whole; they are not segregated according to state lines. The corporations operating both within and without the State of New York are International Railway Company, Buffalo and Lake Erie Traction Company, Berkshire Street Railway Company, Western New York and Pennsylvania Traction Company, New York and Stamford Railway Company, Warren and Jamestown Street Railway Company, and The Waverly, Sayre and Athens Traction Company.

Expenditures since December 31, 1908, as well as those during the year are shown according to the officially prescribed classification, the totals of the balances in accounts representing the road and equipment reported as of December 31, 1908, and still in use being shown on line 55. Figures in *italics* denote credits.

The corporations are named in the order of their average revenues from street and interurban railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 209.

retired.

TABLE 204: COST OF ROAD AND EQUIPMENT, OPERATING ELECTRIC RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914 (concluded)

The figures given are for the corporation as a whole; they are not segregated according to state lines. The corporations operating both within and without the State of New York are International Railway Company, Buffalo and Lake Erie Traction Company, Berkshire Street Railway Company, Western New York and Pennsylvania Traction Company, New York and Stamford Railway Company, Warren and Jamestown Street Railway Company, and The Waverly, Sayre and Athens Traction Company.

Expenditures since December 31, 1908, as well as those during the year are shown according to the officially prescribed classification, the totals of the balances in accounts representing the road and equipment reported as of December 31, 1908, and still in service being shown on line 55. Figures in *italics* denote credits.

The corporations are named in the order of their average revenues from street and interurban railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 209.

TABLE 205 a: FUNDED DEBT, OPERATING ELECTRIC RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914

The figures given are for the actually outstanding debt (i. e. securities not held by or for the issuing corporation) of the corporation as a whole; they are not segregated according to state lines. The corporations operating both within and without the State of New York are International Railway Company, Buffalo and Lake Erie Traction Company, Berkshire Street Railway Company, Western New York and Pennsylvania Traction Company, New York and Stamford Railway Company, Warren and Jamestown Street Railway Company, and The Waverly, Sayre and Athens Traction Company.

The amount shown under "Par value authorized for issue" is the amount already legally issued in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

The corporations are named in the order of their average revenues from street and interurban railroad operations during the year ended June 30, 1914; their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 209.

<sup>1</sup> This column shows matured interest unpaid as reported by the corporation. It is evident in some cases that interest due July 1st has been included under this head; in other cases that such interest has not been included; while in still other instances the report does not show whether interest due July 1st has or has not been included.

<sup>2</sup> Covered by special deposit.

<sup>3</sup> Includes \$18,477 accrued interest paid by purchasers of bonds sold between interest dates.

<sup>4</sup> Of which \$36,537 is covered by a special deposit.

TABLE 205 a: FUNDED DEBT, OPERATING ELECTRIC RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914 (continued)

The figures given are for the actually outstanding debt (i. e. securities not held by or for the issuing corporation) of the corporation as a whole; they are not segregated according to state lines. The corporations operating both within and without the State of New York are International Railway Company, Buffalo and Lake Erie Traction Company, Berkshire Street Railway Company, Western New York and Pennsylvania Traction Company, New York and Stamford Railway Company, Warren and Jamestown Street Railway Company, and The Waverly, Sayre and Athens Traction Company.

The amount shown under "Par value authorized for issue" is the amount already legally issued in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

The corporations are named in the order of their average revenues from street and interurban railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 209.

<sup>1</sup> This column shows matured interest unpaid as reported by the corporation. It is evident in some cases that interest due July 1st has been included under this head; in other cases that such interest has not been included; while in still other instances the report does not show whether interest due July 1st has or has not been included.

<sup>2</sup> Covered by special deposit.

<sup>3</sup> Of which \$3560 is covered by a special deposit.

<sup>6</sup> For permanent debt of Fonda, Johnstown and Gloversville Railroad Company see Table 105 a.

<sup>7</sup> Includes \$830 accrued interest paid by purchasers of bonds sold between interest dates.

TABLE 205 a: FUNDED DEBT, OPERATING ELECTRIC RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914 (continued)

The figures given are for the actually outstanding debt (i. e. securities not held by or for the issuing corporation) of the corporation as a whole; they are not segregated according to state lines. The corporations operating both within and without the State of New York are International Railway Company, Buffalo and Lake Erie Traction Company, Berkshire Street Railway Company, Western New York and Pennsylvania Traction Company, New York and Stamford Railway Company, Warren and Jamestown Street Railway Company, and The Waverly, Sayre and Athens Traction Company.

The amount shown under "Par value authorized for issue" is the amount already legally issued in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

The corporations are named in the order of their average revenues from street and interurban railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 209.

<sup>1</sup> This column shows matured interest unpaid as reported by the corporation. It is evident in some cases that interest due July 1st has been included under this head; in other cases that such interest has not been included; while in still other instances the report does not show whether interest due July 1st has or has not been included.

<sup>2</sup> Covered by special deposit.

<sup>8</sup> Report covers period July 1, 1913, to March 31, 1914; see statement Organization, etc. Receiver has taken into his accounts interest accruals and payments, but not a liability for the principal of funded debt issued by the corporation details of which are reported from "general knowledge only".

<sup>9</sup> Report covers period April 1, 1914, to June 30, 1914; see statement Organization, etc.

<sup>10</sup> Of this amount \$265 was charged to fixed capital.

<sup>11</sup> Successor to the Geneva and Auburn Railway Company; see statement Organization, etc.

<sup>12</sup> Of the \$298,000 first consolidated mortgage bonds, \$86,000 have been sold and interest paid as here shown. "The balance are owned by G. T. Rogers, principal owner of the company, who has canceled and returned to the company all matured coupons therefrom."

TABLE 205 a: FUNDED DEBT, OPERATING ELECTRIC RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914 (concluded)

The figures given are for the actually outstanding debt (*i. e.* securities not held by or for the issuing corporation) of the corporation as a whole; they are not segregated according to state lines. The corporations operating both within and without the State of New York are International Railway Company, Buffalo and Lake Erie Traction Company, Berkshire Street Railway Company, Western New York and Pennsylvania Traction Company, New York and Stamford Railway Company, Warren and Jamestown Street Railway Company, and The Waverly, Sayre and Athens Traction Company.

The amount shown under "Par value authorized for issue" is the amount already legally issued in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

The corporations are named in the order of their average revenues from street and interurban railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 209.

<sup>1</sup> This column shows matured interest unpaid as reported by the corporation. It is evident in some cases that interest due July 1st has been included under this head; in other cases that such interest has not been included; while in still other instances the report does not show whether interest due July 1st has or has not been included.

<sup>13</sup> Includes \$100,000 first mortgage gold bonds purchased for sinking fund by the trustee of the fund with moneys paid to him by the respondent in accordance with the terms of the mortgage, which are carried on respondent's books as liabilities "actually outstanding" and are so reported. The corresponding asset is the amount issued over to the trustee of the fund, carried as "Sinking funds uninvested" and included on the balance sheet under "Miscellaneous temporary debits".

<sup>14</sup> Includes interest on bonds not yet sold to date of report, a certain part of which, not at that time ascertained, is properly chargeable to "Interest on unfunded debt," the bonds having been pledged as collateral to various loans.

<sup>15</sup> Interest on bonds accrued prior to January 1, 1914, canceled and credited to surplus.

<sup>16</sup> Interest on bonds accrued prior to July 1, 1913, canceled and credited to surplus. No interest on bonds reported accrued from July 1, 1913, to October 31, 1913.

<sup>17</sup> Formerly the Penn Yan, Keuka Park and Branchport Railway; see statement Organization, etc.

<sup>18</sup> Payment of interest waived by bondholders.

TABLE 205 b: FUNDED DEBT ISSUED OR ASSUMED, OPERATING ELECTRIC RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914

Only those corporations are included which report funded debt actually issued or assumed during the year.

The amount shown under "Par value authorized for issue" is the amount already legally issued in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

The corporations are named in the order of their average revenues from street and interurban railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 209.

<sup>1</sup> Issued to retire a like amount of Albany Railway Company fifth mortgage bonds.

<sup>2</sup> Issued to retire a like amount of Binghamton Railroad Company first mortgage bonds.

<sup>3</sup> \$572,000 issued in payment for property and \$10,000 for capital stock of Hartwick Power Company; \$376,000 for "Rochester judgment"; \$40,000 for "Index property"; \$2000 for "Real estate"; \$117,000 for "Notes payable and accounts payable funded".

<sup>4</sup> Issued in payment for advances for construction purposes.

<sup>5</sup> Issued in part payment for properties of Ithaca Street Railway Company.

<sup>6</sup> Assumed on purchase of properties of Ithaca Street Railway Company.

<sup>7</sup> Issued in payment for property of the Geneva and Auburn Railway Company.

<sup>8</sup> Successor to the Geneva and Auburn Railway Company; see statement Organization, etc.

<sup>9</sup> Bonds pledged as collateral but previously reported as "actually outstanding" have been redeemed and sold without authorization by the Public Service Commission. Application pending for approval of such issue.

TABLE 206 a: CAPITAL STOCKS, OPERATING ELECTRIC RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914

The figures given are for the actually outstanding capital stocks (*i. e.* stocks not held by or for the issuing corporation) of the corporation as a whole; they are not segregated according to state lines. The corporations operating both within and without the State of New York are International Railway Company, Buffalo and Lake Erie Traction Company, Berkshire Street Railway Company, Western New York and Pennsylvania Traction Company, New York and Stamford Railway Company, Warren and Jamestown Street Railway Company, and The Waverly, Sayre and Athens Traction Company.

The amount shown under "Par value authorized for issue" is the amount already legally issued in addition to the amount which the respondent claims may be issued without further approval by state or other public authority. Stock not otherwise specifically described is common.

The corporations are named in the order of their average revenues from street and interurban railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 209.

<sup>1</sup> Issued in exchange for stocks of constituent or system corporations as follows: \$1,100,000 stock of Rochester and Sodus Bay Railway Company; \$15,290,200 of Rochester and Eastern Rapid Railway Company; \$334,000 preferred and \$66,000 common of Rochester and Suburban Railway Company; \$173,900 of Rochester Electric Railway Company; \$100,000 of Ontario Light and Traction Company; and \$4,500,000 second preferred stock of New York State Railways.

<sup>2</sup> Issued in exchange for \$3,000,000 preferred stock of Rochester Railway Company, and \$750,000 preferred stock of Rochester and Sodus Bay Railway Company.

<sup>3</sup> \$10,120,500 issued upon consolidation in 1902 for like amount of stock of constituent companies; \$6,200,000 issued shortly after consolidation in payment and satisfaction of like amount of outstanding obligations of consolidated company.

<sup>4</sup> In addition to amount issued for cash, \$4,000,000 were issued for purposes of consolidation (including \$400 issued in trust to redeem securities of consolidated companies when presented); \$7,500,000 issued December, 1906, to acquire certain securities of Hudson Valley Railway Company.

<sup>5</sup> Entire capital stock issued for stock of constituent companies as follows: common stock exchanged, share for share, for common stock of Syracuse, Lake Shore and Northern Railroad Company; and for common stock at \$80 per share of Rochester, Syracuse and Eastern Railroad Company; preferred stock exchanged for preferred stock at \$92 per share of Rochester, Syracuse and Eastern Railroad Company; first preferred stock exchanged, share for share, for preferred stocks of Syracuse, Lake Shore and Northern Railroad Company, and of Auburn and Northern Electric Railroad Company; for preferred stock at \$11 per share of Rochester, Syracuse and Eastern Railroad Company; and for the common stock at \$12.50 per share of Auburn and Northern Electric Railroad Company.

<sup>6</sup> \$109,933 issued on account of construction and acquisition of property; \$366,000 "stock dividend charged to surplus (an equal amount of cash having been expended for property)".

<sup>7</sup> Upon consolidation, \$3,420,000 common and \$1,000,000 preferred stock were issued for like amount of stock of former Buffalo and Lake Erie Traction Company, and \$830,000 common and \$1,500,000 preferred stock issued for like amount of stock of Erie Rapid Transit Company. In 1907, \$750,000 common stock was issued to Western New York Construction Company in consideration of agreement to deliver an equal amount of stock of Jamestown, Chautauqua and Lake Erie Railroad Company, of which prior to July 1, 1912, \$403,700 had

been delivered, and during the year ended June 30, 1913, \$400 additional was delivered; the Western New York Construction Company not being able to deliver the remainder, in lieu thereof the respondent has accepted a return of a corresponding amount of its own stock theretofore issued.

<sup>8</sup> \$2,631,000 issued for purposes of consolidation and \$361,400 for construction.

<sup>9</sup> There are also outstanding 76 shares of stock of underlying companies.

<sup>10</sup> For capital stock of Fonda, Johnstown and Gloversville Railroad Company see Table 106 a.

<sup>11</sup> Principally issued for stock of constituent companies.

<sup>12</sup> Common and second preferred stock, also bonds, issued for purchase of existing railroads and for construction and equipment of extensions.

<sup>13</sup> Issued to retire \$500,000 funded debt and \$93,355 bills payable; balance of \$625 charged to surplus account.

<sup>14</sup> Remainder issued for construction.

<sup>15</sup> Issued for construction.

<sup>16</sup> \$59,600 issued, share for share, for \$23,000 stock of Albion and Lockport Railway Company, \$3600 of Albion Electric Railway Company, \$30,000 of Albion and Rochester Railway Company; \$3,940,400 issued for construction.

<sup>17</sup> Exchanged for other securities, amounts unknown.

<sup>18</sup> Remainder exchanged for other securities.

<sup>19</sup> Issued for acquisition at foreclosure sale of all property, rights, and franchises of Albany and Hudson Railroad Company, September 7, 1909.

<sup>20</sup> Issued for purchase of property.

<sup>21</sup> Issued for the acquisition of parts of the Tarrytown, White Plains and Manaroneck Railroad Company, and for organization expenses.

<sup>22</sup> Remainder issued for construction and in exchange for stock of consolidated companies.

<sup>23</sup> Remainder issued in part consideration for construction.

<sup>24</sup> Issued for stock of constituent companies.

<sup>25</sup> Issued in part consideration for the purchase of the property and equipment of the Ithaca Street Railway Company.

<sup>26</sup> Issued in part consideration for the purchase of the property of the Geneva and Auburn Railway Company.

<sup>27</sup> Issued for purchase and construction of road.

<sup>28</sup> \$80,000 issued for stock of Buffalo, Gardenville and Ebenezer Railway Company; \$5700 for stock of Buffalo Southern Railway Company; and \$461,500 for purchase of property.

<sup>29</sup> Issued for purchase of property and reorganization purposes.

<sup>30</sup> Issued for cash (amount not stated) and property.

TABLE 206 a: CAPITAL STOCKS, OPERATING ELECTRIC RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914 (concluded)

The figures given are for the actually outstanding capital stocks (*i. e.* stocks not held by or for the issuing corporation) of the corporation as a whole; they are not segregated according to state lines. The corporations operating both within and without the State of New York are International Railway Company, Buffalo and Lake Erie Traction Company, Berkshire Street Railway Company, Western New York and Pennsylvania Traction Company, New York and Stamford Railway Company, Warren and Jamestown Street Railway Company, and The Waverly, Sayre and Athens Traction Company.

The amount shown under "Par value authorized for issue" is the amount already legally issued in addition to the amount which the respondent claims may be issued without further approval by state or other public authority. Stock not otherwise specifically described is common.

The corporations are named in the order of their average revenues from street and interurban railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 209.

<sup>11</sup> Remainder issued for construction.  
<sup>12</sup> Issued for construction.  
<sup>24</sup> Issued for stock of constituent companies.  
<sup>30</sup> Issued for cash (amount not stated) and property.  
<sup>31</sup> Remainder issued for property purchased.  
<sup>32</sup> Issued for reorganization purposes.  
<sup>33</sup> Remainder issued for purchase of property of former Rochester, Charlotte and Manitou Railway Company.

<sup>34</sup> Issued to bondholders of Port Jervis Electric Light, Power, Gas and Railroad Company for inventory value of electric railroad property.  
<sup>35</sup> Formerly Penn Yan, Keuka Park and Branchport Railway; see statement Organization, etc.  
<sup>36</sup> Remainder issued for reorganization purposes.  
<sup>37</sup> Remainder issued as part payment for road.

TABLE 206 b: CAPITAL STOCKS ISSUED, OPERATING ELECTRIC RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914

Only those corporations are included which report any capital stock issued during the year.

The amount shown under "Par value authorized for issue" is the amount already legally issued in addition to the amount which the respondent claims may be issued without further approval by state or other public authority.

The corporations are named in the order of their average revenues from street and interurban railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 209.

Corp. No.	Name of corporation and class of stock	Date of authorization	New York State authority claimed	Par value				Average price realized per cent of par
				Authorized for issue	Issued during year	Issued for cash	Issued for other consideration	
				Dollars	Dollars	Dollars	Dollars

<sup>1</sup> Of the total "Par value authorized for issue," \$387,000 was authorized by the Public Service Commission, Second District, June 10, 1914.  
<sup>2</sup> Of the total "Par value authorized for issue," \$317,000 was authorized by the Public Service Commission, Second District, April 21, 1914.  
<sup>3</sup> Issued for acquisition of parts of the Tarrytown, White Plains and Mamaroneck Railroad Company and for organization expenses.

<sup>4</sup> Issued in part consideration for the purchase of the property of the Ithaca Street Railway Company.  
<sup>5</sup> Issued in part consideration for the purchase of the property of the Geneva and Auburn Railway Company.

TABLE 207 a: LOCATION AND LENGTH OF ROAD OPERATED, OPERATING ELECTRIC RAILROAD CORPORATIONS, JUNE 30, 1914

The roads are grouped under the name of the operating corporation into classes, as follows: (A) Line owned by the operating corporation; (B) Line owned by a corporation all of whose capital stock is held by the operating corporation; (C) Line operated under lease for a definite annual rent; (D) Line operated under contract or agreement, or where the rent is contingent on earnings or other consideration; (E) Line operated under trackage rights. The length of road stated is confined to that portion lying within the State of New York, and of corporations within the jurisdiction, for the purposes of these annual reports, of the Public Service Commission, Second District, State of New York. The corporations are named in the order of their average revenues from street and interurban railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 209.

TABLE 207 a: LOCATION AND LENGTH OF ROAD OPERATED, OPERATING ELECTRIC RAILROAD CORPORATIONS, JUNE 30, 1914 (continued)

The roads are grouped under the name of the operating corporation into classes, as follows: (A) Line owned by the operating corporation; (B) Line owned by a corporation all of whose capital stock is held by the operating corporation; (C) Line operated under lease for a definite annual rent; (D) Line operated under contract or agreement, or where the rent is contingent on earnings or other consideration; (E) Line operated under truckage rights. The length of road stated is confined to that portion lying within the State of New York, and of corporations within the jurisdiction, for the purposes of these annual reports, of the Public Service Commission, Second District, State of New York. The corporations are named in the order of their average revenues from street and interurban railroad operations during the year ended June 30, 1914, for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 209.

TABLE 207 b: LENGTH OF ROAD AND CLASSIFICATION OF TRACK MILEAGE WITHIN THE STATE OF NEW YORK, OPERATING ELECTRIC RAILROAD CORPORATIONS, JUNE 30, 1914

This table shows the miles of road (or first or single track), the portion of road in New York state, and the miles of other tracks in New York state to which the corporations named had on June 30, 1914, right of possession or occupancy for purposes of operation.  
 This table does not include electric railroad mileage under the exclusive jurisdiction of the Public Service Commission, First District.  
 The corporations are named in the order of their average revenues from street and interurban railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 209.

Corp'n No.		Operating corporation	Portion, in New York State					Operated under trackage rights or joint agreement						Corp'n No.

1 Wood and steel.  
6 Triple equipment.

TABLE 208: CAR EQUIPMENT, OPERATING ELECTRIC RAILROAD CORPORATIONS, JUNE 30, 1914 (concluded)

This table shows for the electric railroad corporations named the number of cars in service June 30, 1914, classified according to type, ownership, seating capacity, and equipment. The car equipment described is that in the service of the corporation as a whole without regard to state lines. The corporations operating both within and without the State of New York are International Railway Company, Buffalo and Lake Erie Traction Company, Berkshire Street Railway Company, Western New York and Pennsylvania Traction Company, New York and Stamford Railway Company, Warren and Jamestown Street Railway Company, and The Waverly, Sayre and Athens Traction Company.

The corporations are named in the order of their average revenues from street and interurban railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 209.

<sup>s</sup> Formerly reported as Penn Yan, Keuka Park and Brandtport Railway; see statement Organization, etc.

TABLE 209: OPERATING REVENUES, OPERATING ELECTRIC RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914

The figures given are for the street and interurban operations of the corporation as a whole; they are not segregated according to state lines. The corporations operating both within and without the State of New York are International Railway Company, Buffalo and Lake Erie Traction Company, Berkshire Street Railway Company, Western New York and Pennsylvania Traction Company, New York and Stamford Railway Company, Warren and Jamestown Street Railway Company, and The Waverly, Sayre and Athens Traction Company. The revenues are classified in accordance with the officially prescribed Uniform System of Accounts. Figures in *italics* denote losses or debts. The corporations are named in the order of their average revenues from street and interurban railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 209.

TABLE 209: OPERATING REVENUES, OPERATING ELECTRIC RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914 (concluded)

The figures given are for the street and interurban operations of the corporation as a whole; they are not segregated according to state lines. The corporations operating both within and without the State of New York are International Railway Company, Buffalo and Lake Erie Traction Company, Berkshire Street Railway Company, Western New York and Pennsylvania Traction Company, New York and Stamford Railway Company, Warren and Ithaca Street Railway Company, and The Waverly, Sayre and Athens Traction Company. The revenues are classified in accordance with the officially prescribed Uniform System of Accounts. Figures in *italics* denote losses or deficits. The corporations are named in the order of their average revenues from street and interurban railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 209.

<sup>1</sup> Report covers period July 1, 1913, to March 31, 1914; see statement Organization, etc.

<sup>2</sup> Report covers period April 1, 1914, to June 30, 1914; see statement Organization, etc.

<sup>3</sup> Successor to Geneva and Auburn Railway Company; see statement Organization, etc.

<sup>4</sup> Electric railroad operations conducted during seven and one-half months only.

<sup>5</sup> Formerly reported as Penn Yan, Keuka Park and Branchport Railway; see statement Organization, etc.

<sup>6</sup> Electric railroad operations conducted from July 1 to September 30, 1913, and May 23 to June 30, 1914.

TABLE 210: OPERATING EXPENSES, OPERATING ELECTRIC

## Part A: Corporations Having Revenues from Street and

The figures given are for the street and interurban railroad operations of the corporation as a whole; they are not segregated according to state lines. The Street Railway Company, Western New York and Pennsylvania Traction Company, New York and Stamford Railway Company, Warren and Jamestown Street The expenses are classified in accordance with the officially prescribed Uniform System of Accounts. Figures in *italics* denote credits.

The corporations are named in the order of their average revenues from street and interurban railroad operations during the year ended June 30, 1914; for

<sup>1</sup> Company equalizes expense of accidents and damages over the calendar year, which is its fiscal year, by means of monthly charges on some estimated basis. This is finally adjusted during December to actual liabilities incurred for the year. The expense for accidents and damages to June 30, 1914, had ex-

ceeded the accruals by \$37,031 causing a debit balance of that amount in "Casualty and insurance reserve" and a net debit balance of \$35,220 in "Other reserves".

TABLE 210: OPERATING EXPENSES, OPERATING ELECTRIC

## Part A: Corporations Having Revenues from Street and

The figures given are for the street and interurban railroad operations of the corporation as a whole; they are not segregated according to state lines. The Street Railway Company, Western New York and Pennsylvania Traction Company, New York and Stamford Railway Company, Warren and Jamestown Street

The expenses are classified in accordance with the officially prescribed Uniform System of Accounts. Figures in *italics* denote credits.

The corporations are named in the order of their average revenues from street and interurban railroad operations during the year ended June 30, 1914; for

TABLE 210: OPERATING EXPENSES, OPERATING ELECTRIC

## Part B: Corporations Having Revenues from Street and

The figures given are for the street and interurban railroad operations of the corporation as a whole; they are not segregated according to state lines. The Street Railway Company, Western New York and Pennsylvania Traction Company, New York and Stamford Railway Company, Warren and Jamestown Street of Accounts. Figures in *italics* denote *credits*. The corporations are named in the order of their average revenues from street and interurban railroad operations

<sup>2</sup> On routes covering two or more zones, while generally one fare has been counted for each zone traversed, it seems evident that in some cases where through tickets are sold each ticket has been counted as a single passenger fare.  
<sup>3</sup> Operations cover period July 1, 1913, to March 31, 1914; see statement Organization, etc.

<sup>4</sup> Operations cover period April 1, 1914, to June 30, 1914; see statement Organization, etc.

<sup>5</sup> Estimated.

<sup>6</sup> Successor to Geneva and Auburn Railway Company; see statement Organization, etc.

<sup>7</sup> Respondent's railroad is regularly operated during a part of year only; during year ended June 30, 1914, operations were conducted during seven and one-half months.

<sup>8</sup> Formerly the Penn Yan, Keuka Park and Branchport Railway; see statement Organization, etc.

<sup>9</sup> Respondent's railroad is regularly operated during a part of year only; during year ended June 30, 1914, operations were conducted from July 1 to September 30, 1913; and from May 23, 1914, to close of year.

TABLE 212: EMPLOYEES AND THEIR SALARIES AND WAGES, OPERATING ELECTRIC RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914

The figures given are for the street and interurban railroad operations of the corporation as a whole; they are not segregated according to state lines. The corporations operating both within and without the State of New York are International Railway Company, Buffalo and Lake Erie Traction Company, Berkshire Street Railway Company, Western New York and Pennsylvania Traction Company, New York and Stamford Railway Company, Warren and Jamestown Street Railway Company, and The Waverly, Sayre and Athens Traction Company.

Only those corporations are included which report details of railroad employees and their salaries and wages.

The corporations are named in the order of their average revenues from street and interurban railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 209.

<sup>a</sup> Road not operated in December.

TABLE 213: GRADE CROSSINGS AND CROSSING PROTECTION WITHIN THE STATE OF NEW YORK, OPERATING ELECTRIC RAILROAD CORPORATIONS, JUNE 30, 1914

Only those corporations are included which report grade crossings in New York state. Figures in *italics* denote decreases.

The corporations are named in the order of their average revenues from street and interurban railroad operations during the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 209.

Corporation No.	Name of corporation	With steam railroads											With highways outside of cities or villages				Corporation No.	
		Unprotected		Protected									Total	Unprotected		Total		
		Number	Increase over preceding year	By both gates and flagmen	By gates alone	By flagmen alone, 24 hours daily	By flagmen alone, part time only	By crossing alarm only	By interlocking devices	By derailling devices	Total	Decrease from preceding year		Number	Increase over preceding year			Number protected

<sup>1</sup> Only crossings on electric division of this corporation are shown; for grade crossings on steam division see Table 113.

<sup>2</sup> Only actual increase or decrease reported is shown; apparent discrepancies with published figures for 1913 are due to erroneous figures reported for that year by corporations indicated.

<sup>3</sup> The crossings of this corporation were reported in previous years by Ithaca Street Railway Company.

<sup>4</sup> The crossings of this corporation were reported in previous years by Geneva and Auburn Railway Company.

<sup>5</sup> The crossings of this corporation were reported in previous years by Penn Yan, Keuka Park and Branchport Railway.

TABLE 214: ACCIDENTS TO PERSONS FROM ELECTRIC RAILROAD OPERATIONS WITHIN THE STATE OF NEW YORK, YEAR ENDED JUNE 30, 1914

The heading "Killed" includes all cases resulting in death within 24 hours after the time of the accident. Accidents resulting in death later than 24 hours afterward are shown under the heading "Injured". Injuries to employees so slight as not to incapacitate the injured employee for more than three days during the ten days immediately following the accident are excluded. Only those corporations reporting accidents are included.

The corporations are named in the order of their average revenues from street and interurban railroad operations for the year ended June 30, 1914; for their names in alphabetic order and their ranking on the basis of railroad operating revenues see page 209.

<sup>1</sup> Interest paid by lessee direct to bondholders.

<sup>2</sup> First lien on electric plant and second lien on railroad.

<sup>3</sup> All bonds are owned by United Traction Co.; no interest is accrued or paid.

<sup>4</sup> All bonds are owned by Hudson Valley Railway Co.; no interest is accrued or paid.

TABLE 205 L b: FUNDED DEBT ISSUED OR ASSUMED, LESSOR ELECTRIC RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914

During the year ended June 30, 1914, no lessor electric railroad corporation issued or assumed any funded debt.

TABLE 206 L a: CAPITAL STOCKS, LESSOR ELECTRIC RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914

The figures given are for the corporation as a whole. The railroad of every corporation included in this table is located wholly within the State of New York. "Par value authorized for issue" is given as reported by the corporations concerned; it is evident, however, that in some cases the amount reported is that specified in the certificate of incorporation and not the par value of capital stock that on June 30, 1914, might be issued without further authority. Stock not otherwise specifically described is common.

Name of corporation	Par value		Cash realized on amount issued	Par value actually outstanding June 30, 1914	Dividends declared during year

<sup>1</sup> Issued to stockholders of constituent companies.<sup>2</sup> Issued on reorganization.<sup>3</sup> Remainder issued for construction.<sup>4</sup> 5% on \$174,800 par value, excluding shares outstanding but not located.<sup>5</sup> Issued for acquisition of all property, rights, and franchises formerly belonging to Bennington and North Adams Street Railway Co. situated within the State of New York, which was sold under foreclosure September 24, 1910.<sup>6</sup> \$10,000 issued for stock dividend.<sup>7</sup> Issued as bonus to purchasers of bonds.<sup>8</sup> Stock and bonds issued in payment of electric light and railway properties of consolidated companies.<sup>9</sup> Issued account of constructed road.

TABLE 206 L b: CAPITAL STOCKS ISSUED, LESSOR ELECTRIC RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914

During the year ended June 30, 1914, no lessor electric railroad corporation issued any capital stock.

TABLE 207 L: TERMINI, MILEAGE, AND LEASEHOLD CONDITIONS, LESSOR ELECTRIC RAILROAD CORPORATIONS, YEAR ENDED JUNE 30, 1914

This table comprises all railroads lying wholly or partly in the State of New York operated by another than the owning company under any form of contract which gives the operating company the right of exclusive possession, including possession through ownership of capital stock.

Name of owning corporation	Road owned but in possession of another		Name of present possessor	Date of expiration of lease	Rent accrued to lessor during year ended June 30, 1914 <sup>1</sup>		Remarks
	Termini	Length of road			Amount	Basis on which determined	
Buffalo and Lackawanna Traction.	Washington and Clinton Sts., South Buffalo—South city line.	Miles 4.38	Buffalo and Lake Erie Traction Co.	Jun 18, 2905	Dollars .....	Interest on funded debt, \$500 yearly administrative expenses.	Controlled by lessee through stock ownership.
Capitol.....	Lark St.—Second Ave., Albany.	1.29	United Traction Co..	Corporate existence lessor.	1	Flat sum.....	Lessee owns entire capital stock.
Citizens Railroad, Light and Power.	Hudson River—Mount Beacon.	2.53	Fishkill Electric Ry. Co.	Year to year	9,000	Flat sum.	
Cohoes.....	26th St., Watervliet—Cohoes, and Belt Line "C" in Cohoes.	6.25	United Traction Co..	Dec 17, 2003	.....	<sup>2</sup> .....	Lessee owns entire capital stock.
Dunkirk Street.....	In city of Dunkirk...	4.94	Buffalo and Lake Erie Traction Co.	.....	.....	.....	Operated by Buffalo and Lake Erie Traction Co. by virtue of ownership of entire capital stock.
East Side Traction.....	East Syracuse—James St., Syracuse, and branch.	6.44	New York State Rys.	Jun 1, 1998	12,500	Interest 5% on \$250,000 funded debt.	Lessee owns entire stock.
Hoosick Falls.....	Hoosick Falls, N. Y.—New York-Vermont state line.	7.11	Berkshire St. Ry. Co.	Feb 1, 2012	.....	.....	"As often as The Vermont Co. (assignor of lease to present holders) pays a dividend upon its own capital stock, a sum equal to the amount of such dividend paid upon one share of The Vermont Co. stock multiplied by the number of shares of the Hoosick Falls Railroad Co." shall be paid to the latter.
Johnstown, Gloversville and Kingsboro Horse.	Fulton St., Gloversville—Madison St., Johnstown.	4.08	Fonda, Johnstown and Gloversville R.R. Co.	Jan 1, 2893	6,600	Interest on \$50,000 funded debt, dividends 8% on \$50,000 capital stock, \$100 administrative expenses.	
Lansingburgh and Cohoes....	Lansingburgh (Troy)—Cohoes.	1.11	United Traction Co..	Corporate existence lessor.	1,050	Flat sum.....	Lease acquired by consolidation of Troy City Ry. Co.
Lewiston and Youngstown F..	Lewiston—Youngstown.	7.05	Niagara Gorge R.R. Co.	Upon notice.	.....	.....	Lessee owns entire capital stock and all funded debt.
Lima-Honeoye Electric Light and Railroad.	Lima—Honeoye Falls.	4.46	Lima-Honeoye Light and R.R. Co.	Jul 6, 1915	100	Flat sum.	
Monroe County Electric Belt Line.	Main St., Fairport—Basket Road, town of Perinton.	0.97	Empire United Rys., Inc.	.....	178	.....	Line operated by respondent's affiliated company, Empire United Railways, Inc. There appears to be no formal lease, but it is reported that the operating corporation paid the owning corporation for the use of tracks, \$178 during the year ended June 30, 1914, being an amount equal to the taxes on the property.
North River.....	In village of Saratoga Springs.	1.72	Hudson Valley Ry. Co.	Jan 1, 1952	.....	Interest 5% on \$200,000 funded debt, 4% dividends on \$200,000 capital stock.	Lessee owns entire capital stock and all funded debt.
Ontario Light and Traction..	In city of Cauandigua.	2.32	New York State Rys.	Year to year	6,010	Flat sum.....	Annual rental includes \$250 for taxes.
Rochester Electric.....	Ridge Road, Rochester—Village of Charlotte.	4.70	New York State Rys.	Jun 30, 1944	32,729	8% on \$200,000 capital stock, 25% of gross receipts in excess of \$55,000.	Lease acquired by the consolidation of Rochester Ry. Co.
Shore Line Electric.....	Mamaroneck Av. and Boston Post Road in village of Mamaroneck—north-westerly line of village of Larchmont.	1.46	Westchester Street R.R. Co.	.....	133	Flat sum.....	
Suffern.....	New York-New Jersey state line—Lafayette St., in village of Suffern.	0.66	North Jersey Rapid Transit Co.	Upon notice.	662	Five cents per car-mile.	
Troy and Cohoes.....	Troy—Cohoes.....	3.58	United Traction Co..	Corporate existence lessor.	3,500	Flat sum.....	Lease acquired by consolidation of Troy City Ry. Co.
Waterford and Cohoes.....	Waterford—Cohoes.	1.88	United Traction Co..	Feb 10, 2383	1,750	7% on \$25,000 capital stock.	Lease acquired by consolidation of Troy City Ry. Co.
West Water Street.....	Main and Water Sts.—Clark's Glen.	3.75	Elmira Water, Light and R.R. Co.	Apr 26, 2898	531	7½% of net earnings..	Lease acquired by purchase of property rights and franchises of Maple Ave. R.R. Co.

<sup>1</sup> Unless otherwise specified, all taxes and operating expenses are paid by lessee.

<sup>2</sup> Maintenance of tracks and roadway, payment of all taxes and assessments, and all interest on bonded indebtedness.

TABLE 603: INVESTMENTS, EXPRESS COMPANIES, YEAR ENDED JUNE 30, 1914 (continued)

The figures given are for the company as a whole; they are not segregated according to state lines. Only those corporations are included which report holdings at any time during the year which are classed on the balance sheet statement as "Other permanent investments" and "Marketable securities". Figures in *italics* in last column represent reported debits instead of credits to the year's income.

Name of corporation and class of investment	Par value of amount held		Book value	Rate of dividend or interest	Income accrued during year

TABLE 605: FUNDED DEBT, EXPRESS COMPANIES, YEAR ENDED JUNE 30, 1914

Adams Express Company is the only company reporting funded debt. The amount outstanding represents a distribution of surplus to the shareholders and covers securities placed in trust against which were issued 4 per cent collateral trust bonds, a statement of which is given below. The securities placed in trust as collateral may be withdrawn from the trustee at any time provided other securities of equivalent market value are given to the trustee in exchange. The securities in trust June 30, 1914, are included in Table 603 with "Pledged Securities".

Name of corporation and securities outstanding	Dates		Par value				Interest

Ocean-going mileage.....	68,284	12,662	30,717	3,390	.....	.....
Grand total all mileage.....	138,480	51,475	<sup>1</sup> 129,734	34,328	10,277	163

<sup>1</sup> Includes 21,679 miles of coastwise mileage in United States and Canada.

TABLE 607 b: LINES WHOLLY OR PARTLY IN THE STATE OF NEW YORK OVER WHICH EXPRESS COMPANIES OPERATED  
JUNE 30, 1914

The mileage given is the entire mileage operated in the case of each line and therefore includes mileage outside the State of New York for those lines which cross the boundary. Lines entirely without the State, including all ocean-going and coastwise steamship lines, are omitted.

The mileage is shown as reported by the express companies although sometimes inconsistent with total mileage operated as reported by the railroads.

## EXPRESS COMPANIES, SUPPLEMENTAL STATEMENT

## AMERICAN EXPRESS COMPANY

*Organization:* An unincorporated association organized under the common law of the State of New York March 18, 1850, and November 15, 1859. The American Express Company and the Merchants Union Express Company (also an unincorporated association) were merged into one company named American Express Company by articles of merger and association dated November 25, 1868, and amendments thereto.

*Controlled companies:* In 1891 the American Express Company acquired the entire capital stock of New England Despatch Company, a Massachusetts corporation then doing business in that State. "While the corporate existence has been kept alive, the New England Despatch Company, as such, has not for many years transacted any business of its own. The business now done by it is confined to business between Boston, Mass., and points in New York, N. Y., south of 59th street; and between Worcester, Mass., and points in New York, N. Y., south of 59th street, in competition with the New York and Boston Despatch Express Company operated between New York and Boston by boat line to Providence or Fall River and thence by railroad to Boston. Its earnings and expenses are merged in and included in the report of the American Express Company." American Express Company also controls Westcott Express Company and National Express Company. For method and extent of control exercised over the latter company, see statement relating to that company. The report of American Express Company for the year ended June 30, 1914, abstracts of which are included in the foregoing pages, also includes the operations of National Express Company, such operations being entirely for and on account of American Express Company.

*Number of offices:* The number of express offices in the United States June 30, 1914, was 7856; outside the United States, 163. The number of offices in the United States at which money orders were on sale June 30, 1914, was 7127; outside the United States, 127.

*Principal officers:* President, George C. Taylor; First General Vice-president, Francis F. Flagg; Secretary, Wm. C. Fargo; Vice-president and Treasurer, James F. Fargo; Vice-president and General Manager Eastern Department, Henry S. Julier; Vice-president and General Manager Western Department, J. A. D. Vickers; Vice-president and General Traffic Manager, John H. Bradley; Comptroller, Wm. E. Powelson.

*Directors:* George C. Taylor, James C. Fargo, Francis F. Flagg, Cornelius Vanderbilt, Charles M. Pratt, John H. Bradley, J. Horace Harding, John G. Milburn, and James S. Alexander, all of New York city.

*Principal office:* 65 Broadway, New York city.

## ADAMS EXPRESS COMPANY

*Organization:* A joint stock association formed by voluntary agreement under the common law of the State of New York; it was organized July 1, 1854.

*Controlled companies:* Controls through stock ownership Dodd and Childs Express Company, New York and Boston Despatch Express Company, Manhattan Delivery Company, Adams Land and Building Company, Adams Vehicle Company, Hollywood Hotel and Cottage Company, Adams Express Building Company, all of which are active corporations; also Morris European and American Express Company, Ltd., and New England Express, inactive corporations.

*Number of offices:* The number of express offices in the United States June 30, 1914, was 6000, at 4860 of which money orders were on sale.

*Principal officers:* President, Wm. M. Barrett; Vice-president in charge of Western Department, Wm. H. Damsel; Secretary, Horatio H. Gates; Treasurer, Caleb S. Spencer; General Auditor, Henry G. Waters.

*Managers:* Wm. M. Barrett, Charles Steele, George F. Baker, Wm. D. Guthrie, Joseph Zimmerman, Caleb S. Spencer, all of New York city; and Wm. H. Damsel of Chicago, Ill. The managers were appointed by the articles of association. There has never been a meeting for the election of managers.

*Principal office:* New York city.

## WELLS FARGO AND COMPANY

*Organization:* Incorporated February 5, 1866, by special act of the then Territory of Colorado, under the name Holladay Overland Mail and Express Company. During that same year this company acquired and merged into itself the Pioneer Stage Company, the Overland Mail and Express Company, and Wells Fargo and Company (a joint stock association organized in New York state 1876); the name of the Holladay Overland Mail and Express Company was thereupon changed to Wells Fargo and Company, formally approved by the legislature of the Territory of Colorado January 26, 1872. At the time of these mergers the capital stock of the company was increased from \$3,000,000 to \$15,000,000; it was later reduced to \$5,000,000; at various times thereafter \$3,000,000 were issued as "advance payments on contracts". A further increase to \$24,000,000 was made by resolution of the stockholders December 23, 1909.

*Controlled companies:* Controls, by joint agreement with National Railways of Mexico to name majority of directors, Wells, Fargo and Company Express, S. A., an active corporation; also by ownership of entire capital stock Knickerbocker Express Company, an inactive corporation.

*Number of offices:* The number of express offices in the United States June 30, 1914, was 7223, at 6135 of which money orders were on sale.

*Principal officers:* President, B. D. Caldwell; Vice-president and General Manager, A. Christeson; Vice-president and General Manager, E. A. Stedman; Vice-president in charge of traffic, F. S. Holbrook; Vice-president and Comptroller, J. W. Newlean; Secretary, C. H. Gardiner; Treasurer, B. H. River; General Counsel, C. W. Stockton.

*Directors:* B. D. Caldwell, F. D. Underwood, W. V. S. Thorne, H. W. deForest, Wm. Mahl, Chas. A. Peabody, Paul M. Warburg, Richard Delafield, H. E. Huntington, L. F. Loree, all of New York city; E. A. Stedman of Chicago, Ill.; and A. Christeson and W. F. Herrin of San Francisco, Cal.

*Principal office:* New York city.

## UNITED STATES EXPRESS COMPANY

*Organization:* An unincorporated association organized in the State of New York April 22, 1854. United States Express Company ceased operations June 30, 1914, and is now in the process of liquidating its affairs.

*Controlled companies:* Controls through stock ownership United States Express Realty Company, an active corporation.

*Number of offices:* The number of express offices in the United States June 30, 1914, was 4335, at 4264 of which money orders were on sale.

*Principal officers:* President, D. I. Roberts; Secretary, Chas. C. Tegethoff; Treasurer, R. H. Morgan, jr.; Counsel, B. P. Kerfoot; Traffic Manager, M. T. Jones; Comptroller, Chas. A. Lutz.

*Directors:* D. I. Roberts, Wm. H. Averell, Joseph W. Harriman, Frank H. Platt, Edward T. Platt, Chas. C. Tegethoff, all of New York city.

*Principal office:* New York city.

## CANADIAN EXPRESS COMPANY

*Organization:* Organized under laws of the Dominion of Canada February 16, 1865; controlled by the Grand Trunk Railway Company of Canada through ownership of its entire capital stock.

*Number of offices:* The number of express offices in the United States June 30, 1914, was 49, at all of which money orders were on sale.

*Principal officers:* Chairman of the Board, E. J. Chamberlain; President, John Pullen; Secretary and Treasurer, Frank Scott; General Counsel, W. H. Biggar; General Auditor, W. W. Williamson.

*Directors:* E. J. Chamberlain, John Pullen, Frank Scott, Hugh Paton, all of Montreal, Canada.

*Principal office:* Montreal, Canada.

## ELECTRIC EXPRESS COMPANY

*Organization:* Incorporated under the laws of New York October 22, 1901; controlled jointly by United Traction Company, Hudson Valley Railway Company, and Schenectady Railway Company through ownership of the capital stock.

*Number of offices:* The number of express offices June 30, 1914, was 28, at none of which money orders were on sale.

*Principal officers:* President, H. E. Andrews; Vice-president in charge of Transportation, C. S. Sims; Vice-president in charge of Accounting and Treasury Department, W. H. Williams; Secretary and Auditor, Wilson H. Elder; Treasurer, H. F. Atherton; Attorney, James McPhillips.

*Directors:* Horace E. Andrews, Alfred H. Smith, W. K. Vanderbilt, jr., W. H. Williams, L. F. Loree, W. H. Davies of New York city; C. S. Sims, Axel Ekstrom, J. F. Hamilton of Albany, N. Y.

*Principal office:* 598 Broadway, Albany, N. Y.

## NATIONAL EXPRESS COMPANY

*Organization:* An unincorporated association organized under the common law of the State of New York April 1, 1895; \$475,000 of its nominal capital of \$500,000 was issued to American Express Company in consideration for certain property transferred to it (mainly "good will and contracts"), and the remaining \$25,000 was subscribed for at par by directors and others connected with American Express Com-

pany under an agreement by which the latter was given the right to take over their shares at any time at actual cost. In one or two instances since then, on the deaths of individual shareholders, American Express Company has taken over their shares under this agreement. By agreement effective July 1, 1912, its plant and equipment and all other tangible property were leased to American Express Company, the latter to pay to National Express Company an annual sum equivalent to 6 per cent on outstanding capital stock (practically all of which is owned by American Express Company), all taxes on property franchises or capital stock, and all other expenses incidental to the maintenance of organization of National Express Company. The business heretofore conducted by National Express Company may under this agreement be conducted by and at the option of American Express Company in whole or in part in the name of either company.

*Number of offices:* All offices are included in the report of American Express Company.

During the year ended June 30, 1914, the company was not operating, and did not report revenues or expenses or other items of Income account: abstracts of the report are therefore not included in the foregoing tabulations. As of June 30, 1914, the balance sheet is reported as follows: Assets: Good will and contracts, \$398,528.10; accounts receivable from American Express Company, lessee, \$101,471.90. Liabilities: Nominal value of shares, \$500,000.

---

SLEEPING AND DRAWING ROOM CAR COMPANY

---

## THE PULLMAN COMPANY

Abstract of the annual report of The Pullman Company to the Public Service Commission, Second District, for the year ended June 30, 1914.

*Organization:* Organized July 15, 1867, under an act of the General Assembly, State of Illinois, approved February 22, 1867, as Pullman's Palace Car Company. Name changed to The Pullman Company and the number of directors increased under the provisions of a general law of Illinois entitled "An Act relating to Corporations," approved April 10, 1872.

*Principal officers:* Chairman of the Board, Robert T. Lincoln; President, John S. Runnells; Secretary, A. S. Weinsheimer; Treasurer, L. S. Taylor; General Auditor, William Hough; General Manager, Richmond Dean; General Solicitor, F. B. Daniels; General Superintendent, L. S. Hungerford.

*Directors:* Robert T. Lincoln, John J. Mitchell, Chauncey Keep, and John S. Runnells of Chicago; Frank O. Lowden of Oregon, Ill.; and Norman B. Ream, William K. Vanderbilt, Frederick W. Vanderbilt, W. Seward Webb, George F. Baker, and J. P. Morgan of New York.

*Principal office:* Chicago, Ill.

*Mileage operated:* During the year ended June 30, 1914, the company conducted operations over a total railway mileage, single track, of 131,011 miles in the United States, Canada, and Mexico. Of this, 127,402 miles were operated under contracts with carriers by which the sole ownership of cars was vested in The Pullman Company, and 3609 miles were operated under contracts by which the ownership of cars was vested jointly in The Pullman Company and the carrier.

The following carriers having mileage in the State of New York are reported as having contracts for operation: Boston and Maine Railroad; Buffalo, Rochester and Pittsburgh Railway Company; The Delaware and Hudson Company; The Delaware, Lackawanna and Western Railroad Company; Erie Railroad Company; Grand Trunk System; The Lake Shore and Michigan Southern Railway Company; Lehigh Valley Railroad Company; New York Central Lines; Cranberry Lake Railroad Company; The New York, Chicago and St. Louis Railroad Company; The New York, New Haven and Hartford Railroad Company; New York, Ontario and Western Railway Company; Pennsylvania System; Rutland Railroad Company; The Ulster and Delaware Railroad Company. In addition, the road of The Lehigh and Hudson River Railway Company is operated over without a written contract.

*Operating contracts:* All of the operations of The Pullman Company except those over the Northern Pacific Lines are carried on under contracts or agreements by which, under varying terms and conditions, The Pullman Company furnishes the cars. With the Northern Pacific Railway Company, The Pullman Company is a party to an "Association contract," by the terms of which the Railway company furnishes the Association with tourist sleeping cars and The Pullman Company pays the Railway company 6 per cent interest on one-half the value of the cars; The Pullman Company furnishes the equipment for such cars and collects from the Railway company 6 per cent interest on one-half the value of the equipment. The revenues and expenses of the operation of sleeping cars under the association contract are included in the revenues and expenses of The Pullman Company, and a proportion of the net income from such operation is paid to the Northern Pacific interest in the Association.

*Auxiliary operations and other properties:* Under the classification prescribed by the Interstate Commerce Commission for sleeping car companies, "Auxiliary operations" covers dining and special car service; incidental commissarial service on sleeping, parlor, or other cars; and charter of commissarial cars, or incidental commissarial service on chartered cars. "Other properties" covers the operation of its car manufacturing and repair plant.

*Controlled corporations:* The company controls, through ownership of the entire capital stock, the Pullman Railroad Company, an active corporation. It also controls, through direct ownership of securities,

the Union Palace Car Company, the Mann's Boudoir Car Company, and the Woodruff Sleeping and Parlor Coach Company, all inactive corporations.

*Capital stock:* The capital stock is divided into 1,200,000 shares of par value of \$100 each. The total par value nominally outstanding is \$120,000,000, of which the company holds in its treasury \$1,978,200 stock and \$524 scrip, in its manufacturing department \$1,223,400, and in sinking or other funds \$188,300. The capital stock outstanding and not held by the company June 30, 1914, was \$116,609,576, of which \$4576 is classed as scrip. Regular dividends at the rate of 8 per cent were declared during the period covered by report, amounting to \$9,441,313.83.

*Funded debt:* The company has no funded debt.

*Balance sheet:* The balance sheet June 30, 1914, is as follows:

<i>Assets side:</i>	
Cost of property and equipment.....	\$144,673,625.48
Stocks owned.....	5,848,261.90
Funded debt owned.....	2,205,995.35
Lands owned.....	7,722.72
Cash.....	6,477,262.87
Bills receivable.....	28,044.98
Due from agents and conductors.....	401,761.71
Due from solvent companies and individuals.....	1,499,265.26
Materials and supplies.....	4,135,956.87
Sinking, insurance, and other funds.....	319,064.48
Sundries.....	12,014.10

Total..... \$165,608,975.72

<i>Liabilities side:</i>	
Capital stock.....	\$120,000,000.00
Audited vouchers and accounts.....	1,874,619.23
Wages and salaries.....	684,003.68
Dividends not called for.....	14,801.50
Matured interest coupons unpaid.....	80.00
Miscellaneous.....	3,097,390.24
Dividends accrued on capital stock.....	1,573,556.00
Reserve and adjustment accounts:	
Depreciation on cars.....	\$15,948,605.12
Depreciation on equipment.....	16,242,639.01
Reserve for accrued depreciation, buildings, appurtenances, etc.....	532,618.45
Insurance reserve fund account.....	306,304.71
Other miscellaneous reserve accounts.....	34,541.11
Profit and loss.....	5,299,816.67

Total..... \$165,608,975.72

"Cost of property and equipment" includes \$20,136,408.32 for the manufacturing department: in this amount is included the book valuation (not separately stated) of \$1,223,400 par value of The Pullman Company's own stock, also \$500,000 par value of Pullman Railroad Company stock.

*Income account:* The Income account for the year ended June 30, 1914, is as follows: note that it does not include operations of the manufacturing plant, the net income from which is carried direct to Profit and Loss account:

<i>Operating income:</i>	
Sleeping car operations:	
Revenues.....	\$41,499,396.04
Expenses.....	28,115,721.60
Net revenue from car operations.....	\$13,383,674.44
Auxiliary operations:	
Revenues.....	\$881,235.09
Expenses.....	\$81,774.87
Net deficit from auxiliary operations.....	539.78
Total net revenue.....	\$13,383,134.66
Taxes accrued.....	1,112,753.70
Operating income.....	\$12,270,375.96

*Other income:*

Hire of equipment, credit balance.....	\$17,057.50
Dividends declared on stocks owned or controlled.....	93,595.65
Interest accrued on funded debt owned or controlled.....	93,126.85
Interest on other securities, loans, and accounts.....	237,058.95

Total other income..... \$440,838.95

Gross corporate income..... \$12,711,214.91

*Deductions from gross corporate income:*

Other interest.....	\$47,552.93
Other deductions.....	306.45

Total deductions from gross corporate income..... \$47,859.38

Net corporate income..... \$12,663,355.53

*Disposition of net corporate income:*

Dividends declared on common stock:	
$\frac{1}{2}$ of 2% payable August 15, 1913.....	\$786,776.68
2% payable November 15, 1913.....	2,360,322.00
2% payable February 15, 1914.....	2,360,326.00
2% payable May 15, 1914.....	2,360,333.15
$\frac{3}{4}$ of 2% payable August 15, 1914.....	1,573,556.00
	\$9,441,313.83

Balance for year carried forward to credit of profit and loss..... \$3,222,041.70

*Profit and Loss account:* The Profit and Loss account for the year is as follows:

*Credits:*

Balance June 30, 1913.....	\$3,933,793.58
Balance for year brought forward from income account.....	3,222,041.70
Net income from other properties.....	3,058,729.20

Total..... \$10,214,564.48

*Debits:*

Totals..... \$3,536,217.51 \$2,205,995.35

*Property and equipment:* The "Cost of property and equipment" reported by the company is not the cost but the book value of such property, the book value being original cost less depreciation written off. The amounts at which different classes of property stood June 30, 1914, are as follows:

*Equipment:*

Standard sleeping cars.....	\$93,711,623.95
Tourist sleeping cars.....	7,334,462.55
Parlor cars.....	16,851,796.81
Dining cars.....	252,909.45
Composite cars.....	1,996,026.59
Private cars.....	806,386.91

Total equipment.....	\$120,953,206.26
Real estate used in operation.....	449,233.60
Buildings and fixtures used in operation.....	3,126,777.30
Miscellaneous properties, storeroom and porters' bunk cars.....	8,000.00

Total cost of property used in sleeping car operations \$124,537,217.16  
Manufacturing department (real estate, buildings, machinery, and other assets)..... 20,136,408.32

Total cost of property and equipment..... \$144,673,625.48

\$11,381,780.65 was charged to capital during the year and \$2,612-041.22 was written off, developing a net increase of \$8,769,739.43.

The debits and credits were distributed as follows:

<i>Equipment</i>	<i>Debits</i>	<i>Credits</i>
Standard sleeping cars.....	\$9,047,754.43	\$1,936,152.01
Tourist sleeping cars.....	652,000.00	100,000.00
Parlor cars.....	1,352,561.86	426,481.18
Composite cars.....	73,897.68	100,000.00
Private cars.....	144,784.04	34,392.21
Miscellaneous cars.....	.....	4,000.00
Buildings and fixtures used in operation.....	108,282.64	9,515.82
Miscellaneous properties, storeroom and porters' bunk cars.....	2,500.00	1,500.00

Totals..... \$11,381,780.65 \$2,612,041.22

Equipment owned or leased in service of the company June 30, 1914, together with equipment added and retired during year, is classified as follows:

	<i>Number added during year</i>	<i>Number retired during year</i>	<i>Number June 30, 1914</i>	<i>Net increase during year</i>
<i>Equipment owned:</i>				
Standard sleeping cars.....	492	169	5,095	323
Tourist sleeping cars.....	67	12	783	55
Parlor cars.....	109	69	1,143	40
Dining cars.....			11	
Composite cars.....	6	16	120	*10
Private cars.....	5	3	38	2
Miscellaneous cars.....		1		*1
Totals owned.....	679	270	7,193	409
<i>Equipment leased or otherwise acquired:</i>				
Cars leased from N. P. Ry., tourist.....			61	
L. S. & M. S. Ry., composite.....		2	8	*2
M. C. R. R., composite.....		6		*6
N. Y. C. & H. R. R. R., composite.....		1	13	*1
R., F. & P. R. R., kitchen.....		1	1	*1
Lehigh Valley R. R., compo- site.....	3		3	3
Totals leased, etc.....	3	10	90	*7
Totals in service.....	682	280	7,283	402

\* Decrease.

Of the cars in service at this date, 1909 standard sleeping cars, 388 parlor cars, 63 composite cars, and 10 private cars, a total of 2370, were of all steel construction.

*Operating revenues:* The revenues from car operations for the year are classified as follows, and combine both contract and association operations.

<i>Berth revenue:</i>	
Standard sleeping cars.....	\$33,075.88
Tourist sleeping cars.....	2,149,759.98
Other cars.....	214.00
<i>Seat revenue:</i>	
Standard sleeping cars.....	2,043,522.70
Tourist sleeping cars.....	7,794.27
Parlor cars.....	5,157,400.53
Composite cars.....	51,344.20
Other cars.....	3.90
<i>Charter of cars:</i>	
Standard sleeping cars, per diem rates.....	302,014.75
Standard sleeping cars, berth rates.....	16,171.76
Tourist sleeping cars, per diem rates.....	56,829.44
Tourist sleeping cars, berth rates.....	249.60
Private cars, per diem rates.....	230,054.79
Other cars to other than carriers, per diem rates.....	5,265.00
Other cars, berth or seat rates.....	6,128.30
Other cars to carriers, other rates.....	18,060.24
Miscellaneous revenue.....	81,069.53
Car mileage revenue.....	757,266.74
Association revenue, Dr.....	490,592.03
Contract revenue, Dr.....	1,969,045.99
Total.....	\$41,499,396.04

The "Association revenue" deduction shown is the amount paid under association contracts to the Northern Pacific Railway.

"Contract revenue, Dr." represents deductions from gross revenue paid to other carriers under the terms of operating contracts.

*Operating expenses:* The operating expenses reported for car operations are given below:

<i>Maintenance:</i>	
Superintendence.....	\$42,989.39
Standard sleeping cars, repairs.....	6,706,386.94
Tourist sleeping cars, repairs.....	668,927.54
Parlor cars, repairs.....	1,371,147.80
Composite cars, repairs.....	74,415.65
Private cars, repairs.....	73,356.67
Other cars, repairs.....	.69
Standard sleeping cars, depreciation adjustments.....	99,281.65
Tourist sleeping cars, depreciation adjustments.....	33,087.96
Parlor cars, depreciation adjustments.....	49,045.02
Composite cars, depreciation adjustments.....	65,045.57
Private cars, depreciation adjustments.....	1,700.54

Other cars, depreciation adjustments.....	\$322.37
Standard sleeping cars, depreciation.....	4,149,019.53
Tourist sleeping cars, depreciation.....	358,235.59
Parlor cars, depreciation.....	724,114.50
Composite cars, depreciation.....	102,895.49
Private cars, depreciation.....	36,194.90
Other cars, depreciation.....	18.53
Shop machinery and tools.....	47,923.93
Buildings, appurtenances, and grounds.....	94,400.71
Buildings, appurtenances, and grounds, depreciation..	58,388.26
Stationery and printing.....	13,198.80
Injuries to persons.....	5,047.55
Maintenance of association cars, Cr.....	100,518.85

Total maintenance..... \$14,674,656.76

*Conducting car operations:*

Superintendence.....	\$208,475.95
District employees and expenses.....	1,451,646.31
Conductors.....	2,587,036.49
Porters and maids.....	2,581,172.72
Car cleaning, general.....	1,259,069.20
Car cleaning, special.....	691,281.95
Laundry.....	1,781,020.41
Other car supplies and expenses, general.....	357,006.22
Other car supplies and expenses, special.....	1,209,635.77
Stationery and printing.....	134,657.99
Loss and damage.....	26,467.58
Injuries to persons.....	132,808.59
Other expenses conducting car operations.....	59,986.42
Operation of association cars, Cr.....	104,642.59

Total conducting car operations..... \$12,375,623.01

*General expenses:*

Salaries and expenses of general officers.....	\$171,820.70
Salaries and expenses of clerks and attendants.....	452,142.04
General office supplies and expenses.....	35,136.89
Law expenses.....	185,625.70
Pension and relief expenses.....	83,316.12
Insurance.....	70,370.17
Stationery and printing.....	38,876.85
Other general expenses.....	29,478.34
Administration association cars, Cr.....	1,324.98

Total general expenses..... \$1,065,441.83

*Recapitulation:*

Maintenance.....	\$14,674,656.76
Conducting car operations.....	12,375,623.01
General expenses.....	1,065,441.83

Total of car operations..... \$28,115,721.60

Operating ratio..... 67.75%

The following is a summary of revenues and expenses of auxiliary operations:

*Commissarial service:*

<i>Operating revenues:</i>	
Dining and special car revenue.....	\$61,868.01
Sleeping and parlor car commissarial revenue.....	761,983.11
Miscellaneous revenue.....	57,383.97
	\$881,235.09

<i>Operating expenses:</i>	
Maintenance.....	\$76,193.01
Conducting commissarial services.....	791,809.52
General expenses.....	13,472.34
	\$881,774.87

Auxiliary operations, deficit..... 539.78

The following is a summary of revenues and expenses of other properties (manufacturing plant):

<i>Revenues:</i>	
Revenues from construction of cars owned.....	\$11,551,921.24
Revenues from repairs of cars owned.....	190,311.49
Revenues from construction and repair work for others.....	18,846,093.62
Miscellaneous revenues or in- come.....	2,439,382.84
	\$33,027,709.19
<i>Expenses:</i>	
Operating expenses.....	\$29,883,912.19
Taxes.....	85,067.80
	29,968,979.99
Net revenue manufacturing plant.....	\$3,058,729.20

*Operating statistics:* Below are given certain statistics and operating revenue and expense averages and comparisons. The revenues and expenses used include both contract operations and association operations.

Total number revenue passengers:

Berth.....	14,491,276	
Seat.....	11,697,477	
		26,188,753
Total number non-revenue passengers.....		1,114,436
Total number car-miles.....		717,789,163
Total number car-days.....		2,209,383
Average number revenue passengers per car per day..		12
Average revenue per passenger, berth.....		\$2.43
Average revenue per passenger, seat.....		\$0.62
Total operating revenues.....	\$11,499,396.04	
Operating revenues per car-mile.....	\$0.05782	
Operating revenues per car-day.....	\$18.783	
Total operating expenses.....	\$28,115,721.60	
Operating expenses per car-mile.....	\$0.03917	
Operating expenses per car-day.....	\$12.726	
Net operating revenue.....	\$13,383,674.44	
Net operating revenue per car-mile.....	\$0.01865	
Net operating revenue per car-day.....	\$6.058	
Average number car-miles per car-day.....		324.88
Average number car-miles per mile of trackage operated over.....		5,478.85
Average capacity per car:		
Standard sleeping cars, berths.....		26.74
Tourist sleeping cars, berths.....		31.45
Parlor cars, chairs or seats.....		30.41
Composite cars, seats.....		26.02
Average cost per car of steel cars placed in service during year.....	\$18,878.22	

Average weight per car equipped for service:

Steel cars.....	146,000 lbs.
Other than steel cars.....	113,000 lbs.

*Employees and salaries:* The number of employees on the payroll as of June 30, 1914, and the average daily compensation reported for different classes, are as follows: the figures given include employees in auxiliary operations but not employees in the manufacturing plant:

Class	Number	Average daily compensation
Maintenance:		
Mechanics, electricians, seamstresses, repairers, carpenters, shop employees, etc.....	5,150	\$2.69
Conducting car operations:		
General officers and staff (superintendence).....	87	4.21
District superintendents, agents, and staff.....	1,282	2.46
Conductors.....	2,311	2.99
Porters and maids.....	6,451	1.11
Train stenographers.....	5	2.31
Car cleaners.....	3,967	1.61
General expenses:		
General officers.....	27	21.28
Clerks and attendants.....	510	2.41
Outside operations:		
Commissary (superintendence).....	17	2.87
Agents and staff, conductors, waiters, cooks, etc.....	303	1.50
Total all employees.....	20,110	\$2.00
Less general officers.....	27	21.28
Total excluding general officers.....	20,083	1.97

---

STAGE COACH CORPORATIONS

## STAGE COACH CORPORATIONS,

The following particulars are abstracted from reports of those concerns which are designated "Stage coach corporations" by sections 24 and 25 of the ships. It has been impracticable to analyze or effectively to criticize these returns, and the statements and figures shown are simply given as reported, although Although diligent effort has been made to obtain returns from all concerns which are required by the law to render reports to the Public Service Commission, returns but did not, are listed at the foot of the table under the title "Stage coach corporations which failed to file reports".

The names of concerns which were granted certificates of convenience and necessity prior to June 30, 1914, but did not conduct any operations during the Names of **incorporated** concerns are in **black face** type.  
*Net losses are shown in italics.*

Stage coach corporations which failed to file reports:

Aker, Jonas J., Schenectady, N. Y.  
 Alden-Transit Company, Inc., Buffalo, N. Y.  
 Berne Bus Line, Berne, N. Y.  
 Brewster, Charles A., Addison, N. Y.

Butler, Frank C., Canastota, N. Y.  
 Colburn, J. L., Oneonta, N. Y.  
 Comstock, A. B., Sherwood, N. Y.  
 East Aurora Motor Power Company, East Aurora, N. Y.

\* Including operating expenses; also taxes, rent, and interest, if any.

<sup>1</sup> Includes \$960 "paid on cars".

<sup>2</sup> So reported though evidently erroneous in one or more of the items.

<sup>3</sup> Includes \$500 for depreciation.

<sup>6</sup> Includes 15% depreciation on \$10,903, value of bases.

<sup>7</sup> Presumptive figures; report is ambiguous.

<sup>8</sup> Includes \$2000 depreciation.

## YEAR ENDED JUNE 30, 1914

Transportation Corporations Law. These concerns are mostly the so called "Auto bus lines," and are generally owned and operated by individuals or copartners here and there some obvious inaccuracy has been corrected or commented on in a footnote.

Second District, there are a number which have made no return. The names of the concerns which according to the best records available should have made year ended on that date have been, where ascertained, omitted from these lists.

Line No.	Name of concern and responsible executive	Office address	Route	Line No.
1	Albany and Voorheesville Express (Albert D. Gray, owner) . . .	Delmar, N. Y. . . . .	Albany — Voorheesville . . . . .	1
2	Alfred — Hornell Auto Transit (William W. Sheldon, owner) . . .	Alfred, N. Y. . . . .	Alfred — Alfred Station — Almond — Hornell . . .	2
3	Amell, William . . . . .	Redford, N. Y. . . . .	Plattsburgh — Cadyville — Elsenora — Danne- mora — Saranac — Moffitsville — Redford . . .	3
4	Anderson Stage Line Corporation (P. J. Tummins, treasurer) . .	Newcomb, N. Y. . . . .	North Creek — Minerva — Newcomb — Long Lake . . . . .	4
5	Auburn and Moravia Auto Bus Company, The (Timothy J. Flood, secretary) . . . . .	6 Mary street, Auburn, N. Y. . . . .	Auburn — Owaseo — Moravia . . . . .	5
6	Austin, Fred B. . . . .	Herkimer, N. Y. . . . .	Herkimer — Middleville — Newport — South Poland — Cold Brook . . . . .	6
7	Buckmaster and Morrison (Ralph J. Buckmaster and Jay E. Morrison, partners) . . . . .	7 W. Washington street, Bath, N. Y. . . . .	Bath — New York State Soldiers and Sailors Home . . .	7
8	Buffalo — Akron Transit Company (William H. Penseyres, president) . . . . .	891 Main street, Buffalo, N. Y. . . . .	Buffalo — Akron; Buffalo — Lancaster — Alden . . .	8
9	Bundy, Nathan A. . . . .	2433 Seneca street, Buffalo, N. Y. . . . .	East Seneca — East Aurora . . . . .	9
10	Butler, Guy E. . . . .	Cherry Valley, N. Y. . . . .	Richfield Springs — Cherry Valley . . . . .	10
11	Cairo Catskill Quick Line (Frederick Weeks, owner) . . . . .	Cairo, N. Y. . . . .	Catskill — Cairo . . . . .	11
12	Canajoharie and Sharon Springs Auto Bus and Car Line Company, Inc. (Seth Smith, treasurer) . . . . .	Sharon Springs, N. Y. . . . .	Sharon Springs — Canajoharie — Palatine Bridge . . .	12
13	Corinth Glens Falls Stage Line (Benjamin P. Ogden, owner) . .	Corinth, N. Y. . . . .	Corinth — Glens Falls . . . . .	13
14	Crane, E. F. . . . .	Grand Central Ave., Horseheads, N. Y. . . . .	Horseheads — Erin . . . . .	14
15	Farrell, Daniel . . . . .	Montezuma, N. Y. . . . .	Montezuma — Auburn . . . . .	15
16	Fling's Trucking Agency (Wilbur S. Fling, owner) . . . . .	Binghamton, N. Y. . . . .	Binghamton — Windsor . . . . .	16
17	Garrison, William R. . . . .	Palenville, N. Y. . . . .	Palenville — Saugerties . . . . .	17
18	Gates, George E., and Son . . . . .	Sterlingville, N. Y. . . . .	Carthage — Watertown . . . . .	18
19	Glens Falls-Bolton Auto Stage Line (J. E. Miller, secretary) . .	35 Ridge street, Glens Falls, N. Y. . . . .	Glens Falls — Lake George — Bolton . . . . .	19

BAGGAGE COMPANIES AND TRANSFER COMPANIES

---

---

## BAGGAGE COMPANIES AND TRANSFER COMPANIES, YEAR ENDED JUNE 30, 1914

The following particulars are abstracted from reports of those concerns which are designated "Baggage companies" and "Transfer companies" by section 2, subdivision 9a of the Public Service Commissions Law. In the majority of instances the concern so designated is merely a teaming business, conducted by an individual or copartnership. It has been impracticable to analyze or effectively to criticize these returns, and the statements and figures shown are simply given as reported, although here and there some obvious inaccuracy has been corrected.

Although diligent effort has been made to obtain returns from all concerns which are required by the law to render reports to the Public Service Commission, Second District, there are a number which have made no return. The names of the concerns which according to the best records available should have made returns but did not, are listed at the foot of the table under the title "Baggage companies and transfer companies which failed to file reports".

Names of incorporated concerns are in black face type.

Net losses are shown in italics.

L.No.	Name of concern and responsible executive	Office address	Railroad in connection with which operated	L.No.

 Quinn, Michael, Geneva, N. Y.  
 Stanwix Hall Express, Rome, N. Y.

\* Including operating expenses; also taxes, rent, and interest, if any.

---

STOCK YARD COMPANY

---

## STOCK YARD COMPANY

The Public Service Commissions Law as amended by chapter 506, laws of 1913, gives the Public Service Commissions jurisdiction over stock yards and over stock yard companies owning, leasing, or operating the same, to the same extent that such jurisdiction applies to "depots, freight houses and shipping stations of a common carrier, including the duty of such stock yard company to submit reports and be subjected to investigations as if it were a common carrier". There has been found within the jurisdiction of the Second District Commission only one Stock Yard Company as that term is defined in the law, which is not a railroad corporation and has hitherto not made reports to the Commission as a common carrier. An abstract of the report of this Stock Yard Company is as follows:

Name of concern: Patrick Horan (unincorporated).  
Location of yard: West Albany.  
*Income statement for year ended June 30, 1914:*

Revenues . . . . .	\$10,958
Operating expenses . . . . .	8,318
	<hr/>
Net income for the year . . . . .	\$2,640

INSPECTIONS OF STEAM RAILROADS

---

## INSPECTIONS OF STEAM RAILROADS

## ADIRONDACK AND ST. LAWRENCE RAILROAD.

Inspected May 22, 1914. Last previous inspection June 9, 1913.  
*To the Public Service Commission, Second District:*

I have inspected the Adirondack and St. Lawrence railroad and submit the following report:

This railroad has a single track line of standard gauge extending from DeKalb Junction, where it connects with the New York Central and Hudson River railroad, to Hermon, a distance of 3.6 miles.

The line is lightly constructed across a rolling country and has some fairly heavy grades. There are some sharp curves, but both grades and curves are readily operated with the present traffic. The cuts and fills are in good condition, and track ditches are provided for drainage. There are several places however where the track is heaved by the action of frost during the winter season, and it is suggested that a moderate amount of tile drainage would show a marked improvement. The surface and line of the track are fair to good.

The track is laid with 60-lb. rail which is in fair condition and suitable for the traffic. In the yard at DeKalb Junction, deliveries are made to this road with a heavy engine from the New York Central line, and it is evident that the rail is too light for the service required of it. It is suggested that heavier rail be laid at that place if practicable. Repairs should be made at one place near DeKalb Junction where the rails on the main track were spreading. The track ties generally are in good condition, and the rate of renewal appears to be sufficient for proper maintenance. The track is well ballasted with mine tailings and cinders. Split switches and rigid frogs and switch stands are used in the turnouts and are in good condition. Tie-plates are used to some extent on the curves. One track gang of about 4 men during the working season handles the track work satisfactorily. The right of way is clean and properly fenced. The road crossings are in good condition except that the signs need painting.

The only open deck structure on the line is a deck truss with timber trestle approaches. As mentioned in the report for last year the concrete abutments are too narrow properly to support the embankments. It was stated that concrete piers are to be built this season, and that the abutments will be made wider. The culverts and cattle-passes are of concrete arch and box construction and are in good condition.

The only station maintained by this company, at Hermon, is in good condition and suitable for the traffic. Joint use is made of the New York Central station at DeKalb Junction. The improvement of interchange facilities at the latter place has been discussed for a long time but no change has been made. It is unfortunate that an agreement can not be reached by the two railroad companies, for the present situation is always unsatisfactory and often unsafe for passengers who transfer between the two roads.

The principal business of this road is the transportation of ore from the pyrites mines to DeKalb Junction. One train handles all of the business, and the existing facilities excepting at DeKalb Junction are sufficient. There are no grade crossings with other railroads.

Since the preceding inspection was made, a concrete arch culvert has been completed, and a considerable amount of ballasting has been done. Improvements contemplated for the near future include an extension of the ballasting and the building of concrete piers at the truss bridge. The recommendations of the preceding report were carried out in most respects, except that the company has been unable to arrange with the New York Central for improved facilities at DeKalb Junction. It is recommended that the spreading rails be repaired, and that the faded crossing-signs be painted.

Respectfully,  
 J. B. STOUDEUR,  
*Steam Railroad Inspector.*

## BATH AND HAMMONDSPORT RAILROAD.

Inspected September 8, 1914. Last previous inspection November 4, 1913.

*To the Public Service Commission, Second District:*

I have inspected the Bath and Hammondsport railroad and submit the following report:

This railroad is a standard gauge single track line extending from Bath where it connects with the Erie railroad, to Hammondsport on Lake Keuka, a distance of 9.23 miles. The sidings amount to 0.46 mile. The line extends through fairly rough country and crosses a divide between the Cohocton river and

Lake Keuka. The grades are heavy but are not extreme for a light railway. The construction grading was light in amount, and the cuts and fills have a sufficient cross-section to support the ballast. Suitable ditches are provided for drainage. The surface and alignment of the track are fair, except on a curve near the Erie railroad at Bath, where the alignment is poor and should be improved. Weeds which are growing in the track also should be cleared. The track is laid with 60-lb. rail which is in fair to good condition. The rail joints are spliced with 4-bolt angle-bars. The track ties are yellow pine timber and generally in good condition. A few more renewals are to be made this season. The line is rather lightly ballasted with cinders, gravel, and native soil, the cinder ballast being gradually extended each season. The track appliances comprise split switches, rigid and spring frogs, and rigid and automatic switch stands, all of which appeared to be in good repair. The right of way is fairly clean, and fences are maintained where they are required. The road crossings are in fair to good condition and are equipped with crossing-signs. The track work is handled by a gang of 10 men during the working season. There is one I-beam bridge of 3 spans. The open deck culverts consist of several forms of timber, rail, or I-beam girders supported on pile bents or masonry abutments. There also are several box and pipe culverts. All of these structures are in good condition except that trash should be cleaned away from the timber culvert north of Smith's switch. There are two stations on the line and several shelters where flag stops are made. These structures appear to furnish sufficient facilities for the existing traffic. There is one grade crossing at Bath where the main track is crossed by an industry track of the Erie railroad. The only protection consists of flagging by the train crews which use the crossing. The traffic on this railroad is light, the freight business consisting chiefly of the local products of the Lake Keuka territory. Connection is made at Hammondsport with boats which operate on the lake during the season of navigation. Train movements are governed by timetable schedules, telephonic train orders, and the operating rules. The facilities of the road appear to be reasonably well adapted to its traffic. The following improvements have been made since the previous inspection: Cinder ballast was applied on 0.76 mile of track. Pile bents were renewed in 5 culverts. One timber culvert was replaced by a concrete pipe. A wooden turntable 54 feet long was replaced by a wrought iron turntable 60 feet long.

This railroad is maintained in a fairly suitable condition for its traffic. It is recommended that the track alignment be improved on the curve near Bath, and that the weeds be cleaned out of the track.

Respectfully,  
 J. B. STOUDEUR,  
*Steam Railroad Inspector.*

## BOSTON AND ALBANY RAILROAD.

Inspected June 19, 1914. Last previous inspection June 30, 1913.

*To the Public Service Commission, Second District:*

I have made an inspection of that part of the Boston and Albany railroad within this State and submit the following report:

The Boston and Albany railroad extends from a connection with the Hudson division of the New York Central and Hudson River railroad at Rensselaer, to the New York-Massachusetts state line near State Line station, a distance of 37.88 miles. The Hudson and Chatham branch is 17.33 miles in length, and extends from Chatham to Hudson. At the latter point connection is made with the Hudson division of the New York Central and Hudson River railroad and with the boat lines on the Hudson river. The main line is double track throughout. The branch has 1.06 miles of double track between Hudson and Hudson Upper. Between Chatham and BA tower the track parallels the single track of the Harlem division of the New York Central and Hudson River railroad. Here the 2 single track lines are operated as double track by both railroads. There are 26.4 miles of third or fourth track and 40.51 miles of sidings.

The railroad ascends from Rensselaer to a summit near State Line with varying grades. The curves are rather frequent and comparatively sharp. The Hudson and Chatham branch crosses a rolling country with varying grades between Chatham and Hudson Upper. From Hudson Upper to Hudson the grade descends at the rate of about 3.64 per cent. The cuts, embankments, and ditches are well maintained throughout and the roadbed is well drained. The alignment and surface were good.

The tracks are laid with rail in weight and kind as follows: main line: tracks 1, 2, and 4, 100-lb. Bessemer 26.95 miles; tracks 1, 2, and 4, 100-lb. ferro-titanium 31.59 miles; tracks 1, 2, and 4, 100-lb. open hearth 16.77 miles; tracks 1, 2, and 4, 105-lb. open hearth 12.25 miles; track 4, 95-lb. Bessemer 14.61 miles. Hudson and Chatham branch: tracks 1 and 2, 100-lb. ferro-titanium 0.31 mile; tracks 1 and 2, 95-lb. Bessemer 14.67 miles; tracks 1 and 2, 80-lb. Bessemer 2.88 miles; tracks 1 and 2, 72-lb. Bessemer 0.53 mile. The rail was in generally good condition. New rail had been laid recently on some of the curves, and rail has been distributed in places to replace the curve worn rail. A mashed head rail was noted on the Hudson and Chatham branch near the section toolhouse north of Hudson Upper, and a rail with a mashed end in the eastbound track on bridge No. 203. The rails are joined with 6-bolt angle-bar splices and some 4-bolt continuous rail joints. The splices are properly adjusted, and with the exception of a few loose bolts on the Hudson and Chatham branch at Hudson Upper, they were in satisfactory condition.

The ties are principally white oak and yellow pine. The latter are used both with and without creosote treatment. The renewals since the previous inspection amounted to 44,343 ties, or 14 per cent of those in the main track, and 6886, or 14½ per cent of the total ties in the Hudson and Chatham branch. The new ties are principally yellow pine, about 12 per cent of which are treated with creosote. It is expected to renew 37,850, or 12 per cent, main line ties, and 8350, or 18 per cent, of the ties on the branch this season. About 75 per cent of the main line tie renewals had been made at the time of the inspection. The general tie situation is in good condition.

The switches are of the split rail type, and the frogs are both spring and rigid. The switch stands equipped with lamps are of both automatic and rigid types. Derails are used where needed. Tie-plates are used extensively on curves. These appliances are in good condition throughout. The ballast on tracks 1 and 2 on the main line is 0.66 mile of gravel and 75.11 miles of trap rock. Track 4 is ballasted with 14.7 miles of cinders, 7.85 miles of gravel, and 3.85 miles of trap rock. The Hudson branch is ballasted with 6.39 miles of cinder, 10.47 miles of gravel, and 1.40 miles of trap rock. The ballast is of good quality and sufficient in amount. The right of way is cleared, clean, and well kept. The fences are well maintained, and the highway crossings and signs are in good condition. The only defect noted was that the crossing-sign on the west side of the track at Pulvers station is obscured by trees and foliage. It should be moved to a position where it is in plain view. With this exception the signs are well located and properly painted.

The sections have an average length of 3.14 miles on the main line, and 4.24 miles on the Hudson branch. The average length of main track is 8.48 miles and 4.47 miles respectively on the main line and the Hudson branch. The average total miles of track per section is 11.07 on the main and 6.73 miles on the branch. The average section force in the working season is 1 foreman and 10.91 laborers on the main, and 1 foreman and 7 laborers on the branch: this force is ample for proper maintenance.

The bridges are all in the nature of permanent structures. The number and kind are as follows: bridges: main line: 1 concrete arch, 4 stone arch, 1 pony lattice truss, 3 through plate girder, 9 deck plate girder, 1 deck plate girder and I-beam, 2 I-beam; Hudson and Chatham branch: 1 stone arch, 3 through plate girder, 1 deck plate girder, 2 I-beam; culverts: main line: 9 arch, 60 box, 47 pipe, and 2 open; Hudson and Chatham branch: 41 box, 21 pipe, 1 open. The bridge structures are generally in good condition. A criticism common to many of the bridges is that the inside metal guard-rails are not full spiked to the ties. It is the best practice to full spike these guard-rails to all ties. This was particularly noted on bridges Nos. 214, 211, 209, and 208 on the main line, and 449, 445, and 452 on the branch. The other minor defects observed were as follows: Bridge No. 209, the north girder on the eastbound track is tight against the back wall of the east abutment; bridge No. 205 has several poor ties; bridge No. 193, the bridge seats are dirty.

There are 4 stone, 2 brick, and 2 frame passenger stations on the main line, and 2 brick and 3 frame stations on the Hudson branch. These buildings are generally of modern design, neat, and clean. The station grounds, drives, lawns, and platforms are in good condition, and a credit to the railroad. The New York Central and Hudson River railroad station at Hudson is used jointly.

At Rensselaer, 2 tracks are crossed by 3 tracks of the Hudson division, New York Central and Hudson River railroad, protected by mechanical interlocking, operated by towermen in New York Central and Hudson River railroad tower No. 99. At Rensselaer, 1 track is crossed by 5 tracks of the Hudson division, New York Central and Hudson River railroad, protected by mechanical interlocking, operated by towermen in New York Central and Hudson River railroad tower No. 100. At Hudson, 2 tracks are

crossed by 4 tracks of the New York Central and Hudson River railroad, Hudson division, protected by mechanical interlocking, operated by New York Central and Hudson River railroad towermen in tower No. 84. At Hudson Upper, 3 tracks are crossed by 1 track of the Albany Southern railroad (electric), protected by a trolley guard and crossing gates.

The traffic, both freight and passenger, is heavy on this railroad. It is one of the principal railroads in the New England states, and having connections with all the more important lines therein, and by its connection with New York Central and Hudson River railroad at Rensselaer, forms a very important gateway to the New England states from the west.

Train movements are frequent. They are controlled by time-tables, train orders, and operating rules, supplemented by a modern system of automatic block signals of the 3-position upper quadrant type. There are interlocking plants located at junction points and the ends of passing tracks. These facilitate the movements of trains. The home signals are power operated, and in addition to governing the movements over switches and crossovers are used for blocking trains. They have 3 arms operated in the upper quadrant. The terminal, yard, station, and road facilities seem ample to handle the business. The important railroad connections are at Hudson and Rensselaer with the Hudson division of the New York Central and Hudson River railroad; and at Chatham with the Rutland railroad and the Harlem division of the New York Central and Hudson River railroad. The main line and the Hudson and Chatham branch are equipped for either telephonic or telegraphic train dispatching. All trains are now dispatched by telephone but the telegraph is maintained for emergency use.

Since the previous inspection the following improvements have been made: bridge No. 214-A has been extended for 1 additional track; bridge No. 441 on the Hudson branch, a pony lattice truss, has been replaced with a through plate girder bridge and both abutments rebuilt with concrete; bridge No. 449 on the Hudson branch, a through lattice truss, has been replaced by a through plate girder bridge; 10.1 miles of new 105-lb. open hearth rail has replaced 3.79 miles of 100-lb. and 6.31 miles of 95-lb. rail; 0.92 mile of fit 100-lb. open hearth rail has replaced 95-lb. rail; 0.03 mile of fit 95-lb. Bessemer rail replaced 72-lb. rail, and 0.03 mile of new 100-lb. open hearth rail replaced 95-lb. rail; on the Hudson branch 0.05 mile of new 100-lb. ferro-titanium replaced 80-lb. rail; 44,343, or 10 per cent, of the main line ties and 6886, or 14½ per cent, of the Hudson branch ties were renewed: 1.98 miles of double track and 0.19 mile of track 4 on the main line were re-ballasted with trap rock, and 2.67 miles of track on the Hudson branch were re-ballasted with cinders; a concrete slab was placed on the culvert at telegraph pole 194-21 on the main line; on the Hudson branch, a concrete slab culvert and a concrete culvert have replaced culverts at telegraph pole 10-04 and telegraph pole 7-25; the pipe culverts have been extended at telegraph pole 11-24, telegraph pole 2-28, and telegraph pole 2-37; the stone box culverts at telegraph poles 2-31, 15-29, and 15-30 have been extended; and the masonry in the culverts at telegraph pole 4-25 and 9-35 have been pointed. The contemplated improvements include: the replacement of 37,850, or 12 per cent, of the main track ties, and 8350, or 18 per cent, of the ties on the Hudson branch; the erection of a new coaling plant at Hudson; the rebuilding of bridges Nos. 215 at Niverville and 224 at Rensselaer on the main line.

This property is being maintained in a very satisfactory condition. It is recommended that the inside guard-rails be full spiked to the ties on all bridges, and that the other defects in the track and bridges noted in the body of the report be repaired.

Respectfully,

W. G. HIMES,  
Inspector Division of Transportation.

#### BOSTON AND MAINE RAILROAD.

Inspected July 1, 2, 1914. Last previous inspection July 21, 22, 1913.

*To the Public Service Commission, Second District:*

I have inspected that part of the Boston and Maine railroad which lies within the State of New York and submit the following report:

The Fitchburg railroad, now operated as the Fitchburg division of the Boston and Maine railroad, comprises the following lines in this State: main line, New York-Vermont state line to Rotterdam Junction, including 1.05 miles trackage rights on the Delaware and Hudson railroad at Mechanicville, 54.74 miles; Troy branch, Johnsonville to Troy 15.55 miles; Bennington branch, Hoosick Junction to New York-Vermont state line 5.04 miles; Saratoga and Schuylerville branches, Mechanicville to Saratoga Springs 17.50 miles, and Schuylerville Junction to Schuylerville 8.32 miles.

The main line and the Troy branch have double tracks throughout, except that on the main line from Coons to Crescent, a distance of 6.94 miles, the Boston and Maine and the Delaware and Hudson railroads each have a single track on a double roadbed, and the two tracks are operated jointly as double track. East of Johnsonville, the two main tracks are on separate roadbeds, having been built as independent lines. The line lying to the north from Johnsonville eastward was selected for the eastbound track, owing to more favorable grades. This eastbound track crosses under the westbound track at Hoosick Falls, and the two lines come together on the same roadbed near North Pownal, Vt. The other branches are single track lines.

The main line lies in the valley of the Hoosick river most of the distance from the Vermont-State line to the Hudson river, and thence extends across a rolling country to Rotterdam Junction. The grades are moderate, but there is some sharp curvature. The branches all have moderate grades and curvature, except one grade of 1.3 per cent on the Saratoga branch near Mechanicville. The cuts and fills have a good cross-section, and most of the ditches are in good condition. The ditches need cleaning in two cuts on the Saratoga branch north of Mechanicville. The surface and alignment of the track generally are fair to good. Poor track surface was observed on the eastbound track west of Eagle Bridge and on the westbound track between milepost 157 and bridge No. 218. Frost shims, which still are in the track in many places, should be removed.

About 20 miles of the main line are laid with 100-lb. rail and the remainder with 85-lb. rail. Both weights of rail are partly Bessemer and partly open hearth steel. The branches are laid with several sizes of rail from 60-lb. to 85-lb., all of which is Bessemer steel. Most of the rail is either good or fairly serviceable. Two piped rails were found a short distance west of Petersburg Junction; a rail with a halfmoon break in the flange was found a short distance west of bridge No. 547; and a rail with a piece broken out of one end was found west of bridge No. 526. The rails are spliced with 4-bolt angle-bars and with continuous and Weber joints. A broken Weber joint was found on the Schuylerville branch near the switch of Cramer's siding, and on the westbound track of the main line near Reynolds a joint was found which had a lip of about  $\frac{1}{4}$  inch. This lip was trailing for the normal movement of trains, but it was on the outside rail of a curve and probably would have caused a derailment if train movements had been reversed. This railroad is making an interesting trial of the frictionless rail on several curves of the main line. This rail is laid on the inside of a curve, and its essential feature is a narrow head which presents a smaller area of friction under the wheel treads. The first of this rail was laid on a 9 degree curve in the eastbound track near Hoosick Falls, and it has been in service about 7 months. The wear of the ordinary rail on the outside of the curve is said to be noticeably less than formerly but the frictionless rail itself is considerably worn, this wear consisting largely of a flow of metal on the running surface. At several other places where this rail is being tried the curvature is not so sharp, and the frictionless rail shows very little wear. I was unable to learn the degree of hardness of this rail, but it is evident that it should be as hard as is consistent with the required toughness. It may be possible after some experiment to produce a rail of the frictionless type which will secure a minimum of total wear on the two rails of a curve. The track ties consist of cedar, chestnut, oak, and yellow pine timbers. Cedar ties no longer are used for renewals on the main line but still are used on the branch lines. The ties generally are in fair to good condition. Heavy renewals were in progress at the time of the inspection, and when this season's work is completed the condition of the track timber will be very good. The track appliances include split switches, rigid and spring frogs, and automatic switch stands equipped with targets and lights. Tie-plates are used extensively on the curves, and a considerable number of rail anchors are in use. The tracks are fairly well ballasted with gravel and cinders. Additional ballast is needed on the westbound track at several places in the vicinity of Hoosick Falls. The right of way is open and well kept, and suitable fences are maintained. The road crossings are in good condition and are provided with the proper signs. The track sections on the double track lines have an average length of about  $3\frac{1}{2}$  miles with a force of about 9 men per section during the summer months. On the single track lines the sections have an average length of about 7 miles, and the labor is about 7 men per section.

A large amount of work has been done on the bridges and culverts in the past year, and the general condition of these structures shows a notable improvement. Heavy repairs and reconstruction still are in progress, and the programme of work practically covers all of the present requirements. Certain defects and other features requiring mention are as follows: A considerable amount of the masonry, especially at the smaller structures, is rough broken ashlar, some of which needs pointing; most of this masonry appears to be essentially sound, and with reason-

able maintenance should continue to give satisfactory service. Main line: No. 231, a 7 span frame trestle, is to be rebuilt with timber; it is suggested that a steel or concrete structure is better adapted to a heavy traffic line; No. 234 has a few poor ties, and the girders are tight at the east back wall; No. 235 has some poor ties, and the masonry needs pointing with the addition of new bridge seats; the Delaware and Hudson bridge at Eagle Bridge, maintained by the Boston and Maine Railroad, has some poor ties and a number of shims on the ties; the abutments are a narrow form, now obsolete, and not well adapted to present conditions; No. 255 has some poor ties; No. 258 has a poor deck, and the masonry needs pointing; No. 259 has a poor deck on the westbound track; No. 260 has a poor deck; No. 269, the deck has been afire and needs repairs; No. 270 is a light truss bridge, 1280 feet long across the Hudson river; a contract has been let for a new superstructure; No. 275, the northwest seat stone is cracked; Nos. 283, 288, and 290 have poor ties; No. 295, the saprot should be trimmed off of the deck timbers; No. 298 has some poor ties and guard timber. Bennington branch: No. 485 has poor bridge seats; No. 490, a light steel bridge 485 feet long, is now being replaced by a heavier structure. Troy branch: No. 497, the concrete abutments are disintegrating; repairs are to be made. Saratoga and Schuylerville branches: No. 508 has no anchor bolts; No. 510, the masonry needs pointing; Nos. 512, 513, and 537 have poor ties; Nos. 548, 549, 550, and 554 are timber trestles in a generally poor condition; all of these are to be rebuilt or extensively repaired, and the work already was in progress at No. 550; first culvert west of Hudson Valley railroad crossing has a poor deck: it is to be rebuilt; culvert in Saratoga Springs yard, the I-beam stringers were canted toward the outside of the track curve.

The stations are in good condition and are well kept. Some of the buildings are small, but they appear to be suitable for the existing traffic. At Troy, the passenger trains enter the Troy Union station, and at Mechanicville, joint use is made of The Delaware and Hudson Company's station.

At Petersburg Junction, 2 tracks are crossed by 1 track of the Rutland railroad, protected by mechanical interlocking: derails and signals for controlling movements against the current of traffic, which were recommended in the preceding report, have not yet been installed. At Eagle Bridge, the eastbound track is crossed by 1 track of The Delaware and Hudson Company, the crossing consisting of a gauntlet across a bridge: train movements are controlled by automatic disc signals. At Mechanicville, 2 tracks are crossed by 3 tracks of The Delaware and Hudson Company, protected by an interlocking plant. At Saratoga Springs, 2 tracks are crossed by 1 track of the Hudson Valley railway: there are derails in the electric road and a trolley guard overhead.

There is a heavy freight traffic on the main line, consisting largely of coal eastbound and manufactured goods westbound. Connections are made with The Delaware and Hudson Company's railroad at Mechanicville and with the New York Central Lines (West Shore railroad) at Rotterdam Junction. The large yard at Mechanicville which has been under construction for more than a year is not yet completed, but a large part of it already is in service. It is intended ultimately to abandon the classification of cars at Rotterdam and to handle all of the classification at Mechanicville. There is a moderately heavy traffic on the Troy branch and light traffic on the other branches. The facilities along the several lines appear to be adequate for the business which is handled. Train movements are controlled by timetable schedules, telegraphic train orders, and standard code operating rules. There also is a complete system of block signals on the main line and Troy branch, consisting of home and distant, normally clear signals, giving 2-position, lower quadrant indications.

During the past year the following improvements have been made: sidetracks have been increased to the amount of 24.1 miles: the larger part of this was in Mechanicville yard; rail renewals consist of 8.74 miles of new 100-lb. rail, 3.23 miles of new 85-lb. rail, and 4.59 miles of relayer 85-lb. rail; ballast was applied on 1.1 miles of track; 5 track bridges and 8 overhead bridges were rebuilt; a large amount of construction was done on Mechanicville yard. The following improvements are contemplated for the near future: the completion of Mechanicville yard; the rebuilding of a timber trestle near Johnsonville and of 4 timber trestles near Schuylerville; the completion of the steel bridge near White Creek; the rebuilding of the Hudson River bridge.

The recommendations of the preceding report generally were followed, but not all of the work was completed. A large amount of work has been done on this railroad during the past year, and the programme of improvements now under way practically covers the essential repairs needed at the present time. It is recommended that defective rails be removed from the track,

and that the lip in the rail joint near Reynolds be eliminated; that other defects of track and structures described in this report be remedied.

Respectfully,  
J. B. STODDER,  
Steam Railroad Inspector.

#### BUFFALO AND SUSQUEHANNA RAILWAY.

#### BUFFALO AND SUSQUEHANNA RAILROAD.

Inspected June 12, 1914. Last previous inspection July 11, 1913.

*To the Public Service Commission, Second District:*

I have inspected the Buffalo and Susquehanna railway and that part of the Buffalo and Susquehanna railroad lying within the State of New York and submit the following report:

These two railroads are separate properties, but they form one continuous line and are operated together under one superintendent. The Buffalo and Susquehanna railway extends from Blasdell, near Buffalo, to Wellsville, a distance of 84.30 miles, with a branch from the main line to Springville 1.32 miles. The Buffalo and Susquehanna railroad extends from Wellsville to the state line near Genesee, Penna., 10.11 miles; and from the state line near Nelson, Penna., to Addison, 9.73 miles. The principal connections are at Blasdell with the Lake Shore and Michigan Southern railway and at Addison with the Erie railroad. In the remainder of this report the two railroads will be treated as a whole.

The Buffalo line extends across a rolling country and has moderate grades and curvature. The Addison line lies in a rough region and has both heavy grades and sharp curves. The cuts and fills generally have a good cross-section, but trouble has been experienced on the Buffalo line especially with sliding material in both the cuts and the fills. Some work probably will be required each season for several years in opening the ditches through cuts and raising and widening fills. Ditching is needed at present in a long cut south of bridge No. 3-5, south of Hamburg, at two places south of Boston, and north of Transit Bridge. There are narrow or sliding fills in the vicinity of Rushford and Belfast. The surface and alignment of the track generally are fair to good. Two places where the surface was not so good were observed, one on the Springville branch and the other on a long curve south of Centerville.

The track is laid with 80-lb. Bessemer and 85-lb. open hearth rail which is in good condition. The rail joints are fastened with 4-bolt angle-bars. The track ties consist of oak, pine, and chestnut timbers and are in fair to good condition. The renewal last year on the Buffalo and Susquehanna railway was 51,549 ties, or about 20 per cent, and on the Buffalo and Susquehanna railroad 6969 ties, or 11 per cent. Some poor switch ties were found at Springville. The track appliances include split switches, spring frogs, and automatic switch stands equipped with targets and lamps. Tie-plates are used to a considerable extent on the sharp curves. The track is well ballasted with slag, cinders, and gravel. The right of way is open and well kept, and suitable fences are maintained. The road crossings are in good condition and are equipped with the standard signs. The track sections have an average length of about 5 miles and an average force of about 5 men per section.

On the Buffalo and Susquehanna railway, the larger part of the bridge structures are modern designs of steel and concrete. On the Buffalo and Susquehanna railroad, there is a much larger proportion of timber bridges. The bridges generally are in good condition, and the repairs which are needed are those which should be cared for in regular maintenance work. The following defects were found: a number of the bridges are not equipped with inside guard-rails: guard-rails on bridges are a safety device of decided value, and they should be installed on all of the larger structures; No. 3-5 has some poor ties; No. 14-23 has 1 piece of poor guard timber; No. 34-0 has some poor ties and guard timber; No. 43-1 has a poor deck; No. 61-0 has some poor guard timber and some poor planks in the sidewalks; No. 66-0 is a concrete arch which has failed and is timbered: the concrete floor is badly cracked and if it should be carried out by a freshet the foundations probably would settle rapidly; Nos. 67-20, 68-1, and a bridge south of Transit Bridge have some poor ties and guard timbers, and saprot should be trimmed off of some of the timbers; No. 73-16 has a poor deck and needs general repairs, and some drift under the bridge should be removed; No. 74-10 and 75-27 have some poor ties and guard timbers; No. 77-10 has some loose shims under a girder; Nos. 80-18, 81-10, and 84-16 have some poor ties and guard timbers; No. 92-4 has a low bent; No. 82-15 has a few poor ties; No. 77-12 has some poor guard timber, and the expansion bearings are very rusty.

The stations and shelters along the line are in good condition and appear to be well suited to the needs of the various communities. At Hamburg, the concrete platform is too far from the

track leaving too wide a space between the platform and a car step. At Buffalo, passenger trains enter the Exchange Street station over the Lake Shore and New York Central roads.

There is only a light traffic on this railroad at present, and the facilities are sufficient for a much larger business. Owing to financial difficulties and changed traffic arrangements, the Buffalo and Susquehanna railway is not carrying the traffic for which it was designed, and the future disposition of the property is uncertain. Train movements are controlled by the timetable schedules, telegraphic train orders, and standard operating rules.

In the past year the following improvements have been made: siding at Sandusky extended 66 feet; rail renewals,  $1\frac{1}{2}$  miles of new 85-lb. rail and 2 miles of relayer 80-lb. rail; twenty thousand tie-plates were applied to the track; ballasting done, 33 miles with slag and 8 miles with cinders; culverts rebuilt, 2; inside guard-rail applied to bridges, 93 feet; a ditching machine was purchased.

The recommendations of the preceding report were carried out to a large extent. It is recommended that essential defects of track and structures described in this report be remedied.

Respectfully,  
J. B. STODDER,  
Steam Railroad Inspector.

#### BUFFALO, ATTICA AND ARCADE RAILROAD.

Inspected June 11, 1914. Last previous inspection July 10, 1913.

*To the Public Service Commission, Second District:*

I have inspected the Buffalo, Attica and Arcade railroad and submit the following report:

This railroad is a standard gauge single track line, extending from Arcade to Attica, a distance of 27 miles. It connects at Arcade with the Buffalo and Susquehanna and the Western New York and Pennsylvania railways, and at Attica with the Erie railroad.

The line extends across a rolling country with an undulating grade line and moderate curvature. The roadbed was graded apparently with a very narrow cross-section. Some of the cuts have been widened in order to provide drainage, but many of the fills are too narrow to hold ballast properly. Some of the ditches north of Java Center need cleaning. The surface and alignment of the track are poor, and a material improvement should be made as soon as possible.

The track is laid with light rail, there being several sections from 56-lb. to 65-lb. per yard. Nearly all of the rail is battered and bent, but with a reasonable amount of labor it will serve to carry the present traffic. A broken angle-bar was found between bridges Nos. 19 and 20, and between Currier's and bridge No. 16 there is a rail with a piece broken out of the gauge side at one end. The track ties are in only fair condition. The renewal last season was 4000 ties, which is a little less than 6 per cent. This rate of renewal is too low properly to maintain the track timber, and it is suggested that a renewal of not less than 10 per cent should be made this season. The track appliances, consisting of split switches, rigid frogs, and automatic switch stands, appeared to be in good condition. A switch at Currier's was unlocked on the day of the inspection. The track is lightly ballasted with gravel, slag, and cinders: the use of additional ballast would make a desirable improvement in a number of places. The right of way is in fair condition. There is a heavy growth of grass in the track over a considerable part of the line, and there is some brush in the right of way which should be cut. Fences are maintained along most of the line, but cattle were found near the track at several places on the day of the inspection. This is an undesirable condition which should be remedied. South of Currier's there is a car truck and a drawbar near the track which are said to have been there about two years. It is suggested that this material should be taken to the storeroom. The road crossings and signs are in good condition except that there is a leaning sign between bridges Nos. 6 and 8. There are three track sections with an average length of 9 miles and an average force of 7 men per section during the working season. It is suggested that the track work might be more economically performed by dividing the line into two sections and providing each with a section motor car.

The bridges and culverts are built in various forms of steel, concrete, and timber. The timber culverts are being replaced by pipes or concrete boxes as rapidly as possible. Most of these structures are in good condition but a few defects were found as follows: Nos. 19 and 18 are rail culverts on timber sills. The sills are poor and in No. 19 especially, one of the sills is very bad and should be repaired immediately; No. 16, the track ties are swinging at the bridge ends; a small culvert north of Johnsonburg has poor walls: it is to be rebuilt.

The stations are frame buildings in fair condition and appear to be suitable for the traffic. A number of the stations formerly

were below the track grade. These have been raised during the past year, and the general appearance of the stations is greatly improved. The floor of the station at North Java needs repairs. At Attica, joint use is made of the Erie railroad station.

There is only a light traffic on this railroad and the facilities, both for passengers and freight, appear to be sufficient for present needs. Train movements are controlled by timetable schedules, telegraphic train orders, and the operating rules. There are no grade crossings with other railroads.

During the past year the following improvements were made: Sidetracks extended  $\frac{1}{4}$  mile; track re-ballasted 1 mile; two bridges and four culverts were rebuilt; five station buildings were raised up to track grade, and an extension was built to the freight room at Java Center; it is intended during the current year to build one or more additional sidetracks; to extend the ballasting; to rebuild several culverts; and to further improve the stations and their surroundings.

The recommendations of the preceding report were followed in general, but the work was not entirely completed. It is recommended that the track surface and the drainage be improved; that repairs be made to the bridges and culverts; and that the other defects named in this report be remedied.

Respectfully,

J. B. STODER,

*Steam Railroad Inspector.*

#### BUFFALO CREEK RAILROAD.

Inspected April 28, 1914. Last previous inspection May 19, 1913.

*To the Public Service Commission, Second District:*

I have inspected the Buffalo Creek railroad and submit herewith the following report:

The Buffalo Creek railroad extends from a connection with the New York Central and Hudson River railroad at Howard street to a terminus at South Michigan street known as Michigan Street yard, a distance of 4.08 miles. It is entirely within the city limits of Buffalo, and has physical connections with the railroads entering the city from the south and east. The Prenatt Street branch 0.80 mile in length extends through Prenatt street in an easterly direction from a connection in the main line. The Beach branch 0.82 mile in length extends in a north-westerly direction along the shore of Lake Erie from a connection in the main line near the Hamburg Turnpike. The mileage of the main tracks and sidings is as follows: No. 1 main track 5.70 miles, No. 2 main track 5.02 miles, No. 3 main track 2.98 miles, No. 4 main track 0.92 mile, sidings 13.41 miles, total all tracks 28.03 miles.

The earthwork is mostly embankment of generally very moderate height. The ground surface is flat and the grades are moderate. The maximum grade on the main line is 0.75 per cent, and the maximum curve is 10 degrees. The grades on the branch lines range from level to a maximum of 0.10 per cent. The maximum curve on the Prenatt Street branch is 22 degrees and on the Beach branch, 10 degrees. The track alignment and surface of the main line and the Beach branch were generally good. The Prenatt Street branch was not in as generally good condition in this respect. However, its use is confined to switching movements only, and its condition is not considered serious.

The main tracks are laid with 11.82 miles of Bessemer and 2.8 miles of open hearth rail in sections varying from 58 to 90 lbs. per yard. The following gives the mileage of track laid with the different weights of rail: main line 90-lb. Bessemer 3.85 miles; main line 90-lb. open hearth 2.80 miles; main line 80-lb. Bessemer 4.33 miles; main line 75-lb. Bessemer 0.80 mile; main line 58-lb. Bessemer 0.40 mile; Beach branch 90-lb. Bessemer 0.16 mile; Beach branch 80-lb. 1.48 miles; Prenatt Street branch 80-lb. Bessemer 0.80 mile. The rail was generally in good condition except the 80-lb. rail on the two main tracks between Beach Junction and South Michigan avenue. Re-laying 90-lb. rail has been distributed, and the 80-lb. rail will be replaced in the near future. The 80-pound rail on the Prenatt Street branch is not in very good condition. It is expected to replace this rail during this season. The cross-ties are of white oak and cedar, and the general dimensions are 6 inches by 8 inches by 8 feet. They were generally in good condition, and with the renewal of about 5,000 ties contemplated during this season the tracks will be in good condition throughout. The rail joints are 4- and 6-hole angle-bars, full bolted. Rigid and spring frogs and split switches with ball throw switch stands are used. A few manganese frogs are in use. The frogs and switches were generally in good condition, and no serious defects were observed. The following is a statement of the ballast in the main tracks: main line, crushed stone 1.55 miles; main line, slag 1.88 miles; main line, gravel 8.75 miles; Beach branch, gravel 1.64 miles; Prenatt Street branch, cinders 0.80 mile. The ballast was of sufficient quantity and in generally good condition with the exception of some parts of the Prenatt Street branch where the ballast was of

poor quality and in some places insufficient in amount. The right of way was in fair to good condition. Considerable progress has been made in the spring cleaning, but it had not been completed at the time of this inspection. The railroad is not divided into track sections, repairs being made by floating gangs. The total number of men thus engaged during the working season is 82. This is sufficient for the proper maintenance of the tracks.

There are 5 bridges, all of which are of steel supported on stone or concrete masonry. The bridge on the Beach branch over the city ship canal has a Scherzer rolling lift span and 2 deck girder shore spans supported on concrete masonry. The double track, deck girder, single span bridge just east of the Lake Shore and Michigan Southern railway crossing is not equipped with inside guard-rails. The span is about 35 feet and should have inside guard-rails. The bridge over the Buffalo river consists of 1 deck girder span, 2 through plate girder spans, 1 Strauss Bascule lift span, and 1 shore tower span. This bridge has been completed since the previous inspection, and it is a good example of modern bridge construction. The 2 bridges carrying the tracks over Howard street and Clinton street are of 3 spans through plate girders on stone masonry abutments with solid floor construction. These bridges were in good condition. There are several overhead bridges carrying streets and tracks, but they are not the property of this company. There are no stations on this railroad and as there is no passenger service, none is required.

Between Clinton and Seneca streets, 2 tracks are crossed by 2 Pennsylvania railroad tracks, and a short distance south thereof 2 tracks are crossed by 4 Erie railroad tracks. East of these 2 crossings the Erie railroad and the Pennsylvania railroad tracks cross at grade. A tower from which sliding board signals are displayed governing the train movements over these 3 crossings is located in the triangle formed by the three railroads. Recommendations have been made in previous reports for the installation of modern interlocking protection for these crossings. Plans are being completed, and the construction of the interlocking plant will be started in the near future. South of Abbott Road, 5 tracks are crossed by 2 Delaware, Lackawanna and Western railroad tracks, protected by semaphore signals. The elimination of this crossing is in progress and the construction work incident to the elevation of the Delaware, Lackawanna and Western railroad tracks is progressing rapidly. Near the Buffalo river, 2 tracks are crossed by 1 track of the Chautauqua division of the Pennsylvania railroad, and 1 track of the New York, Chicago and St. Louis railroad, protected by a tilting board. A short distance west of this crossing, 2 tracks are crossed by 2 Lake Shore and Michigan Southern railway tracks, protected by electric interlocking with derails. At Hamburg Turnpike, 4 tracks are crossed by 1 track of the Buffalo and Lake Erie Traction Company, protected by 2 flagmen: the elimination of this crossing will be accomplished within about two months. The new steel structure to carry the Hamburg Turnpike and the Buffalo and Lake Erie track over the tracks of this railroad is now about completed. The paving of the approaches and some other minor details of construction remain to be completed before the elimination can be accomplished.

The train operations on this railroad are in the nature of yard movements, consisting principally in the interchange of cars between the various railroads with which it connects and various warehouses and industries located along its tracks. The service performed is exclusively freight, although the passenger trains of the Buffalo and Southwestern division of the Erie railroad are operated over a portion of the line. At times the business is very heavy resulting in a more or less congested condition. The improvements completed during the past year and those now in course of construction or contemplated for the near future will relieve this condition at some of the points where the greatest congestion has occurred in the past. Train movements are governed by rules defining main track rights supplemented by a timetable for the movement of the Erie railroad passenger trains. There is no block signal or train order system in use, and none seems necessary.

Since the last inspection the following improvements have been made: new track laid: main track No. 2 0.12 mile, No. 4 0.13 mile, and sidings constructed 1.56 miles; bridge over the Buffalo river, described more fully in a previous paragraph in this report, has been completed; 2.8 miles of 90-lb. re-laying rail, and 1.07 miles of new 90-lb. rail have been laid replacing 80-lb. rail: 12,573 white oak, untreated cross-ties have been used for replacement: this represents a renewal of about 18 per cent of the ties, and it is ample for proper maintenance; stone ballast was placed in 0.6 of a mile of main track, and slag was used to re-ballast about 1.14 miles of sidings; the grade crossings with the Erie railroad and the Pennsylvania railroad have been double tracked, greatly facilitating the movement of traffic at that point; the extension of No. 4 main track to the portal of the Buffalo River bridge and the double tracking of the connection with the South Buffalo railway facilitates the movement

of traffic to and from the South Buffalo railway and the Delaware, Lackawanna and Western railroad over the main tracks of Buffalo Creek railroad; additional land has been acquired, and the Hamburg Turnpike yard has been enlarged, facilitating the handling of traffic to and from the Ganson Street section grain district of the main line which was formerly a congested district; the construction of the viaduct and the bascule bridge over the ship canal to carry the Hamburg Turnpike and the Buffalo and Lake Erie Traction Company's tracks overhead abandoning the present grade crossings is nearing completion, and the grade crossings will be abandoned on or before July 1, 1914: this will relieve the present congestion on the street, and the land vacated by the street will be available for the construction of additional tracks in the future.

The interlocking signal protection for the Pennsylvania railroad, Erie railroad, and the Buffalo Creek railroad grade crossings will be installed by the Erie railroad company. The construction of the plant will be started in the near future. With the completion of the Hamburg Turnpike viaduct there is contemplated a readjustment and improvement of the track layout in this vicinity which will greatly facilitate the operation of this section of the railroad. It is expected to renew about 5000 ties, and replace 80-lb. rail in the main tracks with about 300 tons of new 90-lb. open hearth rail. With the renewal of the ties and rail contemplated on the main line and the general repairs to the Prenatt Street branch, this railroad will be in good condition.

It is recommended (1) that the inside guard-rail be installed on both tracks on the bridge near the Lake Shore and Michigan Southern railway crossing; (2) that general repairs be made to the main track on the Prenatt Street branch.

Respectfully,

W. G. HIMES,

*Inspector Division of Transportation.*

#### BUFFALO, ROCHESTER AND PITTSBURGH RAILWAY.

Inspected July 13 and 14, 1914. Last previous inspection August 4 and 5, 1913.

*To the Public Service Commission, Second District:*

I have inspected the Buffalo, Rochester and Pittsburgh railway in the State of New York and submit the following report:

The lines of this railroad within the State of New York include all of the Rochester and Buffalo divisions and a part of the Middle division. The mileage of the several lines is as follows: Rochester division: main line, Rochester to Ashford 93.70 miles; Rochester belt line, Lincoln Park to Charlotte 8.79 miles; Dock branch, Dock Junction to Genesee Dock 1.51 miles; Silver Lake branch, Silver Lake Junction to Perry 7.60 miles; Buffalo division: main line, Buffalo to East Salamanca 58.15 miles; Salamanca branch, East Salamanca to Salamanca 1.33 miles; Middle division: main line, East Salamanca to state line near Limestone 12.77 miles; total in State of New York 183.85 miles. There is double track on the Rochester division from Rochester to Scottsville, 12.09 miles, and on the Buffalo and Middle divisions from Ashford to the state line, 25.76 miles. All of the other lines are single track.

The northern portions of both the Rochester and Buffalo divisions extend across fairly level country, but farther south it becomes rough and broken. The maximum grades are ascending southward and are fairly heavy. The heavier traffic is northbound, however, and the grades against this are moderate. The curvature is moderate on all of the lines. The cuts and fills have a full cross-section, and generally they are in good condition many of the slopes being covered with sod. South of Springville on the Buffalo division there is a district several miles long where a great deal of trouble has been experienced with slides. Heavy concrete retaining walls have been built at several points, with provision for drainage through them and they have effectually checked the slides against which they were built. Good track ditches are maintained, and tile drains have been installed extensively in the cuts. This subdrainage has a marked effect in securing a stable roadbed. The surface and alignment of the track are good throughout. There are permanent stakes set at each curve which show the proper superelevation and the points where the superelevation begins and where it reaches the full amount. This method of marking curves appears to be an efficient aid to the track foreman.

The rail quite generally is in good condition, consisting of 80-lb., 90-lb., and 100-lb. sections. The standard for renewals is 90-lb. open hearth rail on the Rochester and Buffalo divisions north of Ashford, and 100-lb. open hearth rail on the line south of that point. The joint splices consist of angle-bars and continuous joints, the latter being the present standard. One piped rail was found just south of Mumford and several broken joint bars were observed on the tail track at Genesee Dock. The track ties consist of oak, yellow pine, and treated timbers and are in good condition. The renewals appear to be ample for

properly maintaining the track timber. The track appliances include split switches, rigid and spring frogs, and rigid and automatic switch stands equipped with targets and lights. Manganese switch points are being used in yards and cross-overs and heavy manganese frogs are being used instead of spring frogs at points where high speed is not maintained. Tie-plates are used extensively and some rail anchors also are used. The tracks are heavily ballasted with crushed stone, gravel, slag, and cinders. The right of way is clean and open and properly fenced. Reinforced concrete posts are used in fence renewals. The road crossings generally are in good condition and are equipped with the standard signs of this railroad. Some poor planking was observed at a crossing on the Buffalo division near milepost 41.

The track sections have an average length of 6 miles on single track and 5 miles on double track. The usual section force consists of 7 men but additional labor is employed at points where it is needed.

The bridges and culverts generally are in very good condition. Some timber structures still are in service, but these are being replaced by permanent structures as rapidly as practicable. Concrete slabs are being used extensively for spans of moderate length. A few minor defects were found as follows: Rochester division: No. 44.13, the sills under a few of the frame bents are churning slightly; several pile bents are to be put in; No. 47.96 has a split cap; No. 72.68, the trash should be cleared away from the bridge; Buffalo division: No. 16.66 is a rail culvert in which a sill is displaced: the structure is to be rebuilt; No. 98.10, the shoes under the girders should be straightened, and the saprot should be trimmed off of the deck timbers. Several noteworthy features of the structural work were observed. A number of steel bridges have been built with solid floors so that the track ties and ballast are carried across without a break. A ballast floor timber trestle also is standard, and it is a very heavy and substantial design. It is intended for use where a timber bridge needs renewal, and it is impracticable to build a steel or concrete structure. Another standard solid floor structure is of reinforced concrete for which the piers are built in place. The floor slabs are cast in two longitudinal sections for each span, in the material yard at East Salamanca. When the concrete has set, these slabs are taken to the site of the bridge and placed on the piers with a derrick. A plant for mixing concrete and casting it in a number of forms is located at East Salamanca. Besides the bridge floors mentioned above, there are manufactured large pipes, telephone booths, foundations for signal poles, fence, mile, and whistle posts, and markers for showing the location of property lines, water pipes, and sewers.

The station buildings are in good condition and are kept very neat and clean. At several of the more important stations brick buildings of excellent design have been erected, and the station grounds have been suitably improved. At Colden, the curbing at the back platform needs to be repaired.

At Lincoln Park, 3 tracks are crossed by 1 freight track of the Pennsylvania railroad, protected by tilting board signal. At Pittsburgh and Lehigh Junction, 1 track is crossed by 4 tracks of the Lehigh Valley railroad, protected by an interlocking plant. At Le Roy, 1 track is crossed by 1 track of the New York Central and Hudson River railroad and by 2 tracks of the Erie railroad, these two roads being parallel to each other, both crossings protected by 1 tilting board signal. At Machias, 1 track is crossed by 2 tracks of the Pennsylvania railroad, protected by a tilting board signal. At Riverside Junction, 2 tracks are crossed by 1 track of the Pennsylvania railroad, protected by a tilting board signal. At Limestone, 2 tracks are crossed by 1 sidetrack of the Erie railroad, protected by a tilting board signal. At Salamanca, 1 track is crossed by 1 track of the Western New York and Pennsylvania Traction Company, protected by derails in the electric line.

There is a heavy freight traffic on this road, consisting largely of coal from the Pennsylvania fields destined to northern points. The larger part of the coal tonnage is on the Rochester division, while the Buffalo division handles a considerable amount of southbound ore. At Genesee Dock, a part of the coal is transferred across Lake Ontario by a car ferry without breaking bulk and is delivered to the Grand Trunk railway. Another considerable portion of this tonnage is unloaded into lake vessels, while a smaller amount is delivered to the New York Central lines at a connection on the Charlotte branch. The terminal facilities at Genesee Dock appear to be very good. A high bluff adjacent to the Genesee river made possible the construction of yard tracks on high and low levels. Cars for delivery to the Grand Trunk railway are taken into the lower yard and from there switched aboard the car ferry. Cars to be unloaded into vessels are taken into the upper yard and from there allowed to drift down inclined tracks on a steel unloading trestle, and the empties then drift down to the lower level. The passenger traffic is moderate and the service appears to be well adapted to the needs of the territory along the several lines. Besides the through trains and local trains over parts of the lines, a suburban service is operated by motor cars between Rochester and

Le Roy, 25 miles, and between Buffalo and Springville, 33 miles. Train movements are controlled by the timetable schedules, telephonic train orders, and the operating rules. There also is a very complete and efficient system of automatic block signals covering the territory from Rochester to East Salamanca, including the Silver Lake branch. These signals are 3-position, upper quadrant semaphores and on the single track are arranged on the absolute-permissive plan which blocks opposing movements at the passing sidings, but permits following movements in blocks about one mile long. Between Buffalo and Ashford manual blocking is used with dispatcher's control, and from East Salamanca to Bradford, Penna., there is manual blocking with operator's control. The automatic signaling is now being installed on the remainder of the Buffalo division, Buffalo Creek to Ashford.

In the past year the following improvements were made: the second main track was placed in service and double track operation started between Rochester and Scottsville, 12.09 miles; the gauntlet at Riverside Junction was changed to double track, covering a distance of 0.09 mile; sidetracks have been increased 10.27 miles; new rail laid, 10.99 miles of 100-lb. and 27.37 miles of 90-lb., all open hearth steel; the tie renewal amounted to about 8 per cent, all new ties in main track being equipped with heavy tie-plates; ballasting done on main tracks amounted to 13.9 miles of crushed stone, 8.5 miles of gravel, and 26.3 miles of cinder and slag; 21 timber and light steel bridges were replaced by heavier structures of steel or concrete; all steel bridges now are being designed for Cooper E-60 loading; a new passenger and freight station was built at Lackawanna; a yard office and various service buildings were built at the new Brooks avenue yard near Rochester; new yard, siding, and industry tracks have been built at a number of places, providing increased facilities: the total mileage of new sidings is shown above; a number of buildings at various stations have been painted; the improvement work between Lincoln Park, near Rochester, and Scottsville was completed; this included a classification yard at Brooks avenue, 12.09 miles of second main track, the revision of the grades, and the elimination of the Brooks avenue grade crossing; automatic block signals were placed in service between Rochester and Lincoln Park, and between Gainesville and East Salamanca; an interlocking plant with a concrete tower was installed at the junction of the Rochester and Buffalo divisions at Ashford; extensive dock improvements were made at Genesee Dock. The more important improvements contemplated for the ensuing year include the following items: The rebuilding of 5 bridges, part of the work now being in progress; at one of these bridges, carrying the New York State Railways and Charlotte Boulevard over the Dock branch, provision is made for 2 additional tracks; the installation of automatic block signals between Buffalo and Ashford; the completion of grade crossing elimination now in progress at Saxton street, Rochester, and McVean Road, Scottsville.

The recommendations of the preceding report were carried out. This railroad is being maintained in very good condition and the defects described in this report are of a minor character. It is recommended that these defects of track and structures be remedied.

Respectfully,  
J. B. STODER,  
Steam Railroad Inspector.

#### CARTHAGE AND COPENHAGEN RAILROAD.

Inspected May 19, 1914. Last previous inspection May 27, 1913.

#### To the Public Service Commission, Second District:

I have inspected the Carthage and Copenhagen railroad and submit the following report:

This railroad is a standard gauge single track line extending from C. & C. Junction on the New York Central and Hudson River railroad near Carthage, to Copenhagen, a distance of 8.66 miles. There is about one mile of sidings.

The line ascends the western slope of the Black River valley. The grades ascending westward are heavy and there are many curves, but these features are not extreme for a light railway. The cuts and fills were narrow as first constructed but are being widened to form a good roadbed. The surface and alignment of the track are fair to good.

The rail consists of one mile each of 70-lb. and 56-lb. steel the remainder being 60-lb. steel. The heavier sections of rail are in good condition, but the 56-lb. rail is not suitable for modern train loads. It is suggested that this light rail be replaced with a heavier section as soon as practicable. At one place between Bedell's and the log siding the rails were 1½ inches wider than the proper gauge and there were some loose track bolts with a lip at one joint. East of the log siding there were some joints not full bolted. The track ties are mostly

cedar and beech timbers and generally are in good condition. The renewals appear to be sufficient to maintain the track. The ballast consists of about 4 miles of cinders and the remainder of native soil. The cinder ballast is being extended as fast as practicable. The track appliances consist of split switches, rigid frogs, and both rigid and automatic switch stands, all of which appeared to be in good repair. The right of way generally is clean, but in a few places there is small brush which should be cut this season. Suitable fences are maintained where they are required. Road crossings and signs are in good condition. The track work is handled by a gang of about 8 men during the working season.

The only open deck structure on the line is an I-beam span near C. & C. Junction. It has a few poor ties. The culverts and cattle-passes are reinforced concrete construction, and they are in good condition.

There are station buildings at C. & C. Junction and at Copenhagen, both of which are in good condition. The former is used jointly by the New York Central and Hudson River railroad. There are no grade crossings with other railroads.

The traffic on this line is light, and one train crew handles all of the work. The facilities appear to be suitable for the existing business. Some months ago, when a train was switching about 2 miles west of C. & C. Junction, a car ran down the grade to the Junction and out on the New York Central main track a distance of about ½ mile. A derail should be put in the Carthage and Copenhagen track at some convenient point to eliminate this source of danger.

In the last year the widening of cuts and fills and the cinder ballasting have been extended. It is proposed to continue this work as opportunity is found so to do. In prosecuting this work, sags are being lifted in order to secure a more uniform grade line. The recommendations of the preceding report were carried out except that the 56-lb. rail has not yet been replaced by a heavier section. It is recommended that the defects mentioned in this report be remedied, and that a derail be installed to prevent cars from running out on the New York Central main track.

Respectfully,  
J. B. STODER,  
Steam Railroad Inspector.

#### CATSKILL AND TANNERSVILLE RAILWAY.

Inspected May 14, 1914. Last previous inspection May 13, 1913.

#### To the Public Service Commission, Second District:

I have inspected the Catskill and Tannersville railway and submit the following report:

This is a single track, narrow gauge, 3 feet, railway extending from Otis Summit, where it connects with the Otis railway, to Tannersville, a distance of 5.25 miles. There is 0.40 mile of sidings and yard tracks. This railway is at an elevation of about 2200 feet above sea level, and it follows the general surface of the ground with a minimum of earthwork. The grades are frequent and steep, and the curves are many and sharp. The maximum grade is 5 per cent, and the maximum curvature is 20 degrees. The equipment and traffic are light so that no unusual inconvenience is suffered by reason of this. The cuts and embankments are generally of sufficient cross-section properly to support the track, and the ditches appear properly to drain the roadbed. The track alignment and surface are fair to good. There are no unusual features in the construction or operation.

The tracks are laid with 40-lb. rail, joined with 4-bolt angle-bars and flat fish-plates. The ties are principally yellow pine, and the renewals, amounting to about 7 per cent, were judiciously made. The ties are 6 inches by 8 inches by 6 feet and were generally in good condition. Rigid frogs, split switches, and rigid switch stands are used. The ballast is gravel and a small amount of cinder of fair quality but usually of sufficient amount. The right of way is cleared and in fair condition. The fences are maintained where needed and the road crossings and signs were in fair condition. The section force consists of a foreman and 8 men. This force also handles the track work on the Otis railway.

The bridge structures consist of one overhead queen post timber bridge on masonry abutments carrying a highway; 3 single span timber stringer bridges on masonry abutments; and 2 frame bent trestles. The bridges were in generally good repair and no defects were noted.

There are one-story frame station buildings maintained at Haines Falls and Tannersville. There are also 4 shelter sheds with wooden platforms at other points where passengers are handled. These stations and shelters seem to provide adequate facilities for the class of service performed. There are no grade crossings with other railroads. This railway is operated only during the summer months, and the business is principally passenger. There is a small amount of freight handled locally and

in connection with the Otis railway. There are no automatic or other signals. The terminal and road facilities seem ample for the business. The train movements are controlled by rules and timetables.

Since the previous inspection the overhead highway bridge at Otis Summit has been rebuilt. The tie renewals have been made where necessary, and about 800 ties are on hand for renewals during this season. Cinders have been distributed for raising and re-ballasting parts of the track, and this work was progressing favorably. There are no extensive improvements contemplated for this season. The general conditions on this railway were fair and there were no defects observed which would interfere with the safe handling of traffic.

Respectfully,

W. G. HIMES,

*Inspector Division of Transportation.*

#### CATSKILL MOUNTAIN RAILWAY.

Inspected May 14, 1914. Last previous inspection June 24, 1913.

*To the Public Service Commission, Second District:*

I have made an inspection of the Catskill Mountain railway and submit the following report:

This is a single track railway of 3-foot gauge extending from Catskill Landing on the Hudson river to Palenville, a distance of 15.75 miles. There are 2 branch lines: Cairo branch 3.77 miles in length extending from Cairo Junction to Cairo; and the Otis branch 0.25 mile in length extending from Otis Junction to the connection with the Otis railway. There are 2.48 miles of sidings and yard tracks. This railroad follows the line of least resistance and in consequence thereof the grades are comparatively steep and the curves frequent and sharp. The maximum grade is 2.25 per cent. The cuts and embankments are of good sectional area properly to support the track, and the ditches were generally clean and appeared properly to drain the roadbed. The alignment and surface of the tracks were good.

The tracks are laid with 40-lb. Bessemer steel rails coupled with 4-bolt fish-plates and continuous rail joints. The rails were generally in good condition, and on several curves where it was worn the rails have been turned. There were no defective rails observed. The ties are of chestnut and white oak 6 inches by 8 inches by 6 feet. The tie renewals are now being made with yellow pine ties. The renewals this season will amount to about 12 per cent, which is ample for proper maintenance. Rigid frogs and split switches and rigid switch stands with targets are used. They are in good repair. The ballast is a good quality of gravel and cinders and of sufficient quantity properly to ballast the track. Since the previous inspection 180 carloads of cinders have been distributed for ballast. The tracks are being raised on these cinders and tie renewals were being made at the time of the inspection. The right of way was clean, and the fences where required were in good repair. The road crossings and signs are properly maintained. The section force consists of about 8 men to a section averaging about 6.5 miles in length. This is sufficient properly to maintain the track.

There are 5 timber stringer bridges on masonry abutments; 3 through truss bridges with timber stringers and steel floor beams; 1 through plate girder bridge with timber stringers and steel floor beams; 1 deck plate girder bridge; 6 brick arches; and 5 rail and concrete flat top culverts. They were generally in good condition. The following minor defects were observed: bridge No. 3 has a foot-walk fastened to the outside of the truss which is owned and maintained by the Village of Catskill, the hand-rail on the east end is loose: attention was called to this in the previous inspection, and it was stated that the matter had been brought to the attention of the village authorities without result: it is suggested that an earnest effort be made to have this repaired at once; bridge No. 20 needs several new ties; bridge No. 18 should have the guard-rail full spiked to the ties.

There are 6 frame station buildings in fair condition for the class of service performed. In the previous inspection, attention was called to the fact that the freight and passenger stations at Cairo needed painting. It was explained by the railway officials that they have not been financially able to do this; and that the business at this point has suffered from the competition of automobiles. It is very noticeable that these 2 buildings are not in as good condition in this respect as the other property of the company.

There are no grade crossings with other steam or electric railroads.

The principal service performed by this railway is the transportation of summer excursionists and except from Catskill to Cairo the railway is operated only during the summer season from the middle of May to the middle of October in each year. A freight service is performed but it is confined mostly to local shipments. There are no physical connections with other railroads, but a direct connection is made with the Hudson river

boats at Catskill Landing where passengers and freight are interchanged. Train movements are controlled by timetable operating rules and when necessary by train orders transmitted by telephone. There are no automatic or other block signals in use. The terminal and road facilities seem adequate to handle the business.

Since the previous inspection a coal elevator has been installed at Catskill Landing which replaces the old method of handling the coal by hand. About 12 per cent of the ties have been renewed, and about 25 tons of new 40-lb. Bessemer rail have been used to replace some of the curve worn rails. Cinder ballast has been distributed on about 3 miles of track, and the tracks are being raised and re-surfaced on this ballast. It is expected to renew about 12 per cent of ties during this season.

It is recommended (1) that the hand-rail on bridge No. 3 be repaired at once; (2) that the poor ties on bridge No. 18 be replaced; (3) that the guard-rail on bridge No. 20 be full spiked to the ties.

Respectfully,

W. G. HIMES,

*Inspector Division of Transportation.*

#### CENTRAL NEW ENGLAND RAILWAY.

Inspected June 22-24, 1914. Last previous inspection June 23-25, 1913.

*To the Public Service Commission, Second District:*

I have inspected those lines of the Central New England railway which lie within the State of New York and submit the following report:

This railroad comprises the following lines: main line, state line to Campbell Hall 74.30 miles; Rhinecliff branch, Boston Corners to Rhinecliff 35.12, and Silvernails to Rhinecliff Junction 3.19: 38.31 miles; Newburgh, Dutchess and Connecticut division, state line to Pine Plains Junction 15.30, Stissing Junction to Dutchess Junction 39.04, and Wicopee Junction to Beacon 1.65: 55.99 miles; Hospital branch, Poughkeepsie to State Hospital 3.26 miles; Hopewell branch, Poughkeepsie Junction to Hopewell Junction 12.19 miles; New York, New Haven and Hartford railroad, former Highland division from Hopewell Junction to state line near Mill Plain, Conn., now operated by the Central New England railway 28.50 miles: total in State of New York 212.55 miles.

The line from Campbell Hall to Mill Plain, Conn., via Hopewell Junction is all double track, excepting from Campbell Hall to Maybrook and from Loyd to Highland, amounting to 5.8 miles. All of the other lines are single track.

There are connections at Campbell Hall with the Erie, the New York, Ontario and Western, the Lehigh and New England, and the Wallkill Valley railroads; at Maybrook with the Lehigh and Hudson River railway; and at Dutchess Junction, Beacon, Poughkeepsie, Rhinecliff, Boston Corners, and Millerton with the New York Central and Hudson River railroad.

The character of the country through which the several lines extend varies from rolling to rough, and in some places along the Newburgh, Dutchess and Connecticut division it is mountainous. There are some fairly heavy grades, the maximum being about 1.5 per cent, but the curvature is moderate. The cuts and fills generally have a good cross-section and are in good condition. The drainage on most of the line is good. On the Rhinecliff branch a few ditches were filled by small slides, and it was stated that arrangements had been made for working a ditching machine in that territory. It is suggested that in two long wet cuts, one east of Poughkeepsie and the other near milepost 131, tile drainage would effect a material improvement in the roadbed. The surface and alignment of the track are fair to good and quite generally suitable for the traffic. A few places where the track surface was not so good were observed on the main line west of Stanfordville, west of Clinton Corners, and on the eastbound track west of Clintondale. Frost shims, which still are in the track in many places, should be removed as soon as practicable.

The rail comprises several weights, from 60-lb. to 100-lb. per yard, and most of it is in good condition. The joint fastenings consist largely of 4-bolt angle-bars. Two piped rails were found on the New York, New Haven and Hartford line, one on each side of bridge No. 102.84, and a rail with a piece broken off in a joint was found at Brewster station. Some loose Weber joints were observed in the yard at Beacon. The track ties consist largely of chestnut and oak. Tie renewals were being made in a number of places at the time of the inspection, and the rate of renewal appeared to be sufficient for properly maintaining the track timber. The track appliances include split switches, rigid and spring frogs, and rigid and automatic switch stands equipped with targets and lights. Derails have been installed where that form of protection seems desirable. Tie-plates are used on the curves of the heavy traffic lines. The ballast consists of a fair quality of gravel supplemented by cinders in a few

places. The amount of ballast on the several lines appears to be fairly satisfactory for the traffic which is borne. The right of way is clear and open and suitable fences are maintained. The road crossings are in good condition, and are equipped with crossing-signs. On many of these signs however the lettering is very dim, and they should be painted. The track sections are from 4 miles to 6 miles long, and the track forces consist of 6 men to 8 men per section during the working season. This amount of labor is ample for the maintenance work.

The bridges and culverts include a wide variety of structural forms in timber, steel, and concrete. Many timber culverts and trestles have been replaced by permanent structures during the last few years, and this policy still is being followed as closely as practicable. The bridge structures generally are in good condition, and the following defects are such as are usually cared for in the regular maintenance work: Main line: The large cantilever bridge across the Hudson river at Poughkeepsie has a poor deck: the renewal of this deck requires a large amount of timber and material is now being assembled for that purpose; concrete arch overhead near milepost 113, the easterly telltales were tangled. Rhinecliff branch: There are some poor bridge ties in the track at the place where the Boston Corners trestle was filled; No. 1.63 has some loose blocks under the stringers; No. 1.80 has a few poor stringers: material is on the ground for repairs; No. 8.20 has a poor stringer: a concrete slab top is to be put in; No. 17.46 has a few poor stringers; No. 18.04, there are poor track ties on the approaches; Nos. 21.36 and 21.67, the inside guard-rails are not securely spiked; No. 23.36 has been damaged by fire: it is to be rebuilt with concrete; No. 23.43 has some poor piles and stringers: it is to be rebuilt with concrete. Newburgh, Dutchess and Connecticut division: No. 1.71 has a poor deck and poor stringers: it is to be rebuilt with concrete; No. 22.44 should have saprot trimmed off of the deck timbers; No. 29.33 has a few poor sills and caps: repairs are to be made; No. 47.11 has a poor wall plate; No. 53.38 has some loose boards on the hand-rail; No. 58.50 is a light steel truss over the New York Central tracks near Beacon: this structure should be investigated as to its suitability for carrying the loads which now pass over it, if this has not already been done. New York, New Haven and Hartford railroad, former Highland division: No. 126.00 has some poor ties: the deck is to be renewed; No. 116.55 has very small blocks under the girders.

The station buildings are of frame construction, in good condition and well kept. Many of them are small, but they appear to be suitable for the present traffic. A new station is to be built at Stissing Junction where a car body has been used as a station. No material change has been made in the Poughkeepsie station, and the subject of a new station in that city is now held in abeyance. At several stations where it is necessary for passengers to cross a track to reach a train, there is no platform across the intervening track. This condition was observed on a siding at Copake and at stations in the double track territory west of Poughkeepsie. A platform should be provided by filling in some suitable material between the rails. At East Walden there is no name sign on the station.

At Hopewell Junction, 1 track of the Newburgh, Dutchess and Connecticut division is crossed by 2 tracks of the Hopewell branch, protected by mechanical interlocking with derails in both lines. At Boston Corners, 1 track is crossed by 2 tracks of the New York Central and Hudson River railroad, protected by a large gate which swings across the tracks. At Millerton, 1 track is crossed by 1 track of the New York Central and Hudson River railroad, protected by a large gate swinging across the tracks. At Matteawan, 1 track is crossed by 1 track of the Fishkill Electric railway, protected by crossing gates. At Poughkeepsie, 1 track of the Hospital branch is crossed by 1 track of the Poughkeepsie City and Wappingers Falls Electric railway, the only protection being the flagging of electric cars over the crossing.

There is a heavy tonnage of coal eastbound on the line from Campbell Hall to the state line near Mill Plain, Conn. A pusher service is required over the divide lying east of Hopewell Junction, but west of that point the line has been rebuilt to a low grade, excepting about 4 miles of line west of Highland where heavy reconstruction work now is in progress. A large terminal and classification yard has been developed at Maybrook where the coal which is received from connecting roads is made up into solid trains for various New England points. There also is a considerable westbound traffic consisting largely of manufactured goods. The traffic is light on the other lines of the railroad in this State, and especially so on the Rhinecliff branch and parts of the Newburgh, Dutchess and Connecticut division. It is suggested that under such conditions the use of motor cars would meet the needs of the passenger traffic and probably would show a material economy in operation over the present steam trains. Train movements are governed by the timetable schedules, telegraphic train orders, and standard code rules. There also is an automatic block system in use from Berea, near Maybrook, to Hopewell Junction, and a manual block system

from the latter point eastward. Special signals are in use at several points where the conditions require extra protection.

During the past year the following improvements have been made: increase of sidetracks, 27.04 miles; rail renewals, 5.27 miles of 100-lb. relayer rail, 3.72 miles of 90-lb. re-rolled rail, and 0.37 mile of 78-lb. relayer rail, all replacing worn 78-lb. and 79-lb. rail; 3 timber bridges have been replaced by concrete structures: the stations have been repaired and painted at Brewster, Dykemans, Towners, and West Patterson; new train order signals were installed at Brewster and Towners; a new highway crossing bell was installed at West Pawling, and a new highway signal, consisting of a banjo visual signal with a bell was installed at Stormville; progress was made on the re-location and grade reduction work west of Highland. The principal improvements contemplated for the ensuing year are the laying of  $5\frac{1}{2}$  miles of 90-lb. re-rolled rail, and the completion of the line and grade revision work. The recommendations of the preceding report were carried out. This property as a whole is being maintained in good condition for handling its traffic, and adequate provision apparently is being made for all necessary repairs and renewals. It is recommended that the defects of track and structures mentioned in this report be remedied.

Respectfully,

J. B. STODER,  
Steam Railroad Inspector.

#### CENTRAL NEW YORK SOUTHERN RAILROAD.

Inspected June 15, 1914. Last previous inspection June 7, 1913.

*To the Public Service Commission, Second District:*

I have inspected that part of the Central New York Southern railroad which is operated by steam and submit the following report:

This railroad extends in a southerly direction from Auburn to Ithaca. It is operated by steam from Auburn to South Lansing, a distance of 29.1 miles. The total length of all sidings is about 4.83 miles. There are physical connections at Auburn with the Auburn road of the New York Central and Hudson River railroad and the Auburn division of the Lehigh Valley railroad. It is single track and standard gauge.

The railroad conforms to the general ground surface, and the grades and curves are moderate. The maximum grade is 4 per cent which was employed to save construction cost in the overhead crossing of the Lehigh Valley railroad and a farm crossing near Auburn. It is expected to reduce this grade to about 1 per cent this year. The cuts and fills are in fair condition, and the ditches were generally in condition to provide proper drainage. The exception noted was in the cut at telegraph pole 18-33 where the ditches should be cleaned. The alignment and surface are fair to good. Where re-ballasted recently they are splendid.

The track is laid with 26.5 miles of 70-lb. and about 2.6 miles of 60-lb. Bessemer rail, joined with 6-bolt angle-bar and 4-bolt Bonzano splices. The rails are generally in good condition, and the joints full bolted and tight. The ties are principally oak and chestnut. The renewals since the previous inspection amounted to 11,000, or about 12 per cent of those in track, and it is expected to renew about 15,000, or 16 per cent, this season. This is sufficient for proper maintenance. About 2500 ties have been renewed this Spring, but at the time of the inspection there were very few ties on hand for maintenance work. It was explained that the ties were being used on the street railway work in Ithaca. It was expected that in a short time ties would be available for the regular track renewals. It is the best practice to have the tie renewals completed as early as possible in the season. The shims under the rail in some of the cuts should be removed promptly. The frogs are of the spring and rigid types. The switch stands are the New Century equipped with targets and lamps. The switches are of the split rail type, and the throw is positive. These were usually in good condition, and no defects were noted.

The ballast is gravel of rather inferior quality and in places insufficient in amount. More ballast is required north of telegraph pole 8-35, near poles 17-10 and 23-25. The track in places is over-grown with grass and weeds. These can be exterminated by burning or some other modern means and prolonging the life of the ties. Some cinders have been used in the past year for ballast, and it is expected to continue their use as fast as they are available. These cinders are of good quality, and they will improve the track considerably. The right of way is cleared and in good condition. The old ties piled along the track should be burned. The fences are in fair to good condition except at telegraph pole 29-20 where the fence is down and should be reerected. The road crossings and signs are in good condition and no defects were noted. The sections are from 6 to 9 miles in length and the average is about 8 miles. The force during the

working season is from 8 to 10 men. This is ample for proper maintenance.

There are 1 steel truss, 11 I-beams, and 4 wooden stringer bridges in generally good condition. The minor defects observed were as follows: the saprot on the decks of bridges 1 and 12 should be adzed off; the main running rail is not full spiked to the ties on bridges Nos. 2 and 9; the I-beams should be painted on bridges Nos. 11, 12, 13, 14, 15, and 16. Since the previous inspection two wooden stringer bridges have been replaced with castiron pipe, and one is now being replaced with a concrete arch. It is expected to replace all the remaining wooden stringer bridges with concrete culverts this season. This is in accord with the best modern practice and is commendable.

The stations are all frame and seem to provide the necessary facilities for the present traffic.

There are no grade crossings with other steam or electric railroads.

The traffic on this railroad is local and not very extensive. Steam trains are operated between Auburn and South Lansing. At the latter point the passengers are transferred to electric cars operating into Ithaca. Train movements are controlled by operating rules, timetables, and telephonic train orders. There are no automatic or other block signals.

Since the previous inspection the length of sidings has been increased about 0.5 of a mile. This includes a siding to the Remington power house at Ithaca for delivery of coal and securing cinders for ballast; and providing turnouts on the stub ends of the sidings at Mapleton, Merrifield, and Venice Center. Coal pockets for local distribution were erected at Venice Center. The tie renewals as stated above were 11,000, or about 12 per cent. About 5 miles of track were re-ballasted with cinders. The bridge over the Lehigh Valley railroad at Auburn has been painted. Two McKee gasoline motor cars seating 83 passengers each have been bought, and it is expected to operate them between Auburn and Ithaca. The present morning and evening steam trains will be operated as at present except that the cars will be operated into Ithaca by changing from steam to electric power at South Lansing. This will eliminate the transfer of passengers as at present. The gasoline cars will make the trips between the morning and evening trains and will provide 3 additional trips in each direction over the present schedule. A new passenger and freight terminal with about 2.3 miles of new line is being constructed in Ithaca.

It is expected to renew about 15,000 cross-ties and re-ballast about 10 miles of track with cinders; to eliminate the 4 per cent grade in the main track at Auburn; complete the new terminal at Ithaca and make a physical connection with the Delaware, Lackawanna and Western railroad at Ithaca for the interchange of freight and passengers.

It is recommended (1) that the bridge painting be continued until all the bridges have been painted; (2) that the re-ballasting be continued; (3) that the main rail be full spiked to the ties on all bridges; (4) that the minor defects in the bridges and track enumerated in the body of the report be remedied.

Respectfully,

W. G. HIMES,  
Inspector Division of Transportation.

#### CHAMPLAIN AND ST. LAWRENCE RAILROAD.

Inspected May 27, 1914. Last previous inspection June 12, 1913.

To the Public Service Commission, Second District:

I have made an inspection of that part of the Champlain and St. Lawrence railroad which lies within the State of New York and submit the following report:

This railroad is a part of the Grand Trunk system, extending from Montreal to Rouses Point, where it connects with The Delaware and Hudson Company's railroad. It is a single track line and the length within this State is 1.21 miles. The line extends across level country and most of it is on embankment which has a good cross-section.

The grade is practically level and there is one curve of moderate deflection. The line and surface of the track are good. The rail is an 80-lb. section and most of it is in good condition. Some wear is evident at the south end where switching is done. Near the switches north of the curve there is a joint which is bolted through one rail only, the other rail not having been drilled for bolts. South of the north switch on the east side of the track there is a rail which apparently is piped. An open crack has not developed, but the rail head is failing as shown by the characteristic rust streak underneath. The track ties, consisting of cedar and pine timbers, are in good condition and the renewals appear to be sufficient for proper maintenance. The track appliances include split switches, spring frogs, and automatic switch stands equipped with targets and lights. The track is well ballasted with gravel. The right of

way is clean and well cared for and properly fenced. The only road crossing is at the International boundary. It is in good condition and is equipped with the standard sign of this railroad. The track in this State is part of a section 5½ miles long which has a force of 4 men during the working season. This amount of labor does not seem sufficient to maintain a track under fairly heavy traffic, and presumably it is supplemented at times by a work-train and extra gangs.

The only bridge structures are three culverts, two of which are concrete and the other partly concrete and partly timber. These are in good condition. There are no stations on the line in this State.

Train movements are controlled by timetable schedules, telegraphic train orders, and the operating rules. First-class trains are blocked with the telegraphic train order signals. There is a fairly heavy traffic on this line, it being used by the through trains of The Delaware and Hudson Company to and from Montreal, in addition to the trains of the Grand Trunk system. The facilities for handling the traffic appear to be sufficient.

The only improvements made during the past year were the relaying of 270 feet of 80-lb. rail, and the construction of a car repair siding 607 feet in length. It is recommended that the rail joints be full bolted, and that defective rails be removed from the track.

Respectfully,

J. B. STOUDEB,  
Steam Railroad Inspector.

#### CRANBERRY LAKE RAILROAD.

Inspected May 20, 1914. Last previous inspection May 28, 1913.

To the Public Service Commission, Second District:

I have inspected the Cranberry Lake railroad and submit the following report:

The Cranberry Lake railroad has a single track line of standard gauge extending from Benson Mines, where it connects with the New York Central and Hudson River railroad, to Wanakena, a distance of 6 miles.

The line extends through a rough country involving many curves and some fairly heavy grades. The cuts and fills have a good cross-section and are in good condition. Suitable track ditches provide drainage where it is required. The surface and line of the track are good throughout.

The rail is a 60-lb. section, and most of it is in fairly good condition. Between bridges Nos. 1 and 2 there are some rail joints which are not full bolted. The track ties consist of native timber and are in fair to good condition. Very few renewals apparently have been made this season however, and a number of poor ties were found between bridges Nos. 4 and 5. The line is well ballasted with mine tailings. The track appliances, consisting of split switches, rigid frogs, and rigid switch stands, all appeared to be in good condition. The right of way is clean and well kept but very little of it is fenced. The road crossings are in good condition and are equipped with standard signs. The track work is handled by a track gang consisting of about 6 men during the working season.

The bridge structures are all of timber construction. The smaller bridges rest on timber cribs or mudsills, and two timber truss bridges of one span each are supported on concrete abutments. The following defects were found: No. 1 has a large amount of soft timber in the abutment; No. 2 has soft timber in the west abutment; Nos. 6 and 7, the truss bridges, have some poor ties.

The only station maintained by this company is that at Wanakena. It is in good condition and suitable for the traffic. Joint use is made of the New York Central station at Benson Mines.

This road was built to serve the lumbering industry but most of the valuable timber has been removed, and the traffic now is very light. One train crew handles all of the train work. In order to handle the passenger traffic more economically than it can be done with a steam locomotive and coach, the company is building a motor car in the shop at Wanakena and expects to place it in service soon. The car body is 24 feet long over all and is carried on a 4-wheel truck with a wheel base of 8 feet. It is to be geared to a maximum speed of 18 miles per hour and apparently will provide a means of handling the passenger traffic at a low cost. There are no grade crossings with other railroads.

No improvements have been made in the past year beyond the regular maintenance work. The only improvement contemplated at present is the installation of a motor car for passenger traffic, as mentioned above. It is recommended that the defects of track and structures mentioned in this report be remedied.

Respectfully,

J. B. STOUDEB,  
Steam Railroad Inspector.

## DANSVILLE AND MT. MORRIS RAILROAD.

Inspected June 2, 1914. Last previous inspection June 5, 1913.

*To the Public Service Commission, Second District:*

I have inspected the Dansville and Mt. Morris railroad and submit the following report:

This is a single track railroad of standard gauge. It extends in a northeasterly direction from Dansville to a connection with the Rochester division of the Erie railroad at Mt. Morris, a distance of 14.6 miles. There are 2.52 miles of sidings including 0.28 mile of track known as the Sonyea branch. This is a siding with the switch connection removed. As it is used only at a certain time each year, the switch is restored when needed.

The railroad is built on a fill for the greater part of its length, and it is nearly level. It follows the lowlands in the valley of a stream tributary to the Genesee river. There is no data available as to the grades and curvatures, but they are moderate. The embankments are well formed and the cuts are of good cross-section. Considerable trouble is experienced with high water. At times the tracks are inundated, and washouts have caused considerable annoyance and expense. In the flat country deep ditches have been dug on each side of the track at the foot of the embankments: they are usually wet and a dense growth of vegetation covers the right of way, ditches, embankments, and track. The drainage of this valley has been given consideration and construction work is in progress which when completed should benefit the valley and relieve the railroad of the annoyance and expense caused by the high water after heavy rains. The track alignment and surface are fair.

The tracks are laid with Bessemer rail in the following weights and mileage; 67-lb., 3 miles; 63-lb., 11.03 miles; 60-lb., 0.57 mile: total 14.60 miles.

The rails were generally in fair to good condition, and no defective rails were observed. While in places they were surface kinked, they give satisfactory service under the light traffic conditions. The splices are of the 4-bolt angle-bar type, full bolted, and generally tight. The ties are yellow pine, oak, and chestnut. The renewals since the previous inspection amounted to 2650 ties representing about 6.4 per cent of the total number of ties in track. This is not sufficient for a proper maintenance. It is expected to renew about 4000 ties, or 10.5 per cent, this season, and this number of ties will be required to make the necessary renewals. Rigid frogs, split switches, and rigid switch stands equipped with targets are used. They are few in number and no defects were noted. The track is ballasted with 12.6 miles of cinder and 2 miles of mud ballast. It is generally sufficient in amount but the mud ballast is not very satisfactory. The sod and the dense growth of grass in the ballast tend to hold the moisture and shorten the life of the ties. Maintenance of the track surface under these conditions is difficult. The right of way as stated above has a rank growth of rapidly growing weeds, rushes, etc., and the expense of cutting and clearing this is excessive. It is believed that in dry weather if the drift and dead grass which litters the right of way were fired the growing weeds would be burned, and the expense would be trivial. It is almost impossible to keep the right of way clean on account of the high water after storms depositing fresh drift thereon. The fences are maintained with difficulty but properly. There were no places observed where fences are required that they were not properly maintained. The road crossings and signs are in fair to good condition. The maintenance force consists of a foreman and 8 men in the working season. This force is not sufficient for maintenance on a high standard and especially when the men are required to use a hand-car to go to and from work. The physical conditions, together with the light traffic and revenue, will not permit a maintenance expenditure much beyond that necessary to give a reasonably safe condition of the track and structures. A motor car for the use of the trackmen would materially increase the efficiency and make the maintenance standard higher than at present without any increase in labor expense. The tie renewals contemplated for this year will put the track in safe condition for the traffic. Although the season's work has been considerably delayed on account of the late Spring, about 2 miles of track have been re-tied. The bridges are 32 in number, consisting of 21 frame and pile bent trestles, 10 plate girders, and 1 pony truss. The steel spans are generally supported on either piles, frame bents, or timber cribs. The character of the ground is such that pile foundations are necessary. There are a great many openings which are only necessary during high water. The timber structures are a source of considerable trouble due to the floods depositing drift and straw on the timber and under the bridges which when dry are liable to start a fire and destroy the structure. The bridges were generally in good condition. The defects observed were as follows: bridge No. 2 has several poor caps; bridge No. 11 has some poor ties; bridge No. 21, the back wall on the west abutment needs attention; bridges Nos. 22, 23, 24, 25, and 26 had drift on the timbers and under the structures; bridge No. 26

needs general repairs; bridge No. 29, the back walls need attention; bridge No. 30, a one span deck plate girder on frame bents, has back walls of timbers, and the west abutment is bulging and should be rebuilt at once; bridge No. 31 is a pile trestle of 4 span: it is expected to cut off the piles under the water and erect thereon frame bents; bridge No. 32 is a 7 span frame bent trestle. General repairs were being made at the time of the inspection. Timber is on hand for the repairs to the bridges, and it is expected to complete the repairs promptly.

There are 3 frame station buildings which appear to provide accommodation for the traffic. There were no structural defects noted.

There are no grade crossings with other steam or electric railroads.

Train movements are controlled by operating rules, timetables, and train orders. There are no block or other signals and none is necessary. The traffic is principally farm and manufactured products delivered to the connections at Mt. Morris, and inbound miscellaneous shipments. A through passenger service is performed by the Erie railroad with a morning and evening train between Rochester and Dansville. The other passenger service is local between Dansville and Mt. Morris connecting with the Erie trains at the latter point. This service seems ample.

Since the previous inspection a new wye track has been built at Dansville to replace the turntable, and about 1084 feet of sidings have been removed; 0.26 mile of new 60-lb. rail has been laid; 2650 ties have been renewed; bridge No. 9 has been filled in and additional land has been bought for a gravel pit from which to secure ballast. The contemplated improvements are the renewal of about 4000 ties, and the construction of an engine coaling station at Dansville. It is recommended (1) that the tie renewals this season be not less than 4000; (2) that the bridge defects noted in the body of the report be repaired.

Respectfully,

W. G. HIMES,

*Inspector Division of Transportation.*

## THE DELAWARE AND HUDSON COMPANY'S RAILROAD.

Inspected July 20-25, 1914. Last previous inspection August 11-16, 1913.

*To the Public Service Commission, Second District:*

I have inspected The Delaware and Hudson Company's railroad and submit the following report:

The lines of this railroad are divided into 4 divisions, the Champlain, Saratoga, Susquehanna, and Pennsylvania divisions. The lengths of main line and branches comprising each division are as follows:

Champlain division: main line, Rouses Point to Whitehall, 112.93 miles; Mooers branch, Canada Junction to International boundary, 12.78 miles; Chateaugay branch, Bluff Point to Lake Placid, 79.44 miles; Ausable branch, South Junction to Ausable Forks, 18.87 miles; Ticonderoga branch, Montcalm Landing to Baldwin, 5.69 miles: total, 229.71 miles. This division is single track, with the exception of 3.36 miles of double track on the main line between Plattsburgh and Bluff Point.

Saratoga division: main line, Whitehall to Albany, 79.14 miles; Washington branch, Eagle Bridge to state line, 32.62 miles; Rutland branch, Whitehall to state line, 6.63 miles; Salem branch, Greenwich Junction to Greenwich, 10.20 miles; Lake George branch, Fort Edward to Lake George, 14.46 miles; Adirondack branch, Saratoga Springs to North Creek, 56.68 miles; Troy branch, Waterford Junction to Troy, 5.60 miles; Green Island branch, Watervliet Junction to Green Island, 1.09 miles; Ballston branch, Ballston to Schenectady, 14.12 miles; Mechanicville branch, Glenville to Mechanicville, 9.68 miles: total, 230.21 miles. The main line and the Green Island branch are double tracked throughout. The Troy branch from River street, Troy, to Green Island, the Ballston branch from Glenville to Schenectady, and the Mechanicville branch from Glenville to Crescent are double tracked. From Crescent to Mechanicville on the Mechanicville branch the single track of the Boston and Maine railroad parallels the single track of The Delaware and Hudson Company, and the 2 tracks are operated as double track by both railroads. The other lines of this division are single tracked.

Susquehanna division: main line, Albany to Binghamton, 142.59 miles; Schenectady branch, Delanson to Schenectady, 14.15 miles; Cherry Valley branch, Cherry Valley Junction to Cherry Valley, 21.04 miles; Davenport branch, Cooperstown Junction to West Davenport, 3.60 miles; Cooperstown branch, Cooperstown Junction to Cooperstown, 15.78 miles: total 197.26 miles. The main line from Delanson to Harpersville, about 94 miles, and the Schenectady branch, are double tracked. The balance is single tracked.

Pennsylvania division: main line, Nineveh to state line, 17.65 miles. This division is double tracked between Nineveh and

South Nineveh, and between North End and Tuscarora. The balance is single track.

The total length of first track is 672.83 miles; second track 205.15 miles; sidings and yard tracks 467.14 miles.

The cuts and embankments are maintained in a cross-section of ample proportions properly to support the tracks. Ditches for the drainage of the roadbed are in generally good condition. The track alignment and surface on the main line are only fair to good. The cause for this is attributed to the heavy tonnage and lack of a suitable ballast. There are 6 single track tunnels, 4 of which are through solid rock along the shore of Lake Champlain; 1 at Whitehall is under a section of the village and is lined; the other tunnel between East End and Tunnel on the Susquehanna division is lined. These tunnels are all protected by automatic block signals. They are carefully inspected at frequent intervals, and seem to be in good condition.

The tracks are laid with rail in mileage of each weight and kind as follows: Champlain division: main line, 90-lb. Bessemer, 44.06 miles; main line, 90-lb. open hearth, 29.47 miles; main line 80-lb. Bessemer, 43.99 miles; Mooers branch, 62-lb. Bessemer, 12.78 miles; Chateaugay branch, 80-lb. Bessemer, 79.61 miles; Ausable branch, 67-lb. Bessemer, 6.79 miles; Ausable branch, 62-lb. Bessemer, 12.26 miles; Ticonderoga branch, 62-lb. Bessemer, 6.32 miles; Saratoga division: main line, 90-lb. Bessemer, 53.49 miles; main line, 90-lb. open hearth, 55.99 miles; main line, 80-lb. Bessemer, 47.32 miles; Washington branch, 80-lb. Bessemer, 32.62 miles; Rutland branch, 80-lb. Bessemer, 6.63 miles; Salem branch, 80-lb. Bessemer, 10.20 miles; Lake George branch, 80-lb. Bessemer, 15.12 miles; Adirondack branch, 80-lb. Bessemer, 3.72 miles; Adirondack branch, 67-lb. Bessemer, 33.92 miles; Adirondack branch, 62-lb. Bessemer, 19.33 miles; Troy branch, 80-lb. Bessemer, 5.93 miles; Green Island branch, 90-lb. open hearth, 1.44 miles; Green Island branch, 80-lb. Bessemer, 0.72 mile; Ballston branch, 80-lb. Bessemer, 19.47 miles; Mechanicville branch, 80-lb. Bessemer, 10.59 miles; Mechanicville branch, 90-lb. open hearth, 2.27 miles; Susquehanna division: main line, 90-lb. Bessemer, 57.14 miles; main line, 90-lb. open hearth, 100.12 miles; main line, 90-lb. ferro-titanium, 1.67 miles; main line, 80-lb. Bessemer, 78.48 miles; Schenectady branch, 90-lb. Bessemer, 14.26 miles; Schenectady branch, 90-lb. open hearth, 9.32 miles; Schenectady branch, 90-lb. ferro-titanium, 1.42 miles; Schenectady branch, 80-lb. Bessemer, 2.58 miles; Cherry Valley branch, 80-lb. Bessemer, 15.16 miles; Cherry Valley branch, 67-lb. Bessemer, 5.88 miles; Davenport branch, 62-lb. Bessemer, 3.70 miles; Cooperstown branch, 80-lb. Bessemer, 1.95 miles; Cooperstown branch, 62-lb. Bessemer, 13.83 miles. Pennsylvania division: main line, 90-lb. open hearth, 17.93 miles; main line 80-lb. Bessemer, 4.60 miles.

The rail condition can be described as being both good and poor. Generally speaking, the 90-lb. rail is in good condition. The reverse is true, however, of a considerable part of the 80-lb. rail of which there are in the main tracks about 174.29 miles. Many of the branches have been laid with 80-lb. relayer rail, removed from the main tracks, and these branches, particularly the Cherry Valley, Washington, and Rutland, have a considerable number of rails which have piped or split heads in various stages of development. Many are in bad condition, and their presence in the tracks is a menace to the safety of trains. A rail with a defect of this kind should be removed from the track as soon as its presence is known. The track walkers and section foremen should be carefully instructed so that they may be able to detect and remove from the tracks any defective rails of this kind as soon as the defect is apparent. The practice of watching these defects until they develop to such a point that they are dangerous before removing them from the track does not appear to be on the side of safety.

Defective rails were noted at the following points: Champlain division: main line: a piped or split head rail in the west side of the main track at telegraph pole 186-14; piped or split head rails in the east side of the track at telegraph poles 186-02 and 186-07; opposite milepost 186; near telegraph poles 185-30, 182-25, 181-06; and back of the frog at milepost A-177; a piped or split head rail on the west side of the track at telegraph pole 176-22 is cracked under the head on the gauge side; a piped rail in the west side of the track 2 rails south of telegraph pole 176-20; a piped or split rail in the west side of the track near telegraph pole 175-29 is cracked under the head on the gauge side; an apparently piped or split head rail in the east side of the track at telegraph pole 175-6, and another at telegraph pole 172-20; piped or split head rails on the east side near milepost A-171, near telegraph pole 169-30, and opposite milepost A-158; a split end rail in the west side near telegraph pole 141-10; the rail is poor south of Essex where new rail has been distributed; a piped or split head rail in front of Essex station is cracked, and the rust is streaked for about 15 feet on the gauge side under the head; a piped or split head rail on the east side of the track between telegraph poles 137-1 and 137-2 is cracked down in the web; the rail near milepost A-87 is poor; many are broken or defective

and have been patched with splice bars; Chateaugay branch: an apparently piped rail in the north side of the track near telegraph pole W. U. 370. Saratoga division: main line: the rail is poor in the southbound track near milepost A-74, new rail has been distributed, and the poor rail will be replaced promptly; piped or split head rails were noted in the east side of the southbound track at the following points: telegraph poles 74-05, 70-8, 69-30, 69-1, 68-15, and 68-2; poor rail in the southbound track near milepost A-68, and many broken rails are patched with angle-bar splices; piped or split head rails on the east side of the southbound track near telegraph poles 69-15 and 67-16; a mashed head rail on the east side of the southbound track near milepost A-67; piped or split head rails on the east side of the southbound track at the following points: telegraph poles 65-23, 64-3, 63-24, 63-20, 62-11, 61-30, 61-14, 61-3, 60-25 (has a piece of the head on the outside broken off), 57-5, 53-25, 47-11, 32-5, 17-10; poor rail in the southbound track near milepost A-13 where many broken rails are patched with angle-bar splices; a piped or split head rail in the northbound track just south of the water crane south of W Y tower, Mechanicville; Washington branch: piped or split head rails were noted at the following points: in the west side of track 5 telegraph poles south of milepost A-127; 9 telegraph poles south of milepost A-122; at telegraph pole 121-3 and telegraph pole 121-4; near the fifth and eighth telegraph poles south of the first culvert south of state line monument near Rupert; the sixth rail south of the state line monument; near telegraph poles 1060, 1098, 1107, 1118, 1125, and 1131; in front of the water tank at Granville; the fourth rail south of milepost 107-A; the third rail on the east side south of telegraph pole 1150; the east rail at the heel of the switch north of Granville; near telegraph pole 1154 on the east side; between telegraph pole 1155 and telegraph pole 1156 on west side; first rail south of telegraph pole 1155 on the west side cracked through on gauge side; second rail south of telegraph pole 1157 on the west side cracked through the head on gauge side; second rail north and fourth rail south of telegraph pole 1159 on the west side; second rail south of telegraph pole 1159 on the east side cracked through on the gauge side; first rail south of telegraph pole 1161 cracked through on the gauge side; fourth rail north of telegraph pole 1162 on the east side; second rail north of telegraph pole 1163 on the west side; opposite telegraph pole 1164 in the west side, head split; on the west side of the track near telegraph poles 1169, 1172, 1189, 1200, 1201, 1222, 1226, 1235, 1259, 1269, and 1278; Rutland branch: piped or split head rails were noted in the south side of the main track near telegraph poles 214, 197, 162, 82, 65, 51, 23, 19, 17, and 16; Troy branch: the rail is poor on the main track through the yard at Green Island; Ballston branch: piped or split head rails were noted on the east side of the track about 1000 feet north of bridge No. 28; near the stone box culvert south of bridge No. 28; about 1000 feet south of the first open culvert south of milepost S-11; 3 rails within 350 feet north of bridge No. 29; the twentieth rail on the east side north of the first crossing south of milepost S-10; the twenty-eighth rail on the east side north of Forest Park crossing; the thirty-fourth rail south of milepost 7 on the east side; the thirty-third rail north of the crossing south of milepost 7 on the east side; a rail in the east side near the open culvert south of milepost S-7; 3 rails in the east side of the track between milepost S-6 and signal 4-D; the sixteenth rail in the east side north of the bridge near milepost S-5, and one in the west side on the bridge near milepost S-5; Mechanicville branch: piped rails were noted at the following points: the third rail in the south side of the westbound track west of signal M-S-1, and the second and ninth rails west of telegraph pole 8-20. Susquehanna division: main line: piped or split head rails were noted at the following points: the third rail on the east side of the track north of signal 17.4; on the southbound track near the south end of bridge No. 24; on the east side of the southbound track near telegraph poles 46-23, 47-17, and 48-06; in the west side of the southbound track near the crossover south of Worcester; in the east side of the southbound track near signal 60.1; in the west side of the northbound track near telegraph pole 62-24; in the east side of the southbound track near telegraph pole 64-24; and also one in the west side of the southbound track near telegraph pole 66-29; in the east side of the southbound track near telegraph pole 68-23, about 750 feet north of bridge No. B-72, near telegraph pole 72-14, near signal 72.1, near telegraph pole 74-31, telegraph pole 78-23, telegraph pole 91-25, about 450 feet north of bridge No. B-51, near telegraph pole 92-06, telegraph pole 95-23, north of Sidney near telegraph pole 117-35 and telegraph pole 124-15; in the west side of the southbound track near telegraph pole 115-10; in the west side of the northbound track near telegraph pole 77-11, telegraph pole 77-35, near signal 89.1, telegraph pole 103-29, and telegraph pole 137-19. Other defective rails were noted as follows: halfmoon breaks in the base of the rail on the east side of the southbound track at telegraph pole 3-23, south of bridge No. 5, near stone box culvert south of bridge No. 23, near milepost B-113, and near

telegraph pole 39-32; halfmoon breaks in the west side of the southbound track near telegraph pole 55-16, and in the west side of the northbound track near telegraph pole 57-23; a mashed end rail in the east side of the northbound track about one thousand feet south of bridge No. 23; the rail is poor in the northbound track on the low side of the curve south of milepost B-108; the rail is poor and the joints are sticking out on the southbound track near telegraph pole 49-20, and at signal 53.1; a split end rail on the east side of the southbound track near telegraph pole 114-18; Cherry Valley branch: piped or split head rails were noted at the following points: in the south side of the main track at telegraph pole 21-12, 200 feet east of telegraph pole 20-17, 90 feet east of milepost C-20, 200 feet east of telegraph pole 18-20, 60 feet west of telegraph pole 18-20, 150 feet east of Hyndsville station, in front of Hyndsville station, 180 feet east of bridge No. 24, near telegraph poles 17-14, 14-13, 12-11, 10-09, 9-14, 9-02, 8-19, 8-13, 7-19, 7-15, 7-05, 4-06, 2-19, and 1-10; in the north side of the main track near telegraph poles 2-18, 3-2, 7-2, 7-3, 7-5, 7-14, 8-1, 8-10, 8-12, 9-6, 9-12, 9-15, 10-2, 12-7, 16-22, 17-4, 17-6, 18-8, and 19-7, near the frog west of Hyndsville, and 90 feet east of milepost C-19; a split end rail 200 feet east of milepost C-18; a halfmoon break in the base of a rail on the gauge side near telegraph pole 19-06; Cooperstown branch: piped or split head rails were noted at the following points: 2 rails on the south side of the main track east of milepost C-5 and 1 rail on the same side east of milepost C-4; on the north side near telegraph pole 1330, 2 rails near telegraph pole 1435, and 1 rail near telegraph pole 1527; the rail is poor near telegraph pole 1549, milepost A-80, and telegraph pole 1699. Pennsylvania division: a piped or split head rail in the west side of the southbound track near telegraph pole 130-23; the rails are joined with 4- and 6-bolt angle-bar splices; the new rail has 4-bolt angle-bars with 63/64 inch track bolts; the splices were generally in good condition. The exceptions noted were as follows: Champlain division: main line: cracked splices, one bar only, near telegraph pole 176-22, near bridge No. 43, and between telegraph pole 141-9 and 141-10; Saratoga division: main line: track bolts were missing in the northbound track north of West Waterford; Washington branch: a cracked splice, one bar only, near telegraph pole 1158; Adirondack branch: an old rail chair joint is in the track near bridge No. 10; this should be removed and a pair of angle-bar splices substituted; Ballston branch: loose track bolts were noted in the main track near milepost S-6. Susquehanna division: loose track bolts were observed in the northbound track north of bridge No. 34, near telegraph pole 55-16, and in the southbound track south of Worcester; cracked splice, one bar only, in the southbound track north of bridge No. 44; track bolts loose and missing in both tracks on bridge No. 51; in the northbound track north of milepost B-71, near bridge No. 55, north of bridge No. 56, at milepost B-62; in the southbound track south of bridge No. 65, at bridge No. 87, and near signal 1172. Pennsylvania division: loose bolts in the main tracks at Tuscarora.

The ties are principally yellow pine, chestnut, white oak, cedar, and red oak. Their condition is generally good. Since the previous inspection, the renewals have been made with untreated yellow pine ties as follows: 33,000 on the Champlain division, 58,000 on the Saratoga division, and 64,160 on the Susquehanna division. This is about 6.4 per cent of the total ties in track and is considerably below the general average on other railroads. If this low percentage of renewals is continued it will soon result in an excessive number of bad ties in the tracks. A life of 10 years for untreated ties is a fair average. A renewal of 6.4 per cent would require an average life of 15.5 years which is abnormal. The ties are badly rail cut on the heavier traffic lines where tie-plates are not in use. The tie renewals were less than 50 per cent completed at the time of the inspection, due it is said to the ties not being received early enough. This is a matter which is of vital importance on a heavy traffic railroad. Good track can not be maintained where the tie renewals are made throughout the greater part of the working season. This is particularly true where the ballast is not suitable for heavy traffic. The tie renewals completed early in the season allow sufficient time for raising and surfacing to prepare the tracks for the winter season; otherwise the tracks are not given the required attention and poor track is the result. Rigid and spring frogs, split switches, automatic and rigid switch stands equipped with lamps are in use. Derails of the point and lifting types usually pipe connected to the switch stands are used where needed. Tie-plates are being applied on the curves, but their use is not as yet general. Anti-creeper devices are used to a limited extent. These track appliances are in generally good condition. The exception is that there are a great many broken frogs in the main tracks. They are broken on the turnout side, back of the point, with one exception at Cooperstown where the frog point was broken off. While they are not in a dangerous condition it is the best practice to remove them from the running tracks. The exact mileage of the different kinds of ballast is not available. The tracks are ballasted with gravel on the Champlain division; gravel,

cinders, ore sand, and about 28 miles of stone on the Saratoga division; and cinders on the Susquehanna and Pennsylvania divisions. The cinder ballast is not suitable for the heavy traffic and consequently there is a considerable amount of rough track with churning joints. Considerable attention has been given to this matter by the company, and it has been decided to re-ballast a part of the main line with stone. However, the work has not been started and it is probable that it has been postponed indefinitely. The necessity for a ballast of this kind under the heavy traffic borne is obvious. A start should be made at once. This work continued over a number of years would not be a heavy burden of expense in any one year. It would improve the condition of the tracks and provide greater safety in operation. The right of way was generally clean and well kept. The fences where required are properly maintained. The road crossings and signs are in good condition with the exception that the crossing-signs should be painted at some of the crossings. This is a matter that should be given particular attention. These signs are often the only protection at highway grade crossings and they should be as conspicuous as possible. The following defects were particularly noted in the crossings and signs: Champlain division: Ticonderoga branch: There are 5 crossings on this branch where the signs need painting. Saratoga division: Washington branch: The signs at the following crossings should be painted; first crossing north of milepost A-140; south of bridge No. 111; south of bridge No. 110; south of milepost A-135; and north of Rexleigh; the sign at the crossing south of milepost A-123 should be moved to a better location: it is now hidden behind trees so that it is not in clear view; Rutland branch: the sign should be painted at the crossing west of milepost A-81; Salem branch: the plank should be renewed in the crossing east of East Greenwich; Adirondack branch: the sign at the crossing south of milepost A-42 is broken and should be repaired; Mechanicville branch: the sign at the crossing near milepost M-12 should be re-set; it is now leaning over; the signs at the following crossings should be painted: crossing east of bridge No. 4½, near signal M-6.1, near milepost M-6, and milepost M-5. Susquehanna division: Main line: the sign at the crossing north of bridge No. 20 should be re-set: it is not now plumb; the signs at the crossings north of signal 85.2, and south of Port Crane should be painted; Cherry Valley branch: the signs should be painted at the crossings west of bridge No. 21½, at Sharon Springs, and at telegraph pole 9-9. Other minor defects in the tracks particularly noted were as follows: Saratoga division: main line: the surface and line are poor in the southbound track south of milepost A-72, north of signal 66.2, near milepost A-65, signal 63.2, milepost A-60, and south of W Y tower; broken frogs in the turnout side behind the point in the crossover north of milepost A-66, and in the crossover at the tannery near milepost A-32; joints kinked in the southbound track at signal 58.2, near signal 44.4, and milepost A-17; open track and insufficient ballast in the southbound track near milepost A-23, both main tracks near milepost 18, north of signal 14.2, and north of J A tower; the rail in the southbound track at X O tower should be rolled in; the northbound track has several churning joints near West Waterford; Washington branch: the track should be surfaced and the shims removed near milepost A-136; Adirondack branch: the surface and line are poor on the high fill near milepost A-39. Susquehanna division: main line: poor ties were noted in the main track south of bridge No. 2 and south of milepost B-130; in the southbound track south of milepost B-91, bridge No. 91, north and south of bridge No. 93, and between milepost B-25 and bridge No. 95; spikes sticking up in the southbound track near bridge No. 24 and in the northbound track between bridges Nos. 85 and 86; broken frogs, in the turnout side only in the crossovers near the water tank at Colleskill, north of milepost B-73, south of the overhead highway crossing at Oneonta, near signal 89.2, at Wells Bridge, north of Unadilla, in the southbound track near the water tank north of Sidney, in the turnouts south of bridge No. 86, north of signal 108.1, south of Bainbridge, south of Nineveh, and south of Bevier St., Binghamton. The southbound track is poor north of signal 53.1: the ties are badly rail cut, the joints are kinked, and the rail is poor. Churning track was noted at the following points: in the southbound track at Worcester, south of signal 57.2, between milepost B-86 and signal 59.2, south of signal 60.1, near signal 70.2, north of bridge No. 55, at telegraph pole 93-10, south of signal 93.2, south of bridge No. 71, south of signals 95.2, 96.2, and 97.2, north of bridge No. 76, south of bridge No. 87, and north of bridge No. 95; in the northbound track north of Worcester, north and south of bridge No. 40, south of bridge No. 41, north of Cooperstown Junction, south of Oneonta, near signals 84.2 and 94.3, north of milepost B-45, south of bridge No. 81, near water crane at Nineveh; and in both main tracks south of milepost B-84, south of bridge No. 42, at Schenectady, between bridges Nos. 49 and 50, north and south of bridge No. 51, south of signal 81.2, south of bridge No. 56, south of Wells Bridge, and at Unadilla. The line is poor on the curves in the southbound track at milepost B-66, north of signal 73.2, south of signal 74.2, and in the main track at milepost A-137. The

ties are badly rail cut in the northbound track north of the first culvert north of milepost B-84, in the southbound track at telegraph pole 94-35, and south of signal 98.2. The ties are skewed and the rail creeping in the northbound track north of Worcester, north and south of bridge No. 40, between bridges 62 and 63, south of milepost B-81, south of signal 108.2; and in the southbound track north of bridge No. 43, and south of signal 139.1. The surface and line are poor in the southbound track near milepost B-65, through the yard at Oneonta, on the curve at telegraph pole 88-20, and in the tunnel; on the northbound track through Oneonta yard and south of signal 106.1. Open track in the southbound track south of milepost B-31, south of milepost A-135, and north of signal 136.1. The rail joints are kinked and sticking out north of signal 137.1 and south of signal 134.1. Schenectady branch: the ties are poor in the northbound track between signals D-11.3 and D-11.1; the ditches should be cleaned in the cut near signal 7.4; Cherry Valley branch: a frog broken on the turnout side near telegraph pole O-5; Cooperstown branch: main track frogs broken on the turnout side only were noted west of Milford and east of Portlandville, and a frog with the point broken off east of Cooperstown; grass and weeds were growing in the track south of Cooperstown and near telegraph pole 1822; the surface and line are poor on a greater part of this branch; the points particularly noted were on the tangent south of telegraph pole 1396, east of milepost A-88, east of telegraph pole 1453, at telegraph pole 1592, between telegraph pole 1652 and milepost A-81, at telegraph pole 1780, and on the curve at telegraph pole 1792; the embankment is narrow on the west end of the open culvert at telegraph pole 1531; the shims in the track near telegraph poles 1592 and 1692 should be removed and the track surfaced; the ties are poor east of telegraph pole 1745 and at telegraph pole 1780; Pennsylvania division: the ties are skewed and the rail is creeping on the southbound track at signal 131.1, and on the northbound track south of telegraph pole 124-10; the northbound track is churning north and south of bridge No. 43, and north of signal 123.3; the ditches should be cleaned in the cut at telegraph pole 129-20; the track is open south of milepost A-124. The sections have an average length of 5.2 miles and a working force on the main line during the summer season of  $5\frac{1}{2}$  men per section on the Champlain, 7 on the Saratoga, 8 on the Susquehanna, and 9 on the Pennsylvania divisions. The branches have a working force of 4 to 7 men. This force is sufficient for the proper maintenance of the tracks.

The bridges are principally permanent structures of concrete or stone masonry and steel in one form or another. There are many open rail culverts which have the rails riveted base to base supported on castiron shoes at the bearings. There are a great many of these used as cattle-guards on the main line of the Champlain division and elsewhere as cattle-passes or for drainage. Some of them have dry masonry abutments which are in poor condition. The tracks have been raised from time to time, and the bridges have been raised on wooden blocks to conform to the track grade. In places 2 or 3 short blocks and shims are under each shoe, and they work loose as they are not properly fastened to the masonry. This is not good practice. Many of these openings can be filled in and pipe substituted. If it is necessary to maintain the present structures they should be provided with permanent bridge seats, or if timber blocking must be used the timber should extend in a continuous piece under the shoes on each track. Modern practice requires inside metal guard-rails full spiked and bolted on all open bridges over 15 feet in clear span. There are a great many open bridges that have no metal guard-rails, including several long through and deck girder and truss bridges. Where metal guards have been installed they are in many cases not full spiked or bolted. The main running rail on some of the bridges is not full spiked to the ties.

The minor defects in the bridges are as follows: Champlain division main line: the following rail stringer open span culverts or cattle-guards are supported on wooden blocks: the 3rd, 4th, 5th, 6th, 7th, 8th, and 9th cattle-guards south of Rouses Point, 2 at telegraph pole 187-14, 3 between bridge No. 70 and milepost 185, at telegraph pole 184-31, bridge No. 184, 2 cattle-guards south of bridge No. 184, at telegraph pole 184-5, telegraph pole 183-30, telegraph pole 183-15, cattle-guard between the highway crossing and milepost A-183, 2 at telegraph pole 181-10, telegraph pole 181-2, telegraph pole 179-15, telegraph pole 179-7, 2 at telegraph pole 178-11, and the cattle-guard north of milepost 176; the wooden blocks are in poor condition on the 4th and 6th cattle-guards south of Rouses Point, on the 2 south of milepost 185, at telegraph pole 184-31, 181-10, 181-02, 179-15, and 178-11; ties are poor on the 4th cattle-guard south of Rouses Point, on bridges Nos. 31 $\frac{1}{2}$ , 26, and 3; the ties are rail cut on bridge No. 57 $\frac{1}{2}$ ; the inner guards are not full spiked on bridges Nos. 58, 48, 42, 41, 35, 34, 26, and 2; there are no inner guard-rails on bridges Nos. 57, 50, and 6; the bridge seats are dirty on bridges Nos. 31 $\frac{1}{2}$  and 30; bridges Nos. 28 and 23 are to be replaced with new steel which is now at the bridge site; bridge No. 16 should be painted; bridge No. 5 should have a new deck

and the masonry pointed; bridge No. 3 should have the masonry pointed; Mooers branch: the cattle-guard south of milepost A-190 has poor masonry which needs attention; the cattle-guard south of Mooers Junction and the third one north of bridge No. 67 have rail stringers supported on temporary wooden blocks which are in poor condition; the first cattle-guard south of milepost A-184 is in poor condition; it should be either rebuilt or replaced with pipe and fill; the ties are poor on the first cattle-guard north of milepost A-181; Chateaugay branch: the inside guards are not full spiked on the Ausable river bridge near milepost P-13, on bridges Nos. 11, 18, 19, or 26; bridges Nos. 3, 5, 7, 13, 14, 15, 17, 21, and 22 have no inner guards; the spans vary from about 20 feet to 50 feet; bridge No. 4, the bridge seats are dirty; bridge No. 7 needs some new guard stringers and the steel needs painting; bridges Nos. 14 and 22 need some new guard stringers; bridge No. 17 has saprot on the deck which should be adzed off; bridge No. 19 needs several new ties; bridge No. 24 needs new wall plates; the culvert near milepost P-21 needs new outer guards, and the temporary wooden blocks supporting the rail stringers should be replaced; Ausable branch: bridges Nos. 52 and 54, the inside guards are not full spiked to the ties; the main rail is not full spiked to the ties on the culverts at milepost AF-11, west of milepost AF-11, and west of milepost AF-10; bridges Nos. 52 $\frac{1}{2}$  and 54 need some new ties; the rail stringer culvert west of milepost AF-9 is in poor condition and should be rebuilt or replaced with pipe and fill; Ticonderoga branch: the first culvert west of milepost A-103 has poor ties; the second culvert west of milepost A-103 has poor ties, and the temporary wood blocks under the rail stringers are in poor condition. Saratoga division main line: bridge No. 69, a deck plate girder about 24 feet, has no inner guards; bridge No. 68, a single span through truss, has no inner guards, the ties are poor on the southbound track, and the masonry and steel are dirty; this bridge spans the abandoned canal channel, and it is expected to abandon the bridge and fill the opening; bridges Nos. 66 and 67, two spans each of deck plate girders, are reinforced with pile bents and the inside metal guards are not full spiked: it is expected to renew the steel in these bridges this year; bridge No. 65 is a single span through truss over the abandoned canal channel: it is expected to remove this bridge and fill the opening: there are no inner guards, and the ties and wall plates are poor on the northbound track; bridge No. 64 is a single span deck plate girder: it is expected to replace this bridge with heavier steel; bridge No. 63 is a single span through truss, the north abutment was washed away, and the trusses are supported on timbers, a slow order is enforced, and day and night watchmen patrol the bridge: it is expected to remove this bridge and replace it with a fill: it spans the abandoned canal channel; the culvert south of milepost A-65, the first and second culverts south of bridge No. 62 and the culvert south of milepost A-22 need some new ties, and the wooden blocks under the rail stringers are in poor condition needing prompt attention; bridge No. 62 has the girders reinforced with timber bents, and the ties and wall timbers are poor on the southbound track; the culvert at milepost A-63 has a poor deck, and the north abutment washed out, the stringers are supported on timber blocks: it is expected to fill the opening and abandon the culvert; bridge No. 59, about 35-foot span has no inner guards, and the outer guard stringers are poor on the southbound track; bridge No. 41 is a through truss of about 100-foot span with a buckle plate floor: it has no inner guards; bridges Nos. 40, 39, 38, 37 $\frac{1}{2}$ , 35, and 27, the inner guards are not full spiked to the ties; the bridge seats are dirty on bridges Nos. 40, 35, 25, and on the culvert south of G Y tower; the 2 culverts north of bridge No. 35 have the rail stringers supported on small wooden blocks; bridge No. 34 is a 1 span deck plate girder and 1 span through pony truss: this bridge is on a sharp curve, and there are no inner guards; bridge No. 23 is a deck plate girder span of about 40 feet: it has no inner guards; bridge No. 21 has a cracked bridge seat in the north abutment under the east truss; the Barge Canal bridge south of West Waterford is a through truss about 140 feet in span: it has no inner guards; bridge No. 8 should have the steel painted; Mohawk river bridge is 6 spans of deck trusses: it has no inner guards, and the planks in the foot walks are loose; the canal bridge south of milepost A-8 needs some new guard stringers; bridge No. 4 is a single span deck plate girder: the plank foot walk is poor, a concrete sewer has been built under this bridge, and it is expected to fill the opening and abandon the bridge; Washington branch: bridges Nos. 118, 117, 114, 113 $\frac{1}{2}$ , 112, 106, 103, and 99 have inner guards which are not full spiked to the ties; bridge No. 115, a through plate girder about 50-foot span, bridges Nos. 107 and 105, 2 spans each of through plate girders about 150-foot opening, and bridges Nos. 102 and 101, through plate girders about 50-foot spans, have no inner guards; bridge No. 110 has very poor dry stone masonry which should be rebuilt; bridge No. 109, a two-span through truss, has no inner guards; the west abutment is cracked under the bearing, and the steel needs painting; bridge No. 108, a through pony truss about a 150-foot span, has no

inner guards, and the masonry is poor; bridge No. 107, the steel should be painted and the saprot adzed off of the deck timbers; bridge No. 105 has some poor guard stringers, and the steel needs painting; bridges Nos. 104 and 99 have saprot on the decks which should be adzed off; bridge No. 103 has some poor guard stringers; bridge No. 92, a through truss about 100 feet in span, has no inner guards; Rutland branch: bridge 73, the inner guards are not full spiked; bridges Nos. 72 and 70, through truss spans, have no inner guards; bridge No. 72 needs some new guard stringers; bridge No. 70, the east bearing of the north truss, is on a timber crib: it is expected that this bridge can be filled in as it spans the abandoned canal channel; Salem branch: bridges Nos. 1, 2, 3, and 4 have inside guard-rails which are not full spiked to the ties; the running rail on bridge No. 4 should be full spiked; and the saprot should be adzed off of the deck timbers on bridge No. 2; Lake George branch: the first and second bridges north of signal LG-55.1 have dirty bridge seats; the first bridge north of milepost LG-11 is a through truss about 80 feet in span: it has no inner guards and no anchor bolts; bridge No. 53, the ties and wall timbers are poor; bridge No. 54, the masonry in the south abutment is in very poor condition and needs prompt attention; bridge No. 55, the masonry is very poor: it is expected to rebuild this bridge; Adirondack branch: bridges Nos. 18 and 14 need some new guard stringers; bridges Nos. 17, 15, 14, 13, 9, 7, and 5, the inner guards are not full spiked to the ties; bridges Nos. 13, 12, and 7 have saprot on the decks which should be adzed off; bridge No. 10, a through truss has no inner guards; culverts south of milepost A-42, the north abutment is not plumb; Warrensburgh branch: bridges Nos. 16 and 17 are through truss spans: they have no inner guards; the pier in bridge No. 17 was undermined and has settled: piles have been driven and riprap placed around the foundation; the trusses are supported on temporary blocks, the settlement has pulled the trusses out of line, and the track is kinked at each abutment and over the pier: the trusses should be lined to take the angles out of the track and permanent shoes should be substituted for the temporary blocks; Troy branch: bridge No. 16 is a combination of through trusses and girders on a curve: there are no inner guards, the running rail is not full spiked, the deck timbers have saprot which should be adzed off, and there are some poor guard stringers; bridge No. 15 is a through truss with no inner guards: there is saprot on the deck, and the pier is cracked; bridge No. 14 is a through truss with no inner guards, and the deck timbers have some saprot and the pier is cracking; Green Island branch: bridge No. 12, a deck plate girder bridge, has no inner guards; bridge No. 13, 1 through truss, 1 through plate girder, and 1 deck plate girder spans, has no inner guards, and there is some saprot on the deck timbers; bridge No. 11, a 3-span through truss, has no inner guards, the steel needs painting, the bridge seats are dirty, and the ties are badly rail cut; bridge No. 10 has 4 through truss and 1 draw spans: there are no inner guards, the steel and masonry is dirty, and the west abutment and pier are being rebuilt with concrete; Ballston branch: at the first culvert south of signal S-132, the north abutment is failing, and the shims are in poor condition under the rail stringers: this culvert needs immediate attention; the first culvert south of milepost S-13, the rail stringers are on wooden blocks and shims: these blocks are in poor condition and should be replaced; bridge No. 28 has a poor deck, and the inner guards are not full spiked: it is expected to replace this opening with a concrete arch this year; the culverts south of milepost S-12, milepost S-9, and north and south of milepost S-7 have wooden blocks and shims under the rail stringers: these blocks are in poor condition and should be replaced promptly; bridge No. 29 is about 25 feet in span and has no inner guards; the masonry has failed, and the girders are supported on frame bents: it is expected to face the abutments with concrete; Mechanicville branch: bridge No. 5, the east abutment is failing and needs immediate attention; bridge No. 1½, forms have been erected for a concrete top, but the work has been delayed for some time: this should be completed; bridge No. 1, castiron pipe has been placed in this opening, but the filling has not been done: this should be finished promptly. Susquehanna division main line: bridges Nos. 2, 4, 19, 24, 25, 43, 44, 51, 52, 64, 65, and 81 have inner guards which are not full spiked and in many cases are not full bolted; bridges Nos. 8, 29, 30, 31, 33, 37, 39, 41, 42, 56, 62, 69, 76, 77, 78, 80, 85, 86, 87, 88, 89, 90, 94, 95, 100, 104, 107, and 108 have no inner guards: they are all girders or rail stringers spans from 20 feet to 100 feet in length between back walls; bridge No. 10, the stone masonry abutments have failed, and the steel is supported on timber bents; culvert south of bridge No. 20, the masonry is poor and shaking apart; ticklers in the bridge warning at the Delanson coaling station are missing; bridges Nos. 23, 33, 54, 94, and 97, the running rail is not full spiked to the ties; bridge No. 27, the masonry is poor in the north abutment under the northbound track, and the girders are supported on a frame bent; bridge No. 30, the abutments are being rebuilt of concrete; bridge No. 32, a deck truss of about 60 feet span has no inner guards; bridge No. 33, the masonry is

poor, and the bridge seats are cracked in the south abutment under both tracks; bridge No. 43, the rollers in the south shoes need adjustment; culvert south of milepost B66, the rail stringers are supported on wooden blocks: it is low on the north end in the southbound track; culvert south of signal 79.2 needs some new guard stringers; bridge No. 84 is a 3-span through truss with no inner guards; bridge No. 88 needs some new guard stringers; Schenectady branch: bridge No. 6½ has saprot on the deck timbers; the 2 culverts, one on each side of Alplaus have the rail stringers supported on wooden blocks which are in poor condition; bridges Nos. 32, 33, and 17½ have inner guards which are not full spiked to the ties; the masonry in bridge No. 17½ is poor, and the steel is supported on frame bents; bridge No. 11½ has 1 broken and 1 rotten tie; the bridge seats are dirty on the first bridge south of the West Shore overhead crossing on the southbound track; southbound engines dump their hoppers in the main track north of DJ tower Delanson: the hot cinders have been dumped or dragged over the two bridges south of DJ tower, burning the ties and partly filling the openings: this should be stopped at once; Cherry Valley branch: bridge No. 21½, the inner guards are not full spiked; bridge No. 22½ is a 3-span frame bent trestle with no inner guards; bridge No. 24½, the inner guards are not full spiked, the masonry in the west abutment is failing, and the truss is supported on timbers at the first panel point; bridge No. 25½, the inner guards are not full spiked, the masonry is failing, and the girders are supported on frame bents; culvert at milepost C-14, the masonry has failed, and the timber stringers are supported on wooden blocking; culvert west of milepost C-14, the masonry is in very poor condition, and the outer guards should be renewed; second culvert west of milepost C-14, the masonry has failed, and it is braced with timbers, and the east abutment is particularly bad and needs attention; bridge No. 26½ is a deck girder about 40 foot span with no inner guards: the masonry is poor and shows signs of failure; bridge No. 27½, the inner guards are not full spiked and the east end supported on a timber crib is settling; first culvert west of Sharon Springs has poor masonry, and the abutments are braced with timbers: it should be rebuilt promptly; culvert west of milepost C-3, the masonry is poor and shows signs of failure; the culvert west of milepost C-2 has poor masonry; Cooperstown branch: cattle-pass west of milepost A-90, the stone masonry in the east abutment is failing, and the stringers are supported on a frame bent; cattle-pass at milepost A-90, the stone masonry is poor: the east abutment is failing and needs attention; cattle-pass east of milepost A-90, the stone masonry is poor: the west abutment is failing and needs attention; the 8-span pile trestle at telegraph pole 1396 has no inner guards; open culvert at telegraph pole 1453, the stone masonry has failed, and abutments are braced with timbers: this needs prompt attention; open culvert at telegraph pole 1477, the masonry is failing and needs prompt attention; the deck girder bridge at telegraph pole 1536 is about 35 feet in length: it has no inner guards; the open culvert at telegraph pole 1592 is to be filled; the open culvert at telegraph pole 1611 has poor stone masonry abutments which are braced with timbers: it is expected to fill this opening, and this should be done promptly; the open culvert at telegraph pole 1621 is in poor condition; the open culvert at telegraph pole 1629 is in poor condition: it is expected to fill the opening and this should be done at once; the open culvert at telegraph pole 1660 is to be filled; the through truss bridge at telegraph pole 1692 is about 200 feet long and has no inner guards. Pennsylvania division: bridges Nos. 53, 45, and 50, and the bridges at Tuscarora, milepost A-125, telegraph pole 123-20 and telegraph pole 120-17 are 30 feet or over in length and have no inner guards; the bridge at milepost 121 is a 3-span through truss: it has no inner guards, and the running rail is not full spiked; the bridge at telegraph pole 123-20 does not have the running rail full spiked to the ties.

The station buildings are in number and kind as follows: frame, 140, brick 13, stone 1, stone and brick 5, brick and concrete 3, brick and frame 8, stone and frame 4, concrete and frame 6: total 180. They are generally in good condition and clean. The minor defects observed are as follows: the station at Beekmantown was burned and a passenger car is used temporarily; Oneonta, the flange plank in the platform is in poor condition and should be relaid; the platform at Seward on the Cherry Valley branch is in poor condition and should be repaired.

At Rouses Point, 1 track is crossed by 1 Rutland railroad track, protected by a ball signal: at Mooers Junction, 1 track is crossed by 3 Rutland railroad tracks, protected by a ball signal. At Mechanicville, 3 tracks are crossed by 1 Boston and Maine railroad track, protected by mechanical interlocking. At South Schenectady, 1 track is crossed by 2 New York Central and Hudson River railroad tracks, protected by mechanical interlocking. At Center street, Schenectady, 2 tracks are crossed by 2 New York Central and Hudson River railroad tracks, protected by mechanical interlocking. At Voorheesville, 1 track is crossed by 2 New York Central and Hudson River railroad (West Shore) tracks, protected by gates. At Albany, Livingston avenue, 2 tracks are crossed by 1 track of the New York Central and Hudson River

railroad, protected by a low pressure interlocking plant. At Sidney, 2 tracks are crossed by 1 track of the New York, Ontario and Western Railway, protected by mechanically interlocked signals: The Delaware and Hudson Company's trains do not stop at the crossing when the signals indicate proceed but the New York, Ontario and Western trains come to a full stop before occupying the crossing; the train movements are frequent enough to warrant the installation of full interlocking protection. At Binghamton, 1 track is crossed by 2 tracks of the Delaware, Lackawanna and Western railroad, protected by mechanical interlocking.

At Plattsburgh, 2 tracks are crossed by 1 track of the Plattsburgh Traction Company, protected by a flagman. At Glens Falls, 1 track is crossed by 1 track of the Hudson Valley railway, protected by a flagman. At Fort Edward, 2 tracks are crossed by 1 track of the Hudson Valley railway, protected by a flagman, gates, and derails in the Hudson Valley track. At Mechanicville, 3 tracks are crossed by 1 track of the Hudson Valley railway, protected by flagman and derails in the trolley track. At Waterford, Third street, 1 track is crossed by 1 track of the Hudson Valley railway, protected by gates and mechanical interlocking with derails in the trolley track. At Waterford, Broad street, 1 track is crossed by 2 tracks of the United Traction Company, protected by a flagman. At Cohoes, Van Shaicks Island, 2 tracks are crossed by 2 tracks of the United Traction Company, protected by mechanical interlocking with derails in the trolley track. At Cohoes, Ontario street, 2 tracks are crossed by 2 tracks of the United Traction Company, protected by gates. At Cohoes, Mohawk street, 2 tracks are crossed by 1 track of the United Traction Company, protected by gates. At Cohoes, Main street, 2 tracks are crossed by 1 track of the United Traction Company, protected by gates. At Green Island, Tibbetts avenue, 8 tracks are crossed by 1 track of the United Traction Company, protected by gates. At Green Island, George street, 2 tracks are crossed by 1 track of the United Traction Company, protected by gates. At Watervliet, 19th street, 2 tracks are crossed by 2 tracks of the United Traction Company, protected by gates and mechanical interlocking with derails in the electric tracks. At Albany, North Ferry street, 1 track is crossed by 1 track of the United Traction Company, protected by a flagman. At Albany, Broadway, 1 track is crossed by 2 tracks of the United Traction Company, protected by a flagman. At Cooperstown, 1 track is crossed by 1 track of the Otsego and Herkimer railroad, protected by derails in the trolley track.

Train movements are controlled by operating rules, timetables, and train orders, supplemented by automatic signals on a considerable part of the main line and more important branches. Automatic, single arm, lower quadrant electric signals are in service between Whitehall and South Junction, and on the Lake George branch. Double arm, 2-position lower quadrant signals are in use between Plattsburgh and South Junction, and between Whitehall and Fort Edward. From Fort Edward to Saratoga Springs the majority of the 2 arm 2-position lower quadrant signals have been replaced with single arm 3-position upper quadrant signals, and at this time both types of signals are in use between these points. Signals of the single arm, 3-position upper quadrant type are also in use between Saratoga Springs and Ballston, between mileposts A23 and A18, and between Watervliet and Albany. Disc or banjo type signals are still in use between Ballston and milepost A23, and between milepost A18 and Watervliet. On the Mechanicville and Ballston branches, Mechanicville to Schenectady, the signals are 2 arm, 2-position lower quadrant types. On the Susquehanna division, between Albany and Delanson, and between Harpersville and Port Crane 1 arm, 2-position lower quadrant automatic signals are in use. Between Delanson and Maryland, between milepost A96 and Harpersville, and on the northbound track and a part of the southbound track of the Schenectady branch 2 arm 2-position lower quadrant automatic signals are used. The balance of the main line on this division is equipped with 1 arm upper quadrant, 3-position automatic signals. The Pennsylvania division has single and double arm 2-position lower quadrant automatic signals. These signals were in good condition throughout, and no defects were noted. The normal indication of all automatic signals is stop. The home and distant signals at the interlocking plants protecting the railroad grade crossings, junction points, and yards are usually 2-position lower quadrant types. The train order signals are 2-position upper and lower quadrant types. The north- and southbound arms are on one pole. These were usually in good condition, except that the arms droop on the signals at Whitehall on the Rutland branch and Otsego and Wells Bridge on the Susquehanna division.

The passenger traffic is heavy on the main line north of Albany, particularly during the summer season. It is also comparatively heavy on the Susquehanna division between Albany and Binghamton. It is light on the Pennsylvania division. The coal and through freight traffic is heavy on the main line, particularly on the Pennsylvania and Susquehanna divisions including the Schenectady and Mechanicville branches. Milk, lumber,

farm and manufactured products are the principal items of traffic originating on the lines of this railroad within this State. The terminal, road, and passenger facilities seem to be ample for the present traffic.

Since the previous inspection the following improvements have been made: the length of sidings has been increased 5.05 miles: this includes 0.17 mile on the Champlain, 4.77 miles on the Saratoga, and 0.11 mile on the Susquehanna divisions; 20.68 miles of new 90-lb. open hearth rail has been laid on the main line of the Champlain, Saratoga, and Susquehanna divisions, replacing 13.73 miles of 80-lb. and 6.95 miles of 90-lb. rail; 155,160 yellow pine cross-ties, 557,200 feet board measure of switch ties, and 141,000 feet board measure of bridge ties have been used in renewals; the re-ballasting was confined to patching short stretches of track; bridge renewals were made with 2 through truss and 1 deck girder spans in bridge No. 16 on the Troy branch, and a center truss in bridge No. 37 on the Champlain division; 9 box culverts were replaced with castiron pipe on the Champlain division; the sidings were extended from West Chazy to Canada Junction; the Ticonderoga station and yard improvements have been completed; the Riverside station improvements are finished; the signals at the ends of passing tracks and ends of double track on the Champlain division have been changed from home signals to home and distant signals; a new platform and ramp have been built at the Green Island freight house; the yard improvements at Mechanicville are completed; the overhead highway bridge at Menands is being rebuilt giving increased track room; banjo signals have been erected for the protection of the highway crossings south of Ballston, and at Fort Edward; 8 banjo or disc signals have been replaced with 3-position upper quadrant signals near Mechanicville; crossing-bells have been installed at Wells Bridge and Unadilla; new water facilities at Oneonta including a new 100,000 gallon tank and stand pipe; new water facilities and concrete platform at Cobleskill; the reconstruction of the arch culvert at Port Crane. The improvements contemplated include the following: the completion of the work under way in connection with the Albany Water Front improvements; the replacement of plate girders, and strengthening the truss bridges on all divisions to make them safe for the increasing weight of equipment: this work has been started, and the steel is on hand at many of the bridges; battery wells have been distributed between Plattsburgh and Rouses Point, and it is expected to install automatic signals; the replacement of the disc signals with semaphore type signals having a home and distant indication.

It is recommended (1) that the defective rails be removed from the main tracks at once; (2) that the broken frogs be replaced promptly; (3) that all open bridges or trestles having a span of 15 feet or more between back walls be equipped with inside guard-rails full bolted and full spiked to the ties; (4) that the defects in the bridges enumerated in the body of the report be repaired; (5) that the bridges raised on small wooden blocks and shims have permanent bearings provided; (6) that particular attention be given the surface and line of the main tracks, particularly on the Pennsylvania and Susquehanna divisions; (7) that serious consideration be given the question of a more suitable ballast on the heavy traffic divisions.

Respectfully,

W. G. HIMES,  
Inspector Division of Transportation.

#### DELAWARE AND NORTHERN RAILROAD.

Inspected May 26, 1914. Last previous inspection May 15, 1913.

To the Public Service Commission, Second District:

I have inspected the Delaware and Northern railroad and submit the following report:

This is a single track, standard gauge railroad extending from a connection with the Ulster and Delaware railroad at Arkville to a connection with the New York, Ontario and Western railway at East Branch, a distance of 37.52 miles. The Andes branch is 8.37 miles in length extending from a connection with the main line at Andes Junction to Andes. The approximate length of all sidings and yard tracks is 5 miles.

The railroad throughout its entire length descends the valley of the East branch of the Delaware river, and the grades and curvature are moderate. The maximum grade is 0.9 per cent on the main line and 1.45 per cent on the Andes branch. The maximum curve is 10 degrees on the main line and 12 degrees on the branch. In many places it follows close to the river bank, and the grading while not excessive is difficult to maintain in a proper cross-section to support the track and provide the proper drainage. Considerable expense is incurred annually in cleaning the ditches which are filled by the cuts sliding after the spring rains. This condition is so bad at times that the track is completely covered by mud. The ditches however were well cleaned at the time of inspection. The embankments were

generally of a sufficient cross-section properly to support the tracks. The only exceptions were at some places on the high fills along the river bank. The material taken from the ditches and cuts is being used to widen the shoulder in these places. The alignment and surface are from fair to good. The rail in several places, and especially on the Andes branch, is surface bent, making it impossible to maintain a good surface on the track. The class of service performed is not materially affected by this condition. There are no unusual features in the location or operation of this railroad.

The track is laid with 43.89 miles of 65-lb. and 2 miles of 70-lb. open hearth rail joined with 4- and 6-bolt angle-bar splices. The rails and fastenings were in fair to good condition. The ties are oak, chestnut, and creosoted pine. The renewals amounted to 22,406 ties, or 23 per cent, on the main line, and 7686, or 35 per cent, on the Andes branch. Ties were distributed for renewals at the points most needing them, and when installed the tracks will be in good condition. There are about 11,000 creosoted pine ties in the tracks which have no tie-plates to protect them from rail cutting. Many of these ties are now badly cut by the rail and will be unfit for use in a short time if tie-plates are not put on at once. A treated tie will not have any longer life in track than an ordinary tie if it is not protected from rail cutting. Rigid and spring frogs, and automatic switch stands equipped with targets and lamps are in use. The ballast is gravel and cinders of fair to good quality and generally sufficient in amount. Cinder ballast is being applied, and the track raised where needed as fast as the cinders are available. The right of way is cleared and the fences were generally in good condition. The fence in several places on the Andes branch was down and should be repaired. The road crossings were well maintained with the following exceptions: the crossing-sign at the highway crossing east of Margaretville station should be re-located to be in clear view of both approaches to the crossing; the crossing-sign at Downsville road crossing should be painted. The average length of the track sections on the main line is 6.25 miles, and on the Andes branch 8.37 miles. The working force per section is 6 men on the main line and 8 men on the branch. This is sufficient for proper maintenance.

The bridge structures in number and kind are as follows: main line: 7 steel through truss spans, 5 steel through plate girder spans, 19 I-beam spans, 6 timber trestles, 53 concrete culverts, 81 pipe culverts; Andes branch: 2 steel through plate girder spans, 1 steel pony truss span, 1 I-beam span, 4 timber stringer spans, 3 timber trestles, 3 concrete culverts, 3 pipe culverts. While most of the steel bridges are old, they are in fair condition and fit for the class of service and wheel loads to which they are subjected. There are 9 timber trestles and 4 timber stringer spans aggregating 2485 feet in length which are a constant source of trouble and expense. I-beams can be used to replace the timber stringers in the 4 timber stringer spans at a slight increase in the initial cost, and will effect a considerable ultimate saving. An effort to eliminate the timber trestles should be made by substituting more permanent structures or where possible by filling. The trestle on the north approach to bridge No. 37 up to the new state highway could be filled with the materials from the cuts that are a constant source of trouble, thus eliminating two expensive items of constant maintenance expense. This particular trestle is in need of considerable repairs at this time. If a programme for replacing or filling these trestles were prepared covering a period of several years the expense would not be heavy in any one year, and the maintenance cost would be gradually reduced to a minimum. The minor defects in the bridges which were noted are as follows: main line: bridges Nos. 3 and 3½ have dirty bridge seats; bridges Nos. 4½ and 7½ need some new ties, and the bridge seats are dirty; bridge No. 7¾ needs some new ties; bridge No. 11 needs about 168 new ties and some new guard-rail; bridge No. 13 needs some new ties and guard-rail; bridge No. 13½ needs some new ties; bridge No. 16 needs some new ties and stringers, and the piles are bad: it is expected to cut off the piles and erect frame bents thereon; bridge No. 17 needs some new ties and guard stringers; bridge No. 22 needs some new ties; bridge No. 27 needs some new ties and guard stringers; bridge No. 28 needs some new ties; bridge No. 37, the pile trestle approaches need extensive repairs including new ties, stringers, caps, etc.: the 2 through truss spans over the river should have the dirt and cinders cleaned off of the iron work. Andes branch: bridge No. 1 should have outer guards; bridge No. 3 requires about 125 new ties, 5 new stringers, 1 cap, and 1 sill; bridge No. 3½ needs about 75 new ties, 4 sills, 7 caps, and 10 stringers; bridge No. 3¾ needs 26 new ties and should have outer guards; bridges Nos. 4 and 4½ need some new ties and outer guards; bridge No. 6¾ needed general repairs: the work was being completed at the time of the inspection; bridges Nos. 7 and 8 need some new ties. The materials for making these repairs have been ordered, and it is expected to have the repairs made during the year. On the timber bridges

a wooden block is used as a separator between the stringers. The substitution of cast spool washers would prolong the life of the stringers.

There are 13 frame station buildings in generally good condition. There is a bad plank in the station platform at Andes, and the toilets need repairs. The wooden platform at Shaver-town station needs some attention.

There are no grade crossings with other steam or electric railroads.

The passenger service performed consists of 4 trains daily in each direction on the main line and 1 train in each direction on the Andes branch. The principal items of traffic are coal, lumber, dairy and farm produce. Train movements are controlled by operating rules, timetable, and train orders. There are no automatic or other signals and no interlocking plants, and none are necessary with the present light traffic. The terminal road and passenger facilities appear adequate for the present business.

Since the previous inspection there has been no change in the mileage of main tracks or sidings. The tie renewals on the whole line amounted to 30,092, or about 25 per cent of the total ties. About 8 miles of the main track and 3 miles of the Andes branch have been re-ballasted with cinders. During this season it is expected to make the necessary bridge repairs, renew about 10,000 cross-ties, and re-ballast the tracks with cinders where most needed. Considerable progress has been made in bettering the condition of the tracks and bridges on this railroad, and with the contemplated tie renewals, re-ballasting and re-surfacing of parts of the track, and the bridge repairs completed it will be in good condition for the class of service performed.

It is recommended (1) that the defects in track and structures mentioned in the body of the report be given prompt attention; (2) that tie-plates be installed on the creosoted ties: in this connection it is suggested that the tie-plates could be punched for the 65-lb. and 70-lb. rail so that the plate can be used on the heavier rail if it is decided to relay a part of the light rail.

Respectfully,

W. G. HIMES,  
Inspector Division of Transportation.

#### DELAWARE, LACKAWANNA AND WESTERN RAILROAD.

Inspected August 10 to 13, 1914. Last previous inspection October 22 to 25; November 10, 11, 1913.

To the Public Service Commission, Second District:

I have inspected the Delaware, Lackawanna and Western railroad in the State of New York and submit the following report:

The lines of this railroad lying within the State of New York include a part of the Scranton division and all of the Buffalo, Syracuse, and Utica divisions. The mileage of the several lines is as follows: Scranton division: main line; state line near Conklin to Elmira, 68.27 miles; deducting 6.38 miles in State of Pennsylvania near Waverly gives distance in State of New York of 61.89 miles; Ithaca branch; Owego to Ithaca 34.41 miles. Buffalo division: main line; Elmira to Buffalo 146.45 miles; East Buffalo to Black Rock (a freight line), about 10 miles. Syracuse division: main line; Binghamton to Oswego 115.93 miles; Cincinnati branch: Cortland Junction to Cincinnati 18.31 miles. Utica division: main line: Chenango Forks to Utica 83.81 miles; Richfield Junction to Richfield Springs 21.70 miles. The main line of the Scranton and Buffalo divisions forms a continuous line with similar operating conditions throughout, and it will be treated as such in this report. The Syracuse and Utica divisions are separate lines with similar operating conditions and are operated under one superintendent. The main line and the Black Rock branch have double track throughout, and there is double track on the Syracuse division from Binghamton to Chenango Forks and from Cortland Junction to Apulia, a total of 31.96 miles. All of the other lines are single track.

The eastern part of the main line lies in the valleys of the Susquehanna, Chemung, and Cohocton rivers. A divide is crossed near Wayland and the line descends into the Genesee valley crossing the Genesee river near Mt. Morris. From the latter point westward to Lake Erie the country varies from rolling to level. The grades are moderate, excepting one heavy grade about 12 miles long on the eastern slope of the Genesee valley. The curvature is moderate throughout. The Syracuse and Utica divisions lie in the valleys of lesser streams, and both cross the divide between the southern and northern watersheds. The curvature is moderate, but there are fairly heavy grades on both lines. The smaller branch lines have no especially notable features, excepting at the north end of the Ithaca branch, where two switchbacks are used in descending from high ground to the level of Cayuga lake. The cuts and fills quite generally are stable, and with a few minor

exceptions they have a full cross-section. A large amount of tile drainage has been installed especially on the more important lines, and this work is being extended each season. The surface and alignment of the track generally are good, and in many places where ballasting and surfacing have been done recently the track surface is excellent. Improved track conditions were especially notable at various places on the main line, on nearly the whole of the Utica division, on much of the Syracuse division, and on the whole of the Cincinnati branch.

The rail on the main line consists largely of 101-lb. and 91-lb. open hearth steel, with small amounts of 90-lb. and 80-lb. Bessemer steel. The Syracuse and Utica divisions are laid largely with 90-lb., 80-lb., and 75-lb. rail, and the smaller branches are laid with 80-lb., 75-lb., and 60-lb. rail. A few defective rails were found, but the rail quite generally is in good condition. The track ties consist of yellow pine, oak, chestnut, and treated timber. The general condition of the ties is good, and the renewals were fairly well advanced at the time of the inspection. Where this work was completed the rate of renewal appeared to be ample for proper maintenance. The track appliances comprise split switches, both rigid and spring frogs, derails, tie-plates, screw spikes, and rail anchors. Switches in the single track lines are equipped with a rotating clamp under one rail which holds the stock rail and switch point together when the switch is set for the main track. As used on this road the switch stand and the clamp are locked with separate switch locks. It would facilitate the throwing of a switch to have the device so arranged that one lock would hold both handles. An advanced feature of track work on this railroad consists of the extensive use of heavy tie-plates and the fastening of the rails to the ties with screw spikes instead of the common driven spikes. These screw spikes evidently have great holding power, and they will allow very little possibility of spreading rails. A track equipped with shoulder tie-plates and screw spikes also is very rigid, this being clearly indicated by the fact that such a track can not be aligned by an ordinary section gang of 8 or 10 men. The cost of applying the screw spikes is greater than that of the driven spikes, and the most economical use of them will be with ties having a long life. Treated ties afford the best conditions in this respect, and they are being very largely used. It is necessary to bore the ties to receive the screw spikes, and it is intended as far as possible to dress the ties for the tie-plates and bore them for the screw spikes before treatment. This will insure the least destruction of the wood fibres and also will secure better penetration of the preservative. The ballast on the main line consists of about 158 miles of crushed stone and 50 miles of gravel. Extensive re-ballasting with both of these materials is in progress, the gravel being obtained from a pit near Lounsberry where it is washed and screened. The other lines are ballasted with gravel and cinders. All of the lines are well ballasted, the ballast having a good depth and the cross-section with few exceptions being well filled out. The right of way is clean and open and properly fenced. Concrete fence posts are being made at the Lounsberry gravel pit and are being used in fence renewals. The road crossings generally are in good condition and are equipped with the standard signs of this railroad. A number of crossings on the main line which require rebuilding are being paved with vitrified blocks. At several grade crossings, additional protection has been provided by the installation of the Brach Automatic Flagman, a signal in which an approaching train rings a bell and flashes a red light in imitation of a swinging lantern. The mileposts on this railroad do not correspond with most of the other features, repairs and painting being needed at many places. The track sections on double track lines have an average length of about  $3\frac{1}{2}$  miles with a force of 7 men per section. Single track lines have sections with an average length of 6 miles and a force of 7 men per section, excepting the Cincinnati branch where the sections are 9 miles long and the force for each section is 6 men.

Defects of various kinds were found in the track at the following locations: main line: a broken frog in a crossover at Apalachin; ballasting was in progress at the time of the inspection between Waverly and Lowman, and owing to a temporary stoppage of the ballast supply the old ballast had been removed from the track a distance of more than three miles in advance of the new ballast: there was a speed limit of 15 miles per hour on this section of track, and in order to prevent serious delays to trains it was arranged to reduce the amount of open track: at the east end of bridge No. 253.33 the old ballast had been removed below the bottoms of the ties and several of these were blocked on round boulders, some of which were loose: this condition was not safe for heavy trains even at slow speed; a swing in the westbound track between curves west of milepost 258: poor ballast and churning ties in the vicinity of bridges Nos. 272.82, 272.88, 273.75: new ballast also is to be applied in this territory; a broken angle-bar on bridge No. 272.82; loose rail anchors west of bridge No. 272.88; poor planking in a road crossing at Corning freight station; a loose rail joint with a slight lip on the rails in the westbound track west of bridge No. 288.75; a broken

frog at Bath; several loose rail anchors west of bridge No. 306.91; eastbound track rough for high speed west of Darien; loose rail joints at bridge No. 408.52. Ithaca branch: automatic signals were being installed at the time of the inspection, and several large holes which had been opened near the track for battery wells were left open over night without sufficient protection; 3 apparently piped rails, one on the west side of the track north of milepost 254, another south of the upper switchback, and the third near the chain factory switch; weeds in the track on the north end of this branch; a split end rail north of bridge No. 261.10. Black Rock branch; 2 draw-bars were lying along the west leg of the wye at East Buffalo; the bolt lock at the west wye switch could not be operated, although it was supposed to be in working order; a broken frog in a crossover east of Walden avenue and another in a crossover west of Kensington street. Syracuse division: insufficient ballast at the ends of the Chenango river bridge and on a curve north of bridge No. 214.60. Ballast repairs were in progress north of these points; a leaning crossing-sign south of Whitney Point; an apparently defective rail near the town line post north of Killawog; a few poor ties and ties not spiked north of milepost 242; a badly piped rail just north of the Lehigh Valley railroad crossing at Cortland: this rail should have been discovered and removed at an earlier date; poor planking in a crossing north of bridge No. 263.01; milepost 270 was broken; a narrow fill near milepost 270; rough track on a curve at milepost 312. Cincinnati branch: a broken frog near McGraw; poor planking in a crossing near Gee brook. Utica division: poor ties at the south end of bridge No. 217.64 and south of bridge No. 218.70; 2 apparently defective rails, one on the west side of the track north of bridge No. 232.78 and the other on the west side of the track about 6 telegraph poles north of bridge No. 234.01; 2 piped rails a short distance north of Haynes, and another piped rail on the west side of the track south of bridge No. 244.98; an apparently defective rail on the east side of the track about  $\frac{1}{2}$  mile north of Clayville; narrow fills at the ends of bridge No. 296.93. Richfield Springs branch: several broken angle-bars including one pair of bars at Richfield Springs.

This railroad has comparatively few timber bridges and culverts, the larger part of the timber structures being on the Cincinnati branch. The steel bridges generally are in good physical condition. Some of the bridges on the branch lines are of lighter construction than present standards and these are being replaced from time to time by heavier structures. At a number of bridges the concrete in the abutments and piers is badly cracked and scaled. This condition is on concrete which was put in some years ago. Concrete which has been put in more recently is in good condition, and repairs are made on the older work as necessity requires. A large number of bridge decks have been renewed in the past year or two, treated timber being used almost exclusively. Heavy tie-plates are used on nearly all bridges and are applied on all new bridge decks. An ordinary renewal of ties is required on other bridges, and this work is properly covered by the bridge programme, in many places the material already being on the ground. The timber blocks under many of the girders, which were mentioned in previous reports, are being replaced by suitable pedestals as rapidly as practicable.

The structural defects and other features requiring mention are as follows: main line: No. 205.66, the east abutment is unsound: it appears to be safe at present, but future repairs will be required; No. 217.28, the east abutment is in poor condition: it is to be rebuilt; Nos. 231.55 and 231.92, the inside guard-rails are not securely spiked on the approaches; bridge near milepost 275, the masonry needs pointing; No. 293.74, the drift underneath should be cleared. Ithaca branch: No. 227.40, the masonry needs pointing: a few of the seat stones are cracked, but this condition does not appear to be serious at present; No. 229.70, the deflection of the girders has split pieces off of the concrete piers, and repairs are being considered: drift should be cleared from under the bridge. Syracuse division: No. 231.54, brush should be cleared away from the bridge; No. 311.01 has a poor back wall. Cincinnati branch: a pile trestle east of East Freetown has bad shims under the stringers; a pile trestle west of No. 264.60 has some poor stringers: it is to be rebuilt. Utica division: No. 294.95 should have brush cleared away from the bridge. Richfield Springs branch: No. 308.59, the inside guard-rails are not securely spiked on the approaches.

The passenger stations quite generally are in good condition and well kept. Many of the stations have excellent concrete platforms, and attractive lawns are maintained at most of the important ones. At Buffalo, a new station is to be built in connection with extensive terminal improvements. At Utica, joint use is made of the New York, Ontario and Western Railway station, which is old and poorly suited to the needs of a city of this class. Several new brick and concrete stations have been built recently, and others are now under construction. These buildings are good examples of modern station design, and provide excellent facilities for the passenger traffic. New freight houses or improved facilities also have been provided at a number of the more important stations. The section tool houses are built

according to a standard design, and both the buildings and their surroundings present a very neat appearance. Minor repairs or improved conditions are needed at the following places: At Savona, the track has been raised above the platform; it was stated that the platform will be rebuilt at the proper elevation; Avoca, there was a public drinking cup in the waiting room; Atlanta, repairs are needed on the back platform; Chenango Forks, there was litter on the platform; Preble, the waiting room apparently had not been swept at 11:30 a. m.; Fulton, the platform was littered and dirty; the unloading of commercial coal on the tracks in front of the station makes a very dirty yard.

Main line grade crossings: At Elmira, 4 tracks are crossed by 1 track of the Lehigh Valley railroad, protected by mechanical interlocking. At Coopers, 2 tracks are crossed by 1 track of the Erie railroad, protected by mechanical interlocking. At Mount Morris, 2 tracks are crossed by 1 track of the Erie railroad and 1 track of the Pennsylvania railroad at different points, the two crossings being protected by separate interlocking plants. At Buffalo, 2 tracks are crossed by 3 tracks of the Pennsylvania railroad, protected by mechanical interlocking. At Buffalo, 2 tracks are crossed by 5 tracks of the Buffalo Creek railroad, 2 tracks of the Pennsylvania railroad, and 2 tracks of the New York, Chicago and St. Louis railroad; these three crossings are in close proximity and are protected by semaphore signals; this crossing will be eliminated by raising the Delaware, Lackawanna and Western tracks, the work now being in progress. At Elmira, 2 tracks are crossed by 1 track of the Elmira Water, Light and Railroad Company, protected by gates with day and night gate-men. At East Buffalo, 2 tracks are crossed by 1 track of the International railway, protected by derails and gates. At Buffalo, Clinton street, 2 tracks are crossed by 2 tracks of the International railway, protected by derails and gates.

Black Rock branch: At Black Rock, 2 tracks are crossed by 1 industry track of the Erie railroad, protected by trainmen when used by Erie trains. At Buffalo, 2 tracks are crossed by the international railway at four points: on Walden avenue, 2 tracks, protected by a flagman and derails; on Genesee street, 2 tracks, protected by gates and derails; on Bailey avenue, 2 tracks, protected by flagman and derails; and on Kensington avenue, 2 tracks, protected by a flagman and derails.

Ithaca branch: At Owego, 1 track is crossed by 5 tracks of the Erie railroad, protected by mechanical interlocking; and 1 track is crossed by 1 track of the Lehigh Valley railroad, protected by a one-arm semaphore signal. At Caroline Junction, 1 track is crossed by 1 track of the Lehigh Valley railroad, protected by a banner signal. At Ithaca, 1 track is crossed by 1 track of the Lehigh Valley railroad, protected by interlocked semaphore signals. At Ithaca, 1 track is crossed by 2 tracks of the Ithaca Street railway, without protection.

Syracuse Division: At Binghamton, 1 track is crossed by 4 tracks of the Erie railroad, and 1 wye track is crossed by 2 tracks of the Erie railroad, both crossings being protected by electric interlocking. At Binghamton, 2 tracks are crossed by 1 track of The Delaware and Hudson Company, protected by mechanical interlocking. At Cortland, 1 track is crossed by 1 track of the Lehigh Valley railroad, protected by mechanical interlocking. At Syracuse, 1 track is crossed by 1 track of the New York Central and Hudson River railroad, protected by mechanical interlocking. At Cortland, Elm street, 4 tracks are crossed by 1 track of the Cortland County Traction Company, protected by derails and a flagman. At Syracuse, the New York State Railways has five crossings: on Grape street, 1 track is crossed by 2 tracks, protected by derails and gates; on Onondaga street, 2 tracks are crossed by 2 tracks, protected by derails and a flagman; on West street, 2 tracks are crossed by 2 tracks, protected by derails and a flagman; on Walton street, 2 tracks are crossed by 2 tracks, protected by derails and a flagman.

Utica division: At New Hartford, 1 track is crossed by 2 tracks of the West Shore railroad, protected by mechanical interlocking. At Utica, 1 track is crossed by 1 track of the New York, Ontario and Western railway, protected by a tilting board signal. At New Hartford, 1 track is crossed by 2 tracks of the New York State Railways, protected by derails in the electric line. At Utica, 1 track is crossed by 1 track of the New York State Railways on Columbia street, protected by derails and gates; and 1 track is crossed by 1 track of the same electric line on Whitesboro street, protected by derails and a flagman.

The main line of this road carries a heavy traffic of both passengers and freight. At Buffalo, connection is made with western lines, and the company also has a coal dock on the lake front where coal is transferred to lake vessels. The main lines of the Syracuse and Utica divisions handle a moderate business, and the traffic on the other branches is light. The main line (Saratoga and Buffalo divisions), the Syracuse division from Binghamton to Chenango Forks and from Cortland to Apulia, and the Black Rock branch are operated with an automatic electric wireless block system, the signals consisting of 2-position home and distant motor-driven semaphores, working in the lower quadrant and standing normally clear. The main line of the Utica division

and the Syracuse division from Chenango Forks to Cortland and from Apulia to Fair Grounds are operated with an automatic electric block system, the signals consisting of single arm, 2-position lower quadrant motor-driven semaphores, standing normally clear and arranged with staggered over-lap. The Ithaca branch is now being equipped with automatic, 2-position, upper quadrant signals. On the other lines train movements are controlled by manual train order signals. Besides the interlocking plants at railroad crossings enumerated above, there are other interlocking plants as follows: At Binghamton new yard controlling switches at the west end of the yard; at Groveland controlling yard switches which are used frequently by pusher engines at that place; at East Buffalo, controlling the junction switches of the Black Rock branch; and at Utica controlling movements at the canal drawbridge. The facilities for handling both passenger and freight traffic generally are good. Additional facilities for freight business have been provided in recent years at various places, which give greatly increased capacity. The new Buffalo terminal and the new stations now building at several points on the line also will provide improved facilities for the passenger traffic.

During the past year the following improvements have been made: increase in amount of sidetracks, 2.65 miles; new rail laid: 34.10 miles of 101-lb. open hearth rail and 12.70 miles of 91-lb. open hearth rail; 20.75 miles of double track on the main line have been ballasted with crushed stone, and a considerable amount of repair ballasting has been done on the other lines with gravel and cinders; 7 bridges and 23 culverts have been rebuilt; 2 new stations have been built, 1 frame and 1 brick; grade crossings were eliminated at Robinson street, Binghamton, at Pleasant street, Utica, and at Delaware avenue, Buffalo; new engine houses were built at Ithaca and Groveland; a steel stand-pipe was erected at Norwich; a 25-ton electric crane was installed at Utica; new tool houses were built at Bath and Portway, and a new dwelling house was built at Alexander; various improved facilities were installed at the East Buffalo yard and shops; extensive painting was done on bridges and buildings on all of the lines; progress was made on the Buffalo terminal improvements, which include a new passenger station, the elimination of both highway and railroad grade crossings, and the construction of an interchange yard for joint use with the New York, Chicago and St. Louis railroad. The following notable improvements are either now under way or contemplated for the near future: a continuation of the work on the Buffalo terminal improvements; the construction of a rolling lift drawbridge at Buffalo creek; the elimination of 5 street crossings at grade in and near Buffalo; the completion of passenger stations which are now under construction at Greene, Oxford, and Haynes; the completion of second main track which is now under construction on the Syracuse division between Jamesville and Syracuse.

The type of maintenance which is aimed at on this railroad is high, and the actual conditions are reasonably close to the standards which are set up. Most of the defects which are listed above are of a minor character. The broken frogs which are mentioned do not make a dangerous condition in themselves, but it is not desirable to retain defective material in main track service. The rails which appeared from the inspection train to be defective should be examined to determine their fitness for further service.

The recommendations of the preceding report have been carried out. It is recommended that defective rails and frogs be removed from the track; that other defects of the track and roadway named in this report be remedied; that the defects of bridge and building structures named in this report be remedied, and that the proposed work on the company's structural programme be done.

Respectfully,  
J. B. STODER,  
Steam Railroad Inspector.

#### DUNKIRK, ALLEGHENY VALLEY AND PITTSBURGH RAILROAD.

Inspected June 8, 1914. Last previous inspection July 7, 1913.  
*To the Public Service Commission, Second District:*

I have inspected that part of the Dunkirk, Allegheny Valley and Pittsburgh railroad lying within the State of New York, and submit the following report:

This railroad has a single track line of standard gauge extending from its connection with the Lake Shore and Michigan Southern railway at Dunkirk to the state line near Fentonville, a distance of 42.26 miles. There are connections with the Erie railroad at Dunkirk and at Falconer.

This line ascends the slope lying south of Lake Erie, involving heavy grades and sharp curves. South of the summit near Lily Dale a rolling plateau is crossed, and the grades and curvature are moderate. The cuts and fills have a fairly good cross-section, and the drainage generally is good. The surface

and alignment of the track are fair to good. One place where the track surface should be improved was observed north of milepost 27.

A little more than one-half of the line is laid with 60-lb. rail and the remainder with various amounts of 65-lb., 70-lb., and 80-lb. rail. The rail is in fair condition and suitable for the traffic which is borne. The track ties consist of oak and chestnut timbers, and the general condition is good. The renewals, amounting last year to 11.7 per cent, appear to be sufficient for proper maintenance. The track appliances, consisting of split switches, rigid and spring frogs, and rigid and automatic switch stands, all appeared to be in good repair. The track is well ballasted with cinders and slag. The right of way is clean and well kept, and fences are maintained where they are required. The road crossings are in good condition and are equipped with signs. The track sections have an average length of about  $5\frac{3}{4}$  miles, and the average force per section is  $5\frac{1}{2}$  men. The amount of labor employed appears to be sufficient for maintaining the track.

There are 4 steel truss bridges and several plate girder and I-beam spans. These structures generally are in good condition, but 2 of the trusses appear rather light for modern railway loads. In one of these trusses, No. 36.96, the lower chord is buckled slightly, but it does not appear to affect the soundness of the structure. The speed of freight trains on these two bridges is limited to 10 miles per hour.

There is a considerable number of timber culverts and cattle-passes among which the following defects were found: No. 6.32, a small culvert, has a poor guard timber; Nos. 16.28 and 17.22 have some poor piles; No. 17.00, the abutments are cracked and are assisted by timber bents; No. 30.50 has some poor caps; No. 36.93 has a few poor piles and some poor guard timber; Nos. 38.43, 40.09, and 40.39 have some poor piles; No. 38.20 carries the railroad over the Warren and Jamestown electric railway, and the south abutment has settled as mentioned in previous reports; on the day of the inspection the bridge forces of the electric railway were putting in framed steel braces between the abutments to prevent further movement, but it seems doubtful if this expedient will afford more than temporary relief. An examination of the bridge structures was made recently by the company's inspector, and it was stated that necessary repairs will be made.

The station buildings are of frame construction, and although most of them are small they are in good condition and appear to afford suitable facilities for the traffic.

At Dunkirk, 1 track is crossed by 1 sidetrack of the Erie railroad without protection; 1 track is crossed by 1 track each of the New York, Chicago and St. Louis and the Pennsylvania railroads, these two lines being parallel and close together: the crossing is protected by a tilting board signal; nothing has been done toward separating the grades or providing interlocking at this place as suggested in previous reports. At Falconer Junction, 1 track is crossed by 2 tracks of the Erie railroad, protected by mechanical interlocking. At Fredonia, 1 track is crossed by 1 track of the Buffalo and Lake Erie Traction Company, protected by a flagman between the hours of 6 a. m. and 6 p. m.; there also is a trolley guard overhead, and there are derails in the electric railroad, but it was stated that the latter device is not operated during the winter season.

There is only a light traffic on this line, and the facilities appear to be adequate for handling it. Train movements are controlled by timetable schedules, telephonic train orders, and the standard operating rules.

The following improvements have been made during the past year: increase in sidetracks 0.49 mile; new 80-lb. rail laid replacing 65-lb. rail 1.57 miles; relayer 65-lb. rail laid replacing 60-lb. rail 0.05 mile; tie renewals 12,769 ties, or about 11.7 per cent; ballasting 6.07 miles with cinders; 1 timber culvert replaced by an iron pipe.

The recommendations of the preceding report generally were carried out, and the property as a whole is in reasonably good condition for handling its traffic. It is recommended that the necessary repairs be made to the bridge structures.

Respectfully,  
J. B. STOUTER,  
Steam Railroad Inspector.

#### ERIE RAILROAD.

Inspected August 31 to September 8, 1914. Last previous inspection October 27 to November 19, 1913.

To the Public Service Commission, Second District:

I have inspected the Erie railroad in the State of New York and submit the following report:

The Erie railroad system comprises a trunk line from Jersey City, N. J., to Chicago, Ill., with numerous branch lines to

various cities and towns not on the main line. The location and length of the lines which lie within the State of New York are shown in the tables. Under each division are included all the lines which are operated under a division superintendent, except the Bath and Hammondsport railroad for which a separate report is made.

NEW YORK DIVISION				Length, miles
Line	From	To		
Main line	State line near Suffern	Sparrowbush		59.50
Newburgh branch	Graycourt	Newburgh		18.73
Newburgh short cut	Newburgh Junction	Vail's Gate		12.64
Montgomery branch	Goshen	Montgomery		19.45
Pine Island branch	Goshen	Pine Island		11.64
Crawford branch	Middletown	Pine Bush		10.22
Nor. R.R. of N. J.	State line near Tappan	Nyack		5.82
N. J. & N. Y. R.R.	State line near Pearl River	Haverstraw		12.85
New City branch	Nanuet Junction	New City		4.29
Pi-mont branch	Pi-mont	Suffern		18.00
Greenwood Lake division	State line near Sterling Forest	End of line		0.02
Erie & Jersey railroad	Highland Mills	Crainin		38.60

The main line and the Erie and Jersey railroad have double track throughout. The main line also has third main track 10.05 miles, and fourth main track 0.90 mile. The Newburgh branch, the Newburgh short cut, and the Northern Railroad of New Jersey have a few miles of double track each, aggregating 12.53 miles.

DELAWARE DIVISION				Length, miles
Line	From	To		
Main line	Sparrowbush	State line near Sparrowbush		0.85
Main line	State line near Tusten	State line near Gulf Summit		68.82

Part of this division lies in the State of Pennsylvania, the total distance from Sparrowbush, N. Y., to Susquehanna, Penna., being 102 miles. It is double track throughout.

SUSQUEHANNA DIVISION				Length, miles
Line	From	To		
Main line	State line near Riverside	Hornell		130.12
Tioga division	Elmira	State line near Seeley Creek		6.51

The total length of the Susquehanna division, main line, Susquehanna, Penna., to Hornell, N. Y., is 140 miles. It is double track throughout.

ALLEGHENY DIVISION				Length, miles
Line	From	To		
Main line	Hornell	Dunkirk		128.02
Bradford division	Carrollton	State line near Limestone		7.84
Genesee River R.R.	Hunt's	Cuba		32.60

The main line has 30.13 miles of double track. The other lines are single track.

MEADVILLE DIVISION				Length, miles
Line	From	To		
Main line	Salamancas	State line near Niobe		48.3
Columbus and Erie	Niobe Junction	State line near Niobe		1.5

The main line has 36.9 miles of double track.

BUFFALO DIVISION				Length, miles
Line	From	To		
Main line	Hornell	Buffalo		92.04
Falls branch	East Buffalo	Suspension Bridge		24.01
International branch	International Junction	Black Rock		4.50
Black Rock branch	Yard tracks only			1.14
Buffalo and Southwestern branch	Buffalo Creek Junction	Waterboro		55.79

The main line and International branch are double track throughout. The Falls branch and the Buffalo and Southwestern branch have 6.40 miles and 0.64 mile of double track, respectively.

ROCHESTER DIVISION				Length, miles
Line	From	To		
Main line	Painted Post	Rochester		92.51
Mt. Morris branch	Avon	Mt. Morris		17.70
Conesus Lake branch	Conesus Lake Junction	Lakeville		1.61
Attica branch	Avon	Attica		34.90

All of these lines are single track.

New York division: The main line from Suffern to Port Jervis crosses a rolling and mountainous country, utilizing creek valleys and gaps in the hills. The Shawangunk mountains are crossed at Otisville, and a descent is made with a heavy grade down the valley of Neversink river to the Delaware river at Port Jervis. The curvature on this line is moderate. The Erie and Jersey railroad is a low grade freight line which pierces the upper part of Shawangunk mountain with a double track tunnel about one mile long. The grades and curvature on this line are moderate. The other lines which are operated with the New York division present no unusual features of location or operation, and the grades and curvature are not excessive for the traffic which is handled. The cuts and embankments on the various lines of this division generally are in good condition with a suitable cross-section for supporting the ballast. Good track ditches generally

are provided for surface drainage. The Erie and Jersey railroad, however, presents some unusual features, the uniform low grade requiring heavy cuts and fills. Many of the cuts are through rock which lies in steeply inclined strata, and in a number of places it has been necessary to support the sides of these cuts with concrete buttresses. Slides in some of the earth cuts continue to fill the ditches and a ditching train was in service at the time of the inspection. A large amount of work is required to keep this line in suitable condition for operation and the results generally are good.

The surface and alignment of the track are good on the heavy traffic lines and from fair to good on the lines of lighter traffic.

Delaware division: The main line follows closely the Delaware river from Port Jervis to Deposit, and then crosses a divide between the Delaware and Susquehanna rivers. There are heavy grades over this divide, and there are many curves along the river, the maximum being 6 degrees. The cuts and fills are in good condition, and suitable ditches are provided. The surface and alignment of the track are good.

Susquehanna division: The main line from Susquehanna, Penna., to Hornell lies in the valleys of the Susquehanna, Chemung, and Canisteo rivers with moderate grades and curvature. The cuts and fills are in good condition, and the drainage generally is good. A feature which is especially troublesome on this division is the choking up of small waterways under the track by gravel which is washed down from the hills by freshets. The track occasionally is flooded, and a large amount of work is required to keep these gullies open. The surface and line of the track generally are good. The Tioga division extends southwestward from Elmira. Its condition generally is suitable for the traffic, which is light.

Allegheny division: The main line from Hornell westward extends across the upper watershed of the Genesee river crossing summits at Tiptop and near Cuba, and then descends the valley of the Allegheny river to Salamanca. The line to Dunkirk crosses a rolling country. This line originally was a part of the main line of the Erie railroad, but when the road was extended to the west it became practically a branch. The grades on both parts of this division are heavy but the curvature is moderate. The cuts and fills are in good condition. Some of the ditches need cleaning as noted under the track defects. The surface and line of the track are fair to good and suitable for the traffic. The Genesee River railroad is a low grade freight line. From Hunt's, where this line connects with the Buffalo division, it extends along the eastern slope of the Genesee valley, crossing the Genesee river near Belfast, and continuing westward along a creek valley joins the Allegheny division near Cuba. The grades and curvature are very moderate. The cuts and fills are heavy, and as the soil in this district is notably unstable when wet, a great deal of trouble has been experienced with slides. Many of these slides are of considerable extent, involving a large amount of material, and a heavy expenditure has been required to keep the line open. At the time of the inspection, however, the general condition was fairly good. The track surface is fair and a large amount of drainage work has been done, including the laying of tile drains. This line undoubtedly will require heavy maintenance expenditures for a number of years, but it affords a route over which heavy freight can be handled very economically.

Meadville division: The main line leaves the Allegheny valley near Steamburg and crosses a rolling country to the state line. The grades and curvature are fairly heavy. The Columbus and Erie railroad is another low grade freight line, only a small part of which is in this State. The cuts and fills are in good condition and suitable track ditches are provided. The surface and alignment of the track generally are good.

Buffalo division: The main line and the Buffalo and Southwestern branch both extend from the rough country in the southern part of the State to the level region near Buffalo. The main line crosses the gorge of the Genesee river at Portage on a trestle 820 feet long and 235 feet high. The grades and curvature on this line are fairly heavy but between Hornell and Hunt's the grades were reduced in connection with the construction of the Genesee River railroad. The Buffalo and Southwestern branch has a very heavy grade where the line crosses the valley of Cattaraugus creek. The cuts, fills, and track ditches on this division generally are in good condition. The track surface on the several lines is from fair to good.

Rochester division: The lines of this division extend across rolling and level country with moderate grades and curvature. The cuts, fills, and drainage generally are good. The track surface and alignment are from fair to good and suitable for the traffic.

The rail on the main lines of all divisions, excepting the Buffalo and Rochester divisions, consists of 90-lb. and 100-lb. sections. There is a considerable mileage of open hearth steel, but the larger proportion is Bessemer steel. There also is a considerable amount of heavy rail on other heavy traffic lines.

The lines of lighter traffic are laid with 63-lb., 74-lb., and 80-lb. rail. The heavier sections of rail which have been laid in recent years generally are in good condition. Some of the older rail is considerably worn and prevents the maintenance of first-class track under the traffic which is carried. Additional heavy rail is being laid as rapidly as practicable. On the Buffalo and Southwestern branch new rail was being laid at the time of the inspection and it was observed that the ties were not full spiked and the joints were not full bolted. This condition was not serious but it was evident that the work would be postponed at least one night. In laying rail elements of danger are liable to creep in unless the work is carefully organized and supervised, and it seems to be a safer plan to have the new rail fully bolted and spiked each day. A few defective rails were found in various places as noted under the track defects.

The track ties consist chiefly of yellow pine with smaller amounts of oak and chestnut. Treated timber is used largely on the heavy traffic lines but not exclusively. The renewals for the current season appeared to be 65 per cent completed, and the rate of renewal is sufficient for proper maintenance. It would be a great aid in track maintenance, however, to have the tie renewals completed by September 1st in order that the roadbed may become well compacted during the fall months. The ballast consists of crushed stone, gravel, slag, and cinders. The use of crushed stone is being extended on the eastern part of the trunk line. On other lines re-ballasting is being done in several places with gravel and slag. The track appliances comprise split switches, rigid and spring frogs, and rigid and automatic switch stands equipped with targets and lights. Heavy tie-plates are used extensively, especially on the heavy traffic lines. Rail anchors are used to some extent, and screw spikes are used with some of the heaviest rail. Derails are used where protection of that kind appears desirable. A few broken frogs were found at points noted below. The right of way generally is clean and properly fenced. Mowing has been done by contract this season, and it was stated that the results have been very satisfactory. Most of the road crossings are in good condition and are equipped with proper signs. It was observed, however, that in some cases cinders are used for road repairs at crossings. Under heavy highway traffic this material soon becomes pulverized and something more durable should be used. The track sections have various lengths from 4 miles to 10 miles of single track, and the track forces are from 6 men to 12 men per section during the working season. Extra gangs are employed on rail renewals, ballasting, and other heavy work.

The following track defects were found:

New York division: main line: poor switch ties at Arden; broken frog in westbound track east of bridge No. 46.32; a rail in the eastbound track east of bridge No. 65.55 was reinforced with two extra pairs of angle-bars; a rail which has developed two weak spots is not suitable for service in high speed track; an apparently defective rail on the north side of the westbound track west of bridge No. 73.59; Newburgh branch: broken frog in crossover west of bridge No. 18.55; Newburgh short cut: the signals need adjusting at Highland Mills; Pine Island branch: a number of telegraph poles are not plumb, some leaning toward the track in the marshy ground near the south end of the line; rough track between bridges Nos. 64.57 and 66.74; loose track bolts near Goshen; Crawford branch: rough track south of Thompson's bridge; poor ties and rough track north of Circleville; relay rail was distributed, and it was stated that all needed repairs will be made in connection with the renewal of 4 miles of rail; New City branch: an apparently defective rail on the west side of the track north of Germonds; Piermont branch: apparently defective rails on the north side of the track west of milepost 7 and on the south side of the track west of milepost 11; Erie and Jersey railroad: curve-worn rail on the eastbound track on bridge No. 50.17 (Woodbury trestle); ditches partly filled in a deep cut west of milepost 70 and in another cut east of bridge No. 74.50; both tracks rough west of bridge No. 76.90.

Delaware division: ditch filled in a wet cut west of milepost 121; westbound track rough for high speed east of milepost 143, between mileposts 167 and 168, west of milepost 169, and west of Deposit.

Susquehanna division: main line: some worn and apparently defective rails on the south side of the westbound track west of bridge No. 210.92; iron scrap was scattered along the track through Binghamton; westbound track rough between bridge No. 219.38 and milepost 220; an apparently defective rail on the south side of the westbound track west of milepost 223; broken frogs at Waverly and at MJ tower; a badly churning rail joint at Water street, Elmira; a broken frog at VO tower; ditches filled between bridges Nos. 298.15, and 299.02; some worn rails on south side of the westbound track west of milepost 300; westbound track rough east and west of Addison; a churning joint in the eastbound track at Addison; poor ballast with churning joints in the westbound track between bridge No. 312.48 and milepost 314; loose track bolts, and a lip at one rail joint on the eastbound track at Cameron.

Allegheny division: main line: curve-worn rail on bridge No. 341.89; a broken frog at OP tower (Tiptop); a piped rail on the south side of the track west of WC tower; apparently defective rails on the north side of the track east of bridge No. 414.04; on the north side of the track between milepost 415 and bridge No. 415.69; and on the south side of the track west of Leavenworth street, Cattaraugus; ditches need cleaning at several places between Smith's Mills and Sheridan; Bradford branch: apparently defective rails on the east side of the track south of milepost 3 and on the west side of the track north of bridge No. 5.47; a piped rail a short distance north of the state line.

Meadville division: main line: a lip at a rail joint on the westbound track east of RH tower; poor track ties west of Randolph: tie renewals were in progress about one mile east of this place; a broken frog at Jamestown; a piped rail on south side of the westbound track between the first two bridges west of Watts Flats.

Buffalo division: main line: a rail with a mashed end on the north side of the eastbound track east of Burns: ditches filled east of milepost 343; a piped rail and a rail with a halfmoon break in the flange on the north side of the eastbound track west of bridge No. 362.47; poor ties in the westbound track at Warsaw; ditches filled east of milepost 381; eastbound track rough for high speed between milepost 387 and 388; poor alignment through a road crossing east of Attica; Falls branch: at DF tower some of the foundations which carry the signal wires are in poor condition; a broken frog east of milepost 11; poor switch ties west of bridge No. 13.09; track rough for high speed west of LaSalle; an apparently defective rail on the south side of the track west of FX tower; a piped rail west of South avenue, Suspension Bridge; Buffalo and Southwestern branch: a piped rail on the east side of the track south of Bladell; an apparently defective rail on the east side of a curve south of the bridge road; a narrow fill at the south end of bridge No. 11.97; poor planking in a road crossing south of Hamburg; poor switch ties south of Conewango; an apparently defective rail on the east side of the track between milepost 53 and the first bridge southward.

Rochester division: main line: poor planking in a sidewalk at Savona; ditching needed between bridges Nos. 349.37 and 349.87; weeds in the track and in the ditches between mileposts 352 and 353; ditching needed east of South Lima; an apparently defective rail on the north side of the track east of milepost 359; ditches filled east of milepost 361; insufficient ballast between mileposts 362 and 363; brush on the right of way in the vicinity of milepost 371; Mt. Morris branch: the ditches are choked with weeds in several places; Conesus Lake branch: there are some poor track ties on this line: it was stated that the necessary renewals will be made this season; Attica branch: mowing needed in the vicinity of milepost 370-371; weeds in the track east of Alexander.

Most of the bridges and culverts on this railroad have been built in some permanent form of masonry and steel. Some of these structures however were built a number of years ago and are rather light for modern railway loads. Timber bents have been placed under some of these light bridges to reinforce them for the carrying of heavier loads. Narrow abutments of an obsolete type also are found at a few of the bridges. Heavier structures of modern design in both steel and concrete are being installed as rapidly as practicable. Owing to the raising of the track in ballasting, many of the bridges rest on wooden blocks. This is not objectionable for a temporary arrangement but it prevents the proper anchorage of the girders to the masonry, and it was observed that in many cases the blocks have an excessive height in proportion to the length and breadth. Permanent bridge seats should be provided as rapidly as possible. As mentioned in previous reports, many bridges of lengths up to 60 feet or 70 feet are not equipped with inside guard-rails. Experience has demonstrated the value of guard-rails as a safety device, and it certainly is desirable that they should be more generally applied on the bridges. The ties and guard timber require renewal on many of the bridge decks. Most of this work is provided for, and the bridge programme apparently is sufficient to maintain the structures in safe condition. There are a few timber bridges on some of the branch lines and these also are in fair to good condition.

Structural defects and other features requiring detailed mention are as follows:

New York division: main line: No. 32.10 has a few poor ties; No. 33.94 needs patch painting; No. 35.51 has been raised on short blocks, one of which is getting soft; No. 38.08 has some poor ties and guard timber and a loose plank on the deck; No. 51.03, located on a curve, rests on high, short wooden blocks; No. 86.52 has some poor ties; Newburgh branch: No. 0.52 has some poor ties and guard timber; Nos. 7.35 and 9.48, the masonry needs pointing; Newburgh short cut: No. 47.53, the steel needs pointing; Montgomery branch: No. 3.43, one bearing is slightly low; No. 3.77, the masonry needs pointing; Pine Island branch: Nos. 64.36 and 64.57 have some poor ties; No. 66.74 has a loose block under one of the stringers at the north end; Crawford branch:

No. 5.70, the masonry is in poor condition and the structure is to be rebuilt; Northern Railroad of New Jersey: No. 22.51 has some poor guard timber; culvert near Nyack has some soft blocks under the stringers; New Jersey and New York railroad: No. 31.67, the steel needs painting; No. 38.80, the bridge seats need cleaning; No. 41.16 has a few poor ties; No. 41.18, the guard timber was loose, and a few of the ties were skewed; New City branch: No. 28.29 has soft blocks under the girders and the abutments are cracked; Piermont branch: No. 6.71, the bridge seats need cleaning; Nos. 14.76 and 14.91, highway bridges overhead, need some new stringers and flooring; No. 16.18 has some poor ties and guard timber.

Delaware division: Some of the larger bridges on this division need painting, and it was stated that the work is to be done this season: No. 134.91 has some poor ties and the masonry needs pointing; Nos. 142.24 and 146.52 have some poor ties.

Susquehanna division: main line: No. 205.80, the masonry needs pointing; No. 209.57, the back walls are tight against the girders: the latter are reinforced by timber bents; Nos. 210.75 and 212.52, the bridge seats need cleaning; No. 210.92, brush should be cleaned out underneath the bridge; No. 213.28 has poor ties on the eastbound track, and the bridge seats need cleaning; No. 214.05 needs painting, and there are some poor ties at rail joints on the eastbound track; No. 217.501, the bridge seats need cleaning; No. 224.10, the east abutment needs pointing; Nos. 236.68, 238.31, 247.18, 252.11, and 254.36 have cracks or open joints in the masonry; No. 238.31 also has some poor ties; Nos. 266.09 and 269.50 have some poor ties; No. 269.31, drift should be cleared away from the bridge; No. 272.20, the masonry is cracked in places, but appears to be safe at present: there is some corrosion of the stringers from brine drippings, and the floor system should have better protection: both the main and guard-rails are poorly spiked in places; No. 283.81 has some poor guard timber, and No. 284.17 has a poor deck: the latter is to be rebuilt; No. 286.71 has some poor ties on the eastbound track, and the east abutment needs pointing; No. 286.84, the masonry needs pointing, and a walk on the deck needs repairs; No. 287.95 has some poor ties on the westbound track; No. 292.39 needs patch painting; No. 326.63 has one poor block under one of the girders: a pipe culvert probably will be put in; Tioga branch: Nos. 3.74, 5.21, 7.07, and 8.76 are combination structures in which the timber portions require various new members: it was stated that the renewals are to be made this season.

Allegheny division: main line: No. 340.63 has narrow abutments, the westerly one being in poor condition: the southeast bridge seat also is cracked; No. 340.89, two wings of the abutments are cracked; No. 349.37, the wooden blocks under the girders are getting soft; Nos. 353.15 and 355.34 have some poor ties; No. 373.54, a sidewalk under the bridge is in poor condition; No. 404.08, the narrow abutments are in poor condition and should be rebuilt; No. 410.51, the east abutment is in poor condition: it is to be rebuilt; Nos. 411.24 and 411.34 have poor deck timbers: at the latter, the drift should be cleared away; Nos. 414.86, 415.69, 416.51, 420.67, 450.51, 451.32, 455.65, and 456.20 have poor ties; Bradford branch: Nos. 0.89, 1.17, 1.38, 1.94, and 7.57 are timber structures in which various timbers require renewal: heavy repairs were in progress at No. 2.01, and it was stated that the necessary work will be done on the other bridges; Genesee River railroad: The concrete is scaling at a number of the bridges: the condition is not serious at present but facing probably will be required in the future to prevent serious disintegration.

Meadville division: main line: No. 1.49 has some poor ties and the east abutment needs pointing; bridge west of RH tower, a wooden block on the northwest bridge seat is crushing; No. 18.15, the masonry needs pointing; Nos. 18.50 and 22.57 have some poor deck timbers; No. 22.88 has some poor ties, and the masonry needs pointing; No. 25.23 has some poor ties, and the bridge seats need cleaning; No. 29.26, the masonry needs pointing; Nos. 32.36 and 33.10 have poor ties; No. 34.52, the masonry is very poor: this bridge is to be rebuilt in the Jamestown improvement work which is now in progress; bridge east of Lakewood has some poor ties and needs painting; 2 bridges west of Watts Flats have a few poor ties; bridge east of Niobe Junction, the east abutment is cracked; Columbus and Erie railroad: bridge near Niobe Junction has some poor ties.

Buffalo division: main line: Nos. 332.02 and 336.55 have some poor ties; Nos. 347.70 has some poor ties, and the steel needs painting; No. 348.58, the steel needs painting, and the bridge seats need cleaning; Falls branch: No. 3.55, a bridge seat is cracked, and the counterbraces need adjusting; No. 13.21 has a few poor ties; No. 19.23, a bolt was missing from a splice on an adjustable counterbrace: the splice was placed over the turnbuckle owing to the threads having been stripped; Buffalo and Southwestern branch: Nos. 5.86 and 5.96, the masonry needs pointing; No. 7.18 has some poor ties; No. 8.88 has a soft block under a girder; No. 13.97, the abutments are cracked but

appear to be safe at present; No. 15.96, the south abutment needs pointing; No. 22.25, the bridge seats need cleaning; Nos. 28.20, 30.32, and 32.83, the masonry needs pointing; No. 32.92 has some poor ties; No. 43.84 has some poor ties, and a poor bridge seat on one of the piers; No. 54.07, a pile trestle about 100 feet long, has no inside guard-rail: there are a few poor ties.

Rochester division: main line: No. 293.32 has a poor deck: it is to be rebuilt; Nos. 294.17 and 294.19 have a few poor ties, caps, and sills which are to be renewed; No. 296.41 has a badly cracked bridge seat on one of the piers; No. 299.18 has some poor ties; No. 299.75 is a light plate girder reinforced with timber bents: it is to be rebuilt; Nos. 303.50 and 304.64 have some poor deck timbers; No. 306.61, mowing should be done under the bridge; No. 310.61, a walk by the bridge is not secure; No. 310.94, the masonry needs pointing; No. 318.18, has some poor ties, the guard-rail is not securely spiked on the ground, and the steel needs painting; Nos. 320.38, 320.55, and 320.99, the ties had not been properly adzed for new rail joints, and some of the angle-bars were spiked in the slots; No. 322.20 has some poor ties; No. 322.50, the track surface is poor; bridge west of milepost 328, brush under the bridge should be cleared away; bridge west of milepost 345 has a narrow fill at the east end; No. 361.10 has some poor wooden blocks under the girders, and the inside guard-rail is not securely spiked; No. 383.27 is a very light structure across the Genesee river near Rochester, the rebuilding of which has been delayed awaiting the completion of Barge Canal plans: there are a few loose rivets which are to be re-driven soon; Mt. Morris branch: No. 379.60 has some poor guard timber; Attica branch: No. 380.36 has wooden blocks on the bridge seats, some of which are getting soft; culvert west of the New York Central crossing at Batavia has poor sills; No. 394.55 needs painting and brush under the bridge should be cleared away.

Many of the passenger stations are of frame construction and were built a number of years ago. Most of these furnish fair accommodation, but some of them are very dingy and could be greatly improved by painting. The frames of these buildings generally are heavy and in good condition, and as many of them are of ample size they are being improved by the application of a stucco finish. With the addition of toilets and other facilities the improved stations are suitable for modern traffic conditions. Many of the stations are not as well kept as they should be. Comparatively few stations gave evidence of recent scrubbing, and at a great many stations the morning sweeping apparently had been neglected. The station at Rochester appears to be of sufficient size and fairly suitable for that terminal. The station at Buffalo is used jointly by other railroads, and it is too cramped to furnish all the desirable facilities at a terminal of such importance. Repairs or improved conditions are needed at various stations as follows:

New York division: Hillburn, the building needs painting, and the waiting room needed sweeping; Southfields, a broken concrete platform and the building needs painting; Chester, posts along the platform curbing project above the surface; Salisbury Mills, there was litter around the station; Montgomery, there was litter in the waiting room; Thompson's Bridge has a poor cinder platform; Bullville, there was express matter piled in the waiting room although there is a separate freight room; Sparkill, there was litter on the platforms, and the station was being swept at 9:50 a. m.; Pearl River, there was litter around the station; Mt. Ivy, a poor cinder and gravel platform.

Delaware division: Callicoon, the floor needed scrubbing.

Susquehanna division: Union, there was litter around the station, and the platform was muddy at the door-step; Tioga Center, needs painting; Horseheads, the freight room was dirty, and both commercial and railroad freight was scattered about in disorder, both inside and outside; Addison, the building needs painting, and the back platform needs minor repairs.

Allegheny division: Andover has a poor platform and the station needed sweeping.

Meadville division: Kennedy, the back platform needs slight repairs.

Buffalo division: Dalton, the waiting room, baggage room, and platform were very dirty; Silver Springs, the waiting rooms and platform needed sweeping; Warsaw has a poor timber curbing on the platform; Darien has some poor planking in the platform; Blasdell, the waiting room floor was dirty; Hamburg, needs painting; Eden Center, there was litter on the platform; Markhams has a poor platform; Cherry Creek, the platform was dirty.

Rochester division: Avon, the floor of the waiting rooms is deeply worn; Golah, there are no name signs: the building belongs to the New York Central and Hudson River railroad and is used jointly by the two railroads; Genesee, needs painting both inside and outside.

Grade crossings are as follows:

New York division: steam railroads: At Sparkill, 1 track of the Northern Railroad of New Jersey is crossed by 1 track of the Piermont branch, protected by a high target. At Nanuet,

2 tracks of the Piermont branch are crossed by 1 track of the New City branch, protected by a high target. At Campbell Hall, 1 track of the Montgomery branch is crossed by 2 tracks of the Erie and Jersey railroad, protected by mechanical interlocking. At Campbell Hall, 1 track of the Montgomery branch is crossed by 2 tracks of the New York, Ontario and Western railway, protected by interlocked signals but no derails. Electric railroads: At Middletown, 3 tracks of the main line are crossed by 1 track of the Wallkill Transit Company, protected by gates and derails in the electric line.

Delaware division: There are no grade crossings with other railroads on this division.

Susquehanna division: steam railroads: At Binghamton, 2 tracks are crossed by 1 Y track and 4 tracks are crossed by 1 main track of the Delaware, Lackawanna and Western railroad, both crossings being protected by interlocking. At Owego, 5 tracks are crossed by 1 track of the Delaware, Lackawanna and Western railroad, protected by mechanical interlocking. At Corning, 2 tracks are crossed by 2 tracks of the New York Central and Hudson River railroad, protected by mechanical interlocking. Electric railroads: At Elmira, on Water street, 2 tracks are crossed by 2 tracks of the Elmira Water, Light and Railroad Company, protected by gates. At Elmira Heights, on Fourteenth street, 2 tracks are crossed by 1 track of the Elmira Water, Light and Railroad Company, protected by a flagman.

Allegheny division: steam railroads: At Olean, 2 tracks are crossed by 2 tracks of the Pennsylvania railroad, protected by mechanical interlocking. At Limestone, 1 sidetrack is crossed by 2 tracks of the Buffalo, Rochester and Pittsburgh railway, protected by a tilting board signal. At Riverside Junction, 1 track is crossed by 1 track of the Pennsylvania railroad, protected by a tilting board signal. At Dunkirk, 1 track is crossed by 1 track of the Pennsylvania railroad, and 1 track of the New York, Chicago and St. Louis railroad, in close proximity, protected by a tilting board signal. At Dunkirk, 1 track is crossed by 1 sidetrack of the Dunkirk, Allegheny Valley and Pittsburgh railroad, protected by semaphores not interlocked. At Dunkirk, 1 yard track is crossed by 2 tracks of the Lake Shore and Michigan Southern railroad, protected by an interlocking plant. Electric railroads: At Allegany, 2 tracks are crossed by 1 track of the Western New York and Pennsylvania Traction Company, protected by derails and a flagman.

Meadville division: steam railroads: At Falconer, 2 tracks are crossed by 1 track of the Dunkirk, Allegheny Valley and Pittsburgh railroad, protected by mechanical interlocking. Electric railroads: 2 crossings at Jamestown by the Jamestown Street railway: on Main street 2 tracks are crossed by 1 electric track, protected by gates and a derail in the electric line on a grade descending toward the crossing; on Fairmount avenue 2 tracks are crossed by 1 electric track, protected by gates.

Buffalo division: steam railroads: At Buffalo, Seneca street, 4 tracks are crossed by 1 track of the Pennsylvania railroad, 2 tracks of the Buffalo Creek railroad, and 2 tracks of the Pennsylvania railroad, protected by sliding signals in a tower: an interlocking plant is now being installed. At Buffalo, Hamburg street, 4 tracks are crossed by 2 tracks of the Lake Shore and Michigan Southern railroad, protected by a tilting board signal; and 2 tracks are crossed by 4 tracks of the New York Central and Hudson River railroad, protected by an interlocking plant. At Tonawanda, 1 track is crossed by 2 tracks of the New York Central and Hudson River railroad, protected by mechanical interlocking. At North Tonawanda, 2 tracks are crossed by 2 tracks of the New York Central and Hudson River railroad, protected by electric interlocking. At Suspension Bridge, 1 track is crossed by 4 tracks of the New York Central and Hudson River railroad, protected by an interlocking plant. At Black Rock, 2 tracks are crossed by 2 main tracks and 2 connection tracks of the New York Central and Hudson River railroad, protected by an interlocking plant. At Black Rock, 1 yard track is crossed by 2 freight tracks of the Delaware, Lackawanna and Western railroad, protected by Erie trainmen when used by their trains. At Blasdell, 1 track is crossed by 1 track of the New York, Chicago and St. Louis railroad, and 1 track of the Pennsylvania railroad, protected by a tilting board signal. Electric railroads: At Lancaster, 2 tracks are crossed by 1 track of the International railway, protected by derails in the electric line. At Cheektowaga, 2 tracks are crossed by 1 track of the International railway, protected by derails in the electric line. At Buffalo, 2 tracks of the Falls branch are crossed by 2 tracks of the International railway on Walden avenue, Genesee street, Ferry street, and Kensington avenue, all of these crossings being protected by derails and flagmen. At Tonawanda, 1 track is crossed by 2 tracks of the International railway, protected by derails and a flagman. At Niagara Falls there are 2 crossings by the International railway, protected by derails and gates. At Buffalo, the International and Black Rock branches are crossed by the International railway at Tonawanda and McPherson streets, the crossings being protected by derails.

Rochester division: steam railroads: At Cooper's, 1 track is crossed by 2 tracks of the Delaware, Lackawanna and Western railroad, protected by mechanical interlocking. At Golah, 1 track is crossed by 1 track of the New York Central and Hudson River railroad, protected by a tilting board signal. At Mortimer, 1 track is crossed by 2 tracks of the West Shore railroad, protected by mechanical interlocking. At Mount Morris, 1 track is crossed by 2 tracks of the Delaware, Lackawanna and Western railroad, protected by mechanical interlocking. At Caledonia, 1 track is crossed by 1 track of the Genesee and Wyoming railroad, protected by interlocked signals without derails. At Le Roy, 2 tracks are crossed by 1 track of the Buffalo, Rochester and Pittsburgh railway, protected by a tilting board signal. At Le Roy, 1 track is crossed by 1 track of the New York Central and Hudson River railroad, protected by a tilting board signal. At Batavia, there are 3 crossings by the New York Central and Hudson River railroad: 2 tracks crossed by 2 sidetracks, no protection; 1 track crossed by 6 tracks New York Central main line, protected by electric interlocking; and 1 track crossed by 1 track, protected by a tilting board signal. Electric railroads: At Painted Post, 2 tracks are crossed by 1 track of the Corning and Painted Post Street railway, protected by derails.

This railroad carries a heavy traffic of both passengers and freight on the main line of all divisions, excepting the Rochester division, where the traffic is moderate. The traffic on the various branch lines is from moderate to light. There are fairly large yards in this State at Port Jervis, Hornell, and Buffalo. Connection with various western roads is made at Buffalo and Suspension Bridge, and there also are connections with other railroads at numerous junction points. Automatic signals are in service on the main line of the New York, Delaware, Susquehanna, and Buffalo divisions; on the Newburgh short cut and the Erie and Jersey railroad from Newburgh Junction to Highland Mills and Graham; on the Northern railroad of New Jersey; and on the New Jersey and New York railroad from Pearl River to Spring Valley. The earlier automatic signaling is equipped with 2 arm, 2-position, lower quadrant signals. More recent installations however have signals of the single arm, 3-position, upper quadrant type. The Pine Island, Crawford, New City, and Tioga branches are operated by timetable schedules and train orders. All the other lines are operated with a manual block system which is made permissive only for inferior trains following inferior trains and absolute for all other movements. Besides the interlocking plants located at grade crossings, this railroad has numerous interlocking plants at other points such as important junctions; the entrances to yards; cross-overs and passing sidings; and the end of double track. These facilities are an efficient aid in the prompt and safe handling of trains. On the Rochester division the line from Rochester to Mt. Morris is equipped for electric traction. A frequent passenger service is maintained on this line, and it is said that the better facilities have secured a substantial increase in the traffic.

The more important improvements made in the last year are as follows:

New York division: crushed stone ballast was applied on 7.25 miles of track, and cinder ballast was applied on 13.25 miles; 1 bridge was rebuilt, and 3 bridges were heavily repaired.

Delaware division: new 100-lb. open hearth and ferro-titanium rail was laid on 20 single track miles replacing 90-lb. rail; crushed stone ballast was applied on 3.13 single track miles.

Susquehanna division: sidetracks were extended 0.49 mile; new 100-lb. rail was laid on 35.87 miles of track, and new 90-lb. rail was laid on 0.4 mile of track, both replacing 90-lb. rail; 3 bridges were rebuilt; 1 new station was built, and 1 station was enlarged; interlocking plants were remodeled at Elmira, Corning, and Painted Post; a new fast freight yard was built at Hornell; a grade crossing east of Corning was eliminated; a telephone train dispatching and message circuit was installed; a crossing bell was installed at Elmira and crossing gates were installed at Lestershire; a transfer crane was installed atinghamton.

Allegheny division: a siding at Belvidere, 3700 feet long was taken up on account of the operation of the Genesee River railroad; new 90-lb. rail was laid on 0.92 mile of track and relayer rail from 63-lb. to 90-lb. was laid on 8.11 miles of track; 3 bridges and 1 culvert were rebuilt; telephone train dispatching was installed between Hornell and Salamanca.

Meadville division: new 100-lb. rail was laid on 1.6 miles of track, and 90-lb. rail was laid on 0.3 mile of track; slag ballast was applied on 2.5 miles of track; progress was made on the elimination of grade crossings and other improvement work at Jamestown.

Buffalo division: sidetracks were extended 1.92 miles; rail renewals amounted to 1.07 miles 100-lb. rail, 10.75 miles 90-lb. rail, 4.9 miles 80-lb. rail, and 8.26 miles 74-lb. rail; ballasting amounted to 10.75 miles of crushed stone, 17.20 miles of gravel, 12.60 miles of slag, and 3 miles of cinders; 1 bridge and 6 culverts were rebuilt; extensive repairs were made to Erie coal dock; 1 grade crossing was eliminated at Lawton's, and 2 grade crossings were eliminated at Gowanda.

Rochester division: sidetracks were extended 0.55 mile; rail renewals amounted to 3.89 miles new 80-lb. rail and 7.60 miles 90-lb. relayer rail; gravel ballast was applied on 17.75 miles of track; the station at Mt. Morris was remodeled and coated with stucco.

The following more notable improvements are either now in progress or contemplated for the ensuing year:

New York division: 1 pipe culvert, 3 concrete slab culverts, and 1 bridge replacing a timber trestle to be built; 1 station to be rebuilt.

Delaware division: 2 bridges are to be rebuilt; passing sidings and station platforms are to be extended to accommodate longer trains; overhead bridge at Narrowsburgh to be raised to increase the clearance; the passenger and freight station at Callicoon to be remodeled.

Susquehanna division: a passing siding at Chemung to be extended, and a team track to be built at Endicott; grade crossings to be eliminated at Rathbone; a highway to be built at Great Bend; the passenger station at Corning to be remodeled and enlarged; portions of the retaining wall west of Waverly to be rebuilt.

Allegheny division: telephone dispatching circuit to be extended from Salamanca to Dunkirk; the improvement of water facilities with the installation of electric light and power facilities at Salamanca; the improvement of Main Street crossing, Cuba.

Meadville division: the elimination of grade crossings and other improvement work at Jamestown to be prosecuted.

Buffalo division: the grade crossings at Main, Genesee, and Doat streets, Walden avenue, and Military Road in and near Buffalo to be eliminated.

Rochester division: several bridges to be rebuilt, including the Genesee River bridge at Rochester.

The recommendations of the preceding report generally were followed, except that inside guard-rails were not applied on the bridges, and only a few of the wooden blocks on the bridge seats have been replaced by permanent pedestals. The rails which appeared from the inspection train to be defective should be examined to determine their fitness for further service. The broken frogs which were found generally are broken on the turnout side back of the frog point and are held together by bolts or rivets. It is not desirable however that defective material be retained in the main track. It is recommended that defective rails and frogs be removed from the main track; that other defects of the track mentioned in this report be remedied; that more extensive repairs and renewals of bridge masonry be undertaken, including the installation of permanent bridge seats in place of wooden blocks; that other defects of the bridge structures mentioned in this report be remedied; that the passenger stations be kept in a cleaner condition. The recommendation made in the preceding report, that all open deck bridges exceeding 15 feet in length be equipped with inside guard-rails, is renewed.

Respectfully,  
J. B. STODER,  
Steam Railroad Inspector.

#### FONDA, JOHNSTOWN AND GLOVERSVILLE RAILROAD.

Inspected May 12, 1914. Last previous inspection May 22, 1913.  
*To the Public Service Commission, Second District:*

I have inspected the part of the Fonda, Johnstown and Gloversville railroad which is operated by steam and submit the following report:

This is a single track, standard gauge railroad extending from a connection with the New York Central and Hudson River railroad at Fonda in a northeasterly direction to Northville, a distance of 25.47 miles. The Broadalbin branch, 6.15 miles in length, extends in an easterly direction from Broadalbin Junction to Broadalbin. There are 7.70 miles of sidings and yard tracks on the main line and 0.38 mile on the Broadalbin branch. The railroad ascends from Fonda to Johnstown on comparatively heavy grades, the maximum of which is 2.34 per cent about 0.72 mile in length. It follows the general surface of the ground, and the earthwork is moderate. The maximum curve is 5 degrees on the main line and 6 degrees on the Broadalbin branch. The cuts and embankments are of good cross-section properly to support the tracks. The ditches are in generally good condition and appear properly to drain the roadbed. It was observed that the ditch south of milepost 3 was clogged and should be cleaned. The alignment and surface of the tracks were good throughout.

The track is laid with rail in generally good condition. The miles of track laid with the different weights of rail are as follows: main line 80-lb. A. S. C. E. Bessemer, 4 miles; main line 75-lb. A. S. C. E. Bessemer, 6 miles; main line 70-lb. Dudley Bessemer, 15.47 miles; Broadalbin branch 70-lb. Dudley Bessemer, 2 miles; Broadalbin branch 56-lb. Bessemer, 4.15 miles; total, 31.62 miles. The ties are principally untreated chestnut, and the renewals since the previous inspection amounted to 7593 ties, or

about 9.1 per cent. The general dimensions of the ties are 6 inches by 8 inches by 8 feet, and they are of good quality. It is expected to renew about 6000 ties during the season. This will be sufficient for proper maintenance. The rails are joined with 4- and 6-bolt angle-bars, a few Weber splices, and 100 per cent joints. The frogs are of the rigid and sprung rail types, and the switches are of the split rail type. Rigid and automatic switch stands equipped with targets and switch lights are used. The curves are tie-plated, and the sidings have Hayes derails. The ballast is gravel and a small amount of cinders: it is clean, of good quality, and sufficient in amount. The right of way is clean and the fences were in good condition. The street and highway crossings are well maintained, and the crossing-signs except on the Broadalbin branch were in good condition. The signs on the branch should be painted. The sections have an average length of about 5 miles, and the force during the working season consists of 5 men. The generally good condition of the track shows that this force is sufficient for proper maintenance.

The bridges on the main line are as follows: 1 span pony truss; 1 deck truss; 1 through truss; 7 plate girders; 56 stone box, arch, rail floor, and pipe culverts. The Broadalbin branch has 1 plate girder, 1 I-beam, and 16 stone box, rail floor, and pipe culverts. The bridges were generally in good condition. The minor defects observed were as follows: bridge No. 1 should have the masonry pointed, and the bridge seat on the east abutment cleaned; the bridge at Johnstown south of Washington street is of 1 span deck plate girder type carrying 2 tracks: the opening is about 45 feet and there are no inside guard-rails on the main track, the siding leads to the coal trestle, and it has no inside or outside guards and the floor system is not fastened to the girders, the ties are the ordinary track kind and the siding is on a curve, outside guard-rails should be installed and the floor system should be fastened by hook bolts or some other device to the girders; bridge No. 11, some ties have saprot which should be adzed off, and there is a piece of poor guard stringer; bridge No. 12 has 1 piece of guard stringer that should be renewed, and some ties with saprot which should be adzed off; bridge No. 13 has ties with saprot which should be adzed off.

The stations consist of 2 brick and 8 frame buildings: they are in good condition and appear to provide ample facilities for handling the traffic. The buildings were clean and well maintained. At Fonda, joint use is made of the New York Central and Hudson River railroad station. The station at Johnstown is used only during the summer season. The canopy over the platform south of the station was damaged by an accident recently and it will be removed before the station is used for this summer's traffic.

There are no crossings at grade with other steam railroads. There are 4 grade crossings with the electric tracks operated by this company at the following points: 1 siding is crossed by 1 electric track at the Fair Grounds, Johnstown, protected by derails in the electric track; 1 main track is crossed by 1 electric track, protected by derails in the electric track at South Main street, Gloversville; 2 tracks are crossed by 2 electric tracks, protected by derails in the electric tracks at North Main street, Gloversville; 1 track is crossed by 1 electric track, protected by derails in the electric track at Kingsboro avenue, Gloversville.

A passenger service is maintained throughout the year between Gloversville, Northville, and Broadalbin connecting with the electric cars at Gloversville. This service is extended to Fonda from about June 20th to Labor Day. The passenger service during the summer season is quite extensive, and many passengers and excursionists are transported. The freight service is performed throughout the year over the entire line. Train movements are controlled by timetable, operating rules of the standard code, and telegraphic train orders. There are no automatic signals and no interlocking. Distant signals are wire connected to some of the switches where the view and grade conditions are such as to require them. The terminal, road, and passenger facilities seem to be adequate properly to handle the business.

Since the previous inspection the sidings and yard tracks have been increased 0.27 mile. A concrete and rail floor bridge has been built replacing a through plate girder span in bridge No. 7. There are no extensive improvements contemplated for the coming year. It is expected to replace about 6000 ties, or about 7.2 per cent. While this is a small percentage for a season's renewals it is sufficient to replace the poor ties now in the tracks. This railroad is maintained in a satisfactory manner, and the materials and labor are judiciously applied. It is recommended (1) that the minor defects noted in the body of the report be given prompt attention; (2) that the saprot on several of the bridge decks be adzed off; (3) that the masonry on bridge No. 1 be pointed; (4) that the bridge just east of Washington street, Johnstown, have an inside guard-rail placed on the main track, that outside guard-rails be placed on the siding span, and that the timber deck be fastened to the top flange of the girders.

Respectfully,

W. G. HIMES,

Inspector Division of Transportation.

#### GENESEE AND WYOMING RAILROAD.

Inspected June 3, 1914. Last previous inspection June 20, 1913.  
*To the Public Service Commission, Second District:*

I have inspected the Genesee and Wyoming railroad and submit the following report:

This is a standard gauge, single track railroad, extending in a southerly direction from a connection with the Buffalo, Rochester and Pittsburgh railway and the Lehigh Valley railroad at Pittsburgh and Lehigh Junction to a connection with the Delaware, Lackawanna and Western railroad at Greigsville, a distance of 14.39 miles. The East branch extends in an easterly direction from Retsof to a connection with the Rochester division of the Western New York and Pennsylvania railway at Retsof Junction, a distance of 1.77 miles. The Halite and Northern railroad operated by the Genesee and Wyoming railroad is known as the South branch. It extends from a connection with the main line near Retsof to the Sterling Salt Works, a distance of 3.1 miles. The sidings and yard tracks aggregate 2.59 miles. The cuts and embankments have a good cross-section, and the ditches are properly maintained. On the South branch the earth cuts are troublesome in wet weather on account of the character of the soil, but the ditches were well opened and the drainage was good. The track alignment and surface were excellent on the 5 miles of track south of P. & L. Junction. The balance was generally good. The maximum grade is about 1.5 per cent for 800 feet, and the maximum curve is about 6 degrees. These present no unusual difficulty in the operation as conducted.

The tracks are laid with 70-lb. rail with the exception of about 0.3 of a mile of 67-lb. rail. The 70-lb. rail on the main line has mostly miter ends joined with 6-bolt angle-bar splices. The 70-lb. rail on the South branch has square ends joined with 4-bolt angle-bars. The rails were generally in good condition, and the bolts were tight. The ties are principally oak, and the renewals amounted to 4350 ties, or about 10.2 per cent of all the ties, except on the South branch where they are only about 3 years old and require no renewals. It is expected to renew about 6000 ties this year. About 5 miles of track were re-ballasted with gravel, and the ties not fit for 3 years' service were renewed. This made the renewals heavy on this part of the railroad and left a small percentage of renewals on the balance. However, ties are distributed and renewals are being made where most needed, and the contemplated renewals will put the track in good condition throughout. The main line is ballasted with 5 miles of gravel and the balance is cinders, the East branch with cinders, and the South branch with stone and slag. The ballast is generally good and sufficient in amount. The 5 miles re-ballasted is in splendid condition and a credit to the railroad. The right of way is cleared, clean, and orderly, and the fences are well maintained. The road crossings are in good condition except that many of the signs are dingy and need to be painted. The crossings particularly noted in this respect are as follows: the crossing between mileposts 4 and 5; the crossing between milepost 5 and the steel viaduct; and the crossing just north of milepost 9. It is proposed to paint all the crossing-signs this year. The frogs are generally rigid, and the switches are the split rail type. The switch stands have targets and no switch lamps. There was a broken frog in the main line at the Erie railroad connection. The track repairs are made with a floating gang of 18 men: this force is ample for proper maintenance.

The bridges consist of 2 steel tower viaducts with the tracks supported on deck plate girders; 2 plate girder bridges; 2 I-beam and 1 wooden stringer bridges. They are well maintained and in good condition. There are also 3 arch culverts, and 3 reinforced concrete cattle-passes. The only defect in the bridges observed which is worthy of criticism is that on some of the bridges the main rails and the inside guard-rails are not full spiked. It is considered good practice to full spike the rails to all ties. There is only one wooden stringer bridge remaining. Since the previous inspection 2 such bridges have been replaced with castiron pipe.

There are 4 frame stations in generally good condition with ample accommodation for the service performed.

One track is crossed by 1 track of the Canandaigua branch of the New York Central and Hudson River railroad and 1 track of the Attica branch of the Erie railroad. These crossings are within a short distance of each other, and the protection is by interlocked signals operated from a tower located between the crossings. There are no grade crossings with electric railroads.

The passenger service consists of a morning train and an evening train between Retsof and P. & L. Junction. Operating rules, timetables, and telephonic and telegraphic train orders control the train movements. The traffic is principally outbound shipments of salt and its products and farm produce to the connecting railroads, and miscellaneous inbound shipments. The operation is in the nature of switching and consists in handling empty cars from the connections to the salt mine at Retsof and the Sterling Salt Works and delivery of the loaded cars to the connections. There are no automatic block signals and none is necessary. The

terminal road and other facilities seem ample to perform the service required.

Since the previous inspection about 0.4 of a mile of sidings has been constructed; 4350 oak ties have been renewed; 5 miles of track have been re-ballasted with gravel; and 2 timber bridges have been replaced with castiron pipe. There are no extensive improvements contemplated for the present. It is expected, however, to renew about 6000 ties this year. It is recommended (1) that the broken frog in the track at Erie railroad connection be replaced; (2) that the main running rail and guard-rails on all bridges be full spiked to the ties; (3) that the crossing-signs be painted.

Respectfully,  
W. G. HIMES,  
*Inspector Division of Transportation.*

#### GLENFIELD AND WESTERN RAILROAD.

Inspected May 18, 1914. Last previous inspection May 26, 1913.

*To the Public Service Commission, Second District:*

I have inspected the Glenfield and Western railroad and submit the following report:

This railroad is a standard gauge, single track line extending from Glenfield, where it connects with the New York Central and Hudson River railroad, to Monteola, a distance of 19.55 miles. There are about 2 miles of sidetracks.

The line ascends the slope on the west side of the Black river valley. There are many sharp curves and steep grades, the maximum of the former being 18 degrees and of the latter, 5.1 per cent.

The cuts and fills generally are in good condition for a light railroad. The surface and alignment of the track are only fair. Some improvement should be made in this respect at several places and it was stated that this work will be done as soon as practicable.

The track is laid with 60-lb. and 65-lb. rail which is in fair to good condition. A piped rail west of bridge No. 14 and a rail with a halfmoon break in the base east of Sackett's cattle-pass should be removed from the track. The track ties generally are in fair condition. Tie renewals were in progress at the time of the inspection, and the rate of renewal appeared to be suitable for proper maintenance. The track appliances, consisting of split switches, rigid frogs, and rigid switch stands are in good condition. The road is rather lightly ballasted with cinders, sand, and gravel. The train loads are moderate, however, and the ballast appears to give satisfactory service. There is a considerable amount of trash on the right of way, consisting of dead branches and old ties, which should be burned or removed. Most of this material already has been piled, and it was stated that it will be burned when that can be done without danger to the surrounding forest. Suitable fences are maintained where they are required. Road crossings and signs are in good condition, except that there are poor crossing planks at two road crossings between bridges Nos. 16 and 21. The maintenance work is handled by 2 track gangs of 6 men each and 1 bridge gang of 4 men.

The bridges and culverts include both steel and timber structures and are in good condition, excepting for some ordinary maintenance repairs. The steel bridges consist of 2 trusses of moderate size and several plate girder and I-beam spans. Some of the timber bridges have concrete or stone abutments while others rest on timber mudsills. The following minor defects were found: bridge seats dirty at Old Glendale bridge; some poor ties on Van Ornum's, Lee's, and Bardo's cattle-passes and on bridge No. 18; loose blocking at the bridge east of Little Pond.

Joint use is made of the New York Central station at Glenfield. The Glenfield and Western has no stations, and as the passenger traffic is very light none appears to be needed.

This road is essentially an industrial property and the traffic, which is moderate, consists almost wholly of the transportation of logs. One train crew handles a regular train and another crew does switching under yard limit rules. There is a wye track at each end of the road for turning engines and the facilities generally appear to be sufficient for handling the existing traffic. The wye switch at Glenfield which is at the foot of a heavy grade is kept set for the wye to serve as a derail.

Since the last inspection was made, 5 culverts have been rebuilt, a steel bridge has been installed at Fish Creek, and a change of line was made to reduce the curvature on a reverse curve. In the ensuing year it is intended to make the usual maintenance repairs on the track and bridges, and to divert a creek so that 2 timber bridges can be eliminated. This railroad is maintained in reasonably good condition for handling its traffic, and the defects which are mentioned in this report are of a minor character. It is recommended that these defects be remedied.

Respectfully,  
J. B. STODER,  
*Steam Railroad Inspector.*

#### GREENWICH AND JOHNSONVILLE RAILWAY.

Inspected May 13, 1914. Last previous inspection May 23, 1913.  
*To the Public Service Commission, Second District:*

I have inspected the Greenwich and Johnsonville railway and submit the following report:

This is a single track, standard gauge railroad extending in a northerly direction from a connection with the Fitchburg division of the Boston and Maine railroad at Johnsonville to a connection with the Saratoga and Schuylerville branch of the Boston and Maine railroad at Northumberland, a distance of 21.15 miles. The principal sidings and yard tracks are located at Johnsonville, Greenwich, and Thomson. Other sidings are located at various points along the line. The total length of sidings and yard tracks is 7.19 miles. The railroad was built with comparatively light earthwork, and the grades are steep and the curves sharp. The maximum grade is 4 per cent, and the maximum curve is 13 degrees. The service performed by this railroad is such that these conditions do not materially affect the operation. The cuts and embankments were of ample cross-section properly to support the track, and the ditches were generally in fair condition and seem to drain the roadbed. There were one or two places north of Greenwich where a little ditching could be done to advantage. These places were in the cuts where the banks are constantly slipping. The points particularly noted were between bridges Nos. 5 and 6. The track alignment and surface south of Greenwich were from fair to good. North of Greenwich they were only fair.

The tracks are laid with Bessemer steel rail in the following weights and mileage: 60-lb. 8.49 miles; 67-lb. 1.00 mile; 70-lb. 9.66 miles; 80-lb. 2.00 miles; total 21.15 miles. The rail was generally in fair condition, and no defective rails were observed. The ties are about 60 per cent chestnut and 40 per cent oak and native timber. The renewals since the previous inspection amounted to 7695 ties, or about 13 per cent. This is sufficient for proper maintenance. Tie renewals were being made at the time of inspection, and ties were distributed for renewals at most of the places where poor ties were observed. It is expected to renew about 6533 ties during this season. This will be sufficient to put the track in proper condition. The greatest number of poor ties were noticed between Greenwich and Thomson. The rail fastenings are 4- and 6-bolt angle-bars. Several joints were noted where half angle-bars were used with 2 bolts in one rail and 1 bolt in the other. These joints were old 6-bolt angle-bars broken in half. These splices should be replaced at once. Rigid and spring frogs, split switches, and both rigid and automatic switch stands are used. The frogs and switches were generally in good condition with the exception of the crossing frogs at Thomson which require some new bolts, and the bolts should be tightened. The ballast is gravel of fair quality and sufficient in amount. The general track condition north of Greenwich can be improved by raising the track on the tangents. There is sufficient ballast along the track for a moderate raise, and if the track is raised as the ties are placed, it will be a material improvement. The right of way, fences, road crossings, and signs were generally in good condition. The sections are about 7 miles in length, and the force consists of 1 foreman and 5 laborers. This force is sufficient to maintain the tracks if properly administered.

There are 2 through truss bridges, 31 plate girder and I-beam bridges, 5 wooden stringer bridges with masonry abutments, 1 timber trestle, and 72 arch, box, and pipe culverts. They were generally in good condition. The bridges are numbered consecutively from 1 to 31 south of Greenwich, and from 1 to 9 north of Greenwich. The minor defects observed were as follows:

South of Greenwich: bridge No. 1 should have main rail and guard-rails full spiked to the ties; bridge No. 8 has a poor masonry abutment, the north span has 3 9-in. by 9-in. timber stringers under each rail, the masonry is relieved by a frame bent in the middle of the span: it is suggested that a rail floor or flat top culvert could be used to advantage in replacing this structure; bridge No. 9 should have repairs made to the north abutment; bridge No. 10 is about a 12-foot opening: the north abutment is failing, and a temporary frame bent has been erected in the middle of the span; bridges Nos. 18, 19, and 20 have abutments failing: temporary frame bents have been erected in front of each abutment; bridge No. 23 is one span I-beams on masonry abutments, the beams rest on wooden blocks, the shims under the rail should be removed, and bearing plates of the proper thickness should be placed under the beams; bridge No. 30 has low approaches, and track should be raised on each side of the bridge; bridge No. 31 is a 6 span deck plate girder bridge in generally good condition; there are no inside guard-rails on this bridge: they should be promptly installed; north of Greenwich: bridge No. 1 should have the main rail and guard-rail full spiked to the ties; bridge No. 3 is 3 spans of deck plate girders on concrete abutments and piers, the wing-walls on the south abutment have failed and require extensive repairs, the bridge seats are dirty, and the inside guard-rail is not full spiked to the ties; bridges Nos. 4, 6, and 7 should have inside guard-rails full spiked to the ties; bridge No. 8 should have main rail and inside guard-rails

full spiked to the ties; bridge No. 9 should have main rail and inside guard-rails full spiked to the ties, and the bridge seats cleaned.

The principal passenger station is at Greenwich. This is a neat one-story brick and concrete building with concrete platforms, lawns, and driveways surrounding. There are 5 other frame stations and 1 frame shelter shed between Greenwich and Johnsonville. These stations are flag stops, and there was no apparent need for any additional facilities at any of these points. The stations were clean and no defects were noted.

There are no grade crossings with other steam railroads. One track is crossed by 1 electric track of the Hudson Valley railway at Thomson: trainmen flag the crossing when used by the steam trains, and the conductors of the electric cars flag the crossing when used by them.

A passenger service is operated between Greenwich and Johnsonville consisting of 3 trains each way a day. The freight service consists of 2 trains each way between Greenwich and Johnsonville and 1 train each way between Greenwich and Thomson. Train movements are controlled by telephonic train orders, timetables, and standard code train rules. There are no automatic or other block signals and none is necessary. Terminal facilities are provided at Greenwich which appear to be suited to the class of service performed. The Hudson Valley Railway Company operates its electric cars over the tracks of this company across the Hudson river at Thomson and a short distance either side thereof. The train crews using this track protect their movements against the electric cars. The railroad has light traffic throughout and particularly north of Greenwich where the service performed is in the nature of switching. One engine making a round trip daily on this part of the line is the only train operation. The speed of extra trains is limited to 20 miles per hour.

Since the previous inspection there have been no changes in the track mileage; the tie renewals amounted to 7695, or about 13 per cent; several of the bridges between Greenwich and Johnsonville have had the decks renewed with ties and outside guards; the trestle approach to bridge No. 1 at Greenwich has additional stringers and some new ties; the overhead highway bridge No. 2 at Middle Falls has been rebuilt in timber. There are no extensive improvements contemplated for this season. It is expected to renew about 6533 ties, and to re-surface the tracks in many places, especially between Greenwich and Thomson.

It is recommended (1) that the minor defects in the track enumerated in the body of the report be remedied; (2) that the half angle-bars now in use be replaced with either 4- or 6-bolt splices full bolted; (3) that bridge No. 31 at Johnsonville be equipped with an inside metal guard-rail full spiked to the ties; (4) that all bridges not now so equipped have the main running rails and metal guard-rails full spiked to the ties.

Respectfully,

W. G. HIMES,

*Inspector Division of Transportation.*

#### JAMESTOWN, WESTFIELD AND NORTHWESTERN RAILROAD.

Inspected June 10, 1914. Last previous inspection July 9, 1913.

*To the Public Service Commission, Second District:*

I have made an inspection of the Jamestown, Westfield and Northwestern railroad and submit the following report:

This railroad, formerly known as the Jamestown, Chautauqua and Lake Erie railway, extends from Jamestown to Westfield, a distance of 33 miles. Connections are made at Jamestown with the Erie railroad, at Westfield with the Lake Shore and Michigan Southern railway, and at Mayville Junction with the Western New York and Pennsylvania railway. The trains of this railroad use the Pennsylvania tracks from Mayville Junction to Mayville, 1.2 miles, and from Mayville to the Chautauqua Assembly Grounds there is a branch line of 2.8 miles which is used only for switching service. Since the preceding inspection was made this railroad has been reorganized and transferred to new management. Radical improvements have been started, and the line is being equipped for electric traction.

From Jamestown to Mayville Junction the line extends along the eastern shore of Chautauqua lake, and the grades are moderate. Between Mayville Junction and Westfield the dividing ridge between Lakes Erie and Chautauqua is crossed, and on the northern slope there is a heavy grade for a distance of about 8 miles. There is some fairly sharp curvature but this feature is not excessive.

South of Mayville Junction the cuts and fills are of moderate extent. North of that point however some fairly heavy grading was required, and many of the cuts are in poor condition: the

material slides readily when wet, and a large amount of ditching is needed; one gang was ditching with hand tools at the time of the inspection. Some of the fills are too narrow to form a good roadbed, and the material taken from the cuts should be used in widening the fills as far as practicable. The surface and alignment of the track are poor, excepting a few miles of track which have been surfaced this Spring. It was stated that practically the whole line probably will be surfaced this season.

The track is laid with 60-lb. and 70-lb. rail coupled with 4-bolt and 6-bolt angle-bars. The 70-lb. rail is in fair condition but the 60-lb. rail is poor. Practically all of it is battered and bent, and there is a large number of split, piped, and otherwise defective rails. Two miles of new 80-lb. rail are being laid from Jamestown northward, and it was stated that the best of the rail taken up will be used in repairs. It is proposed also to lay a few miles of rail each year until all of the poor rail is eliminated. The condition of the track ties is fair to poor. A heavy renewal is being made at present which if completed will put the track timber in good condition.

The track appliances comprise split switches, rigid frogs, and automatic switch stands equipped with targets and lights. On the day of the inspection the south switch at Bemus Point was not locked, and a lens was missing from a switch lamp at Maple Springs. The track is ballasted largely with the gravelly soil found along the line, supplemented by cinders and slag in small quantities. Additional ballast of good quality would make a desirable improvement. The right of way is in fair condition, and fences are maintained where they are required. The road crossings generally are in good condition and are equipped with signs. A crossing north of Williams cut and another south of the brick road near Westfield have poor crossing planks, and the signs are leaning. The track sections have an average length of about 6½ miles. At the time of the inspection about 100 men were employed in the improvement work, the larger part of them being engaged on the track.

There is a large number of timber trestles, culverts, and cattle-passes on this line. The general condition of these structures has been considerably improved. Some of the structures still are in poor condition, and the following defects were found: two culverts south of Bentley's one has a poor cap, and the other has a poor stringer; culvert north of Driftwood has poor caps and posts; second culvert north of Colburn's has poor bulkheads; culvert south of Shore Acres has a poor stringer and poor ties; two trestles and two cattle-passes between Shore Acres and Bay View have a few poor sills, caps, stringers, and ties; culvert north of Bay View has poor piles; third culvert north of Chedwell needs more ties, and the deck should be drift bolted to the stringers; two trestles south of Dewittville have poor caps, stringers, and decks; two culverts north of Dewittville have poor walls and one poor stringer; trestle south of Hartfield, the south timber abutment is leaning, and the timbers are soft: the condition is bad and should be remedied at once; trestle north of Hartfield, the south bent is not plumb; three cattle-passes south of Williams cut have poor decks; cattle-pass north of Williams cut, the stone walls are leaning: these walls have been braced, but the general condition is not satisfactory; Pepper's cattle-pass has a bad wall plate and some poor ties; Laufer's trestle, some of the bents are not plumb. It was stated that bridge repairs are to be included in the general reconstruction work of the present season. A number of the culverts probably will be replaced by pipes. It is suggested that the bridges and culverts should be numbered. A convenient method is to give each structure as a number its distance in miles and hundredths of a mile from one end of the line.

The station buildings and shelters are all of frame construction and are of suitable size and design. Repairs are now being made where required to put these structures in good condition for the summer passenger traffic.

At Mayville Junction, 1 track is crossed by 1 track of the Western New York and Pennsylvania railway, protected by mechanical interlocking.

There is only a light traffic on this line. Steam locomotives are used at present, and train movements are controlled by timetable schedules, telegraphic train orders, and the operating rules. The line is being equipped for electric traction, however, and it is expected to begin the operation of electric cars between Jamestown and Mayville about July 1st. Freight traffic probably will be handled by steam locomotives for some time longer. The yard tracks at Jamestown have been transferred to the Erie railroad and are being operated by that company.

During the past year a considerable amount of repair work was done on the bridges, and a small amount of ballasting was done. The track is being surfaced; tie renewals are being made; 2 miles of new 80-lb. rail are being laid; and the stations are being repaired. It is proposed also to make necessary repairs to the bridges and culverts; to raise about 2 miles of track near Jamestown above high water mark; and to open the ditches.

A considerable amount of work was done in compliance with the recommendations of the preceding report, but the entire programme has not been completed. It is recommended that the defects named in this report be remedied.

Respectfully,  
J. B. STODER,  
*Steam Railroad Inspector.*

#### KANONA AND PRATTSBURGH RAILWAY.

Inspected June 1, 1914. Last previous inspection June 4, 1913.  
*To the Public Service Commission, Second District:*

I have inspected the Kanona and Prattsburgh railway and submit the following report:

This is a standard gauge single track railroad extending in a northerly direction from a connection with the Rochester division of the Erie railroad at Kanona, to Prattsburgh, a distance of 11.44 miles. The total length of all sidings and yard tracks is 0.56 mile.

This railroad follows the general topography of the region, and grades and curves are not excessive. The data on the exact percentage of grade and degree of curvature were not available, but it was observed that they had little effect on the operation.

The cuts and embankments are usually narrow, which does not allow room for proper ditches in the cuts and makes a narrow shoulder to support the ballast on the embankments. The embankment at the south end of bridge No. 2 on the creek side is very narrow and should be cribbed and filled promptly. The ditches are usually in fair condition. The ditch in the shale cut between bridges Nos. 1 and 2 is filled and should be cleaned. In several places they are overgrown with grass and weeds which interfere with the proper drainage of the roadbed.

The track alignment and surface are usually only fair, although where re-ballasting has been done recently they are good. Poor surface and line were noted about one mile on either side of telegraph pole 230, and at pole 260.

The track is laid with 60-lb. rail joined with 4-bolt angle-bar splices; it was in generally good condition and no defective rails were noted.

The ties are oak and chestnut. The renewals since the previous inspection amounting to 1508 ties, or about 5 per cent, were not sufficient for proper maintenance. It was explained that considerable difficulty was experienced in securing local ties in sufficient amount for the renewals. Poor ties were noted at telegraph poles Nos. 60, 65, south of 213, 260, 270, and at 280. Ties were distributed for renewals in a few places, but there are probably not more than 1000 ties on hand and it will require at least 3000 ties for renewals this season.

The ballast is gravel of a good quality. Some cinders have been distributed, and short stretches of track have been re-ballasted with them. More ballast is required between bridges Nos. 2 and 3. Cinders have been distributed between bridges Nos. 6 and 8. Additional ballast is required for about half a mile south of telegraph pole 205. The track is overgrown with grass and weeds in many places.

The track has been re-tied and raised on new ballast on the curve south of bridge No. 2; about one-half mile of track north of telegraph pole 99; north of pole 135; between bridges Nos. 8 and 9; and on the tangent and curve in the cut south of Prattsburgh; this work has been well done.

Rigid frogs and split rail type switches with rigid stands and targets are used; they were in satisfactory condition.

The right of way, road crossings, and fences were well maintained.

The sections are 2, about equal length, and the force consists of 5 men on each; this is sufficient for the proper maintenance of this railroad.

The bridges are all single span structures with the track supported on either steel or timber. There are 7 plate girder and I-beam and 10 timber stringer bridges. The defects noted were as follows: bridge No. 4 needs a new stringer; bridge No. 8 needs 3 new ties; bridge No. 10, the north abutment has been undermined and should be repaired at once; bridge No. 11 needs some new ties and should have drift cleaned off of the caps; bridge No. 13 needs 4 new ties; bridge No. 17 at Prattsburgh should have timber guard-rails on the span under the siding west of the main track. The main track and two other sidings are supported on I-beams. The bridge seats are filled with dirt and rubbish, and the beams are badly rusted over the bearings; these bridge seats should be cleaned off and the beams painted at once.

There are two frame station buildings in generally good condition, at Prattsburgh and Wheeler. There are numerous flag stops at public highway crossings where no facilities are provided, but the travel is local, and no unusual inconvenience was observed on this account. Joint use is made of the Erie railroad station at Kanona.

There are no grade crossings with other steam or electric railroads.

The train movements consist of 3 scheduled combination freight and passenger trains in each direction daily. The movements are controlled by operating rules and a timetable. There are no automatic or other signals, and none is necessary. The railroad is operated with one locomotive. The facilities are ample for the service rendered.

Since the previous inspection a new frame 1 stall enginehouse has been built replacing the old one which was destroyed by fire; and a mile or more of track has been re-ballasted with cinders and gravel. There are no extensive improvements authorized for this season.

It is recommended (1) that the defects in the bridges as noted in the body of the report be remedied; (2) that at least 3000 ties be placed in the tracks for the season's renewals; (3) that the other minor track defects noted in the report be remedied.

Respectfully,  
W. G. HIMES,  
*Inspector Division of Transportation.*

#### KEESEVILLE, AUSABLE CHASM AND LAKE CHAMPLAIN RAILROAD.

Inspected May 27, 1914. Last previous inspection June 12, 1913.

*To the Public Service Commission, Second District:*

I have inspected the Keeseville, Ausable Chasm and Lake Champlain railroad and submit the following report:

This railroad has a single main track of standard gauge extending from Port Kent, where it connects with The Delaware and Hudson Company's railroad, to Keeseville, a distance of 5.65 miles.

The line is built in the rough country lying on the west shore of Lake Champlain. There are some rather steep grades and sharp curves, but neither of these features is excessive for a railway carrying a light traffic. The cuts and fills are of moderate extent, and while rather narrow are fairly satisfactory. The drainage is good. The surface and alignment of the track are fair. On the curve east of the Chasm the alignment is poor, and the elevation of the outside rail apparently is too great for the usual speed of trains.

The track is laid with 60-lb. rail most of which is in fair condition. A number of defective rails were found, however, consisting of pipes, split heads and ends, and short pieces broken at the ends. These rails are at the following places: a rail with a split head and another with a split end between the Chasm bridge and the first bridge east; a rail with a broken end east of trestle No. 2; 8 defective rails between trestle No. 1 and the tool house; a split rail east of the tool house. The track ties consist largely of oak and are in a generally fair condition. The renewal in the past year was about 16 per cent, and this rate of renewal should not be diminished. Split switches and rigid frogs are in use and are in fairly good repair. The track is lightly ballasted with gravel. The right of way is clean and open and is properly fenced. The road crossings are in good condition and properly equipped with signs.

A force of about 5 men is employed during the working season to handle both the track and bridge work. This amount of labor would be sufficient on the track but is not enough properly to cover both lines of work.

There is one steel bridge on the line consisting of a cantilever deck truss about 240 feet long across the gorge of the Ausable river. This structure is of light design but appears to be in good condition, except that painting is needed. There are 4 framed timber trestles, 2 of which form approaches to the steel span. These trestles are of light construction, and the bents rest on numberless blocks and wedges. This form of foundation is wholly unsuitable for a railway structure, and permanent foundations should be provided. At the west approach trestle, some blocks at the west end were loose, and there are several poor timbers including caps, sills, and braces; east approach span, the deck is very poor, and there are some poor sills and braces; new stringers have been put in these trestles, but there should be 3 stringers under each rail instead of 2 as at present; No. 2 trestle had some loose shims under the rails; part of the ties and some of the heavier timbers are in poor condition; the outside stringer on a curve needs bracing; one of the water barrels was empty; No. 1 trestle had loose blocking at the west end; the guard timber is not complete; there are several poor timbers in the structure; in Nos. 1 and 2, a third line of stringers has been added under each rail, leaving the old stringers in place, some of which are in poor condition. It is intended to continue repairs on all of these trestles as fast as material can be obtained. The present condition still is unsatisfactory, however, and the work should be carried through to completion. Trains run at slow speed over the trestles, and this restriction should be continued. No. 1 trestle is across a nearly dry ravine and should be filled if possible. The

smaller structures consist of concrete and stone boxes and timber stringers on masonry walls. They are in fair to good condition.

Two stations and two shelters at flag stops furnish suitable accommodations for the passenger traffic. Joint use is made of The Delaware and Hudson Company's station at Port Kent.

The traffic on this line is light through the larger part of the year. In the summer season there is a considerable excursion business to Ausable Chasm. One train crew handles all of the trains, and the facilities generally appear to be sufficient.

New stringers have been placed on the Chasm bridge and trestles, and a new deck on the steel structure. An additional line of stringers under each rail has been placed in the other trestles and a few other timbers have been renewed. Repairs have been made on the smaller structures. It is proposed to continue repairs on the bridge structures this year.

It is recommended that defective rails be removed from the track and that the repairs and strengthening of the timber structures be pushed forward to completion.

Respectfully,  
J. B. STODER,  
Steam Railroad Inspector.

#### LAKE CHAMPLAIN AND MORIAH RAILROAD.

Inspected May 28, 1914. Last previous inspection June 13, 1913.

*To the Public Service Commission, Second District:*

I have inspected the Lake Champlain and Moriah railroad and submit the following report:

This railroad is a single track standard gauge line, extending from Port Henry, where it connects with The Delaware and Hudson Company's railroad, to Mineville, a distance of 7 miles. At the latter point there are extensive yard tracks to the iron ore mines which furnish almost the whole of the traffic. The road is of heavy standard construction throughout.

The line ascends the lower ranges of the Adirondack mountains bordering Lake Champlain, involving heavy grades and sharp curves. The maximum grade is 4.04 per cent, and there also are two switchbacks which permit the gaining of elevation without extensive development of the line in distance. The cuts and fills have a full cross-section, and the drainage is good. The surface and alignment of the track are first-class throughout.

The track is laid with 90-lb. rail, all of which is Bessemer steel excepting one mile of ferro-titanium steel. The rail is in good condition. The track ties consist of white oak and yellow pine timbers, and ample renewals are made for maintaining the track in good condition. The line is heavily ballasted with mine tailings. The track appliances, consisting of split switches, rigid and spring frogs, and automatic stands, are in good repair. The right of way is clean and properly fenced. The road crossings are in good condition and equipped with the standard signs. There are 3 track sections of about 5 miles each which include some of the principal yard tracks. The track forces consist of about 5 men per section, and with this labor the track is very well maintained.

The bridge structures are all of moderate size and consist of 2 plate girders, 1 1-beam span, and 3 concrete arches. The culverts consist of pipes, and stone and concrete boxes. All of these structures are in good condition. There are two stations, one at each end of the line: these are small but are sufficient for the needs of the passenger traffic which is light.

The business of this road consists almost wholly of the transportation of iron ore from the mines in the vicinity of Mineville. No regular passenger service is maintained, but passengers are carried in a coach attached to the ore trains. There are fairly extensive yard and dock facilities at Port Henry where part of the ore is transferred to boats. A telephone is used for train dispatching but ordinarily there is only one train at a time on the road. Derails are installed where needed, and one in the main track above the switchback is attended by a switchman.

During the past year the following improvements were made: a scale track about 900 feet long was built in the Mineville yard; one mile of 90-lb. ferro-titanium rail was laid in the main track; one mile of main track was re-ballasted with mine tailings. This railroad is being maintained in excellent condition for the traffic which it handles, and no recommendations are required.

Respectfully,  
J. B. STODER,  
Steam Railroad Inspector.

#### LAKE SHORE AND MICHIGAN SOUTHERN RAILROAD.

Inspected June 8, 1914. Last previous inspection July 7, 1913.  
*To the Public Service Commission, Second District:*

I have inspected that part of the Lake Shore and Michigan Southern railway which lies within the State of New York and submit the following report:

This railroad extends from Buffalo westward to the New York-Pennsylvania state line, a distance of 67.79 miles. There are four main tracks the whole distance, excepting a few miles of two track line in the city of Buffalo. Direct connection is made with the New York Central and Hudson River railroad at Buffalo, and there also are connections with other eastern lines either directly or over the terminal railways of that city.

The line extends across the rolling country which borders Lake Erie, and some fairly heavy grading was required especially across the deep gorges of several creeks. The cuts and fills have a full cross-section, and suitable drainage is provided. Both grades and curvature are very light and especially adapted to a heavy traffic. The surface and alignment of the track are good throughout.

The two high speed tracks are laid with 100-lb. rail throughout, and the two freight tracks have both 100-lb. rail and 80-lb. rail. The rail is in good condition and is spliced with 6-bolt angle-bars and with continuous and Bonzano joints. A pair of broken continuous bars was found in track No. 1 at Brocton. The track ties quite generally are in good condition, and ample renewals are made. Switches and frogs are of modern design intended for heavy service and apparently are all in good repair. Tie-plates are used extensively, and it is expected soon to make a more extended use of rail anchors. Derails are used where that form of protection is desirable. The tracks are ballasted almost wholly with crushed stone, there being a small amount of cinder ballast on the freight tracks. The right of way is open and well kept, and properly fenced where fencing is required. The road crossings are in good condition and equipped with standard signs. The track sections have an average length of 8.1 miles of single track, and the track forces amount to 8 men per section during the working season. The amount of labor employed appears to be ample for securing good maintenance.

All the bridges and culverts have been built in some permanent form of steel or masonry, and quite generally they are in good condition. A few poor ties were found on Nos. 229, 215, and 195, and some poor guard timber on No. 101. The new rolling lift drawbridge over Buffalo creek has been in service for some months.

The station buildings are in good condition and are kept very clean and neat. Well ordered grounds and lawns are maintained at most of the stations and present a very attractive appearance.

At Buffalo, 4 tracks are crossed by 2 tracks of the Erie railroad, protected by a tilting board signal; 2 tracks are crossed by two tracks of the Buffalo Creek railroad, protected by electric interlocking. At Dunkirk, 2 tracks are crossed by 1 yard track of the Erie railroad, protected by mechanical interlocking. There are no grade crossings with electric railroads.

This railroad handles a heavy traffic of both freight and passenger business. Train movements are controlled by timetable schedules, telephonic train orders, and the standard operating rules; there also is a complete system of automatic block signals. The blocks are about one mile long, and the signals are of the 2-position home and distant type with the blades working in the lower quadrant and normally indicating stop. Interlocking plants have been installed at a number of points for controlling the switches in crossovers and turnouts. The terminal facilities at Buffalo include the large yard at West Seneca and a double track freight connection to the Gardenville yard of the New York Central and Hudson River railroad. The smaller yards and other facilities along the line appear to be sufficient for the requirements of the traffic.

During the past year the following improvements have been made: increase in mileage of sidings 0.51 mile; the rolling lift bridge across Buffalo creek was completed; new 100-lb. rail laid replacing 100-lb. rail 15.07 miles; relayer 100-lb. rail laid replacing 80-lb. 9.30 miles; ballasting with crushed stone 31.01 miles.

This railroad property is being maintained in very good condition for carrying its traffic. The only recommendation required is that the minor defects mentioned in this report be remedied.

Respectfully,  
J. B. STODER,  
Steam Railroad Inspector.

#### LEHIGH AND HUDSON RIVER RAILWAY.

Inspected May 27, 1914. Last previous inspection June 2, 1913.  
*To the Public Service Commission, Second District:*

I have inspected that part of the Lehigh and Hudson River railway which is within the State of New York and submit the following report:

This is a standard gauge, single track railway extending in a southwesterly direction from a connection with the Central New England railway at Maybrook to the New Jersey-New York state line, a distance of 25.20 miles. There are also physical connections with the New York, Ontario and Western railway at Burnside and the Erie railroad at Greycourt. The latter connection is by a sidetrack about 0.7 mile in length, made necessary by the overhead railway crossing at this point. The total length of all sidings and yard tracks is about 20.58 miles.

The general alignment of this railway is good. The curves are comparatively few in number, and the maximum is 6 degrees which is moderate for a railway of its class. The maximum grade is about 1.2 per cent 3700 feet in length ascending westwardly. The cuts and embankments are well formed, having a good cross-section on the embankments to provide a suitable shoulder for the ballast, and in the cuts to allow proper ditches for drainage. The ditches were well cleaned and appeared properly to drain the roadbed. The only exception noted was in the cut west of bridge No. 16 where it is expected to install porous tile to insure a proper drainage. The alignment and surface are good throughout. There are no unusual features in the construction or operation of this railway.

The tracks are laid with 12.6 miles of 100-lb. open hearth rail joined with 28-inch Bonzano 6-bolt joints, and 12.6 miles of 80-lb. Bessemer rail joined with 30-inch angle-bars of the 6-bolt type. The curves are laid with the 100-lb. rail, and when necessary to replace turnouts it is done with 100-lb. material. The ties are oak, chestnut, yellow pine, and treated yellow pine. The main track tie renewals are made with treated ties. The curves are tie-plated throughout, and the treated ties are equipped with heavy plates bored for screw spikes of a design similar to the Delaware, Lackawanna and Western railroad standard. The rails are fastened to the ties with screw and nut spikes. The tie renewals since the previous inspection amounted to 16,292, or about 12.5 per cent: this is sufficient for proper maintenance. The track is ballasted with cinders and gravel in about equal proportions, of generally good quality and sufficient in amount. Since the previous inspection about 7 miles of track have been re-ballasted with gravel. The right of way is cleared, clean, and well kept. The fences are well maintained throughout. The highway grade crossings and signs are properly maintained. The sections are about 5 miles in length except in the yards where the length is less, so that each section has an average of about 8.1 miles of track. The working force consists of a foreman, track walker, and 6 men during the working season. This is sufficient for a proper maintenance of the tracks.

The following is a statement of the number and kind of bridge structures: 4 steel deck plate girders; 9 steel through plate girders; 7 steel I-beam bridges; 5 rail stringer bridges; 2 timber stringer bridges; 1 concrete arch; 48 concrete and stone culverts; 58 pipe culverts, steel, concrete, and tile; 7 timber box culverts. The bridges were generally in good condition and properly maintained. The minor defects observed were as follows: bridges Nos. 19 and 23 should have the bridge seats cleaned; bridges Nos. 38, 45, and 48 should have the inside guard-rail full spiked to the ties. Since the previous inspection 5 open span bridges have been replaced by concrete flat top structures with ballast floor; 7 steel bridges have been replaced with steel designed for the Cooper E. 60 loading. These improvements are in line with modern practice. The former reduces the maintenance cost and minimizes the danger of accident, and the latter provides for increased weight of equipment in the future.

There are 7 frame and 1 combination stone and frame station buildings. Joint use is made of the Central New England station at Maybrook, the New York, Ontario and Western station at Burnside, and the Erie station at Greycourt. The station buildings, grounds, platforms, and driveways were in good condition, and no defects were observed.

Two steam railway tracks of the New York, Ontario and Western railway are crossed at grade by 1 track of the Lehigh and Hudson River railway near Burnside, protected by mechanical interlocking with signals and derails. There are no grade crossings with electric railroads.

Train movements are controlled by operating rules, timetables, telegraphic train orders, and automatic absolute and permissive block signals. A passenger service is performed over the entire line. The freight service is usually at high speed. The traffic is principally through freight and coal received from and delivered to connecting lines.

Since the previous inspection, the mileage of the main tracks has not been changed; the mileage of sidings has been decreased about 0.37; 8.98 miles of new 100-lb. open hearth rail has been laid replacing 80-lb. Bessemer; 16,292 ties, or 12.5 per cent, have been renewed; 7 miles of track have been re-ballasted with gravel; the masonry on bridges Nos. 38 and 40 has been replaced with concrete; 5 open bridges have been replaced with concrete top culverts; 7 new steel bridges have replaced lighter steel structures; 2 90-ft. turntables have replaced 70-ft. tables at Maybrook and Warwick; 6 additional stalls have been built on the enginehouse, and a new oil storage vault has been constructed at Warwick; automatic signals have been installed over the entire railway. There have been no authorized improvements for the current season. It is, however, expected to renew about 14,000 ties with treated yellow pine. This railway is maintained in a satisfactory manner, and the improvements which have been made are in line with advanced methods. It is recom-

mended that the inside guard-rails be full spiked to the ties on all bridges.

Respectfully,  
W. G. HIMES,  
*Inspector Division of Transportation.*

#### LEHIGH AND NEW ENGLAND RAILROAD.

Inspected May 28, 1914. Last previous inspection June 3, 1913.  
*To the Public Service Commission, Second District:*

I have inspected the Lehigh and New England railroad and branches within this State and submit the following report:

This is a single track, standard gauge railroad. The main line extends westward from a connection with the Pine Island branch of the Erie railroad to the New Jersey-New York state line at Liberty Corners, a distance of 4.11 miles. The Glenwood branch, or Pochuck railroad, extends in a southerly direction from a connection with the main line at Glenwood Junction to the New York-New Jersey state line, a distance of 2.12 miles. The Empire branch, about 1 mile in length, extends in an easterly direction from a connection with the Pochuck railroad at Caleite Junction to the abandoned limestone quarries. About 2000 feet of this branch is now used for the storage of cars. The balance is unfit for use and is practically abandoned.

The main line of this railroad is in the marshy valley of the Wallkill river, and the grade is practically level; however, in one or two places where the line leaves the marsh and ascends to more solid ground very moderate grades are employed. The maximum grade is about 0.3 per cent. The railroad was built along the line of least resistance, and as the country traversed is nearly level and few obstacles were encountered; there are very few curves. Where necessary they are of moderate degree, the maximum being about 6 degrees. The Glenwood branch connects with the main line on the swampy ground, and for a short distance therefrom is nearly level. Leaving the swampy ground it ascends the Pochuck mountain on very heavy grades, the maximum of which is about 5 per cent, and with frequent sharp curves reaching a maximum in 15 degrees. The Empire branch, now used as a siding, is tangent for the greater part of its length, and aside from a grade near the junction is nearly level. The main line is on an embankment throughout the greater part of its length. This embankment was originally made by casting the earth from the sides of the right of way to the center: on this the track was laid and ballasted. The excavated trenches on the sides form the drainage ditches. The soil within a foot or so of the top is saturated with water, and the ditches are seldom dry. The embankments have been widened with cinders and gravel, and the track raised repeatedly in past years. The unstable character of the subsoil makes the maintenance of this track a source of annoyance and expense. The grading on the Glenwood branch is extremely light. Curves and grades were employed to avoid all grading possible. The cuts are usually narrow but present no difficulty to proper drainage as the grades are steep enough to carry the water away from the roadbed. The alignment and surface of the main track are fairly good. This is extremely difficult to maintain as the track is constantly creeping in the direction with the loaded trains, and the rail getting tight at the joints has a tendency to buckle. This condition is usually aggravated by low joints, but there were no low joints observed, and the track was in as good surface and alignment as it is possible to have with the present light rail. The Glenwood branch has only fair surface and alignment, but as it is used only for freight service with an engine and never more than 2 cars one round trip each day, this presents no serious difficulty.

The main line is laid with 60-lb. Bessemer rail joined with angle-bars of the 4-bolt type. The Glenwood branch is also laid with 60-lb. rail and a small amount of 70-lb. Bessemer, principally on the sharpest curves. The rail on the main track is in fair condition, but it is considered too light a section to withstand the tendency to buckle when the joints tighten from the rail creeping. The splices are worn on the top so that they do not fit the rail snugly. The rail on the branch is in poor condition being surface kinked and bent. The ties on the main line are 75 per cent long leaf, yellow pine, 10 feet in length, and the balance a mixture of oak and chestnut ties 8 feet long. The long ties were installed about 6 years ago, and some of the joint ties have been marred and split by the action of the rail joints on the spikes. This condition is not serious at this time, but some of these ties will probably have to be renewed next year. The tie renewals since the previous inspection were sufficient for proper maintenance. It is expected to replace about 370 ties on the main line and about 1000 ties on the Glenwood branch this season. Rigid and spring frogs, automatic switch stands with targets and lamps, and split rail switches are used. Anti-rail creepers were installed on the rail when the 10-foot ties were put in, but they were not of a good type; considerable difficulty has been experi-

enced in keeping them in place, and many are now broken or misplaced. Switchpoints are used at frequent intervals to permit the expansion in the rails. They are securely fastened to the rail, and are properly maintained. The switch lamp on the stand at the east end of the Pine Island siding is not properly adjusted. The lamp should be turned so that the light can be clearly seen by approaching trains. The ballast on the main line is cinders of good quality. They were liberally applied and form a good wide shoulder as a support to the 10-foot ties. The Glenwood branch is ballasted with a rather inferior grade of gravel and a few cinders. The right of way is cleared and in good condition. The fences where needed are in fair condition. The road crossings are few but well maintained. The crossing-signs should be painted. The section force consists of 6 or 8 men in the working season, and this is ample for the proper maintenance of the tracks.

The bridges on the main line consist of 5 pile trestles in generally good condition. The only criticism is that the short approach spans on several of the trestles should be removed and regular back walls substituted. The bridges on the Glenwood branch are 6 in number, consisting of 1 pile trestle and 5 wooden stringer bridges on stone masonry abutments. They are generally in fair condition. The following defects were noted: The first bridge south of Glenwood Junction should have new back walls; the first bridge south of Calcite Junction needs a new deck and 2 new stringers; the third bridge south of Calcite Junction needs new stringers and should have outer guard-rails.

There are no passenger stations. There are 3 freight platforms, level with a car floor, having enclosed sheds on each for the accommodation of less than carload freight shipments. Sidings are provided at frequent intervals for carload freight. At Eden on the Glenwood branch, the old creamery building is used as a freight house: the platform has collapsed and should be rebuilt.

There are no grade crossings with other steam or electric railroads.

There are no automatic block or other signals, and none seems necessary. Train movements are controlled by operating rules, timetables, and telephonic and telegraphic train orders. The traffic is principally coal from the Pennsylvania regions and other products destined to New England points. The freight trains operate by trackage agreement over the Pine Island and Montgomery branches of the Erie railroad to Campbell Hall Junction where connection is made with the New York, Ontario and Western railway, the Wallkill Valley railway, and the Central New England railway. The local traffic is principally dairy and farm products. Terminal facilities owned at Campbell Hall Junction consist of two sidings for the interchange of cars with connecting railroads.

There have been no extensive improvements since the previous inspection. Minor repairs to the bridges and the ordinary track repairs, including tie renewals, have been made. The storm in March destroyed the telephone line, and it will be rebuilt with copper clad wire as an extension to the dispatcher's telephone line. The old telephone line was connected with the office at Sussex which had telegraphic communication with the dispatcher. With the reconstruction of the telephone line and its connection with the dispatcher's line, direct telephonic communication with the dispatcher will be established. Relaying 80-lb. rail with 4-bolt angle-bar splices is being distributed to replace the 60-lb. rail on the main line. It is proposed to lay this rail at once and install new rail anchors. It is expected that this heavier section of rail properly anchored to the ties will prevent much of the trouble with the creeping track and permit the removal of some or all of the switchpoints now used to take up the expansion in the rails. 370 ties on the main line, 660 on the sidings, and about 1000 on the Glenwood branch will be this season's tie renewal: this is sufficient for proper maintenance.

This railroad is being maintained in a satisfactory manner. It is recommended that repairs be made promptly to the bridges on the Glenwood branch.

Respectfully,

W. G. HIMES,

Inspector Division of Transportation.

#### LEHIGH VALLEY RAILROAD.

Inspected July 27 to 31, 1914. Last previous inspection October 20 to 25, 1913.

To the Public Service Commission, Second District:

I have inspected the Lehigh Valley railroad in the State of New York and submit the following report:

The lines of this railroad lying within the State of New York comprise the whole of the Buffalo division and the larger part of the Seneca and Auburn divisions. The mileage is as follows:

Line	From	To	Miles
<i>Seneca Division:</i>			
Main line.....	State Line near Sayre, Penna.....	Manchester.....	89.10
Waverly branch.....	State Line near Sayre, Penna.....	Waverly.....	0.41
Ithaca branch.....	Van Etten Jet.....	Geneva Jet.....	59.49
Willard branch.....	Hayt's Corners.....	Willard.....	2.98
Naples branch.....	Geneva.....	Naples.....	29.43
<i>Buffalo Division:</i>			
Main line.....	Manchester.....	Buffalo.....	86.07
Rochester branch.....	Rochester.....	H. block.....	28.72
Honeoye Falls spur.....	Honeoye Jet.....	Honeoye Falls.....	0.35
Niagara Falls branch.....	Niagara Jet.....	Tonawanda Jet.....	10.56
Lehigh and Lake Erie.....	Tiiff Farm Jet.....	Tiiff Farm.....	10.93
<i>Auburn Division:</i>			
Lehigh and N. Y. branch.....	State line near Sayre, Penna.....	N. Fair Haven.....	115.37
Elmira and Cortland branch.....	Elmira.....	Cannden.....	139.14
Auburn and Ithaca branch.....	Auburn.....	Ithaca.....	42.43
Cayuga branch.....	Cayuga Jet.....	Cayuga.....	4.40
Seneca Falls branch.....	N. Y. C. connection.....	Geneva Jet.....	10.59
Total in State of New York.....			630.01

The main line, Seneca and Buffalo divisions, has double track throughout its whole length and also 11.4 miles of third main track. The Lehigh and Lake Erie and Niagara Falls branches have double track, excepting on the latter where a single track 0.17 mile long extends under the New York Central tracks near Niagara Junction. The Ithaca branch has 1.03 miles of double track, and all the other lines are single track.

The main line enters the State in the valley of the Susquehanna river, from which it ascends to a summit near Alpine, and thence makes a long descent on the east side of Seneca lake to Geneva. From this point a rolling country is crossed until the level plain bordering Lake Erie is reached. There is some fairly heavy grading in a few places on this line, but as a whole the location is such that low grades and moderate curvature were secured with moderate construction work. The cuts and fills have a full cross-section and the track is well drained. A large amount of tile drainage has been installed both on the main and branch lines. The surface and line of the track quite generally are good. The Ithaca branch is a part of the original main line which terminated at Geneva. It crosses the divide between Lakes Cayuga and Seneca with fairly heavy grades and moderate curvature. The cuts and fills are in good condition and suitable track ditches are provided. There are several fast passenger trains on this line, and although the standard of maintenance is the same as for the main line the track surface between Ithaca and Geneva Junction is not as smooth as it should be for high class trains. Heavier rail is to be laid on this line soon however, and the opportunity should be used to improve the line and surface. The Lehigh and Lake Erie is a freight line extending around the eastern and southern city line of Buffalo to the lake front. It is built on a fill to avoid grade crossings, and its condition is fairly suitable for the traffic. The Lehigh and New York and the Elmira and Cortland branches extend across the rolling and rough country in the central part of the State, with heavy grades and sharp curves. The cuts and fills generally have fair cross-sections, and the ditches with a few exceptions provide suitable surface drainage. The alignment and surface of the track are fair to good. The Auburn and Ithaca branch follows the eastern shore of Cayuga lake for most of its length. There is a heavy grade ascending from the lake level to Auburn, and there are many sharp curves along the lake shore. The roadbed is well formed, and the surface and alignment of the track are fair to good. On the smaller branches the roadbeds and tracks are in fair to good condition, and there are no especially notable features.

The rail on the main line consists of 90-lb. and 100-lb. open hearth steel, and most of it is in very good condition. There are a few miles of 100-lb. rail on the Ithaca branch, and large amounts of 80-lb. and 90-lb. rail on all of the branch lines. The other weights of rail on the branch lines vary from 56-lb. to 76-lb. Good relayer rail from the main line is being laid on the branches, it being well adapted to the traffic on those lines. A few defective rails and poor rail joints were found, as noted further on.

The track ties consist largely of yellow pine with oak, chestnut, and cedar in smaller amounts on the light traffic lines. Treated ties are being largely used for renewals, and on the lines of heavy traffic they are being used exclusively. The condition of the ties generally is good, and where renewals have been made the rate of renewal is ample for maintaining the track timber. The renewals are not as far advanced however as they should be at this season, and on the Auburn division it was stated that only 35 per cent of the authorized renewals had been made. Track ties in ample quantities are said to be available, and it is suggested that the renewals should be pushed forward more rapidly in order that the track may be disturbed as little as possible during the fall months.

Crushed stone ballast is used on the main line, on the Ithaca and Niagara Falls branches, and on the Rochester branch north

of Rochester Junction. On the other lines cinder ballast is chiefly used, there being smaller amounts of gravel, slag, and stone screenings. Additional cinder ballast is being applied on the branch lines, there being a constant supply of this material from the engine terminals.

The turnouts consist of split switches with both rigid and spring frogs. With the heavy rail a large number of solid manganese steel frogs are used which require no frog bolts. Switch stands are largely of the automatic type and are equipped with the usual locks, targets, and lamps. On the single track lines some of the switches are equipped with bolt locks and semaphore signals. Other switches in single track territory are equipped with a clamp under the rails which holds the switchpoint against the stock rail when set for the main track. In the single track territory covered by new automatic signals another style of lock is being tried out. The essential feature of this lock or clamp consists of 2 metal blocks, 1 of which slides on the flange of each rail just in front of the switch. These blocks are operated by the switch stand and engage the switchpoints, clamping both points in proper position when the switch is set for either the main track or the siding. Derails are quite generally used on sidings, in many cases the derail being connected to the switch by a pipe line. Tie-plates and rail anchors are used extensively.

The right of way in most respects is well kept and suitably fenced. The road crossings generally are in good condition and are equipped with standard crossing-signs. At several crossings disc or banjo signals also have been installed, which give both an audible and visible warning. A trial is being made of building road crossings without planks. A good road ballast is placed across the track, and a top dressing of finer material is put on. The crossing is practically a short section of macadamized road, and if properly constructed and cared for it should give good results.

The track sections on double track have an average length of 4 miles, and the average force per section is about 9 men. On single track the sections which are equipped with hand-cars have an average length of about 6 miles, and the average force is 6 men per section. Motor section cars are used on some of the branch lines and the sections so equipped are made 8 to 10 miles long, and the section labor per mile is slightly reduced. The amount of track labor employed appears to be sufficient for properly maintaining the track.

The following is a list of the track defects which were found: Seneca division main line: poor surface on westbound track near milepost 295, 324, and west of milepost 335; curveworn rail on bridge east of Alpine; ties burning in many places on the westbound track west of Geneva; it was evident that hot coals had been scattered recently, and it was stated that the matter would be investigated; Ithaca branch: 2 broken frogs at Interlaken; mowing needed in the vicinity of milepost 337, 338; Naples branch: narrow cuts west of milepost 345 and west of milepost 347; a wet and sliding cut east of milepost 349; fence repairs needed west of milepost 355. Buffalo division main line: poor surface on westbound track in the vicinity of milepost 403; loose rail anchors in the vicinity of Wadsworth; poor plank in a road crossing west of milepost 390; Rochester branch: ditches filled and track rough in a cut south of Cedar Swamp; weeds in the track north of Lima, and mowing needed south of Woodruff; ditches filled between milepost 387 and 388; rough track north of milepost 391; Lehigh and Lake Erie branch: loose track bolts in the vicinity of bridges Nos. 445A and 446; 2 switch lamps not in line with the track at Tift Farm. Auburn division Lehigh and New York branch: several rough spots in the track between Smithboro and Tioga Center; a rail with a halfmoon break in the flange and a rail with a split end at pole W. U. T. 985; a rail with a halfmoon break in the flange about halfway between milepost 285 and 286; several broken angle-bars in the vicinity of mileposts 285, 286; a broken frog at Owego; insufficient ballast east of bridge No. 301; a narrow fill east of bridge No. 318; rough track in the yard at Freeville; a broken frog at Moravia; a narrow fill north of Glenwood beach; poor planking in a road crossing north of bridge No. 355; weeds should be cleared away from the pipe lines at the Sterling interlocking plant; poor track alignment between bridges Nos. 381 and 381A; a leaning sign at a road crossing south of Brick Church; a broken frog at Throop; rough track between bridge No. 357 and the trolley line crossing northward; poor planking in the street crossing north of bridge No. 357; Elmira and Cortland branch: weeds in the track south of Camden; rough track on a curve south of milepost 137, and south of milepost 120; ditches filled between mileposts 116 and 117; poor track ties between Blakeslee and the stone crusher; ditches filled north of milepost 103, and south of milepost 99; a leaning sign at a road crossing north of milepost 97; a piped rail between bridges Nos. 88 and 988; a switch point in poor adjustment at Truxton; rough track south of milepost 79; a broken frog north of Elm street, Cortland; an apparently defective rail a short distance north of milepost 71, and a rail with a mashed end south of bridge No. 67; a narrow fill south of bridge No. 65; ditching needed north of McLean; shims under a switch at McLean; a rail

with a mashed end about midway between milepost 62 and bridge No. 61; a leaning sign at a road crossing south of milepost 55; rough track between Varna and the overhead bridge northward; ditches filled south of milepost 51; narrow fills south of Snyder and between bridges Nos. 29A and 29; a broken angle-bar south of bridge No. 20; poor planking in road crossings south of bridge No. 15, and south of Erin; Auburn and Ithaca branch: a broken frog south of the Central New York Southern overhead bridge; an apparently defective rail on the east side of the track north of the north switch at Oakwood; a ditch filled south of Levanna; rough track south of Levanna and south of Aurora; an apparently defective rail on the east side of the track between bridges Nos. 312J and 311A; rough track south of milepost 311; a broken frog south of milepost 307; Cayuga branch: trees and brush close to the track north of Cayuga Junction; Seneca Falls branch: ditches filled near Seneca Falls; many bent rails between Waterloo and Geneva Junction.

On the main line and the Ithaca, the Niagara Falls, and the Lehigh and Lake Erie branches, all of the bridges and culverts have been built in some permanent form of steel and masonry. The other lines have a large number of timber cattle-passes and trestles, and also a large number of I-beams and plate girders of moderate span supported on timber bents. The bridges quite generally are maintained in good condition. The officers in charge of the structures had been over most of the lines previous to the inspection, marking the defective timbers and other parts needing repairs. The programme of work thus laid out covers practically all of the repairs required for proper maintenance. Certain defects which were found and other items requiring mention are as follows: Seneca division main line: No. 307 has cracks in the abutments, but the condition is not serious at present; No. 344A has a hole burned in the planking on the deck; the bridge is to be rebuilt; No. 344C has some poor guard timber; No. 359, a walk on the deck is not firmly supported; the bridge is to be rebuilt. Buffalo division main line: No. 445C has some poor guard timber; No. 445G and 446C have some poor ties; Lehigh and Lake Erie branch: Nos. 443, 444A, and 444B have some poor ties; No. 443A needs painting; No. 443B, the abutments have settled slightly but apparently there is no movement at present; No. 446B should have saprot trimmed off the deck timbers. Auburn division: There is a large number of timber structures on the several lines of this division on which the usual annual repairs are needed; this work was in progress at several places, and the renewals appeared to be suitable for proper maintenance; Lehigh and New York branch: No. 281 has some poor ties and the masonry is cracked; the structure is to be rebuilt; No. 289, one bridge seat on the pier is cracked; No. 354A has poor abutments; No. 358, the abutments are cracked but appear to be in safe condition at present; No. 359A, the abutments are cracked and bulged and are in poor condition; No. 361 has a poor deck, and the masonry in the abutments is loose; No. 351A is a light steel trestle reinforced with timber bents; an arch is to be built; No. 372A has a soft block under one girder and the back wall is poor; Elmira and Cortland branch: Nos. 104B and 101, the bridge seats need cleaning; No. 104, the counterbraces need adjusting; No. 91, the north wall needs repairs; No. 81A, drift should be cleared away from the structure; No. 80A, gravel and drift should be cleared out of the stream; No. 64A has some poor stringers and the north bent is out of plumb; No. 30A needs painting; No. 16C, the south mudsill had been undermined by a recent freshet; arrangements were made for immediate repairs; No. 10B, the channel of the stream needs clearing; No. 5C needs patch painting; Auburn and Ithaca branch: No. 339D has some poor guard timber; No. 334A, the masonry needs pointing; No. 320A, the northeast bridge seat is in poor condition; it is to be repaired; No. 310, the abutments are poor and are to be rebuilt.

There are brick station buildings in some of the larger cities and towns, but the larger number of stations have frame buildings. Some of the station buildings are small but generally the station facilities appear to meet the requirements of the traffic. Progress is being made on the new passenger terminal at Buffalo. At Weedsport and Sylvan Beach, the stations need painting. It was stated that this work has been postponed owing to a contemplated change in the standard station colors. It is suggested that painting should be done soon, as these stations present a very poor appearance. At Locke and Swartwood, minor repairs are needed on the platforms. At Freeville, the concrete platform has settled badly out of surface. It was stated that arrangements have been made for repairs.

On the main line at Rochester Junction, 2 tracks are crossed by 1 track of the Rochester branch (Lehigh Valley): the crossing has slip switch connections, which together with other switches at this place are controlled by a mechanical interlocking plant; at P. & L. Junction, 4 tracks are crossed by 1 track of the Buffalo, Rochester and Pittsburgh railway, protected by

mechanical interlocking; at Buffalo, 2 tracks are crossed by 4 freight tracks of the New York Central and Hudson River railroad; trains stop before going over the crossing and are governed by signals which slide in and out of a tower. Ithaca branch at Van Etten, 1 track is crossed by 1 track of the Elmira and Cortland branch (Lehigh Valley); the crossing has switch connections and is controlled by a mechanical interlocking plant. Naples branch at Stanley, 1 track is crossed by 3 tracks of the Northern Central railway, protected by an interlocking plant. Rochester branch at Mortimer, 1 track is crossed by 2 tracks of the West Shore railroad, protected by a mechanical interlocking plant. Lehigh and New York branch: at Owego, 1 track is crossed by 1 track of the Delaware, Lackawanna and Western railroad, protected by a semaphore signal; at Freeville, 2 tracks are crossed by 2 tracks of the Elmira and Cortland branch (Lehigh Valley), protected by a semaphore signal; at Auburn, 1 track is crossed by 1 track of the New York Central and Hudson River railroad; protection consists of interlocked signals, but there are no derails; at Sterling, 1 track is crossed by 1 track of the New York Central and Hudson River railroad, protected by an interlocking plant. Elmira and Cortland branch: at Elmira, 2 tracks are crossed by 1 freight track of the Delaware, Lackawanna and Western railroad, protected by a target signal; 1 track is crossed by 1 freight track of the Northern Central railway, protected by a target signal; and 1 track is crossed by 4 tracks of the Delaware, Lackawanna and Western railroad, protected by a mechanical interlocking plant; at Caroline Junction, 1 track is crossed by 1 track of the Delaware, Lackawanna and Western railroad, protected by a target signal; at Cortland, 1 track is crossed by 1 track of the Delaware, Lackawanna and Western railroad, protected by a mechanical interlocking plant; at Rippleton Junction, 1 track is crossed by 1 track of the New York Central and Hudson River railroad, protected by a target signal; at Canastota, 1 track is crossed by 2 tracks of the West Shore railroad, protected by mechanical interlocking; at Sylvan Junction, 1 track is crossed by 1 track of the New York, Ontario and Western railway; the crossing consists of a single track across the bridge over the Barge Canal, with a junction at each end, all of the switches being controlled by a mechanical interlocking plant. Auburn and Ithaca branch: at Auburn, 1 track is crossed by 1 yard track of the New York Central and Hudson River railroad; the New York Central crews protect their trains when using the crossing; at Ithaca, 1 track is crossed by 1 track of the Delaware, Lackawanna and Western railroad, protected by interlocked semaphore signals.

On the main line at Cheektowaga, 2 tracks are crossed by the International railway: an interlocking plant was installed as described in former reports, but it is not in operation, owing to a protest from the Erie railroad, which has tracks adjacent not included in the interlocking protection; the derails in the electric line are now thrown by hand; it certainly seems desirable that this plant should be remodeled to include the whole crossing and put in operation; at Louisiana street, Buffalo, 2 tracks are crossed by the Buffalo and Lake Erie Traction Company, protected by derails in the electric line; at Chicago street, Buffalo, 2 tracks are crossed by the International railway, protected by interlocked signals and derails in the electric railway track. Lehigh and New York branch at Auburn, 1 track is crossed by the Auburn and Syracuse Electric railroad, protected by a flagman and gates across the electric line; at Auburn, 1 track is crossed by the Auburn and Northern Electric railroad, protected by a flagman and derails in the electric line. Elmira and Cortland branch at Elmira, 1 track is crossed by 1 track of the Elmira Water, Light and Railroad Company, protected by derails in the electric line; at Horseheads, 1 track is crossed by 1 track of the Elmira Water, Light and Railroad Company, protected by derails in the electric line, and 1 yard track is crossed by the same electric line without protection; at East Ithaca, 1 yard track is crossed by the Ithaca Street railway, without protection; at Cortland, 3 tracks are crossed by 1 track of the Cortland County Traction Company, protected by derails in the electric line. Auburn and Ithaca branch at Renwick street, Ithaca, 1 track is crossed by 1 track of the Ithaca Street railway, protected by derails and signals; at State street, Ithaca, 1 track is crossed by 1 track of the Ithaca Street railway, without protection.

The main line of this railroad carries a heavy traffic of both passengers and freight. There are connections at Buffalo and Suspension Bridge with all of the western lines which terminate at those points, and at Tift Farm there is a large interchange of bulk freight with lake vessels, coal and grain being the chief commodities. Freight received at the terminals and from connecting lines at Buffalo and Suspension Bridge is taken to Manchester, the first division point eastward, and there classified into trains for the various eastern points to which it is destined. There is a third main track between P. & L. Junction and Stafford, which is used by heavy westbound freights in going up a long grade, thus leaving No. 1 track westbound free for high

speed traffic. The construction of additional third main track at other points is contemplated. On the Auburn and Ithaca branch and the Lehigh and New York branch north of Auburn, there is a moderate northbound traffic of coal which is delivered to lake vessels at North Fair Haven. On the Rochester branch north of Rochester Junction there is a fairly heavy traffic; on all of the other branch lines the traffic is largely local and moderate in amount. The Seneca Falls branch has been extended to join the Cayuga branch, thus affording this railroad a direct line from Auburn to Geneva and Buffalo. Joint use is made of the New York Central track and bridge across the north end of Cayuga lake. The main line, the Ithaca branch, and the terminal branches near Buffalo are operated under an automatic block system, the blocks being about one mile long. Upper quadrant signals have been installed on the Ithaca and the Lehigh and Lake Erie branches, but elsewhere the block signals are the home and distant lower quadrant type, standing normally at stop. The other lines are operated under the manual block system, using the train order stations and signals. Telephones for train dispatching are being installed on this railroad and are now in service on the Seneca and Buffalo divisions and the Elmira and Cortland branch of the Auburn division. The telegraph is still in use on the other lines.

Besides the interlocking plants mentioned in the list of railroad crossings, there are other interlocking plants at the following points: near the New York-Pennsylvania state line, controlling switches at the north end of Sayre yard; at Van Etten Junction, controlling the main line and Ithaca branch routes; at Geneva Junction, controlling the junction of the Ithaca and Seneca Falls branches with the main line; at Manchester, controlling the switches at the east end of the yard; at Niagara Junction, controlling the main line and the Depew and Tonawanda branch routes; and at Tift Farm Junction, controlling the main line and Lehigh and Lake Erie routes. The terminal facilities at Buffalo, excepting the passenger station, appear to be good. As this was one of the later roads to enter Buffalo, it was carried above most of the other lines, thus largely avoiding grade crossings. Good facilities also are afforded at the various stations of the several lines for handling the existing traffic.

The following notable improvements have been made in the past year: the mileage has been increased by 7.20 miles of third main track, 2.39 miles on the Seneca Falls extension, and 9 miles of sidings; new rail laid, 84.61 miles of 100-lb. rail and 5.39 miles of 90-lb. rail; relayer rail laid, 39.28 miles of 90-lb. rail, 5.64 miles of 80-lb. rail, and 4.13 miles of 76-lb. rail; ballasting consists of 14,600 cubic yards of crushed stone used in ballast repairs, and 4.40 miles of track ballasted with cinders; 60 bridges and culverts were rebuilt or heavily repaired; a new concrete and brick station was built at Gorham; section houses were built at Stafford and Williamsville; a transfer platform was built at Manchester; a large steel standpipe was installed at East Buffalo; upper quadrant automatic signals were installed on the Ithaca and the Lehigh and Lake Erie branches; extensive tile drainage was installed along the track in various cuts; streets near the stations at Elmira and Cortland were paved; work was continued on the Buffalo terminal; the rebuilding of the Cayuga branch and the construction of the Seneca Falls branch extension were completed and freight service installed.

Important improvements contemplated for the ensuing year include the following: the replacing of light rail on the branch lines with heavier relayer rail; additional third track on the main line; a concrete station at Trumansburg; an improvement of the line at Newfield; an increase in the track and station facilities at Ithaca; the installation of automatic signals on the Rochester branch; a continuation of the work on the Buffalo terminal.

The several lines of this railroad within the State of New York are maintained generally in good condition, and most of the defects listed above are of a minor character. The rails which appeared from the inspection engine to be defective should be examined to determine their fitness for service. The recommendations of the preceding report generally were carried out. It is recommended that the repairs of bridges and culverts be carried out as outlined in the company's programme of bridge work; that the other defects of track and structures enumerated in this report be remedied.

Respectfully,

J. B. STODER.

Steam Railroad Inspector.

#### LITTLE FALLS AND DOLGEVILLE RAILROAD.

Inspected May 11, 1914. Last previous inspection July 26, 1912.

To the Public Service Commission, Second District:

I have made an inspection of the Little Falls and Dolgeville railroad and submit herewith the following report:

The Little Falls and Dolgeville railroad is a single track line of standard gauge extending in a northerly and southerly direction from Little Falls to Irondale a distance of 13.97 miles. Passenger trains are operated regularly between Little Falls and Salisbury Center, a distance of 12.35 miles. Physical connections at Little Falls facilitate the interchange of freight and passengers with the Mohawk division of the New York Central and Hudson River railroad. Terminal facilities, including interchange and storage sidings, a turntable, and water station, are located at Little Falls. The enginehouse, a turntable, water and coal station, and yard tracks are at Dolgeville. There is a wye for turning engines at Salisbury Center, and a turntable not now in use at Irondale. There are sidings to various industries and for local shipments at various points along the line. The total length of all sidings is about 1.5 miles.

This railroad ascends from the Mohawk valley at Little Falls to its northern terminus at Irondale on grades varying from moderate to comparatively heavy. The maximum grade is 2.08 per cent, and the maximum curve is 9 degrees. Near Little Falls the railroad is benched in the rock bluff for about two miles, and the excavation was comparatively heavy. The sideling location necessitated several retaining walls and several comparatively long trestles and bridges over ravines. The balance of the line has much lighter earth work. The cuts and embankments were generally of ample cross-section properly to support the track, and the ditches were in good condition and seemed properly to drain the roadbed. The alignment and surface of the track south of Salisbury Center were good. It was from fair to good between Salisbury Center and Irondale where a switching service only is performed. There are no unusual features in the construction or operation of this railroad.

The tracks are laid with 3.89 miles of 65-lb. and 10.08 miles of 60-lb. Bessemer rail. It was in generally good condition. One rail in the main track at the siding near the south end of Louck's cut is either piped or has a split head, and should be removed at once. The ties are a mixture of yellow pine and cedar. When the renewals for the present season, amounting to 3500 ties, have been made the track will be in good condition. The rails are joined with 4- and 6-bolt angle-bars. Rigid and spring frogs, rigid switch stands, and split switches are used. They were generally in good condition, and no defects were noted. The ballast is principally crushed stone. There are however several places where cinders are used. The ballast is generally of good quality and sufficient in amount. The right of way is clean and well kept, and the fences, road crossings, and signs were in good condition. The sections are about 7 miles in length, and the force consists of a foreman and 6 laborers on each section. This is sufficient properly to maintain the track and its general good condition proves that this force is ample.

There are 11 single span timber cattle-passes, 5 timber trestles ranging in length from 53 to 438 feet, 1 deck truss, and 2 steel trestles with timber trestle approaches. The total length of all the timber spans is about 1600 feet, while the actual opening required for drainage or other purposes is a small percentage of this. The constant repairs and attention required to keep these trestles in repair, and the danger from fire make them a heavy item of expense. It has been suggested in previous reports that a tentative programme be prepared for distributing the work of filling these trestles over a number of years. Since the last inspection 1 timber cattle-pass has been replaced with a concrete structure. It is proposed to replace the present timber trestle over State street, Dolgeville, about 100 feet in length, with a 3-span through girder bridge with concrete abutments: this is in line with the suggestions heretofore made and is commendable. There are also 1 pony truss bridge and 1 deck plate girder bridge on masonry abutments. The minor defects noted on the bridges were as follows: bridge at station 2 plus 337 needs some new guard stringers; bridge at station 2 plus 637 needs some new ties and guard stringers; bridge at station 12 plus 638 should have guard-rail full spiked; bridge at station 14 plus 899 needs some new guard stringers, and guard-rail should be full spiked; cattle-pass at station 22 plus 943 needs new sills and plumb posts; cattle-pass at station 32 plus 086 needs new caps; bridge at station 35 plus 511 needs about 130 new ties on the steel spans, and guard-rail should be full spiked; bridge at station 50 plus 000 needs new ties and stringers: it is proposed to replace this bridge with steel girders and concrete abutments this year; bridge at station 64 plus 089 has a few ties with saprot: this should be adzed off at once to lessen danger from fire.

There are 5 frame passenger stations in generally good condition. Agents are in charge of the stations at Dolgeville and Salisbury Center. Joint use is made of the New York Central and Hudson River railroad station at Little Falls. The stations seem to afford ample facilities for the class of service performed. There are no grade crossings with other steam or electric railroads.

The business handled consists principally of in- and outbound freight to the various industries along the railroad. Several large industries are located in Dolgeville. The iron ore mines at Irondale are not being worked at the present time. Lumber and lumber products are shipped from Salisbury Center. A private branch line is being built to facilitate handling the products from a tract of about 22,000 acres of timber land. A good passenger service is maintained between Salisbury Center and Little Falls. Trains are operated by telegraphic train orders, timetable, and operating rules. There is no block system in use and none seems necessary.

Since the previous inspection one timber cattle-pass has been replaced with a concrete structure of modern design; two new concrete walls replacing dry masonry walls near the Pierce Stone Company's plant have been built; 3982 cross-ties have been replaced representing a renewal of about 11 per cent. It is expected to renew about 3500 ties, or about 10 per cent, during this season, and the present timber trestle over State street, Dolgeville, will be replaced with a modern steel girder bridge on concrete abutments.

This railroad is being maintained in a satisfactory manner. When the season's track work has been completed and the minor defects in the structures remedied the railroad will be in good condition. It is recommended (1) that the minor defects in the track and bridges enumerated in the body of the report be given prompt attention; (2) that the metal guard-rail on all bridges be full spiked to the ties.

Respectfully,  
W. G. HIMES,  
Inspector Division of Transportation.

#### LONG ISLAND RAILROAD.

Inspected April 21 to 24, 1914. Last previous inspection May 7 to 9, 1913.

To the Public Service Commission, Second District:

I have inspected that part of the Long Island railroad which lies within the Second Public Service District of the State of New York and submit the following report:

The Long Island railroad within the Second Public Service District comprises the following lines:

Line	From	To	Miles
Main line	City line	Greenport	80.75
Montauk division	City line	Montauk	100.92
Oyster Bay branch	Mineola	Oyster Bay	14.57
Wading River branch	Hicksville	Wading River	45.39
Far Rockaway branch	Valley Stream	City line	4.71
Long Beach branch	Lynbrook	Long Beach	5.24
Hempstead branch	Mineola	Hempstead	2.74
Valley Stream branch	Hempstead Crossing	Valley Stream	6.15
North Side division	City line	Port Washington	5.28
Sag Harbor branch	Bridghampton	Sag Harbor	4.43
Manor branch	Manorville	Eastport	6.00
Central extension	City line	Babylon	19.98
Bethpage branch	Bethpage Junction	Bethpage	1.50

There is double track on the lines in and near New York city extending on the main line and Wading River branch to Hicksville and Syosset; on the Montauk division and Long Beach branch to Oakdale and East Rockaway; on the Oyster Bay branch to Locust Valley; and on the North Side division to Great Neck. The Central extension is not operated with a regular service between Garden City and Babylon.

The surface of Long Island is rugged along the north shore and slopes to more level ground along the south shore. The railway lines are fitted to the rolling surface of the ground, involving many curves and grades. Some of these grades are rather steep but they are not very long, and present no serious obstacle to the operation of trains. The cuts and fills are of moderate extent and quite generally are in good condition. On the north side of the island the grading extends through various materials including clay and gravel, but in the central and southern parts of the island the soil is very sandy. Suitable track ditches are provided, and the drainage generally is good. On the North Side division east of Great Neck, there is a slide of earth in a cut, and the roadbed is saturated with water. It is suggested that a moderate amount of tile drainage would be a desirable improvement. The line and surface of the track are good and well suited to the character of the traffic.

The lines of heavy traffic near New York city are laid largely with 100-lb. rail. Outside of this zone of dense traffic there is a large mileage of 85-lb. and 80-lb. rail, and on the lines of light traffic there are various amounts of 76-lb. to 56-lb. rail. The rail is in good condition, and no cases were observed either of defects or excessive wear. The track ties generally are in good condition, and the annual renewals apparently are sufficient for proper maintenance. The renewals for the current year were well advanced at the time of the inspection. Treated ties are used to a limited extent, more particularly on construction work. The track appliances consist of split switches, rigid and spring frogs, derails, guard-rail clamps, tie-plates, and rail

anchors. These appliances quite uniformly are in good repair and performing the several functions for which they are intended. The ballast consists of sand, gravel, and cinders, and it appears to be satisfactory both in quality and quantity. Owing to the heavy passenger traffic on this railroad especially in the Summer, the roadbed is oiled each Spring to prevent the raising of dust by passing trains. The right of way is clean and well kept, and fences are provided where they are needed. New fences are built with concrete posts and heavy galvanized wire, the latter being required to withstand the corroding effect of the salt atmosphere. Road crossings and signs are maintained in good condition. The track sections are in various lengths of 3 miles to 7 miles, and the track forces are 4 to 6 men per section. The general condition of the road indicates that this amount of labor is sufficient for proper maintenance.

A large proportion of the bridges and culverts have been built in permanent forms of masonry and steel. Of the steel structures there are 5 steel trestles, 1 through truss, and a large number of plate girders and I-beams of moderate span. The bridge steel appears to be in good condition except that in a few places painting is needed. This work is provided for in the programme of bridge repairs. The bridge masonry quite generally is of very good quality. There are several timber trestles on the lines at the east end of the island and on the Long Beach branch. These structures are in good condition, the annual repairs apparently being fully sufficient for good maintenance. Drawbridges of moderate span are located at several streams and inlets which are navigated by small boats. Interlocking devices are used for the protection of trains at these openings.

Owing to the large local passenger traffic on this railroad, the stations are located at close intervals. The larger proportion of the stations are of frame construction, and as they were built a number of years ago before the railroad lines were consolidated there is no evidence of uniform design. Some of these older stations are quite small, but in general the station facilities appear to serve the needs of the existing traffic. At a number of the more important points, modern station buildings of brick or concrete have been erected in recent years. Most of the stations have separate express and freight houses. The station buildings and grounds quite generally are clean and well kept. The salt atmosphere on the island has a disintegrating effect on paint, and some of the frame stations need painting. It was stated that a certain amount of this work will be done this season. At stations in double track territory there is a fence between the two tracks extending the length of the station platforms. At some of the more important stations either subways or foot bridges overhead are provided. At other places there is an opening in the fence and a planked crossing for the use of passengers. At the smaller stations the opening in the fence is not protected. At the larger stations the opening in the fence is protected by a gate which is operated by a gate tender at a nearby street crossing. This arrangement provides some protection, but where traffic is heavy the crossing of tracks by passengers is always an element of danger. The use of foot passages either over or under the tracks should be carefully considered whenever station improvements are made on the double track lines.

At Mineola, 2 tracks of the main line are crossed by 1 track of the Oyster Bay branch, protected by interlocking. At Hempstead Crossing, 1 track of the Hempstead branch is crossed by 1 track of the Central extension, protected by interlocking. There are only 4 grade crossings of electric lines, all of which are protected by derails, gates, or interlocking.

The principal business of this railroad is the handling of a heavy suburban passenger traffic. During the winter months the passenger traffic to the east end of the island is moderate, but in the summer season there is a heavy traffic on all of the lines. The heavy traffic lines in and near New York city have been electrified, using the third rail system of transmission. The freight traffic is moderate in amount. Train movements are governed by the timetable schedules, operating rules, and train orders. Automatic block signals also are in service on the heavy traffic lines adjacent to New York city. The older signals are of the 2-position, lower quadrant, home and distant type, while signals more recently installed are the 3-position, upper quadrant form. Where automatic block signals are not in use, trains are manually blocked except on the least important branches and on that part of the Central extension branch over which there is no regular operation. This latter system has been installed during the past year. Besides the interlocking already mentioned at the crossings and drawbridges, there are interlocking plants at the junctions at Floral Park, Hicksville, and Valley Stream, and small interlocking plants also are located at the end of double track on the several lines. There are no very large terminals in this district. Owing to the requirements of the suburban traffic, there are engine terminals at several points on the different lines where trains lie over night. The buildings and sidings provided for freight traffic appear to furnish reasonable facilities for the existing business.

The larger part of the improvements being made on this road at present consists of extensive terminal facilities in the First

Public Service District. In the Second Public Service District during the past year 2 timber trestles have been replaced by concrete culverts, 2 stations have been rebuilt, and 4 grade crossings of highways have been eliminated. This railroad is in good condition for performing the service required of it, and the programme of maintenance work, especially on the track and bridges, appears to be well suited to the efficient operation of the property. It is recommended that some painting be done this season on stations where it is needed.

Respectfully,  
J. B. STODER,  
Steam Railroad Inspector.

#### LOWVILLE AND BEAVER RIVER RAILROAD.

Inspected May 19, 1914. Last previous inspection May 27, 1913.

*To the Public Service Commission, Second District:*

I have made an inspection of the Lowville and Beaver River railroad and submit the following report:

This line is standard gauge and has a single main track extending from Lowville, where it connects with the New York Central and Hudson River railroad, to Croghan, a distance of 10.44 miles.

Near Lowville the line crosses the Black River flats on a fairly heavy fill, and thence extends northeasterly across a rolling country. The curvature is moderate and the grades, although fairly heavy, are suitable for a light railway. The cuts and fills are in good condition, and track ditches are provided for surface drainage. The surface and alignment of the track are fair to good.

The rail is mostly a 60-lb. section, there being a smaller amount of 70-lb. rail; much of the lighter rail is considerably bent and battered, making it difficult to keep the track in good surface. It is apparent however that an effort is made to get the best results possible with this rail, and for the existing traffic it gives reasonably good service. The track ties are mostly of cedar and generally in good condition. The renewals, which will amount to 5000 ties this season, are now being made with yellow pine. The track appliances, consisting of split switches, rigid frogs, and both rigid and automatic switch stands, appeared to be in good working order. A considerable number of tie-plates are used on the curves. The track is well ballasted with native sand and gravel. The right of way is clean and open, and suitable fences are maintained. The road crossings and signs are in good condition, except that there are poor planks in the crossing south of the dam at New Bremen. The track work is handled by one track gang, consisting of 6 to 12 men during the working season. A motor section car is used, and it has been found both efficient and economical.

There are several steel bridges with moderate spans all of which are in good condition. The other structures are culverts and cattle-passes consisting of timber stringers on stone or concrete abutments. North of Lowville a cattle-pass has a poor abutment which is assisted by a timber bent: it is to be rebuilt soon. Cattle-passes near telegraph poles 154 and 329 have soft blocks under the stringers. First culvert north of New Bremen, the stringers are soft on the abutments, and it is evident that this result was hastened by the presence of dirt on the bridge seats which kept the timber damp. The culvert near New Bremen which was washed out should be rebuilt in some permanent form as soon as practicable. It is intended gradually to replace the timber stringers by reinforced concrete slabs.

There are 4 stations on the line, at 3 of which this company has good station buildings. At Lowville, the station building is owned by The New York Central and Hudson River Railroad Company and leased to this company.

One train crew handles all of the trains which are operated. There are turntables at both ends of the line for turning engines, and the facilities for handling both passengers and freight appear to be sufficient.

The only grade crossing is that of a narrow gauge industrial track at Lowville, no protection provided.

During the past year 1200 track feet of new 70-lb. rail were laid; concrete platform and walks were built at the Lowville station; and a small amount of ballasting was done. Improvements contemplated for the current year include the building of a concrete platform at the Croghan station, and the replacement of the timber stringers in several culverts with reinforced concrete slabs.

The recommendations of the preceding report generally were carried out. This line is maintained in a generally good condition for handling its traffic, and the normal amount of maintenance work is all that is required. It is recommended that the defects mentioned in the description of the structures be remedied.

Respectfully,  
J. B. STODER,  
Steam Railroad Inspector.

## MARCELLUS AND OTISCO LAKE RAILWAY.

Inspected October 5, 1914. Last previous inspection October 20, 1913.

To the Public Service Commission, Second District:

I have inspected the Marcellus and Otisco Lake railway and submit the following report:

This railroad is a standard gauge single track line extending from a connection with the New York Central and Hudson River railroad at Martisco to Otisco Lake, a distance of 9.5 miles.

The line lies in the valley of a creek which forms the outlet of Otisco lake and crosses the stream at several places. Between Martisco and Marcellus a considerable part of the line is built along the steep side of the valley with heavy grades and very sharp curves. South of Marcellus the location is more favorable and the grades and curvature are moderate. On the sidehill location south of Martisco there are several cuts which have steep slopes and at these places there is considerable trouble from slides. On other parts of the line the cuts and fills are in good condition. The surface and alignment of the track are fair and suitable for the light traffic which is handled. There was a strong growth of weeds in the track at several places south of Marcellus. A considerable amount of weeding has been done, and it was stated that the work will be finished this season.

The track is laid with 70-lb. rail which is in good condition. The joint fastenings consist of 4-bolt angle-bars. The track ties are oak, chestnut, and yellow pine, the general condition of which is fair. Additional renewals are needed in a few places this season, especially on a curve near Martisco. It was stated that 2500 ties are available and that the renewals will be made. Split switches with both rigid and spring frogs are used and are in good condition. The track is lightly ballasted with gravel and cinders, and the cinder ballast is gradually extended as this material becomes available from the engine terminal.

The right of way is in fairly good condition and suitably fenced. The road crossings are in good condition but the signs are poor at several crossings. New signs are on hand and will be erected soon. The track force consists of about 8 men during the working season.

There are five steel girder bridges of one span each, all of them being in good condition. The other bridges are timber trestles or timber stringers on stone and concrete abutments. These also are in good condition excepting for a few minor defects as follows: No. 2 has a poor guard timber; No. 5, drift should be cleared away; cattle-pass north of Rose Hill has a poor block under the stringers. A large amount of work has been done in repairing and renewing the bridges which were damaged by a freshet last year. An old abutment was being removed at No. 11 at the time of the inspection. At No. 7, one new abutment has been built, and the other will be built next Spring. There are stations at Marcellus, Rose Hill, and Otisco Lake, the latter being used only in the summer season. These buildings are in good condition and are well suited to the traffic. This railroad handles only a light business, the freight traffic consisting of local merchandise and agricultural products. The stations are connected by telephone which is used for the issuing of train orders when they are needed. The facilities and the service are adequate for handling the existing traffic. The improvements made during the past year, besides the maintenance work on the track, include the following more important items: a new sidetrack to an evaporating plant at Marcellus; new decks have been placed on four bridges; several new bridge abutments have been built; a new I-beam bridge with a larger opening has been built at No. 11; a new station platform was built at Rose Hill. It is intended to do additional surfacing and weeding on the track and to make additional tie renewals this season; to complete the work at bridge No. 11; to build a new abutment next Spring at bridge No. 7; to erect five new crossing-signs.

The recommendations of the preceding report were carried out. It is recommended that the weeding of the track be completed; that additional tie renewals be made this season; that the defects of structures mentioned in this report be remedied.

Respectfully,

J. B. STODER,  
Steam Railroad Inspector.

## MIDDLEBURGH &amp; SCHOHARIE RAILROAD.

Inspected May 5, 1914. Last previous inspection May 19, 1913.  
To the Public Service Commission, Second District:

I have inspected the Middleburgh & Schoharie railroad and submit the following report.

This railroad connects with the Schoharie Valley railway at Schoharie and extends to Middleburgh, a distance of 5.33 miles.

The line lies in the valley of Schoharie creek but it is close to the creek only at one place. There has been some erosion of the bank at that point, and riprap is being put in for protection

against further scour. The grades and curvature on the line are moderate for a light railway. The cuts and fills are moderate in extent. The roadbed throughout is narrow but it serves to support a fair amount of ballast. Track ditches are provided for surface drainage, and quite generally they are in good condition. The surface and line of the track are fair and are suitable for the traffic conditions.

The rail consists of about one mile of 70-lb. rail and the remainder of 60-lb. rail. Part of the lighter rail is connected with flat fish plates, and some of the joints are considerably battered. Several short pieces of rail also were noticed in the track. There is some rail on hand and it is suggested that some of the most worn rails be replaced as soon as practicable. Some broken angle-bars were being replaced at the time of the inspection. The track ties are in good condition, excepting the usual proportion of renewals needed. Some new ties have been put in this season, and the rate of renewal appears to be satisfactory. The track appliances consist of both split and stub switches, rigid switch stands, and rigid frogs. Some of the frogs in Middleburgh yard show considerable wear but appear to be giving satisfactory service owing to the light traffic and slow train movements. This applies also to the stub switches in the same yard. The track is lightly ballasted with broken stone, cinders, and gravel. The right of way is clean and open, and fences are maintained where they are required. The road crossings are in good condition and properly equipped with signs. The track work is performed by a crew of about 6 men during the working season.

There are two small timber trestles both having short spans between the bents. The culverts comprise timber and rail stringers, stone boxes, and pipes. Some of the culverts are very small and apparently could be closed by opening suitable ditches along the track. The timber trestle at Schoharie has been reinforced by putting in additional stringers. There appears to be sufficient timber in this structure to carry the loads which pass over it, but the bents and stringers are cobbled up with many blocks and wedges. The whole structure should be overhauled in order properly to adapt it to moving loads. It is suggested that a single span of steel and concrete would not be very expensive and would secure a marked saving in future maintenance charges.

There is one station on this line, located at Middleburgh. It is in good condition and appears to afford ample facilities for the passenger traffic. A separate freight house is provided at that place. At two points where flag stops are made, small shelters are provided for the convenience of passengers.

There is only a light traffic on this line, and one train crew handles all of the trains. Through trains are operated over this line and the Schoharie Valley railway, and the engine terminal is located at Middleburgh. The turntable which was recommended in previous reports is now in service.

Two pipe culverts have been put in, replacing open culverts. The turntable at Middleburgh was completed during the past year and placed in service. Concrete ash pits were built in the enginehouse at Middleburgh. It is recommended that the timber trestle at Schoharie be rebuilt.

Respectfully,

J. B. STODER,  
Steam Railroad Inspector.

## MIDDLETOWN AND UNIONVILLE RAILROAD.

Inspected May 29, 1914. Last previous inspection July 7, 1913.  
To the Public Service Commission, Second District:

I have inspected the Middletown and Unionville railroad and submit the following report:

This is a single track standard gauge railroad extending in a southwesterly direction from a connection with the Erie railroad and the New York, Ontario and Western railway at Middletown to the New Jersey-New York state line near Unionville, a distance of 14.3 miles. The total length of all sidings and yard tracks is 3.07 miles. This railroad crosses a rolling country, and as it was built with comparatively light earthwork the grades conform to the general surface of the ground. The maximum grade is 2.33 per cent ascending westward and is located about 1.4 miles south of Middletown. This grade is short and considerably steeper than any of the other grades. The curvature is moderate, the maximum curve being about 5 degrees. The cuts and embankments are well formed and the ditches drain the roadbed. The alignment and surface of the tracks are generally good.

The tracks are laid with 12.4 miles of 70-lb. and 1.9 miles of 80-lb. open hearth rail joined with angle-bars of the 4- and 6-bolt types: the 80-lb. rail is new and in good condition; the 70-lb. rail is in some places badly worn. This was particularly noted south of milepost JC 81. The ties are oak, chestnut, and pine. The renewals since the last inspection amounted to 3500 ties, or about 9 per cent. This is sufficient for proper maintenance. It is proposed to make the renewals this season with about 1218 ties;

representing 3.2 per cent. This is not sufficient properly to maintain the tracks. While the poor ties are not bunched they are sufficient in number to impair the safety of the track if the renewals are insufficient. At least 3000 ties should be renewed this year to insure safe track and a proper maintenance of the railroad.

Both rigid and spring frogs are used, and they were generally in good condition. The switch stands are equipped with targets. The switch lamps have been abandoned except on the yard switches at Middletown. There are no night trains, hence the lamps are unnecessary. Many of the curves are tie-plated, and derails are provided on sidings where the grade conditions require them. The track appliances were generally well maintained. The track is well ballasted with a good grade of cinders. The right of way is cleared and well kept. The fences in several places were poor. It is expected to rebuild about 3 miles and patch about 2 miles of fence this season. The road crossings were well maintained. The railroad is divided into 2 sections, one 8.56 miles and the other 5.74 miles in length. The force per section during the working season consists of 12 men. This is sufficient properly to maintain the track.

The bridges supporting the track are 2 steel through truss bridges, 2 steel through plate girder bridges, 3 steel deck plate girder bridges, 2 wooden stringer bridges, 6 1-beam bridges, 14 concrete flat top culverts, 1 arch culvert, and 2 pipe culverts. They were, with the few exceptions noted below, in good condition. A criticism common to many of the bridges is that the metal guard-rails are not full spiked to the ties. It is the best practice to full spike these guards. Saprot on the decks of some of the bridges should be adzed off to prevent fire. The following defects were noted: bridge No. 60, the ties are in poor condition; bridge No. 86.77 is a through lattice steel truss of one span over the main line of the Erie railroad; the gas from the engines passing under this bridge has corroded the metal with which it comes in contact, especially so over the westbound Erie track: a new floor beam has replaced the one condemned in the previous inspection, but the bottom lateral braces in the fifth panel have not been replaced: these are 3 inch by 3 inch angles, and should be put in at once; the uncertain age of this bridge, at least 30 years, and the probability that it has in the past been subjected to loads heavier than that for which it was originally designed, together with the loss of sectional area of some of the members due to corrosion, are important factors which determine its fitness for continued use: the substitution of new members for those badly corroded would not benefit the other members that may be crystallized, and hence the expense involved does not seem to be warranted; economy and safety would be better secured by the substitution of a new structure, and it is therefore deemed desirable that a through plate girder bridge be installed; bridge No. 85.96 has poor guard stringers; bridge No. 82.57 has a poor tie and one poor piece of guard stringer; bridge No. 82.47, the saprot on ties should be adzed off; bridge No. 80.39, the guard-rails are not full spiked, and the saprot on the guard stringers should be adzed off; bridge No. 79.15 is a 1 span pony truss of light construction over which a speed of 15 miles per hour is enforced: the wing on the north abutment has failed, and this is to be replaced with a concrete wing-wall: the guard-rails should be full spiked to the ties; bridge No. 75.59 needs some new ties and guard stringers; bridge No. 73.68, the guard-rails should be full spiked to the ties, and the saprot on ties and guard stringers should be adzed off.

There are 4 frame station buildings in generally good condition which seem to provide ample facilities for the service performed. The Main Street station at Middletown of the New York, Ontario and Western railway is used jointly: the buildings were generally clean and orderly, and no structural defects were noted.

The service is performed by 1 engine and crew. Train movements are controlled by timetables, operating rules, and an occasional train order. There are no automatic or other signals and none is necessary.

Since the previous inspection the following improvements have been made: 0.44 mile of new 80-lb. rail has been laid, replacing 70-lb. rail; 3500 ties, or 9 per cent, were received; a new wye track has been constructed at Unionville for turning the engine. The improvements contemplated for this year include the following: a new freight house at Middletown; general repairs including two coats of paint to all buildings, bridges, and other structures; one earload of new rail to replace worn rail in track; the construction of a new interchange track at State Line; the reconstruction of about 3 miles and repairs to about 2 miles of right of way fence: the renewal of about 1218 ties.

It is recommended (1) that the tie renewals this year be not less than 3000; (2) that the metal guard-rails on bridges be full spiked to the ties; (3) that bridge No. 86.77 be replaced with a new steel bridge.

Respectfully,

W. G. HIMES,  
Inspector Division of Transportation.

#### MOUNT BEACON INCLINE RAILWAY.

Inspected May 7, 1914. Last previous inspection May 21, 1913.  
*To the Public Service Commission, Second District:*

I have inspected the Mount Beacon Incline railway and submit the following report:

This railroad is located in Dutchess county, extending from the base of Mt. Beacon in the city of Beacon to the summit of the mountain, a distance of 2200 feet. The gauge of the track is 3 feet, and there is no track connection with any other railroad.

The total rise of the line is about 1200 feet. The steepest grade is near the top of the mountain where the rate of ascent is about 72 per cent. Very little grading was required in building the line. There is one rock fill about 7 feet high which replaces a former trestle. There is one curve of long radius near the middle of the line.

The track ties are 6 inches by 6 inches, spaced 2 feet apart, and are carried on timber stringers which in turn rest on mudsills. On each side of the track a guard timber 6 inches by 8 inches is bolted on top of the ties. Spacing blocks are placed on top of the stringers between the ties to prevent the ties from slipping down the incline. The rail is a 35-lb. section and in good condition. The anchor straps which were recommended in last year's report have not yet been applied, and it was stated that no trouble has been experienced from the rail creeping down hill. The rail joints are tight however, and with this condition there necessarily is a tendency for the rail to buckle in hot weather. The anchors should be put on in order to hold expansion spaces at the rail joints. A few poor ties and pieces of guard timber were found which should be replaced this season. Preparations for these repairs were being made at the time of the inspection. The surface and line of the track are fair to good. The timber structure has been partly filled with loose stone ballast in compliance with a recommendation made in former reports concerning ballasting. It is evident however that the intent of that recommendation was that the mudsills should be firmly ballasted in order to preserve a good surface and alignment of the track. It is not necessary that the stringers should be covered with ballast.

There are 2 cars on this line, each having a seating capacity of 54 passengers. The cars are attached to the two ends of a cable which is driven by two 75 horse-power electric motors in the head house at the summit. The cable, which is 1½ inches in diameter, has been in use two seasons and is in good condition. One car ascends the incline as the other descends, there being a passing track at the middle point. The passing of the cars is made automatic by having double flanged wheels on the easterly side of one car and the westerly side of the other car, while the opposite wheels have an 8-inch tread without a flange. The flanged wheels follow a continuous rail through the turnout, and the other wheels readily cross the openings in the opposite rail. A telephone is provided for communication between the lower station and the head house, and there are safety devices for holding the cars in the event of any accident to the hoisting machinery or cable. On each car there is a pole with a copper crossarm with which a short circuit can be made between two cables overhead, thus stopping the motors. Each car also has a clutch which is controlled by a centrifugal governor. The normal speed of the cars is 500 feet per minute, but if a speed of about 650 feet per minute is reached, the clutch is sprung and engages one of the guard timbers on the track. This clutch also may be operated by a person on the car. A hand-brake is provided on the main driving drum which also will stop the machinery if too high a speed is attained, this brake being controlled both automatically and by the operator. Electric limit stops are provided on the track by which the cars are automatically brought to a gradual stop at the upper and lower stations. It was stated that all of the safety devices are frequently tested. The line is operated only during the summer season, starting about May 30th each Spring and closing in the month of September.

Referring to the recommendations of the last previous report the following conditions were observed: the line and surface of the track apparently have been improved; anchor straps have not yet been applied to the rails; considerable progress has been made in ballasting the track structure. It is recommended that the necessary repairs to the timber parts of the structure be made as early as practicable this season; that anchor straps be applied to the rails as previously recommended.

Respectfully,

J. B. STODER,  
Steam Railroad Inspector.

#### NEWARK AND MARION RAILWAY.

Inspected June 17, 1914. Last previous inspection June 6, 1913.

*To the Public Service Commission, Second District:*

I have inspected the Newark and Marion railway and submit the following report: This is a single track standard gauge

railway extending from a connection with the Northern Central railway at Newark to Marion, a distance of 8.19 miles. There is also a connection with the New York Central and Hudson River railroad at Newark. The trains are operated over the tracks of the Northern Central railway for a short distance and joint use is made of the Newark station of the Northern Central railway. The sidings have a total length of 0.86 of a mile.

It follows the general surface of the ground, and the cuts and embankments are moderate. The approaches to the bridge over the New York Central and Hudson River railroad are the only high embankments. They have a good cross-section, and the cuts are generally wide enough to provide ditches for proper drainage. The ditches were usually opened, but in the cut south of Marion they should be cleaned. The track here was wet, and the ditches full. The grades are rolling and the maximum is 3.5 per cent for about  $\frac{3}{4}$  mile in Newark. The curvature is moderate, the maximum being 5 degrees. The track alignment and surface are fair.

The track is laid with 70-lb. Bessemer steel rails, 60 feet in length. They are in good condition and no defects were noted. The splices are 4-bolt continuous rail and Atlas joints. The ties are principally chestnut. The renewals since the previous inspection were 2500 chestnut ties. These constitute the quota of ties for this season and they are all in track. This is a renewal of about 11 per cent of all the ties in track and is sufficient for proper maintenance. Spring frogs and point switches are used. The switch stands are of the rigid type equipped with targets. The ballast is gravel of only fair quality, although usually sufficient in amount. The track is overgrown with grass and weeds in many places. The right of way is cleared and mowing was in progress at the time of the inspection. The fences are well maintained, and the road crossings and signs are in generally good condition. The signs at the highway crossings are of the small metal type and are not very conspicuous. It is suggested that a few of these signs be replaced each year with large signs similar to those in use on the New York Central and Hudson River railroad. The track is maintained by a working force of 8 men: this is sufficient for proper maintenance.

There are 2 openings spanned by steel bridges. The first is a 1 span through riveted pony truss on concrete abutments spanning Ganargua creek, and the other is a 1 span through riveted truss and 1 deck plate girder spanning the New York Central and Hudson River railroad with 11 spans of steel viaduct on the south approach. These bridges are in good condition. The only defect observed was that a few of the ties on the south end of the viaduct have saprot which should be adzed off to prevent fire.

There is one frame station building. It is at Marion and seems to provide ample facilities for the business. It is clean, orderly, and well kept.

There are no grade crossings with other steam or electric railroads.

The train movements are controlled by timetable and operating rules. One engine and crew perform the service. Three mixed passenger and freight trains are operated in each direction daily. The traffic is light in both passenger and freight. The latter is principally farm produce and canned goods from the canning factory at Marion. Terminal facilities are provided at Marion. The speed of the trains is restricted to 15 miles per hour.

There have been no improvements since the previous inspection. The tie renewals authorized for this year were 2500, and they have been made. There are no improvements contemplated, but it is expected to make the ordinary track repairs as required.

This railroad is being maintained in a satisfactory manner for the service performed. It is suggested that the general condition of the track would be improved by re-ballasting with a good grade of gravel or cinders. This could be done in amounts divided over several years so that the expense would not be too great in any one year. This would certainly reduce the maintenance expense by prolonging the life of the ties and would prevent damage to the rail from low joints. It is recommended that the saprot be adzed off the ties on the viaduct, and that the ditches in the cut south of Marion be cleaned.

Respectfully,

W. G. HIMES,  
Inspector Division of Transportation.

#### NEW YORK AND OTTAWA RAILWAY.

Inspected May 25, 1914. Last previous inspection August 4, 1913.

To the Public Service Commission, Second District:

I have inspected that part of the New York and Ottawa railway which lies within the State of New York and submit the following report:

This railroad has a single track of standard gauge extending from Tupper lake to the International boundary at the St. Law-

rence river, near the station of Nyando, a distance of 69.6 miles. There are track connections at Tupper Lake with the New York Central and Hudson River railroad, at Moira with the Rutland railroad, and at Helena with the United States and Canada railroad, a subsidiary of the Grand Trunk System.

The southern part of this line lies in the Adirondack mountains and has numerous heavy grades and sharp curves. In the vicinity of Santa Clara the line leaves the mountain region and extends across the rolling valley of the St. Lawrence river. The cuts and fills are moderate in extent. In some places the cross-section is too narrow to provide good drainage and form a good roadbed. Many shims were found in the track and these should be removed as soon as practicable. It is suggested that a moderate amount of tile drainage installed each season would materially lessen the amount of track labor required during the winter season. The surface and alignment of the track are fair to good throughout.

The rail consists of 18 miles of 80-lb. relayer rail, and the remainder is divided among 65-lb., 67-lb., and 70-lb. sections. The heavier rail is in good condition. Some of the lighter rail is considerably battered at the joints but serves fairly well for the traffic which is borne. A defective rail was found just north of St. Regis Falls station, and another rail, apparently defective, was observed on a curve north of section post 12-13. The ties consist of native timbers with cedar predominating. It is stated that a renewal of about 21 per cent was made during the past year, and it is proposed to renew about 16 per cent of the ties in the current year. About 50,000 tie-plates have been applied and when this year's renewal is completed the track timber should be in good condition.

The track is ballasted chiefly with sand, with small amounts of gravel and cinders used in a few places. These materials are easily worked by the track forces and form a suitable ballast for a light railway. The track appliances consist of split switches, rigid and spring frogs, and both rigid and automatic switch stands equipped with targets and lamps. Derails are provided in a number of places where they are required. The right of way is open and well kept and is properly fenced where necessary. The road crossings are in good condition and are equipped with standard signs. The track sections have an average length of 6 miles with an average force of about 6 men per section. This amount of labor is sufficient for maintaining the track under the existing conditions.

The bridge structures consist of 4 truss bridges, 4 plate girders, and a number of timber trestles of various sizes. The bridges quite generally are in good condition, recent repairs having been made on many of the timber trestles. Painting of the steel bridges was in progress at the time of the inspection. No. 100 A has 2 soft sills, and at bridges Nos. 81 B, 85 A, and 106 A the guard-rails are not securely spiked. The embankments are very narrow at the ends of bridges Nos. 81 B and 106 A.

The stations, which are all of frame construction, are in fair to good condition and apparently are suitable for the traffic. A name sign should be placed on the station at Nyando. Joint use is made of the New York Central station at Tupper Lake Junction, of the Rutland railroad station at Moira, and of the United States and Canada railroad station at Helena.

At Helena, 1 track is crossed by 1 track of the United States and Canada railroad, protected by mechanical interlocking: the south distant signal was not in good adjustment on the day of the inspection. At Moira, 1 track is crossed by 1 main track and 1 siding of the Rutland railroad: the crossing is effected by means of junction switches and a crossover, and is protected by a ball signal on a high mast. At Tupper Lake Junction, 1 track is crossed by 1 track of the New York Central and Hudson River railroad, protected by interlocking semaphores placed close to the crossing. At Meno, 1 track is crossed by 1 industrial track of the Brooklyn Cooperage Company, protected by manually operated semaphores.

There is a moderate traffic on this road north of Moira, but south of that point the traffic is light. Train movements are controlled by the timetable schedules, telegraphic train orders, and the standard operating rules. This arrangement appears to be satisfactory for the number of trains which are handled at present. The facilities at the terminals and at the several stations are sufficient for the existing traffic. The telegraph wires are too close to the track on a curve between mileposts 086 and 088. One wire brushed the coach of the inspection train and might cause an accident to a man riding on the side or top of a box car.

The following improvements have been made during the past year: 6 miles of 56-lb. rail and 3 miles of 67-lb. rail have been replaced by 70-lb. relayer rail; bridge No. 85 A, formerly a Howe truss timber, has been replaced by a steel truss; the station at Nyando was enlarged, and a new station was built at Ironton; about 50,000 tie-plates were applied to the track. The only important improvement contemplated in the near future is the

replacement of timber with a steel structure at bridge No. 81 B. It is recommended that the defects of track and structures mentioned in the body of this report be remedied.

Respectfully,

J. B. STODER,  
Steam Railroad Inspector.

#### NEW YORK AND PENNSYLVANIA RAILWAY.

Inspected June 4, 1914. Last previous inspection June 17, 1913.

*To the Public Service Commission, Second District:*

I have inspected the New York and Pennsylvania railroad within this State and submit the following report:

This is a single track standard gauge railway extending in a southwesterly direction from a connection with the Susquehanna division of the Erie railroad at Canisteo to the New York-Pennsylvania state line near Genesee, Penna., a distance of 27.7 miles. It reenters the State near Ceres where it connects with the Pittsburgh, Shawmut and Northern railroad. The length of line here is about 0.18 mile. The sidings have a total length of 4.80 miles.

The grades and curvature are moderate for a railway of its class. The maximum grade is 1 per cent ascending southward, and the maximum curve is 6 degrees. The cuts and embankments have a narrow cross-section, and the ditches in many of the cuts are maintained with difficulty due to the earth and loose rock on the sides sliding down and filling them. The embankments along the creek are subject to the action of the current in high water, and considerable trouble is experienced at times from this. Riprap has been applied to the exposed embankments, and they were in fair condition at the time of the inspection. The ditches in the cut between bridges Nos. 28 and 29 should be cleaned out. The embankment along the creek near bridge No. 11 is narrow and should be filled promptly. The alignment and surface are from poor to good. The principal cause of this is the inferior ballast. The rail is surface kinked and bent making it hard to maintain a good line or surface. Where cinder ballast has been applied recently it is good.

The track is laid with 65- and 70-lb. Bessemer rails joined with angle-bar splices. The rail was generally in good condition except that it is surface kinked and bent. A split end rail on the east side of the track between bridges Nos. 44 and 45 should be replaced promptly. The ties are yellow pine, chestnut, and white oak. The renewals since the previous inspection amounted to 7326 ties, or about 10 per cent of the total ties in track. It is expected to renew about 10 per cent of the ties this season. This is sufficient for proper maintenance, but this season's renewals should be made as promptly as possible. The ties were particularly poor south of bridge No. 72, between bridges Nos. 67 and 68, 62 and 64, and 59 and 61. Rigid and spring frogs and split rail type switchers are used. The switch stands are of the rigid type equipped with targets. The broken frog near bridge No. 3 at Canisteo should be replaced at once. The ballast is dirt, gravel, and cinders. The dirt and gravel are of inferior quality and in many places not sufficient in amount. Where this ballast is used the track is full of weeds and grass. The cinder ballast is of good quality; engine cinders obtained from the Erie railroad; a considerable quantity has been distributed for ballasting, and at the points where they have been put under, the track is in good condition. It is expected to continue this as fast as the cinders are received. The re-ballasting should be continued with as little delay as possible. The lack of proper ballast is the principal cause for the present track condition. The season's track work has been delayed, due it is said to the late Spring and hard Winter. The track was very rough in places, and indications of spreading were evident. This was due to the poor surface of the track through the swamp land and particularly between bridges Nos. 52 and 54. This should have attention at once. The right of way is cleared, and the fences and road crossings are in fair to good condition. The signs at many of the highway crossings are dingy and should be painted. The sections have an average length of 7 miles, and the working force consists of 1 foreman and 5 men. This is hardly sufficient for maintenance of a high standard, but it should be sufficient to maintain the track in safe condition for the service performed.

The bridges in number and kind are as follows: 66 frame bent and pile trestles, 10 rail stringer bridges, 2 I-beam bridges, 1 wooden stringer bridge, 1 timber Howe truss. While the bridges are nearly all timber and a heavy item of maintenance expense they were generally in good condition. Several of the long timber trestles have spans of 24 to 30 feet with timber stringers trussed with steel rods. The maintenance of these spans in timber is certainly false economy. Their replacement in concrete piers and I-beams or with girders would make the structures permanent and reduce the annual maintenance cost. The majority of the bridges have timber abutments which in many cases need exten-

sive repairs. Where the track has been raised on the approaches to some of the bridges, the stringers have been blocked on the eaps so that there is no support to the tops of the bents and the back walls. Many such bents have been shoved out of plumb. This is a dangerous practice and liable to result in the failure of an abutment. The rail stringer bridges are from 4 to 6 feet in clear span and have usually three 60-lb. rails under each track rail. This is not enough. The 6-foot openings should have at least 5 rails under each track rail, and the 5-foot openings should have not less than 4. It is expected to replace bridges Nos. 51, 41, 34, 74, and 75 with eastiron pipe. Bridge No. 22 has been filled, and it is expected to fill bridges Nos. 6 and 11 and 2 spans each of bridges Nos. 27 and 5. The minor defects noted in the bridges are as follows: bridges Nos. 83 and 67 have timber back walls out of plumb, which should be straightened and braced; bridge No. 75 has one poor bent; bridge No. 69 needs a new eap on north abutment; bridges Nos. 66, 61, and 57, the channel is obstructed and should be cleaned; bridge No. 65 needs 2 caps, 2 ties, and 2 pieces of guard stringers; bridges Nos. 62 and 60 need new ties and guard stringers; bridges Nos. 59 and 33 need some new ties; bridge No. 58 needs a new eap and eorrels; bridges Nos. 57, 56, 55, and 3 are to be replaced with I-beam stringers: this should be done promptly; bridge No. 54, the track is loose on the approaches and should be tamped solid; bridges Nos. 53 and 50 need new back walls and guard stringers; bridge No. 49 needs new guard stringers; bridges Nos. 43, 29, 24, and 19 need new back walls; bridge No. 39 needs 2 eaps and several ties; bridge No. 34 is to be replaced with pipe; the pipe is in place, and the opening should be filled at once; bridge No. 27 has 2 spans on the south end which are to be filled: this should be done at once; bridge No. 18 needs new back walls and posts; bridge No. 17 needs new stringers; bridge No. 15 needs 4 posts in north abutment; bridges Nos. 11 and 6 are to be filled; they are in poor condition and should be filled at once; bridge No. 5 has two spans on the south end which are to be filled: they are in need of extensive repairs and should be filled at once, and several new ties are required on the balance of the bridge; bridge No. 2 should have the rubbish and drift cleared away.

There are 6 frame stations in generally fair condition. The passenger and freight traffic is light, and the accommodations provided seem to meet the demands of the traffic.

There are no grade crossings with other steam or electric railroads.

The traffic consists of farming produce and the output from several oil wells near the south end of the line and factories at Canisteo. The passenger traffic is light and entirely local. Train movements are controlled by timetables, operating rules, and train orders. There are no automatic block or other signals and none is necessary.

Since the previous inspection the following improvements have been made: 102 relayer 70-lb. rails have replaced a like amount of 60-lb. rail; 7326 cross-ties, or 10 per cent, have been renewed; 125 cars of cinders have been used for re-ballasting; repairs have been made to 23 bridges. There have been no extensive improvements authorized for this season. It is expected to renew about 10 per cent of the cross-ties and make the necessary bridge repairs. The ballasting will be continued as fast as cinders are available.

It is recommended (1) that the poor track in the swamp between bridges Nos. 52 and 54 be given immediate attention; (2) that the re-ballasting be continued as rapidly as possible; (3) that the broken frog at Canisteo be replaced at once; (4) that the season's tie renewals be made as promptly as possible; (5) that the bridge openings to be filled or replaced with pipe be given immediate attention; (6) that the other defects in bridges noted in the body of the report be given immediate attention.

Respectfully,

W. G. HIMES,  
Inspector Division of Transportation.

#### NEW YORK CENTRAL AND HUDSON RIVER RAILROAD.

Inspected August 24 to September 16 inclusive; October 5, 6, 8, 9, and 23, 1914. Last previous inspection, September 8 to October 10, 1913.

*To the Public Service Commission, Second District:*

I have inspected the lines operated by The New York Central and Hudson River Railroad Company within the Second Public Service Commission District of the State of New York, and submit the following report:

This is a trunk line railroad extending from New York city to Buffalo, with numerous branches. The operating divisions with the mileage of main line and branches are as follows:

#### Electric Division

	Miles
New York City line near Yonkers to Croton	21.47
New York City line near Mt. Vernon to North White Plains	11.82

From the city line near Yonkers to Croton it is four tracked, and there are 2.54 miles of fifth track, 0.59 mile of sixth track, and 53.2 miles of sidings. The New York and Harlem River railroad is double tracked, and there are 20.93 miles of sidings.

*Harlem Division*

	Miles
North White Plains to Chatham.....	102.93
Lake Mahopac branch, Goldens Bridge to Lake Mahopac.....	7.22

There are 30.33 miles of second track and 51.13 miles of sidings between North White Plains and Chatham. The Lake Mahopac branch is single tracked, and has 2.19 miles of sidings.

*Putnam Division*

	Miles
New York City line to Putnam Junction.....	47.55
Yonkers branch, New York City line to Yonkers.....	1.69
Mahopac Falls branch, Baldwin Place to Mahopac Falls.....	2.05

The main line has 3.61 miles of second track and 16.35 miles of sidings; the Yonkers branch is double tracked, and has 0.16 miles of sidings; and the Mahopac Falls branch is single tracked, and has 0.26 miles of sidings.

*Hudson Division*

Croton to Rensselaer.....	106.29 miles
---------------------------	--------------

This is double tracked. There are also 33.99 miles of third, and 30.94 miles of fourth track, and 67.75 miles of sidings.

*River Division*

	Miles
West Shore R.R., Tappan to Ravena.....	111.17
Wallkill Valley R.R., Kingston to Montgomery.....	32.88
Rockland Lake branch, Congers to Rockland Lake.....	1.17
Albany branch, Ravena to Kenwood Jet.....	11.55
The West Shore railroad is double tracked, and there are 103.90 miles of sidings. The branches are single tracked, and have a total of 10.45 miles of sidings.	

*Mohawk Division*

	Miles
Rensselaer to Minoa.....	140.13
Troy and Greenbush branch, Rensselaer to Troy.....	5.56
Troy and Schenectady branch, Troy to Schenectady.....	20.91
Tivoli Hollow R.R., West Albany to Albany.....	1.24
West Shore R.R., Ravena to Syracuse.....	145.42
Adirondack branch, Herkimer to Division line.....	0.19
Hoffmans connection, Hoffmans to Rotterdam Jet.....	2.50
Schenectady detour, Carman to South Schenectady.....	4.65

The main line is four tracked, and there are 8.27 miles of fifth track and 330.09 miles of sidings. The Troy and Greenbush branch, Hoffmans connection, and the Schenectady detour are double tracked, and have 13.13 miles of sidings. The West Shore railroad is double tracked, and has 15.36 miles of third track and 81.98 miles of sidings. The other branches are single tracked, and have a total of 14.61 miles of sidings.

*Western and Buffalo Divisions*

	Miles
Minoa to Buffalo.....	157.65
Attica branch, Batavia to Attica.....	10.67
Tonawanda branch, at Batavia and Getzville to North Tonawanda.....	6.13
Niagara branch, Buffalo to Lewiston.....	28.86
Buffalo Belt branch, William St. to North Buffalo.....	7.22
Canandaigua branch, at Batavia.....	0.28
Falls branch, at Ames St. Jet., Rochester, and at Suspension Bridge.....	1.48
Lockport branch, North Tonawanda to Lockport Jet.....	11.15
Syracuse Jet. R.R., East Syracuse to Syracuse Jet.....	8.31
Auburn branch, at Syracuse and at Brighton.....	0.03
Lyons branch, at Lyons.....	0.35
Chenango branch, Syracuse to Earlville.....	42.70
West Shore R.R., Eastwood to Buffalo.....	148.25
Terminal Ity., Bridge 751 to West Seneca.....	11.33
Watertown branch, at Syracuse.....	0.13

The main line is four tracked for 150.18 miles, and has 0.58 miles of fifth track. The Buffalo Belt, Falls branch, Syracuse Junction railroad, West Shore railroad, and Terminal railway, 23.09 miles of the Niagara branch, and 1.66 miles of the Tonawanda branch, are double tracked. The balance is single tracked. There are 6.27 miles of third track on the Syracuse Junction railroad. The total length of all sidings is 762.15 miles.

*Rochester Division*

	Miles
Tonawanda branch, Batavia to Getzville.....	29.31
Canandaigua branch, Canandaigua to Batavia.....	50.08
Falls branch, Rochester to Sugar St. yard.....	72.57
Charlotte branch, Rochester to Ontario Beach.....	7.43
Auburn branch, Syracuse Jet. to Brighton.....	96.26
Lockport branch, Lockport Jet.....	0.02
Rochester freight yard 5th track (main line).....	0.64
Lyons branch at Geneva.....	0.02
Geneva, Corning and Southern R.R. at Geneva.....	0.02
